Your country was ruled by the CCCP (USSR) for many years. Ask Vaira
Vike-Freiberga to invite the Russians back for an informal cup of tea and
have them stay awhile. Sound pleasant to you?

Unless you have lived here for awhile, I doubt you know enough about the US
to judge whether or not the average citizen feels they live under a "police
state". I would not pay too much attention to sensationalist news broadcasts
or newsgroup posts to dictate your views of the "average American citizen".

It should be of interesting note to know that posts , nearly
identical to this original post by " supposed " journalists ..were
commonly seen on the cellular hacking NGs back in the 92 - 94 era.

they were fairly common and numerous. turned out they were most
often made by FBI personnel (+ possibly other government
agencies) and initially the information made it's way into reports
used by the government and private manufactures to craft / draft
the super strict killer FCC EE3 cellular legislation and resultant
rule making. this rule making basically resulted in the death of
all USA cellular hacking and was used in most of the
anti-eavesdropping legislation too. it was claimed , in
about '94 , that the same information gained was used by the feds to
prosecute a number of people that supplied information to the
posters of the requests. people thought they were protected by
confidential reporter acts , when in reality they were actually
inter reacting directly with federal law enforcement people and THOSE
people are NOT required , by law , to be truthful with you. lieing
such as claiming to be journalists is not illegal for law enforcement
operatives.

interesting , slightly different in these posts is that the person is
seeking information strictly on (illegal) eavesdropping and
not the so called " hacking " like posts of the earlier era.
this , probably because " they " know that basic cellular
hacking is dead and that only " eavesdropping " could remain.

dunno what anyone , even law enforcement people , could expect to gain
by this old ploy / exploit , anymore. cellular hacking is dead and
analog cellular eavesdropping is experiencing the death rattle.
still .... it's good to remember the historic relationships and
keep that in mind , nowadays. might also be some homeland
defense people with too much time on their hands too.

The Yaseu VX-5R is a tri-band for about $200
The Icom IC-T90A is a tri-band for about $250
They both have wind band receive, the Icom will receive .495 - 999 MHz

Hi Fred,

I assume you only want to use extended receive, and not to transmit on police and fire bands. You may or may not know that many dual band rigs already receive extended coverage out of the box. Look at the fine print, and save a few bucks.

All the best, and 73,
Dave

LARDASS Lloyd Davies aka "Arf! Arf!" <DoggieDaze@Liberalz.com>
blathered in message news:<c9ethe$617$0@pita.alt.net>...
> "<more lies>

Here's the letter, dumbfuck, word for word, do see if you canb spot
the reason for the retest, beside the FCC perogative for doing so. And
note, too, that the retest was PASSED, and later the license was
upgraded. Something you haven't been able to do in over 10 years. You
couldn't pass the Technician license exam TODAY if you had to.

July 11, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47 C.F.R.
Section 97.519(d)(2), the Commission has the authority to
re-administer any
examination element previously administered by Volunteer Examiners
(VE's).
The Commission may either administer the examination itself, or under
the
supervision of a Volunteer Examiner Coordinator (VEC) or VE designated
by
the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur
Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an
American Radio Relay League Volunteer Examiner Coordinator. This
examination
must be completed on or before September 11, 2000. The required code
speed
that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present a
photo
identification. Pursuant to Commission rules, your license will be
cancelled
if you do not appear for re-examination. You will be granted an
Amateur
Radio license consistent with the elements you pass upon
re-examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

<blah blah blah>

"Overwhelming evidence," dumbass?

> This topic has been addressed many times before and each and every time it
> is brought forth, Roger spins his usual. He will challenge the poster to
> show where he was retested for having violated any FCC rules or regs. Yet
> the evidence is clearly there for all to see. No, he was not chosen at
> "random" as he likes to claim.

See the above letter. Where does it say WHY other than the FCC's
perogative was the reason for the retest, fatass?

> Yes, the FCC CAN ask any Ham licensee who was
> licensed under the VEC program to retest, but when was the last time you
> heard of that happening?

Go to the ARRL web site, dumbass and to the FCC enforcement logs, they
go back to 1999, there are quite a number of retests and canellations
because some didn't show up to retest. Or can't you even read?

>Hollingsworth simply has too much to concern
> himself with and the idiotic claim that they "randomly" chose Wiseman for a
> retest is laughable at best.

I'll bet he'll be interested once he reads your kiddie porn ad.

> The excerpts concerning the Wiseman debacle are easily found via several
> sources. The ARRL site is one such example. A Google search will yield each
> and every letter of warning for Malicious Interference by Wiseman...it takes
> only a few minutes to find.

That's because there is only ONE letter, shit for brains. And it
"alledges" interference, which doesn't prove a thing. Then there of
course, it the preemptive letter which your buddy Gopher face recieved
also.
Didn't LRod explain this to you before? Or are you just too fucking
stupid for it to have soaked in your empty, Evinrude motor cover

shaped skull the first time?

> but the bottom line is that he was forced to
> retest not randomly, but because Riley Hollingsworth was willing to rescind
> his Ham License if he failed to comply.

Why didn't he say so in the letter? Nowhere does it say any license
would be recinded. Hollingsworth would have no qualms to put that in
the letter if it were so. Looks like you are blathering out of your
ignorant fat ass again.

>[flush more of mentally ill retard Davies' blatherings]

Poor mentally ill retard Lardass Lloyd Davies. He'll soon be back in
the funny farm. He's tried suicide before, you know.

Hello
I still have the problem with my IC-706MKII in LSB mode:
On all bands,I hardly get half output power on LSB, while on the
contrary ,
I get all available output power on USB.
About the modulation: the lower frequencies of my
voice are cut off, which produces bad modulation.
On recieve:
On LSB,the signal level is not as strong as on USB,
and some frequency components of the audio are
cut off;
the same symptoms appear when recieving Brodcast stations
(AM) on LSB.
Fortunatly,I can fix this annoying problem by rotating the IF shift
knob counterclockwise(about +800 or 1000HZ), so the the recieved
signal's level geos better
along with the audio quality.
So 1- I am looking for a way to fix this problem while transmitting.
I dont know if the LSB's BFO is off frequency, or
that the FI4 filter (which select the wanted SSB) is not realy
centered on 9.011.5 MHZ.
IF the first assumption is true , is there any way to change the
BFO frequency while
transmitting on LSB?
Yes, there is a menu in setup configuration (Q4) where one can
shift
carrier frequency (BFO) by +- 200Hz. But this is not enough.
2-
The Service Manual states the following:

****
IF SHIFT CIRCUIT:
==========
" The IF shift circuit shifts the center frequency of IF signals to
electronically shift the center frequency.
The IF shift circuit shifts the 1st LO and BFO within ï¿½1.2 kHz
in SSB/CW/RTTY modes or ï¿½250 Hz in CW-N/RTTY-N
modes. As a result, the 2nd IF (also 1st IF) is shifted from
the center frequency of the 2nd IF filter (FI4, FI5 or
optional IF filters). This means 2nd IF signals do not pass
through the center of the 2nd IF filter. Therefore, the higher
or lower frequency components of the IF are cut out. Since
the BFO frequency is also shifted the same value as the 1st

IF, frequency is corrected at the detector.
In the IC-706MKII, the 1st LO frequency is shifted to change the 2nd IF because a fixed 2nd LO frequency (60 MHz) is used. The 1st IF filter (FI1) and crystal filter (FI3) have 15 kHz pass-band widths, and do not affect IF shift operation.
....

BALANCED MODULATOR:
==========
Microphone signals from the AF selector switch (IC23) are applied to the balanced modulator (IC17, pin 6). The BFO signal from the PLL unit is applied to IC17 (pin 8) as a carrier signal.
IC17 is a double balanced mixer IC and outputs a double side band (DSB) signal with ï¿½40 dB of carrier suppression. R191 and R193 adjust the balanced level of IC1041 for maximum carrier suppression. The resulting signal passes through a 9 MHz IF filter (FI4 in SSB/CW/RTTY modes) to suppress unwanted side-band signals.
....

3-3-3 2ND LO AND REFERENCE OSCILLATOR CIRCUITS:
==========
The reference oscillator (X1, Q14) generates a 30.0 MHz frequency used for the 1st LO and BFO circuits as a system clock and for the 2nd LO signal.
....

3-3-4 BFO CIRCUIT:
==========
The DDS IC (IC12) generates a 10-bit digital signal. The signal is converted into an analog wave signal at the D/A converter (R116ï¿½R135). The analog wave is passed through the high-pass filter and low-pass filter. The 9 MHz BFO signal is then applied to the MAIN board via the "BFO" signal line
....

BFO FREQUENCY:
==========
RX BFO/3rd LO
TX BFO/FM PLL ref.
frequency [MHz]
frequency [MHz]
==========
==========

USB 9.0130
9.0130
LSB 9.0100
9.0100

CW 9.0106
9.0106
(ï¿½CW pitch frequency)
(ï¿½CW pitch frequency)

RTTY 9.008375 (2125 Hz tone)
9.0105 (MARK)
9.008885 (1615 Hz tone)

AM No output
9.0100

FM 9.4665 (3rd LO)
9.0115 (PLL ref.)
FM nar. 9.4650 (3rd LO)
9.0100 (PLL ref.)

I think the first is true - the LSB BFO is off-frequency. If the filter
was not really centered on 9011.5 then USB would have problems too.

I think you have a broken crystal. (I don't have a 706 so I can't tell
you *which* crystal) I don't think any alignment problem can cause it
to be that far off-frequency.

title 47, Code of Federal Regulations, or any other part of
that title) for any scanning receiver that is capable of--

`(A) receiving transmissions in the frequencies allocated to
the domestic cellular radio telecommunications service,

`(B) readily being altered by the user to receive transmissions
in such frequencies, or

`(C) being equipped with decoders that convert digital cellular
transmissions to analog voice audio.

US CODE COLLECTION
TITLE 47 > CHAPTER 5 > SUBCHAPTER III > Part I > Sec. 302a.
Sec. 302a. - Devices which interfere with radio reception

(d) Cellular telecommunications receivers

(1) Within 180 days after October 28, 1992, the Commission shall prescribe and make effective regulations denying equipment authorization (under part 15 of title 47, Code of Federal Regulations, or any other part of that title) for any scanning receiver that is capable of -

(A) receiving transmissions in the frequencies allocated to the domestic cellular radio telecommunications service,

(B) readily being altered by the user to receive transmissions in such frequencies, or

(C) being equipped with decoders that convert digital cellular transmissions to analog voice audio.

[CITE: 47/302a] http://www4.law.cornell.edu/uscode/47/302a.html
--

FCC Rules: PART 15--RADIO FREQUENCY DEVICES--
Subpart B--Unintentional Radiators

Sec. 15.121 Scanning receivers and frequency converters used with scanning receivers.

(a) Except as provided in paragraph (c) of this section, scanning receivers and frequency converters designed or marketed for use with scanning receivers, shall:

(1) Be incapable of operating (tuning), or readily being altered by the user to operate, within the frequency bands allocated to the Cellular Radiotelephone Service in part 22 of this chapter (cellular telephone bands).

[CITE: 47CFR22.905] http://tinyurl.com/3ygxp
--

Scanning receivers capable of ``readily being altered by the user'' include, but are not limited to, those for which the ability to receive transmissions in the cellular telephone bands can be added by clipping the leads of, or installing, a simple component such as a diode, resistor or jumper wire; replacing a plug-in semiconductor chip; or programming a semiconductor chip using special access codes or an external device, such as a personal computer.

Scanning receivers, and frequency converters designed for use with scanning receivers, also shall be incapable of converting digital cellular communication transmissions to analog voice audio. (continued)

What I would do first is a filter calibration. It's possible this will
fix your problem if you are lucky.
#1 You will need to enter the adjustment set mode. To do so, turn off
the radio.
Stick a dummy 3.5 mm "same size as headphone jack" plug into the
remote jack in the rear of the radio. "center pin is connected to
ground". Then, push the two left buttons, "p.amp/att" and "tuner/call"
in at the same time. While these two buttons are pressed at the same
time, turn on the power switch. The radio should crank up in the "set"
mode. Then, push F3 "TX" to enter the transmit set mode. Push up/down,
or maybe also the tuning or memory knob, to scroll through the
settings until you get to filter calibration. The display should show,
"GO FILTER CAL" when you get to the right one.
Have the radio connected to a dummy load, or matched antenna.
Push and hold menu "GO" to start the calibration. The radio will
transmit for a few seconds while it is calibrating the filters. It's
all automatic. This *should* cure your lopsided filter/carrier
oscillator problem. BTW, I don't know if it has any effect, but I
would re-center the IF shift to neutral before doing this adjustment.
When done, push F1 to exit the setup menu. It may turn the radio off,
but I forgot...If not, turn the radio off, take out the dummy plug,
and turn the radio back on normally. If you are lucky, it will be

fixed. I've done this on mine when I noticed the filters were getting a little lopsided. When the filter setup is correct, you should be able to listen to "white" band noise, switching between USB, or LSB, and notice no real change in pitch. "IF shift nuetral".
These radios do automatically what we used to have to do manually as part of the alignment. Do a search, and d/l the complete 706mk2g service manual for complete instructions on this, and all the other setup's...I wouldn't mess with any other than the filter setup. If it ain't broke in other areas, don't fix it...:/ MK

24. No SSB output on Icom IC 725

I just pulled an IC 725 out of the closet, dusted it off after a number of years and found that it has good output on CW but absolutely no power output on SSB, AM or FM even with the Mic gain turned all the way up.

Any suggestions?

Thanks

Tom Esker

This looks like a standard form letter that the FCC would send to
anyone whom they wish to retest. BTAIM, they certainly don't send
these letters out randomly. The FCC has had a good reason for sending
any letter such as this, and you can best bet that they had a damn
good reason for sending one to you....

I am trying to help a friend track down an old acquaintance. He can't remember the fellow's name, but he remembers being in the his shack and hearing him call CQ from "Willy Able Four John Tere Marie, slant 4 Charlottesville".

This was perhaps 25-35 years ago, I believe. The call is not active nor listed. If someone has an older callbook and can look up WA4JTM so we may get his name, it would help. I must've tossed my old books somewhere along the way.

I'll check back on the newsgroup or you can get my attention at capn27 at PLUG yahoo dot com dot sg. Pull the plug.

Try QCWA. They have old callbooks. http://www.qcwa.org

I will tell you that the range of years may lead to ambiguity. The
call you cite was probably originally issued sometime around 1961-63
(I was WA4NJI, issued 1963). However, in a few of the call areas (the
Second, that I have specific knowledge of), the WA calls were run
through a second time before moving on to the WB calls (as they did in
the Ninth area, of which I also have specific knowledge).

I think I remember some WB4 calls from the late '60s, which suggests
they didn't recycle the 4s, but the Fourth area was always one of the
quickest to go through allocations (a friend's wife received WA4Txx in
'64), so it's possible they might have indeed gone through the WAs
twice before going to the WBs, like they did in the Second area.

I was inactive from '64 through about '70, so didn't follow the
allocations in that period.

Good luck in your search.

LRod.....

Thanks for the link. I looked at the site, but couldn't find a reference to
old callbooks. I certainly don't care to join an association or buy a book
just to look up one call once.

If I can just get somebody to haul one off the shelf, look under WA4JTM and
give me a matching name, I can refer it back to my pal to see if he can make
a mental connection.

They'll do the lookup service for no charge, if I recall. Send them a
request. The worst that can happen is they'll say there's a charge. At
best you get the name and maybe address. QCWA is a good group.

You might also look at http://www.qrz.com Seems to me I recall either
them having a lookup service or information about one. Also check the
League: http://www.arrl.org Same deal.

There are lots of resources out there. I just don't have any old
Callbooks. Someone else might. In the meantime...

>
> Don't care what the letter did NOT contain..

Of course, you do, it makes your delusions that you think are real all
full of holes like Swiss cheese.

The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the rules to
readminister any examination element previously administered by a
volunteer examiner. ....Still stands, dumbass.

>..HERE is the reason you were
> made to retest and what Riley sent just prior to the retest notice.

November, 1999 to July, 2000 is more then "just prior to" fatty.
Several months. You forgot the cautionary letter that Riley sent
myself and the Gopher face, but then after I explained what Gopher
face had been doing on here and on the air, that is why he sent *that*
letter. Who do you think clued Riley into the disagreement in the
first place, dumbass?

> Contrary to what you claim, I don't see anywhere in either letter where
> Riley says a single word about a "random" retesting, as you lamely claim.

Anybody with more than your working two brain cells can, however. It's
even in the retest letter itself. No wonder you flunked out of those
public schools and just barely passed that christian school's courses.
But their standards are quite lower, after all. And, let's not for get
all you could manage at Kirkwood Community College is a "certificate".

> "evidence that the licensee had been "deliberately and maliciously
> interfering with the
> radio operations of other licensed amateurs" on 20 meters. "This
> interference has occurred at various times in the last several months
> and includes broadcasting music and other unidentified transmissions,"

Wrong again, that was part of the warning letter that "alledges"
interference.
Why do you think they put this disclaimer on their releases on the
ARRl web page?
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC
has what it believes to be reliable evidence of possible rules
infractions and not necessarily that the recipient has violated FCC
rules.

> Note that is says "evidence", Wussyman.

Too bad they left out the "manufactured" qualifier. "evidence" is
faked all the time, but if you weren't such a mentally ill retard who
lives in a fantyasy world of TimeLords and Daleks, you'd realize that.
The Letter states they have what they "believe to be reliable
evidence" doesn't necessarily make it so, your brain dead retard.

> The letter doesn't say, "Things have
> been a little bit slow for us here at the FCC, so to help fill our down
> times we have instituted a new program of randomly retesting Amateur Radio
> Operators."

No it says:
The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the rules to
readminister any examination element previously administered by a
volunteer examiner.

Which pretty much makes the "random" part quite true. Why do you think
there are so many in those many enforcement logs who have lost their
license because they didn't bother to show up for a retest? Read it
for yourself. Oh, sorry, I momentarily forgot whom I am addressing.
Get someone to read it for you and explain it to you.

> The notice says, "evidence", which means YOU DID IT,

No, that was the "warning letter of Nov. 1999, that wasn't in the
retest letter at all. And it was still "allegations" of interference.
In fact it says:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC
has what it believes to be reliable evidence of possible rules
infractions and not necessarily that the recipient has violated FCC
rules.

> and probably a whole lot more that you didn't get caught for.

You mean like when you play "Amazing Grace" on 20 meters?

And again, no, it just means they have faked tapes by Gopher face and
Davey boy trying to get somebody into trouble. Happens all the time,

just like it did to AC5IU. He got a warning letter for interference,
but they later recanted.

> For crying out loud, Wiseman.

You seem to be doing more than your fair share of that, Lardass.

> Your pathetic denials are really, really lame,
> but that is to be expected of a congenital liar.

Too bad you had to plagiarize fatass high-el's words, huh Davies, you
sure couldn't come up with a word like "congenital" on your own.

--
The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the rules to
readminister any examination element previously administered by a
volunteer examiner.

How freaky is this? One of the rare threads I get involved in and that
address is less than three miles away from me on beachside. That zip
is incorrect. Most of Ormond Beach is 32174; that address is 32175.
Probably some changes over the years.

I'll drive over there today and see if there are any antennas. I don't
know anyone in town, as I've only been here a year and I haven't been
active.

Thank you, Aaron. The information has been forwarded to my friend Dave in Richmond and the name clicked in his memory. He now has a place to start looking for his old mentor.

Steve, CainineDCeye, was also kind enough to send me the info - Thanks to him as well.

This has been a freaky week, LRod. Night before last a small voice in my head (I forgot to wear my tinfoil nightcap) woke me up at 2:40 am. I rolled out of bed, rubbed my eyes, went to the window, hoisted the light-proof shade and looked out into the moonlight.

Just in time to see a meteor flash over the house and explode with a flash that lit up a 200 mile area like daylight! I thought the Triton Sub Base at Bangor, WA (forty miles north of me) had gone up.
http://seattletimes.nwsource.com/html/localnews/2001947342_meteor04m.html

The freaky part is, of course, what caused me to wake up and go to the window?

But - regarding the address. . . Aaron wrote the zip code as 32074. You wrote 32174 and 32175. Dave can look it up, of course, but I wonder which one is current?

I'll stay tuned for your report. Maybe you could get a forwarding address if he has moved (died, defected, whatever).

I drove by the house this morning. Nothing special and no antennas;
looks like it's had some renovations, so it might have changed hands
recently.

I also checked the current phone directory; no Tom or Thomas Carey in
Ormond Beach. In fact, there are only two listings in Volusia County;
one in Enterprise (a tiny bump in the road about 20 miles from here)
and one in Deland (county seat, and where Walt Maxwell, W2DU, lives).

I'm not much for knocking on doors, so I'll let your friend take it
from here.

45. Amateur Radio Newsline™ Report 1399 June 4, 2004

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-04 17:34:27 UTC
From: radionews@aol.com
Message-ID: <20040604133427.16591.00000452@mb-m15.aol.com>
Source record: 57607

Amateur Radio Newsline™ Report 1399 June 4, 2004

Amateur Radio Nerwsline Report number 1399 will follow in a few moments. First, this important announcement from our Support Fund Administrator Andy Jarema, N6TCQ:

--

The following is not necessarilly for retransmission. I guess you already know that if you are hearing my voice on a closed-circuit advisory it means that Newsline is again facing a financial crisis.

Well, you're right. The funds are so low that we may not be able to pay the bills from May. Worse, for the first time in our history, we even do not have the money to send a representative to Huntsville this
summer to present the 2004 Young Ham of the Year Award. And in two words --- "that's bad." "Real bad."

The solution to both of these problems really lies with you. Our world-wide all volunteer staff produces these newscasts for you. The all volunteer Young Ham of the Year Committee labors tirelessly each year to select a youngster to receive the Award. Joe Eisenberg, K0NEB, oversees the Newsline sponsored Roy Neal, K6DUE, Amateur Radio Mentoring Project database, doing so at no cost. The list goes on and on.

I too am a volunteer, but I have to be the realist. I'm the accountant
who has to look at the bottom line and when it turns red, I have to say -- hold on -- there is no more money to continue. And that's about where we are right now.

So, here's the bottom line. If you want the newscasts to continue. If you want the mentoring program to continue and the Young Ham of the Year Award to continue, we need you to show it now -- right now -- through your financial support of Amateur Radio Newsline.

Remember that Amateur Radio Newsline is a federally chartered 501(C)(3) and California state not-for-profit corporation. This makes your donations tax deductible, whether you're an individual or a club.
The address to send them to is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California 91066. If you missed the address don't worry. It will be repeated at the end of this week's report.

For now I thank you for listening, for responding and offer you this weeks newscast which follows immediately.

--

Amateur Radio Newsline report number 1399 with a release date of Friday, June 4, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio on alert on a stormy Memorial Day
weekend, a BPL deadline is extended, another country says goodbye to Morse code and June is Amateur Radio month. We'll tell you where on
Amateur Radio Newsline report number 1399 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS AID AS TORNADOES CONTINUE

Strong storms with funnel clouds raced across Indiana during the Memorial Day holiday forcing thousands of Indianapolis residents and race fans alike to take shelter from tornadoes. Jack Parker W8ISH was
tracking the storm that left behind a train of devastation while putting radio amateurs on alert.

--

For the city of Indianapolis, the Race Day storms could not have happened at a worse time. Hundreds of thousands of people were in town for the 88th running of the Indianapolis 500 mile race and for the NBA Playoff game between the Indiana Pacers and the Detroit Pistons. The rain delayed race was nearing the end when race officials threw out the checkered flag and warned nearly 400 thousand race fans to immediately take shelter.

Accordling to early reports an F3 tornado passed just south of the Indianapolis Motor Speedway and began its destructive path across the south and east side of Marion county. Hundreds of central Indiana amateur radio operators were kept busy from Sunday morning until late Sunday evening tracking the funnel clouds and reporting ground truth observations back to the National Weather Service office in Indlianapolis.

While the Pacers took on the Detroit Pistons, tornado sirens blared outside, motorists got stuck in traffic jams, and tree limbs and debris were tossed into roadways. A funnel cloud described as two blocks wide, tore the roof off a nursing home leaving nearly fifty bed-ridden patients without shelter. They spent over an hour out in the pouring rain as rescue personel attended to their injuries. Downed
power lines, flooded streets and massive amounts of debris from damaged homes made it difficult for Indianapolis police and fire

personnel to reach those in need.

According to the National Weather Service more than a dozen tornadoes had touched down in 10 Indiana counties. This was the third time in three years that powerful tornadoes have ripped across central and southern Indiana.

Reporting from Indianapolis, for Amateur Radio Newsline, this is Jack Parker W8ISH

--

Marengo in southern Indiana was hard hit, with at least one fatality, four injuries and numerous homes damaged or destroyed. But Indiana was not alone in dealing with weather related problems. According to news reports several people in Kansas and Nebraska were injured by the
weekend's tornadoes which also ripped through parts of those states. Ham radio was on alert there as well. More on this ongoing story in future Amateur Radio Newsline reports. (ARNewsline(tm), W8ISH)

**

THE BPL FIGHT: REPLY COMMENT DEADLINE EXTENDED TO JUNE 22

The FCC has extended the deadline to file reply comments on already filed responses in its broadband over power line Notice of Proposed Rule Making ET Docket 04-37. The FCC granted the extension based on requests from the National Antenna Consortium and the Amherst Alliance.

The two organizations had sought to have the FCC postpone the filing comment deadline until either September 1 or two months after the public release of the NTIA's Phase 2 study -- whichever was later. The Commission responded that in its view an additional three weeks should be ample time to respond to any NTIA submission.

The FCC does not routinely grant such time extensions, and it denied earlier petitions, including filings from the ARRL. Now it has relented and has set a new Reply Comment deadline of Tuesday, June 22nd. (ARRL)

**

RESTRUCTURING: MORE COUNTRIES DROP CW

More restructuring has taken place in Europe. The GB2RS News Service reports that Finland has now officially dropped the Morse code requirement for that nations hams to have access to the High Frequency
bands. GB2RS says that Finland actually deleted the Morse requirement
on the 1st of November of 2003. Now, with the latest rules revisions there are now there are only two classes of amateur license in that

European nation.

Also from GB2RS word that former French Class 2 licensees with F1 and F4 callsign prefixes are now being heard on the High Frequency bands.
According to the French national amateur radio society, this change was implemented on May 16th.

But C-W is far from dying or dead on the other side of the Atlantic. In fact the fourth European High Speed Telegraphy Championships take place the 15th through the 19th of September in Montenegro and Serbia.
(GB2RS)

**
RESTRUCTURING: NEW ZEALAND SAYS GOODBYE TO MORSE

Finland and France are not alone in saying goodbye to Morse code testing. So has a nation down-under.

On June 4th New Zealand's Telecommunications regulators issued a decree that says Morse proficiency testing has ended and thatNew Zealand Limited Class operators will soom have access to the high frequency bands. In fact, regulators have decided to upgrade Limited Class operators to the New Zealand General Class.

According to the notice, operators will not be required change their callsigns or take any other action.. The new rules go into effect on June 17th. (ZL2BHF)

ENFORCEMENT: POLICE JAMMER GETS 8 YEARS IN PRISON

A man convicted of jamming a Wisconsin emergency service radio system will spend the next 8 years behind Federal prison bars. Amateur Radio
Newsline's David Black, KB4KCH, is at the south-east bureau with the
details:

--

University of Wisconsin graduate student Rajib Mitra faces eight years

in prison after being convicted of intentionally jamming public safety
radio communications. The 25-year-old Mitra was sentenced by a federal judge as a domestic terrorist under the Patriot Act which punishes substantial disruption of a critical public infrastructure.

The computer science student converted a radio receiver to transmit tones that interfered with the 800 MHz emergency radio system used by Madison police, fire and paramedics. In all, Mitra was accused of interfering with public safety communications 37 times last year. He told a federal judge the incidents were accidental--the result of a loose wire. But the judge likened that to a fairy tale, and increased
Mitra's sentence for perjury. The disruptions happened between January and October, 2003.

Assistant U-S Attorney Tim O'Shea says Mitra's crime stems more from immaturity than ideology. O'Shea says the case was about domestic terrorism, not like what happened in New York City September 11th 2001, but by the immaturity of the defendant.

Testimony included reports about disruptions that prevented police officers from communicating with each other while making arrests, keeping paramedics from getting patient information to hospital staffs
and decreased safety for firefighters while on calls.

In one incident, Mitra was accused of interfering with communications for three hours on Halloween night. He was also convicted of downloading pornographic sounds from the Internet and broadcasting them over police channels.

Mitra could have been sentenced to two years in prison. He also faces
three years probation and has been ordered to pay more than 6-thousand
dollars to the Madison Police Department.

From the South-East bureau in Birmingham, Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

Its not known if the government will use Mitra's conviction under the
Patriot Act as the basis of prosecution of others acused of the same type of crime. (ARNewsline(tm) from Capital Times, others)

**

ENFORCEMENT: RESTERAUNT FINED $10,000 FOR USING 2 METERS

Remember the case of Best Wok? The New Jersey resteraunt that was warned by the FCC to stop using an illegal high power 2 meter

cordless
telephone to coordinate deliveries but which continued to do so
anyhow?

Well, that decision by the store manager is going to cost the company
$10,000. Thats the amount of the fine that the FCC has levvied
against Best Work for transmitting on 145.8376 MHz without Commission
authorization. The resteraunt was given the customary 30 days rto
pay
up or to file an appeal. (FCC)

**

ENFORCEMENT: RIGHT APPLICATION - WRONG BURTON

The FCC admits that it made a mistake when it announced that it had
sent a warning letter to a former California ham and designated his
GMRS radio service application for a hearing. What happened?
Amateur
Radio Newsline's Bruce Tennant, K6PZW, tries to sort it all out:

--

The FCC recently announced that it had sent another warning letter to
Richard A. Burton, the ex-WB6JAC. This, warning him about operating
without a license and designating his GMRS application for review.

Only one problem. The regulatory agency had the wrong Richard A.
Burton.

It turns out that it was a Richard A. Burton in another state who,
this time, applied for a GMRS license. It was not the Richard A.
Burton who lives in California.

Complicating thins further the California Richard A. Burton had filed
for a GMRS license over a year ago. He voluntarily rescinded his
application after the FCC set it aside for review.

So what happened? According to a note in the ARRL Letter, the FCC
was
acting on the belief that the latest GMRS application had come from
the California Richard A. Burton. And mistakenly, the regulatory
agency designated it for hearing.

For the Amateur Radio Newsline, I'm Bruce Tennnant, K6PZW, in Los
Angeles.

--

By the way, we did a search on the QRZ.com callsign supersite. We
found that there are 12 hams that have the name Richard Burton living
in North America. Of these one is a Richard A. Burton but he does
not
live anyplace near the Richard Burton who was seeking the GMRS

license. (ARRL, others)

**

ENFORCEMENT: TO MANY CALL SIGN CHANGES

The FCC is asking a New York, ham why he has filed over a dozen call sign change requests with the agency in the past four years. Since August 29, 2000, Kiyoshi L. Nakamura of Buffalo has held the call signs K3DJ, KJ6UZ, AD1L, K3DJ again, KH6DJ, AD1L again, K3DJ for a third time, AD2R, AD1L for a third time , AD2R, WH7S, AD1L for a forth
time and AD2R for a second time. And on May 4th, he again filed a call sign change request. This time he wants to give up AD2R and get back to K3DJ for the fourh time.

In its letter to Nakamura, the FCC says that his numerous call sign change applications raise questions about apparent abuse of the licensing system. This says the FCC that with limited exceptions, each call sign would be blocked by Commission rules from being reassigned to another licensee for two years.

So, the FCC gave Nakamura 20 days from the date of its inquiry letter to respond. He was told to state his intentions regarding the filing
of these applications. He was also told to coose one and only one call sign that he actually wants to keep. (FCC)

RADIO HONORS: AMATEUR RADIO MONTH IN NH

June is now Amateur Radio Month in New Hampshire. This, as Governor Craig Benson issues a proclamation honoring the states radio amateurs for their dedication and the service for its almost 100 year history of contributions to the advancement of communications technology.

First issued by the New Hampshire State Legislature in 1985, each succeeding Governor has recognized the role of the states Amateur Radio operators during the month of June. 2004 marks the 19th consecutive year that these proclamations have been issued. (Via e-mail)

**

TECHNOLOGY: IS IT BYE-BYE TO VHS?

Home recording using tape as a medium seems to be on its way out. According to the Consumer Electronics Association, in 2003, movie watchers rented more DVDs than VHS tapes. Also, DVD sales increased by 30% while the sale of VHS VCR's dropped by an unexpected 50% in
2003.

Whats replacing the venerable VHS system? Hard disk recorders like TIVO which have been dropping in price over the last twelve months. When combined with satellite or cable TV, these devices make delaying a program to watch later as easy as 1-2-3. (Science OnLine)

**

THE SOCIAL CIRCUIT: HAM-COM IN DALLAS TEXAS IN JUNE

Turning to the ham radio social calander, if you will be in the Dallas., Texas area the weekend of June 18th and 19th, make it a point to attend Ham-Com 2004. This is the ARRL West Gulf Convention held at the Arlington Convention Center in the Dallas suburb of Arlington. This years features include indoor and outdoor flea markets, numerous commercial exhibits, a D-X luncheon, an APRS workshop and much more.

Information on this one is on line at www.hamcom.org or by writing to Ham-Com 2004. P.O. Box 12774, Dallas, Texas, 75225. The phone and fax number is area code 214-361-7574 (Ham-Com)

**

THE SOCIAL CIRCUIT: KNOXVIOLLE TN. IN JUNE

And the 38th annual Knoxville Hamfest and Electronics Exposition is slated for June 11th and 12th. The venue is the Knoxville Exhibition, World's Fair Park in Knoxville, Tennessee. The theme this year for the event is "Promoting Youth in Amateur Radio." More information is on-line at www.w4bbb.org (K4PZT)

**

THE SOCIAL CIRCUIT: A TALE OF HAM RADIO AT NAB

Also, if you want to read more about ham radio at the recent National Association of Broadcasters Convention in Las Vegas, take your web browser over to www.haleisner.com. Then click on the column titled "The Other Side of the Control Room Glass" by our own Bill Pasternak, WA6ITF. This month Bill not only takes reads to the N-A-B show but also tells of his recent exploits at the Dayton Hamvention. Again, its all on-line at www.haleisner.com (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to

the

RADIO LAW: FREQUENCY COORDINATION FOR THE 2004 NATIONAL POLITICAL
CONVENTIONS

Remember a few years ago when the ARRL became the FCC's
"single Point
of Contact" or spoc on repeater related matters? Well how about
one
for this years political conventions? Well that honor has gone to a
New York based consulting engineer. Bill Pasternak, WA6ITF, has more:

--

At the request of the Frequency Coordinating Committee for the 2004
Political Conventions the FCC has designated Louis Libin, as the
single point of contact -- or spoc -- for coordinating broadcast R-F
operations. This, under Section 74.24 of the agency's Rules.

Libin will oversee all RF operations for broadcasters in Boston from
July 26th through July 29th and in New York City from August 30th
through September 2nd. Nor is this the first time for him to do so
either. Louis Libin is considered one of the worlds foremost
authorities in the area of RF compatibility and has worked on
numerous
televised events over the years.

For the Amateur Rafio Newsline, I'm Bill Pasternak, WA6ITF, in
Los
Angeles.

(FCC, CGC)

**

RADIO LAW: 811 PROPOSED AS A NATIONWIDE CALL-BEFORE-DIGGING NUMBER

The FCC is asking for comments on a proposal to adopt "811" as a
nationwide call-before-digging number. The regulatory agency
believes
that this will give excavators one simple number to call to avoid
cutting buried cables, gas lines and other important infrastructure.

Currently there are 70 nationwide "One Call" centers that serve
different geographic areas. They are generally accessed by dialing

toll-free or local telephone numbers. The FCC however believes that having one simple number to call like 811 should promote safety and lead to fewer utility outages.

Want to know more? It's all on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-247171A1.doc (CGC)

**

RADIO LAW: COURT UPHOLDS CABLE RULING

Meantime, the FCC is considering a Supreme Court appeal in cable Internet access dispute. This, after a federal appeals court says that it is standing by its October ruling that cable TV operators should open their lines to rivals who also want to use them to sell high-speed Internet service.

The Federal Communications Commission asked the 9th U.S. Circuit Court
of Appeals to revisit the decision, but the court declined to do. If upheld, the circuit's decision would likely subject cable operators to
the same rules as local phone companies, who are forced to lease their
lines to rival providers of phone service and D-S-L Internet access. (Published reports)

**

WORLDBEAT-UK: 2004 AMSAT COLLOQUIUM IN THE UK

Turning to news from around the world, the 2004 AMSAT-UK Colloquium will be held on Friday, July 30th through Sunday, August 1. This, at
the University of Surrey, Guildford, United Kingdom.

A feature of this year's meeting will be a talk and Question and Answer session with Professor Colin Pilinger of the Beagle 2 project. More information is on-line at www.uk.amsat.org. (AMSAT-UK)

**

WORLDBEAT-ALBANIA: TIRANA ALBANIA FOR DX'ERS IN JUNE

And Albania's first ever DX Convention, is scheduled for 19th to the
20th of June in the city Tirana. Attendees will get to meet many figures from the DX community who donated equipment to put Albania on the air. This includes G3LQP, W6UM, OH2BH and T93Y. United States Amateurs should contact K2WR, at k2wr@njdxa.org for advice how to travel to this gathering. (Via e-mail)

**

ON THE AIR: FRENCH RULES CHANGE SPAWNS DX OPERATION

FT1ZL is on Amsterdam Island and is expected to become active soon. This, after the French have change their licensing structure to grant holders of that nations VHF only license operating privileges on the High Frequency bands.

French stations with the numeral 1 or 4 in their prefix can now operate the low bands using all modes except A1A, A2A, F1A and F2A. FT1ZL will use his new found privileges on 20, 17, 15, 12 and 10 meters SSB during his Amsterdam Island stay. (Internet)

**

DX

In D-X, IK4RUX says that he plans to operate portable IF1 from Favignana. He will be found on SSB and C-W from the June 19 to the 26
th. QSL this operation direct or via the ARI Bureau. (GB2RS)

And K8AQM reports that his upcoming trip to Samoa will take place July
7th to the 21st. He will operate as 5WZ0TR from the Samoan Village Resort on 160 though 10 meters. Modes will be CW, SSB, RTTY and PSK. All QSLs are via K8AA at his callbook address. (OPDX)

**

THAT FINAL ITEM: BANNED BY ONE WORD

And finally this week, the tale of why hams in Thailand were not allowed to talk to hams in other parts of the world for a number of years. The truth be known, it was all because of a three letter word. Here's Q-News Graham Kemp. VK4BB, with the rest of the story:

--

Audio report only. No text available. Lisen on-line at www.arnewsline.org/

--

And for those of you who do not speak French, the word oui -- sometimes pronounced as the English word "we" -- means "yes."

You're welcome. After reading other posts here I rechecked the 1973 listing. While I copied the zip correctly, I flubbed on the name. It should be Tim, not Tom. Sorry about that. It's amazing how much smaller that font has gotten since I got that book. ;) BTW I went ahead and checked my 1984 call book and the call had disappeared. I also checked my oldest 'searchable' database (Sams 1994) for the name 'Tim Carey' and WA4JTM and nothing there either. It seems Tim left the ham scene. One can only speculate. Maybe a silent key, or inactivity? And of course your friend might have gotten the phonetics wrong. I can't remember ever hearing a ham using "Tere" or "Marie" before. Let us know how your friend makes out and if he has any other guesses, or clues, I'd be happy to try again.

Aaron.....

Dave verified that Tim Carey is indeed the person he remembers. As soon as I
wrote the name to him, he remembered.

I remember a lot of the different phonetics used and "Tare" (Dave spelled it
Tere and I just copied what he wrote) was common for "T". "Nan" "November"
or "Nectar" for "N" and I seem to remember "Marie" or "Mary" for "M".

'Course, I learned my Morse code when Truman was pres.

Rich

Interestingly, one of the messages from this newsgroup that I have
archived is about phonetic alphabets. You probably learned this one:

Pre-1954 U.S. Navy Radio Alphabet:

(Communications Handbook, 1945)

Able Baker Charlie Dog Easy Fox George How Item Jig King
Love Mike Nan Oboe Peter Queen Roger Sugar Tare Uncle Victor
William X-ray Yoke Zebra

I cut-and-pasted this from the original post.

When I retired from the FAA in 1997 after 30 years, there were still
occasions when I'd hear a couple of those (not counting the ones like
Victor and X-Ray that are also on the ICAO list).

Yes, Tare for "T" seems to ring a bell. "Tere" threw me as I read it as 'tear'.

> "Nan" "November"

Yep remember these being used too.

>or "Nectar" for "N"

Nectar? Maybe a CB crossover??

>and I seem to remember "Marie" or "Mary" for "M".

Well Mary was the correct one anyway.

>'Course, I learned my Morse code

That's one of the nice things about Morse, no Phonetics...

>when Truman was pres.

Well the closest to Truman I can come is my 1947 Callbook. It would have been 'John Thomas Mary' using that books ARRL list. That was only slightly different from 'John Tom Mary' in the "Western Union Key Words" phonetics for amateurs in my 1934 Callbook. However in the 1973 Callbook the "ARRL adopted International Civil Aviation Organization" phonetics list had changed things completely to 'Juliet Tango Mike'. So what the hey, maybe we can get Nectar in officially someday. ;)

http://www.advancedreceiver.com/page26.html

They make a marvelous little DC injector that I'm using in my van
to feed DC power to the GPS antenna (it requires more than 5V bias).

They work great, and they're cheap! ($30-$40 or so).

AR makes lots of other nice products too. In fact, I would
consider their web site to be dangerous to one's checkbook.

Keep the peace(es).

That's the one my Dad used on his aircraft radio in his Cessna 120 back in
1952 or so. The aircraft registration number was 1927 Nectar.

http://vancouver.indymedia.org/news/2004/06/140075_comment.php

David Ray Griffin tells us he has sympathy for you.

"... although the thought did cross my mind that 9/11 might
likewise have been arranged, I did not take this possibility
seriously. It seemed to me simply beyond belief that the Bush
administration ? even the Bush administration ? would do such a
heinous thing. I assumed that those who were claiming otherwise
must be "conspiracy theorists" in the derogatory sense in which
this term is usually employed ? which means, roughly, "crackpots."

I knew that if they were right, this would be very important.
But I was so confident that they must be wrong ? that their writings
would consist merely of loony theories based on wild inferences
from dubious evidence ? that I had no motivation to invest time
and energy in tracking these writings down.

I fully sympathize, therefore, with the fact that most people
have not examined the evidence. Life is short and the
list of conspiracy theories is long, and we all must exercise
judgment about which things are worth our investment of time.
I had assumed that conspiracy theories about 9/11 were below the
threshold of possible credibility."

| Interestingly, one of the messages from this newsgroup that I have
| archived is about phonetic alphabets. You probably learned this one:
|
| Pre-1954 U.S. Navy Radio Alphabet:
|
| (Communications Handbook, 1945)
|
| Able Baker Charlie Dog Easy Fox George How Item Jig King
| Love Mike Nan Oboe Peter Queen Roger Sugar Tare Uncle Victor
| William X-ray Yoke Zebra

This might have been the same "spirit" which drove the other poster out of
the bed and to the window, to see the meteor, got me to read this thread.

Tonight, I watched a TV-documentation of the preparation for D-Day through
BBC TV. They showed a map of the Normandy, actually a plan for the landing,
where all of the different sectors like omaha, sword and utah, were
subdivided for with the same phonetics, I just remember oboe, peter, queen
.....

|
| I cut-and-pasted this from the original post.
|
| When I retired from the FAA in 1997 after 30 years, there were still
| occasions when I'd hear a couple of those (not counting the ones like
| Victor and X-Ray that are also on the ICAO list).

http://www.hard-core-dx.com/nordicdx/antenna/wire/t2design.html

The consensus about these antennas seems to be that they're very
convenient, but can be quite inefficient if you're using them on
frequencies well away from those where the dipole is resonant.

> also intersted in desgins based on the
>isotron.

I don't have a good sense of how the Isotron is _supposed_ to work
(according to its manufacturer). What little I've heard of its actual
use in the field suggests to me that it, like many other "miracle"
short vertical antennas, is actually very dependent on radiation from
its coaxial feedline and its support mast. The Isotron itself seems
to act less as a radiator, and more as a sort of end-of-feedline
transmatch between the 50-ohm coax (interior) and the mast and coax
braid. Trying to reproduce one, homebrew, and to get good performance
thereby seems to me to be a recipe for severe frustration.

Re the Isotron.

You may wish to look up an IEE paper on Electric Slot Radiators by
Robert K. Zimmerman Jr.

I thought the same as you before I tried one.

One test was to by-pass the feeder altogether. I connected a simple
crystal controlled 160m 1w rig directly to the feed point. Using an AEA
analyser brought the antenna to resonance.

I then measured the field strength using a Potomac FIM.

I then added 15 metres of 1/2" Cellflex as a feeder, relocated the
transmitter, made an insignificant adjustment to the antenna and took
another reading.

The loss through the short length of cable was only around a dB.

I was the very first person to get Ralph at the factory to design a AM
broadcast band version for the low power (1w EMRP) license holders here
in the UK.

A well setup station, at the top end of the band typically covers a 5
-10 mile radius with reception on a portable radio. The end users are
happy with that as the terms of the license only allow coverage over the
campus!

911 was done by remote control, by electronic means, by
encrypted wireless communication.

> I don't see how it's related to anything electronic at all.

Maybe some of you can throw some light on the kind of transmissions
that were used?

Are there monitoring stations that have recorded transmissions
on that morning?

LESS PERTINENT (may be ignored):

And as for future MasCal exercises,
http://www.mdw.army.mil/news/news_photos/Contingency_Planning_Photos.html
does it take up much space on a modern HDD
to LIFO archive a monthï¿½s worth of transmissions?
Can one receive/store many frequencies simultaneously without
too much gear...?

What would be a cheap way to archive wide bands of spectrum?
Maybe we find public-minded individuals that would let
their screen-saver do some work.

There must be much to be discovered when monitoring many
signals for synchronicity.

LEAST PERTINENT (ignore unless you like to philosophise):

And who are the guardians of public ownership of the radio-waves?
According to the Subsidiarity Principle
http://europa.eu.int/scadplus/leg/en/cig/g4000s.htm#s10
it partly yous, at least where short range public broadcasts,
i.e. FM Bands are concerned.

This page has complete info about the terminated folded wideband
dipole:

http://www.cebik.com/wbfd.html

This page has the index for many interesting antennae:

http://www.cebik.com/radio.html

This gentleman's site is about the best (in my opinion)
for all sorts of antenna information.

911 is a car

9/11 is the 11th of November and nothing of note seems to have happened on this date.

11th September (11/9) is when a bunch of rag-head, murdering Islamic Muslim loonies (are there any other kind?) attacked The White House and The World Trade Centre.

But there is about as much in common with the above 3 as with posting this crap into an amateur radio newsgroup.

Prolly the leastexpensive method of archiving *wide* bandwith spectrum
is via film.

80. Ham band intruders ...

Lots of intruder activity on 40 meters lately.

Just heard a couple of 'good ol boys' on 7119.9khz LSB talking and swearing
until a VK or ZL chased them off and just about every evening there are a group
of spanish speaking guys on 7008.0 USB.

Hearing most of the activity past 0600z.

Hello,

Just helping to spread the word about www.HamRadioTalk.com. Looks to
be a great site with lots of potential. With the danger that Ham Radio
is in, it's important we do what we can to keep the hobby alive.

73,
Dave

Wogie,

You were retested by the FCC because *Evidence* linked continual
intentional malicious interference to you, from your qth. Even you
with your correspondence DeVry Masters Degree can certainly figure
that out, or are you still trying to figure out how to calculate negative
SWR and RMS voltage?????
ROTFLMAO!

I remember loading a ham friend's Viking Ranger (60 to 80W) into a 75
ohm dipole without a balun, and then squeezing the pickle and being
introduced to a rather nasty fellow called R.F. Burns. :-(It's not
nice to have a coax that radiates!

84. FS: Wavecom w41pc RTTY Decoder package!

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-08 03:22:30 UTC
From: Chuck Yarbrough <wampus@nc.rr.com>
Message-ID: <j6cac05b2qgpetiaru213t19se7ta003cb@4ax.com>
Source record: 57546

Hi all--I am selling my Wavecom w41pc (not MKII) rtty decoder card package. It includes the ISA w41pc decoder card, Diskettes with v.4.4.0.0 software, a CD with the latest version 5.6, and the official Wavecom User's Manual in the original Wavecom binder. It also has the original factory checklist from Wavecom certifying that the card has passed all tests.

This is a VERY high-end and rare decoder (especially to find it in the US). It also costs approximately $4900 if you bought it from Wavecom. I am asking $1400 for the whole package shipped CONUS. Other locations need to inquire about shipping to your QTH.

While this is the original w41pc card, and not the current Mark II, Wavecom software works the same on both. The MkII added a descriminator output jack on the card and also shrunk the card a bit. Functionally the original and the MkII work the same (same modes, analysis, etc).

Please see the Wavecom website for further details.
http://www.wavecom.ch/products.htm .

By the way, Wavecom provides FREE web downloads of upgrades in its software. Your decoder will stay current for a long time!

Please respond to me off list at wampus@nc.rr.com.

THanks
Chuck KI4BZJ

Lardass Lloyd's fatass "Rant" <rant@rantscoms.net> whined in message
news:<ca2cal$m49$0@pita.alt.net>...
> Wogie,

Lardass, you really should quit trying to suck Roger's "woger" you've
got quite a cocksucking lisp!

> You were retested by the FCC because *Evidence* <lies flushed>

Oh, so you are speaking for the FCC, now Lardass? Funny how the retest
letter doesn't give a reason except that the FCC has the authority to
retest.
But you don't let the truth stand in the way of your lies, do you?

Here's the letter, where does it say *anything* about interference?

July 11, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47 C.F.R.
Section 97.519(d)(2), the Commission has the authority to
re-administer any
examination element previously administered by Volunteer Examiners
(VE's).
The Commission may either administer the examination itself, or under
the
supervision of a Volunteer Examiner Coordinator (VEC) or VE designated
by
the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur
Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an
American Radio Relay League Volunteer Examiner Coordinator. This
examination
must be completed on or before September 11, 2000. The required code

speed
that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present a
photo
identification. Pursuant to Commission rules, your license will be
cancelled
if you do not appear for re-examination. You will be granted an
Amateur
Radio license consistent with the elements you pass upon
re-examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

Oh, that's right, you got it from the ARRL Enforcement log releases on
the subject. You string together that release that states that Roger
got a warning letter which may or may not indicate inappropriate
activity occuring
(despite this disclaimer, posted along with the logs, which you
somehow "forgot" to include with your retelling:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC
has what it believes to be reliable evidence of possible rules
infractions and not necessarily that the recipient has violated FCC
rules. The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the
rules to readminister any examination element previously administered
by a volunteer examiner.) a preemtive letter to Wiseman and
Gopherface Tunder and the above retest letter, which gives no
indication that interference had ANYTHING to do with the letter being
sent out. BTW, explain why Wiseman PASSED the retest and the code test
(while you couldn't the first time) and even upgraded.
(space reserved for your backpedaling)

LOL... really, well your kids should be working for MicroSoft then, seeing that I worked there until I moved on to doing work for Hospitals in North America.
But hey, seeing that you are the one needing a clue (in your words) , then I will let your LAMENESS go by.

I don't have to guess where I come from but then I don't try to pretend I'm posting from a Mossad e-mail address. You're from a country with a negative population growth, a 2% net out migration rate, an average income of 8,000 Euros, an average life expectency of 65 years for males, and your main export is wood. The population of Latvia is about 1/3 that of Los Angeles County. Your country is still run by the same communists who were in power in 1991 but changed their party name and you've had 9 different governments since 1993. You've probably never been to the US in your life (I've been to Riga) and everything you know about us you get from TV and the internet. From this, you know WE live in a police state from reading a scanner newsgroup?

You were saying morons came from where....?

Why, golly, silver, it says right here in the header that you're silver posting from <silv3r@inbox.lv>. That's in Latvia. So are you saying you not only want us to believe you're posting from a Mossad address but you're also not posting from Latvia? If so, where exactly are you from? Must be a real nice place since you want to hide it so much.

LOL... are you for real?.... I am not trying to hide! If you had
something better at reading your newsgroups then just OutlookExpress then
maybe you would see more then this:

From: silver <silv3r@REMOVEinbox.lv> <---this is my web email address.
Just like yours comes from yahoo.com. But you don't post from Yahoo do
you?

Organization: Hamossad <www.mohr.gov.il> <---anyone can put anything in
their headers like this. You can remove this if you wanted, along with
other parts of your header. Here is something I also added:

reset-NT-admin-password-tool: http://home.eunet.no/~pnordahl/ntpasswd/

Also if you knew how to read rest of the headers you would be slow to
make yourself look very foolish (i hope).

Get yourself a better NewsReader then you wouldn't have this problem.

No I know from being in the US, and reading the Gov't Doc's (bills/laws)
that come out.
Some of my family are in the US Military, and one works in VA for your CIA
(30+ years now). But you know what..... your country is becoming more and
more a Police State, and you can't see it; just like you can see where I
come from.

> You were saying morons came from where....?

Your parents?! If you still think I live in Latvia because of my email
address, you have to be the most unlearned person (on headers) I met so far
on the internet. Learn how to read headers.

These are yours:

If you know what questions to ask and where to look, you can find anybody
in time....

How is it in Wonder Lake (at the age of 58), maybe I will give you a call
sometime (just kidding).... at your number 8*5-7*8-*1*4 (blocked the
numbers... but you know the missing ones ;))

Do you live here?
http://tinyurl.com/2a6fq

Looks like a nice area, between Chicago, and Milwaukee. :)

good day

pete, ka1wbe has been contacted, he is planning to show up at the field days this year.

last saturday we all went to the field day site, set up some antennas and tried out some gear, we had a great time and it was a success. we are all geard up for feild day now. we all had a great time looking at hooters on saturday night, and enjoyed some wings also.

the repeater has had a few jammers every other day - some were touch tones and some were just making noises with the mouth - what are we going to do with you people

dont forget my net tonight @ 8pm

121. If I am looking for N8FN, how can I find him?

Hi!

About 20 years ago, I got interested in Ham Radio, and even got the old novice license. I wanted to be a good ham radio operator, and listened to many of the conversations going on, and I noticed that most of them seem to be about old men and their various diseases.

Well, back then I was too young, and didn't have any diseases to talk about, so I gave the hobby up and let my license expire. I was just too intimidated to talk to anyone. What about my fist! What would I say! And so on. I mean, just look at this usenet post and you can tell I'm a lid, right?

That was then, and now I have all kinds of problems with blood pressure, bad knees, hearing loss and so on to share with the Amateur Radio world, so I'm going to get one of the new fangled "Tech" and then "General" licenses. Shouldn't be a problem, I did the 5 wpm code test before, I could re-learn that; and I have a couple of degrees in physics and electrical engineering so all I really need to re-learn are the rules and such.

Oh yeah! I gotta have a question. Okay, here's one; I'm interested in this PSK31 * thing. Does anyone do PPP via this modulation technique, like to pass primitive usenet like messages, old ftp, or text based web pages?

* http://psk31.com/

Looking at his QRZ search results... he has an 8 call, the QSL says he's in Oregon, but the address is in Illinois.

No wonder he's hard to get hold of!

If you an prove that you held a novice license in the past, even though now expired, it is accepted as credit for having passed the 5wpm and you would not have to retake the code test. The best thing is your old license if you can find it. A copy of an old call book page showing it is also usually sufficient. Or if you don't mind paying for an FCC search, you can proof from them.

134. Noise From TV on my receiver.

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-12 20:45:36 UTC
From: Skimpybag@hotmail.com
Message-ID: <50bc4c9a.0406121245.1eacba3e@posting.google.com>
Source record: 57496

When I turn on my TV i get 5 S units of noise on 10 meters (28 MHz). I have cable TV. When I disconnect the cable from the TV the noise stops. Somehow the noise is being generated from TV (when it's on) and sent through the cable lined which is effecting my receive on my radio. I was thinking a high pass filter where the cable goes into the TV. Anyone know if this would work? If not, then what might work?

Thanks in advance, Scott

So, I just show up with my old novice license, and I can take
the Tech written test? Can I take the general test the same
day? I guess that depends on the place I get tested at, right?
I found a list of locations near me at the ARRL website. This
is great news. Thanks a lot!

Outlook Express does just fine as a real newsreader. You seem to be taking a lot of care to disguise your location - I wonder why? It looks like you've got free e-mail account in Latvia, you throw in the Mossad as your Organization, you're posting through NewsDawg out of Englewood, Colorado, but you're really coming through ripe.net in Amsterdam. I suppose I could get more infomation as well but you're really not worth the effort. It's interesting since I live in a police state that I don't take the effort to make it difficult to figure out who I am but you, living in a non-police state , do. Hmmmm....

I know of an elderly couple who had a similar experience recently. They had a TV putting out RF and they too were on Cable. The RF would radiate from the cable into other TVs, be they connected to the cable also or not and other appliances which were in some way, receivers.... VCRs, etc.

The cable company was called in to investigate and they traced it down to the tuner of the offending TV set. As soon as that set was turned off, all RF interference ceased. Not sure what they ended up doing with the offending set. To my knowledge, they were not told to try to filter it or anything else, so I can't say what the conclusion was.

I'd recommend grabbing study guides for these as they have added RF safety
questions. Plus it would not hurt to brush up on the material in general.

You will need your old novice license and a copy of it (they attach it to
the forms) and two pieces of ID.

Yes you can just show up and take the tests though some VE teams prefer that
you let them know you plan on attending.

Yes you can take the General written the same day IF you pass the Tech written.

Good luck and let us know how it goes.

For one, did I say my Country was not a police state?

And another thing, you are learning something's that might help you, and if I tell you, then you would not learn anything. You don't want to be lazy now, do you?

LOL... Outlook Express a "REAL" newsreader... now that is funny. Better make sure you got your Anti-Virus up to date with that thing.

It is people like you that are surprised when someone steals your ID (your name and such), and makes a second life so as to run up C.Cards and other things. Bet you don't even shred your Bills before you throw them out.

If I wanted to, I bet I could get every bit of information on your life (right down to shoe size ;)), but that would be a waste of my time.

This is rather idiodic, to use a worldwide newsgroup to post local items that should be hosted or sent via a dedicated list to those folks in the Tampa area who could possibly have an interest in the subject matter.

Someone in their club should be able to set up a mailing list, and give courtesy to the other 99.99 % of us.

--James--

144. Update! Filing FCC comment against BPL

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-13 01:07:29 UTC
From: yea right <spam@spam.spam>
Message-ID: <pan.2004.06.13.01.08.32.501637@spam.spam>
Source record: 57506
Cross-posted to: rec.radio.shortwave,rec.radio.swap,rec.radio.amateur.misc

The information about filing a FCC BPL comment on the ARRL web page was outdated. There is a new case number that should be used. 04-37 is the correct case number.

It only takes 5 minutes to file a comment with the FCC against BPL.

No, it is a text based mode. Phase shifting can certainly be used to send data, but PSK31 is the shifting and an encoding scheme that sends text only. Correctable too!

Of course, you can send ascii art!

The primitive usenet was all text - mail, usenet, and text based
web using Lynx, connected via PPP.

BUT, if I can send text, I can uuencode binary files, and send
them as text. This whole web thing is entirely text based, yet
by uuencode and other schemes binary files can be passed, and
applications can be created that make viewing or using those
binary files seem transparent.

BUT, THEN AGAIN, PSK31 uses vericode, which appears, at first glance to be optimized for English language text messages, with the vowels being of the shortest number of bits and less frequently used letters being many more bits. Optimal for English, much less so for binary. I've not looked at it to see what its efficiency would be compared to other schemes, so I really shouldn't say.

BUT, STILL AGAIN, I wouldn't dream of sending anything but text via PSK31. I just think it might be cool to use something like PPP to relay messages about, sort of like repeaters, but not real time. After all, the original internet was just a few computers that connected with phone lines at low bit rates; not at all unlike radio contacts made with PSK31.

Feel free to hit me over the head for quibbling.

PSK31 or any PSK does not have error correction, so the messages might not arrive in "one piece" and one could spend many hours trying to send one "good version". PSK was designed to take over where RTTY left off as far as a keyboard mode for QSO's. Speed is about the same 60 WPM for BSK31, but less bandwidth and a little better under poor band conditions. MFSK has some error correction but again the speed is about 60 WPM, would take a long time to send complete pictures. MixW has a feature for sending pictures via MFSK, works well but not anything like the Internet or even SSTV, picture quality is very poor. Right now the MFSK picture mode is not lawful in the USA, but there is a petition before the FCC to allow bandwidth up to 500 Hz for some of the new digital modes like MFSK picture mode which is a FAX mode in reality There is PACTOR with error correction, but again the baud rate is 300 bps on HF. Would be like using a early modem connected to the telephone line. If you were around for the first BBS systems they were very slow. Took me four evenings at one hour per session to download the satellite tracking program STSPLUS, and that was not a very large file compared todays software. I believe the connection speed to the BBS was 1200 bps then.

Even message sending via Packet and PACTOR is getting to be less and less with satellite phones and cell phones and email via the Internet. But your idea is interesting about PPP messages, but would be much to slow for todays high tech communications. Would you be willing to sit at your station for many hours to download a few messages? And then many hours to relay them?

My two cents worth.

Yeah, but... the whole point of the PPP network is that you only have to make a few contacts, and then pass all the data rather than a contact for each e-mail. The PPP decides what to put into the data that goes to each contact.

I suppose that PSK31 would be way too slow. ARPAnet was some 50 kbs, wasn't it? Of course, I was thinking of a PPP consisting of say 20 or so hams, and not 20 or so universities and research facilities with hundreds, or even thousands, of people sending e-mails. PPP is probably overkill, you're right.

Yep on ARPANET .
"Around Labor Day of 1969, The first network consisted of four nodes between UCLA, Stanford, UC Santa Barbara and the University of Utah in Salt Lake City running at 50 Kpbs!" From the "History of the Internet"

Of course, I was thinking of a PPP

Might look into what the "Digital SSTV" gang is doing on
14.233, not only pictures but any kind of file can be sent
over the air using the method they are.

How about someone posts YOUR prison record?
Still on reporting parole?
Making $50.00 monthly payments on yer fine?
Still stalking, I see.

Somehow that doesn't surprise me.

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W1VV, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W5AZN, W5OZI, K8YSE, DL/VE3ZIK & www.contesting.info, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, JG1OWV, JH4RHF, JI6KVR & JA-IOTA Islands News, JQ2GYU, OH2BH, OH2BN, ON5NT, S58A, SP8HKT, SQ2HFH, UA9KM, VA3RJ & ICPO, VE3EXY and YB0DPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th/June, through Sunday, 13th/Junr there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VK9N, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (IOTA Activity). Laurence, KL1X/5 (GM4DMA), will be active as 3D2KL from Viti Levu and Vanua Levu Islands (OC-016), and possibly other islands in the Fiji group starting around June 21st through July 9th. However, his radio activity will be limited because he is working for a voluntary organization. His activity will be on HF and 6 meters.

4S, SRI LANKA. Ron, 6Y5/4S7RO, who has been in Jamaica since September 2000, will be traveling back to his home (for a few months -- on holiday) and will be operational as 4S7RO starting June 15th. He is not sure if his XYL will reactivate her 4S7YLG callsign. Ron states, "Although it may not be the right time of year, my prime objective would be to get my old 160/80m antennas sorted out. I will mostly be on CW/SSB, but in reposne to the many requests, I will also try to get PSK31 operational ASAP." QSLs for 4S7RO go to DJ9ZB. QSLs for his 6Y5 operations are handled by G0IAS. ADDED NOTE: Ron mentions that he has noted from various DX cluster archives that someone is bootlegging his 4S7 callsign on 10 MHz.

9H, MALTA. Jun, OE1ZKC/JH4RHF, will be active and on holiday from Malta as 9H3RH from July 25th to August 8th. He will probably be active on 40-10 meters, SSB, CW, RTTY and SSTV upon request. QSL via OE1ZKC. PLEASE NOTE that 1 USD does not cover the postage from OE to outside EU.

EA9, CEUTA AND MELILLA. Marc/ON5FP and Jose/ON4CJK will be here from from July 30 to August 1st (callsigns not provided). QSL via ON4ADN either through the UBA Bureau or direct to: Geert Decru, St. Laurentiusstraat 18, 8710 Wielsbeke, Belgium.

IOTA NEWS.....
AF-004. Operator Herman, ON4QX, will be active as EA8/ON4QX from Gan Canaria (DIE S-005) now through June 26th. Activity will be on all bands, mostly RTTY. QSL via his home callsign.

AS-005. Operators Serge/RA3XR and Nick/UA3YH will join a scientific expedition team to Dikson Island (RRA RR-06-09) from June 15th through September 15th. They plan to operate as RA3XR/0 and UA3YH/0 (or possibly with a special callsign). QSL via their home callsigns by the bureau or direct.

AS-089. The team of Nikolai/UA9KM (Team Leader), Serge/UA9KB, Andy/ RA9KM, Mike/UA9KGH/1, Boris/UA9LAC, Tim/RV6LFE, Valery/UT7CR, Mike/UT9IO (ex.UA9KO) and Victor (The Cook) will operate as RK9KWK/p from Litke Island in the group of Marresalskiye Koshki Isls, June 22nd to July 1st. Other reference numbers are: RRA RR-06-02 and RDA YN-14. They plan to be active with three stations on the IOTA frequencies and operate on 80-10 meters (including the WARC bands) SSB and CW. QSL via UA4RC, by the bureau or direct.

AS-169. Look for the Indian Island of Elephanta to be activate between July 23-28th, weather pending. Callsign will be AT0BI.

EU-059. Nigel/2M0NJW and David/GM4RQI will be on a two man DXpedition and will be attempting to reach the rarest IOTA Island in Britain called St. Kilda. Activity will be between August 22-25th, and callsigns to be used are 2M0NJW/P and GM4RQI. Their activity will be CW/SSB on 20, 30, 40 and 80 meters. QSL direct via 2E0NJW and G4RQI, or via the RSGB bureau.

EU-149. Marc/ON5FP and Jose/ON4CJK will operate as EA1/ON5FP/P and EA1/ON4CJK/P during their visit to Mouro Island, July 23-25th.

Activity will include at least one entry in the IOTA Contest.
QSL via ON4ADN either through the UBA Bureau or direct to:
Geert Decru, St. Laurentiusstraat 18, 8710 Wielsbeke, Belgium.

NA-077. After his first Zone 2 operation (see VE2 below), Nenad, VE3EXY, will spend part of his holidays on the Island of Anticosti in the second half of June. Note that the Island of Anticosti is NOT in Zone 2. His operation from Anticosti Island (CISA QC-001) will be between June 21st (about 1300z) and June 30th (1300z). The callsign to be used is VE2/VE3EXY/P. QSL via VE3EXY. The sunraise/sunset times are: 0742z/2345z. His suggested frequencies are:
CW - 7010, 10107, 14025, 18077, 21025
SSB - 14260, 21260, 7060 (USA split included).
He will always work split (2 kHz CW, 5-10 kHz SSB).

NA-079. Operators Dennis/K7BV, Gary/NW5E, Ivars/KC4PX, Jose/N4IS and Pat/W5OZI will activate the special event callsign, K4T, during an expedition to Fort Jefferson State Park in the Dry Tortugas, June 27th to July 1st. Activity will be on the HF and VHF/UHF bands. The station's site has a Grid Square of EL84, and it is likely a breakable beacon will operate on 6 meters, 50.098 MHz. QSL via KC4PX.

OC-237. A group of YB0s and YB1s call area DXers will be going to Peucang Island, which is located near Krakatau Island, and activate the callsign YE1P between July 21-25th. Activity will be on 80-10 meters (including the WARC bands) on CW, SSB, RTTY, PSK31 and SSTV. For more details, please visit the Web page at: http://www.peucang.org

KH0, MARIANA ISLANDS. Naoyuki, JK1FNL, who was recently active from KH2, will team up with Yutaka, JQ2GYU, and possibly others to visit Saipan Island in early July. Activity will be on 40-6 meters including the WARC bands. More details should be forthcoming soon.

LIGHTHOUSE ACTIVITY. Special event station, N9L, will be operating from several lighthouses along the Door Peninsula of Wisconsin from August 5-14th, including activation of the Eagle Bluff Lighthouse (USA-252) during the National Lighthouse/Lightship Weekend on Saturday and Sunday, August 7-8th. Jim/W5AZN (ARLHS #484) and Patty/W5AZO (ARLHS #485) will be active at a different lighthouse for a few hours each day between 1400-2100z. Frequencies will be centered on 14270 or 7270 kHz (+/-). A QSL for each lighthouse as well as a certificate representing all of the lighthouses will be available to confirmed contacts and SWLs. QSL direct to W5AZN. For complete details of the N9L Lighthouse Expedition, visit the Web page at: http://www.w5azn.com

OJ0, MARKET REEF. Members of the World Wide Young Contesters (WWYC) plan to activate this reef as OJ0YC between September 23-26th. The team of operators include Mike/SM3WMV, Thomas/OZ1AA, Colin/KU5B and Pat/OH6GDX at the moment. The DXpeditions goal is to be a multiplier in the Scandinavian

Activity Contest (SSB), and to be on the air as a serious competing station too. They will also work a bit of RTTY during the contest the same weekend, but the main focus will be on the SAC SSB. Apart from HF, OH6GDX will mainly be focusing on working 2 meters (maybe also 70cm). Activity on 2m will be at least on the FSK441a, CW, SSB, FM modes. Mike promised to work some 6m QSOs too. Since the team consists of students, any kind of help is needed (sponsors and donations). The OJ0YC team now has a Web site up at: http://oj0yc.m3php.net/
QSL via OH6GDX: Patrik Willfor, Langviksgatan 24 B13, FI - 65100 Vasa, Finland.

PACIFIC OPERATION. Ulli, DL2AH, will be on a holiday style operation from Kiribati/Tarawa as T30KU, October 9-18th, and from Tuvalu/Funafuti (T20 callsign not provided yet) October 20-24th. Activity will be on 20-10 meters SSB/RTTY/PSK31 using a FT897 and a Delta-Loop antenna. QSL direct to DL2AH or to the DL Bureau.

QSL INFO AND NEWS.....
QSL TM7BDX via F8BBL. Activity was from the Lighthouse of Cordouan (WLH LH-0271, ARLHS FRA-007, DDFM 33), Ile de Coudouan (IOTA EU-159, DIFM AT-032, DDFM 33).

Bill, W1VV, reports that he is NOT the QSL Manager for ZK1VVV. He has recently received a few QSLs for this station and states that he has no connection with this station.

SPECIAL EVENT. Look for the special callsign 3Z0BLY to be activated from the ORP Blyskawica Battleship Museum (in Gdynia, Poland) between now through July 31st. Activity will be on all bands. QSL to SP2PMW via the bureau.

SPECIAL EVENT. Look for special event station VI3JA to be activated by the members of the Central Goldfield ARC, August 7-8th. Activity is to celerbrate the 150th year of the naming of the Township of Maryborough Victoria, Australia. Operations will be mainly on 3789 kHz SSB and 20 meters SSB/RTTY/PSK. QSL via VK3JA. CGFAR's Web page is at: http://www.cgfar.com

ST, SUDAN. Ghis/ON5NT (in A61) informs OPDX that operators Michael/PA5M (ex-YI/PA5M, 9U5M) and Dane/S57CQ (ex-YI/S57CQ, YI9T, A52CQ) are in the Sudan and will be active for the next several weeks. Michael has been active for about 2 weeks, and Dane just arrived. Both are working for the World Food Programme. Michael is ST2DX (QSL via PA7FM) and Dane is ST2T (QSL via S57DX). Checking the Clusters, Michael has been on 6 meters and 15 meters this past week.

VE2, CANADA (Zone 2). Nenad, VE3EXY, will be in Zone 2 in the second half of June and first weekend in July. He will be active in the following contests: All Asian CW, and Quebec QSO Party. The schedule for his weekend operations from ZONE 2 are:
June 17th (about 2300z) to June 20th (1300z)
July 1st (about 2200z) to July 4th (1300z)

Nenad will use the callsign VE3EXY/2 (Counts as Zone 2 and VE2). His sunrise/sunset times are: 0802z/0010z. QSL via VE3EXY. His suggested frequencies are:
CW - 3510, 7010, 10107, 14025, 18077, 21025, 24897 and 28025 kHz
RTTY - 14090, 21090 and 28090 kHz.
Outside Contest: WARC, RTTY, LF
During Contest: 40,20,15,10 meters
ADDED NOTES: No 6 meters. Outside of the contest, Nenad will always work split (2 kHz CW, 5 kHz RTTY).

YA, AFGHANISTAN. Masa/JG1OWV, QSL Manager and a pilot for YA1D/YA0J, informs OPDX that Sada/YA1D/YA0J is leaving Afghanistan by the end of this month. Your last chance to work him is the upcoming All Asia CW Contest. He will take down all his antennas right after the contest. Masa says, "Thank you for many QSOs during his stay there."

YA, AFGHANISTAN. The "425 DX News" reports that Daniel, DL5SE, will be active as YA0Y from Kabul until September. He will operate with 100 watts into a ground plane. QSL via DL5SE. Looking at the Cluster spots, Daniel has been quite active on CW on 30/20/17/15 meters at various times (anywhere between 0630-0930z and 1400-1900z).

YI, IRAQ. Start looking for Richard, YI9KT, to be active near the City of Al Hillah. Activity will be on 40-10 meters. QSL via SP8HKT.

YV0, AVES ISLAND. Rumors continue to circulate that an activation of this island is coming soon. However, exact dates and list of operators are not yet known.

ZA NEWS AND ACTIVITY. The following is a press release from Martti Laine, OH2BH: THE FIRST ALBANIA DX CONVENTION - ZA1DX
Who would have expected a few years ago that an Albanian DX Convention would soon be reality? Surely Amateur Radio has taken a major leap forward recently; hence this gathering is possible this coming weekend. Some 60 people from more than ten countries are expected to attend - and this includes all new 39 licensees from the recent Amateur Radio training program at the Technical University of Tirana. Last minute check-ins are welcome and the festivities will be held at Rogner Europark Hotel, downtown Tirana (see www.za1a.com <http://www.za1a.com/>). Room booking reference is "DX IS" and it will give you a special room rate. The Convention will open on Saturday, June 19 at 10.00 and end up with a DX Dinner at 19.00. During the afternoon a new Club station, ZA1UT, will be inaugurated at the Technical University. A new Yaesu FT1000MP and Quadra VL1000 station will be aired. Opening words will be by the Vice-Minister of Education and the Rector of the University. Moreover, several donated radios will find their new homes during this coming weekend. Lecturing at the DX Convention will be G3TXF, G3LQP, I8NHJ, K2WR, LA2RR, OH2BH, OH2PM, T93Y and W6UM. Obviously these people will get on with beam antennas - extensive on-the-air activity can therefore be expected, from Thursday evening, June 17 through Wednesday, June 23. QSL ZA1DX via OH2BH."

ZB2, GIBRALTAR. Marc/ON5FP and Jose/ON4CJK will be active from here
July 27-29th (callsigns not provided). QSL via ON4ADN either through
the UBA Bureau or direct to: Geert Decru, St. Laurentiusstraat 18,
8710 Wielsbeke, Belgium.

Well, you could, I suppose. Of course there isn't error correction. The
received print could be cut and pasted from the screen into a text
editor, then saved as the intended file. If you were lucky, you might ge
something.

But 31 baud would be tortuously slow!

> BUT, THEN AGAIN, PSK31 uses vericode, which appears, at first

Also Caps use more bits. Fortunately the people that use all caps on
psk31 don't seem to be the fastest typers.

> BUT, STILL AGAIN, I wouldnï¿½t dream of sending anything but text

The TV is brand new. I already know the noise is coming from the TV.
The question was, weather a high pass filter would suppress the noise
generated from the TV.

Anyone else ever have this problem?

I suspect I've been around a few years more than you and haven't had my ID stolen yet. Now you know I live in a plice state and don't even shred my bills? As you say, I could probably get every bit of information about you also but that would be a waste of time.

So tell us about the scanner laws in Holland? Looks to me like you can't monitor cell phones or wireless phones either. What exactly makes Holland less of a police state than the US? Other than the "coffee shops", that is.

The way your going (read below), you would have troubnle finding your front door if somebody didn't so you where it was if it was in some headers. ;)hehe

But seeing that you must get out of your house now and then to do you work... I would say you have no problem finding the door. It is just seeing where I come from in the headers that is the problem.

> So tell us about the scanner laws in Holland? Looks to me like you

Why would I know anything about Holland, other then reading about it? Oh you don't think I live in Holland do you? Is it the wooden shoes i wear that makes you think that.
Maybe I live in Russia (because of the 'omon' kit I wear from there).... lets see, maybe in the EU. But then again, maybe not..... LOL

But I can tell you this.. it is not Holland.

How about someone posts YOUR prison record?
Still on reporting parole?
Making $50.00 monthly payments on yer fine?
Still stalking, I see.

Somehow that doesn't surprise me.

Try a brute force AC line filter. These 'state of the art' TVs mostly use
switching power supplies. Puts out an amazing amount of trash.

And make the RF cable into a choke (wind around ferrite core or such) at the
set connection, to minimize noise conducted over the outer braid of the
coax.

185. Old SWL Cards and books

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-16 19:03:09 UTC
From: hacklert@hotmail.com
Message-ID: <8b73a9f3.0406161103.40d66f18@posting.google.com>
Source record: 57447

When I was young, in about 1965, my father got stationed in alaska and at the
same time I was given an old hellicrafters swl radio. Being in alaska, we
were very close to europe and I received SWL cards from most of the countries
that were there. I threw them all into a box and after looking at them just
recently, a lot of the countries don't even exsist anymore. I also was sent
a large package from the former soviet union (radio moscow) with pictures of
their country and trying to tell me how great their country was. I probably
got this because my dad was in the Air Force and they noticed the Air Force
Base Return address. Of course he was really mad when we got this propaganda
package but he let me keep it.

My question is: where is the best place to DONATE all the SWL cards and flags
and pennants that I got thru the mail way back then? I will not use them but
I hate to see them go to waste. I know there must be some really good place
that would want them and at the same time other people might have access to
them. If anybody knows a site that is really good at taking care of the items
and making sure they can be seen by others, please forward me an email so I
can get in contact with them. I can remember staying up many late
nights waiting for some of these small stations to go off the air so I can find out
their addresses and send them requests for SWL cards. Most of the
time, I always got a response. But sometimes it took a couple letters to get them to
send the cards.

My email address is: hacklert@hotmail.com and any information would be very
much appreciated..... <TED>

--

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator, getting caught up with our supporters. In the month of August of last year we heard from The Reading, PA Radio Club, W3BN; Joseph Bartzi, Jr., KC8DKF of Columbus, OH; The North Hills Radio Club in Sacramento, CA; monthly contributor William Walters, WA2IBM, of San Jose and monthly contributor Scott Hensley of the Area Communications Team, also in San Jose

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a federally chartered 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1400 with a release date of Friday, June 11 2004 follows in 5-4-3-2-1.

The following is a Q-S-T.

Australia to make big changes in its Amateur Radio service, Greece will welcome hams at the 2004 Summer Olympics and Amateur Radio Newsline celebrates 1400 weeks of service to the world-wide ham radio community. It all comes your way, right now!

(Billboard Cart Here)

**

RESTRUCTURING: BIG CHANGES DOWN-UNDER

Big changes are coming to ham radio down-under. This, as Australia announces some sweeping changes that are about to take place in that nations Amateur Radio service. Owen Duffy reports:

--

The ACA has released their report entitled "Outcomes of the Review of Amateur Service Regulation". The report contains the ACA's intended changes to the Amateur service following stakeholder response to the recent discussion paper entitled "A Review of Amateur Service Regulation."

The key changes are removal of the Morse qualification requirements for all grades of amateur radio license; introduction of a new entry level license (the Foundation License) along the lines of the UK Foundation License, although it will be adapted to suit Australian preferences.

A three tier licensing structure: Advanced, Standard, and Foundation; translation of Unrestricted, Limited and Intermediate licenses to Advanced; translation of Novice and Novice Limited licenses to Standard; a privileges package for the Standard License that is much greater than enjoyed by Novice Licenses today.

A generous privileges package for the Foundation License allows voice or Morse code at low power (10W PEP) using only unmodified commercial transmitting equipment on all of 80m, 40m, 15m, 10m, 2m, and most of 70cm.

Australian participation in CEPT Recommendation T/R 61-01 (reciprocal licensing) is in progress. The status-quo is essentially preserved in respect to higher operating power; interference and interference management built on current arrangements.

Apparatus Licensing as the vehicle for licensing Australian amateur stations (though stations licensed under CEPT Recommendation T/R 61-01 would be class licensed). State significance of callsigns remains.

This has been Owen Duffy for the CQVK project on Q-News Australia.

--

As we go to air, no effective date for these changes to take place has been announced by the Australian Communications Agency. (Q-News)

**

INTERNATIONAL: THE BIG DISPUTE

Two Asian Pacific nations are embroiled in a territorial dispute and Amateur Radio appears to be caught right in the middle. Q-News Graham Kemp, VK4BB, is in Brisbane with the details:

--

A centuries-old territorial dispute between Japan and South Korea is again escalating with the South Koreans placing a group of amateur radio operators on the rocky islets known in Korea as the Lonely Islands. To the Japanese they are the Bamboo Islands.

The radio station, licensed by South Korea, was seen as a provocation by the Japanese. Some amateur radio operators in JA are

said to have interfered with the South Korean stations transmissions.

I'm Graham Kemp, VK4BB, of Q-News for the Amateur Radio Newsline.
--

Kemp says that hams around the world were surprised to hear about the dispute. This is because our hobby stresses development of technologic skill along with friendly international communications. (Q-News)

**

RESCUE RADIO: THE NEBRASKA TORNADO AFTERMATH

Back on this side of the Pacific Amateur Radio operators were on duty aiding tornado-stricken communities in Nebraska and elsewhere in the Midwest. Norm Seeley, KI7UP, picks up the story from here:

--

As we reported last week, a May 22nd tornado virtually destroyed most structures in the small town of Hallam, Nebraska. Hallam is located some 20 miles south of Lincoln and one death there was attributed to the storm.

During and after the tornado ham radio was an important part of the overall emergency service effort. The ARRL Letter quotes Nebraska Section Emergency Coordinator Reynolds Davis, K-zero-G-N-D, as saying that Lancaster County ARES and SKYWARN spotters were activated that evening in response to a report of an approaching front. Within a half-hour, W0NWS at the National Weather Service office was receiving tornado damage reports via the Lincoln Amateur Radio Club K0KKV repeater.

The storm severely damaged a high school in Norris, Nebraska, and plucked the tower supporting the K0RPT repeater's south region receiver from the ground. The tornado went on to demolish additional homes to the northeast. Its path of destruction finally ended south of the town of Bennet.

Once the SKYWARN Nets closed, the remainder of the K0RPT system was put into service to support Red Cross communications between the tornado scene, the chapter house and a shelter set up in a Lincoln high school for residents displaced by the storm. Two ARES nets were activated May 23rd to coordinate damage survey and assessment. They logged reports via K0EOC at the Lancaster County Emergency Operations Center.

For the Amateur Radio Newsline, Norm Seeley, KI7UP

--

Amateur Radio communications support continued for several days. (ARRL)

**

Break 1

More news after a break for you to identify your station. Cue the announcer, please:

"From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the K2SBD repeater serving Long Island. New York."

(5 sec pause here)

**

WITH NEWSLINE: SEND US YOUR ID - PLEASE

The station I-D you just heard was recorded a few weeks ago at the Dayton Hamvention. And it has lead us to an idea.

Would you like to I-D your own repeater or bulletin station here on Amateur Radio Newsline? Well here is how you can do it.

Simply record on a cassette tape the following sentence and include the call sign and location you want to honor.

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the
"xxx"
repeater serving "yyy zzz." The "xxx" is the call
sign. The "yyy"
and "zzz" are the city and state.

Then, take the tape and mail it to Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. As time permits, we will select an audio I-D and include it in the newscast.

All tapes submitted become the property of the Amateur Radio Newsline and cannot be returned.

Again, the address to make yourself a part of this bulletin service is Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. (ARNewsline(tm))

**

HAM RADIO IN SPACE: FIRST EXPEDITION 9 QSO A BIG SUCCESS

AMSAT reports that the first ARISS contact with the Expedition 9 crew on the ISS took place on Tuesday, May 25th. During his first-ever amateur radio contact, Astronaut Mike Fincke, KE5AIT, answered 18 questions asked by the students who gathered at the Erie Planetarium in Pennsylvania.

The contact used the facilities of telebridge station, VK5ZAI, in Australia to assure high quality space to ground communications. It

was deemed very successful as the children applauded and thanked KE5AIT for taking the time to join them from space. We will have more ham radio space related news later on in this weeks newscast. (AMSAT, ARISS)

**

WORLDBEAT: HAM RADIO AND THE 2004 SUMMER OLYMPICS

If you are planning to attend the 2004 Summer Olympics in Greece, we have some good news for you. Foreign radio amateurs from CEPT countries or from countries with reciprocity can use the special prefix J42004 from August 1st to November 15th without any special license from Greek Authorities.

Not only that. Demetre Valaris, SV1UY, says all hams visiting Athens for the Olympics is more than welcome to give a shout on 145.425 MHz with a 88.5HZ access tone. Demetre says that this is so visitors can hook up with Greek hams and share hospitality.

What about visiting hams from non CEPT nations? They will have to contact Greek telecommunications regulators for special permission to operate. (Via E-Mail)

**

RADIO RESEARCH: MCRN TO TEST RADIATION ANGLES

The Marconi Radio Club of Newfoundland station VO1MRC will be conducting an antenna comparison experiment on the 19th and 20th of June and you are invited to take part. Amateur Radio Newsline's Bruce Tennant, K6PW, has more:

--

Each day during the experiment from 0000 to 2400 UTC station VO1MRC will operate a CW beacon on 5269.5 kilohertz. Its purpose will be to determine the relative performance of high and low radiation angles. The antenna in use will be identified by a code in each transmission.

VO1MRC will also be open briefly for 2 way contacts with stations authorized to transmit on 60 meters starting 0000 UTC each of these days and will operate simplex on 5260.5 kilohertz CW. Following this it will transmit on 5327.5 kilohertz upper sideband and receive 5346.5 kilohertz upper sideband and 3807.5 kilohertz on lower sideband.

The experiment was proposed by Marconi Radio Club of Newfoundland and is endorsed by Radio Amateurs of Canada. Its operated under an authorization issued by Industry Canada which is that nations telecommunicastions regulatory body.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

For further information, please check the Marconi Radio Club of Newfoundland web site. That U-R-L is http://www.ucs.mun.ca/~jcraig/5megex.html (RAC)

**

ENFORCEMENT: TO MUCH RF

The licensee of FM station KWNZ, located in Carson City, Nevada, has been fined $10,000 by the FCC. This, for creating ground-level radiation in excess of the permissible public exposure level at KWNZ's McClellan Peak transmitter site.

The CGC Communicator says that the various excuses offered by the licensee were not impressive. For example, KWNZ contended that there was no evidence whatsoever of public use of the particularized ten square foot area where the station exceeded the RFR permitted radiation limits.

According to the FCC, it is not necessary to establish actual public use of the particular unfenced and unmarked]area where excessive power density occurs. The regulatory agency says that public use of an area nearby is sufficient.

(DO NOT READ: More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1533A1.doc (CGC)

**

ENFORCEMENT: AMATEUR RADIO ACTIONS

Now with more enforcement news here's the FCC's Daryl Duckworth, NN0W:

--

Audio report only. Hear it on this weeks newscast at http://www.arnewsline.org
--

More on these issues as the FCC releases follow-up information. (FCC, RAIN)

**

BEST PRACTICES: EMERGENCY READINESS GUIDE FOR LOCAL MEDIA

The FCC's Media Security and Reliability Council has published a new booklet titled the "Readiness Guide for Local Media on How to Prepare for Emergencies." This colorful pamphlet is good for a quick overview of what the media should do in times of emergencies. Its available on the web in both Mocrosoft Word and PDF format. The PDF version is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-

244522A1.pdf. Download the following doc version at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-244391A1.doc. Finally, the generic website for the Media Security and Reliability Council is http://www.fcc.gov/MSRC/. (CGC)

**

ON THE AIR: THE COLLINS COLLECTORS NETS

And if you own vintage ham gear, you might want to become a member of the Collins Collectors Association and join one of their monthly nets. The nets are held the first Wednesday of the month on 3.888 MHz beginning at 7:30 PM in the Eastern time zone and 8 PM in the Central, Mountain and Pacific time zones.

These nets draw hundreds of vintage stations from across the country and are anchored by a "tall ship" AM station in each time zone and you do not need to operate Collins gear to take part. For more information. just tune in. Comments go by e-mail to wa9vrh@mtco.com (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: LLOYD "SIG" SIGMON W6LQ - S.K.

A ham radio operator who developed a public warning scheme that eventually carried his name, has died. This, with word that 95 year old Lloyd Sigmon, W6LQ, became a silent key on Wednesday, June 2nd, following a long illness.

Known to his ham radio buddies as Sig, in 1955 W6LQ perfected a method that allowed the Los Angeles Police Department to issue emergency warnings over local radio stations. At the time Sigmon was an executive with radio station KMPC and wanted to boost station ratings by providing traffic information.

Then Los Angeles Police Chief William H. Parker permitted use of Sigmon's device but only on the condition that it be made available
to any radio station that wanted to use it. He also is dubbed the bulletins as SigAlerts in honor of W6LQ.

The first SigAlert was broadcast on Sept. 5, 1955. It was carried by six radio stations and urged medical personnel to respond to a train derailment outside Los Angeles Union Station. The California Highway Patrol later took over freeway traffic warnings from the Los Angeles Police Department and handles SigAlerts, which now are computerized.

Lloyd Sigmon, W6LQ, was born in 1909 in Stigler, Oklahoma. He was fascinated by electronics and received his first Amateur Radio license at age 14. He died at Green County Assisted Living Center in Bartlesville, Oklahoma, where he had been residing the past four years. (Published news stories)

**

RADIOS LEGACY: THE HISTORIC KGFJ 1230 KHZ TRANSMITTER SITE HAS BEEN SHUT DOWN

The CGC Communicator reports the passing of a different sort. This with the announcement that on May 24th a historic AM broadcast transmitting site was turned off after 80 years of service.

In 1924, radio station KGFJ started broadcasting from the Odd Fellows Lodge Building on Oak Street near downtown Los Angeles. In more recent years, the station call sign was changed its call letters to KYPA.

Shortly after 4 PM on May 24th, Marvin Collins, W6OQI, turned on the new 1230 kHz transmitter. Its signal is diplexed into a tower at the KBLA 1580 kHz transmitter site.

Collins says that the old KGFJ "flat top" antenna had been in continuous use by since 1924. He adds that the old antenna may well have been the last full-time use of a flat top antenna anywhere in the country.

Marv took photos of the old KGFJ site and the new diplexed setup at KBLA, visit Marvin's web page at http://earthsignals.com/Collins/ and scroll to "KGFJ 1230." You can write to Marv at KFIam640@aol.com

(CGC)

**

HAM RADIO IN SPACE: BIG LAUNCH DOLLARS RAISED AT DAYTON

AMSAT says that its Launch Fund campaign now has $93,0000 in it. This, thanks to donations received at the recent Dayton Hamvention including one anonymous donor who matched every dollar collected with another one.

AMSAT North America President Robin Haighton, VE3FRH, says that now is the time to make a final push to reach $110,000 goal. He adds four words that seem to come right out of the Mel Brooks musical the Producers. The four words are - "we can do it." And
Haighton is

confident that they will.

More about the fund and ham radio space exploration is on-line at www.amsat.org. (AMSAT-NA)

**

HAM RADIO IN SPACE: ECHO NEAR COMPLETION

And some more good news from on the ham radio satellite scene. It comes from Jim White, WD0E, who has been testing and performing final integration of the ECHO ham-sat.

White says that as far as he can tell the ECHO team is on track and the new satellite is looking good. He says that there are a few minor items have to be completed before the bird is sent to the Kazakhstan launch site. White says that he is confident that it will be 100% by the time it gets there for the launch. (AMSAT-NA)

**

WORLDBEAT: HFRADIO.NET TAKES LIGHTNING HIT

Due to a system failure caused by a recent lightning strike, the H-F-RADIO dot NET Canadian Amateur Radio Bulletin service has lost its database of subscribers. In order to rebuild it and for subscribers to continue receiving those weekly bulletins, hams across Canada are asked to send an e-mail to webmaster@hfradio.net with the word "subscribe" in the subject line. (RAC)

**

DX

IN DX, K8AQM, reports that his trip to Samoa will take place between July 7th to the 21st. While there he will operate as 5W0TR on 160 through 10 meters using CW, SSB, RTTY and PSK. Also, look for him as KH6BB from Hawaii July 5th and 6th and 22nd through he 24th. QSLs go via K-8-A-A as his Callbook address.

And members of the United Kingdoms Wrexham and District Amateur Radio Society will be on from the Isle of Man from September 1st to the 8th. Station location will be at the discontinued Coast Guard lookout tower at Scarlett Point. Activity will be on all High Frequency bands plus 50 MHz, 70MHz, 144MHz and 432 MHz, at full UK power on CW, SSB, RTTY, PSK and SSTV. More information is on-line at www.gb4iom.co.uk (Various DX sources)

**

THAT FINAL ITEM: CELEBRATING NEWSCAST 1400

And finally this week its time for a bit of a celebration here at Amateur Radio Newsline. That's because this newscast marks 1,400 consecutive weeks that we have been bringing you news from the worlds

of Amateur Radio and personal communications. With some thoughts on this milestone, here's our producer Bill Pasternak, WA6ITF:

--

If you get out your calculator and do the math, you will find that 1400 weeks comes out to be 26 point 923 years. Close enough in our book to say 27. And in ham radio news, I guess we can say that's a
pretty long time.

Back when we still edited on tape I used to wonder how many splices that we made in a year. One day I sat down and figured out that there were about 30 in an average newscast. That was 120 a month or 1440 a year and an awful lot of Scotch splicing tape. Had we stayed on tape it would mean that we would have cut into a piece of audio tape 38,880 times as of today.

But we stopped putting the newscast together using tape almost 4 years ago. Now its done in the digital world using computers and programs like Goldwave and Cool Edit pro. Becoming part of the digital age early on is something we are kind of proud of. Being on your favorite repeater for the past 27 years and never missing a deadline is another.

As we enter year 27 and begin rolling on toward year 28, we pause and renew our simple pledge to you. The promise we made many years ago and which continues to guide our very being. Amateur Radio Newsline will be here as long as you want us and as long as you support us. We exist to serve you and we all consider it an honor to do so.

Speaking for all of the volunteers who make up the world-wide Amateur Radio Newsline team, I say "thank you." Thank you for sharing your
lives with us through the magic of Amateur Radio. Thank you for caring about us through your ongoing support. Most of all, we thank you for being a part of what we like to call the Amateur Radio Newsline family.

To paraphrase a line from the show Chicago. "We simply could not do
it alone."

Again, we thank you.

I'm Bill Pasternak, WA6ITF.

Jim.

--

As one of the anchors who has been here almost from the start, I add my thank-you's as well.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff
for
nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm
Jim
Davis, W2JKD, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

So the profit finally let it go - that's good news. Now what was that club Reagan was in? The owl and bat club? What?

What enforcement letters? There's nothing left to enforce. Tarzan and Doofus have been gone for years. The Red Panty Man is history. On and on - so who got enforced?

188. On the Domestic Front on the air now!

Kiss that Ham radio License Good-fucking-bye Hillbilly!
mauahahahahaahahahahahahahah
by High El

This was fowarded to me by Lloyd. Another ham operator
KF4BZE fowarded it to him. Character is an issue! This Complaint was
filed on Woger, recently.

Original sender: <Dave Wiseman>KB8LZT@hotmail.com
Original date: June 7, 2004 0807 Monday
To: rholling@fcc.gov

Dear Mr. Hollingsworth:

For the last three days I've been getting deliberately jammed on 20
meters
from AB8MQ. Somehow I seem to have offended him. This operator then
used all
kinds of vulgar profanities calling me
a pedophilia and child molester. He made death threats on my person
(I've
recorded it to tape and
would be happy to mail you a copy) then played music (John Lennon,
music)
for an hour (recorded
that as well). I honestly don't know what I've done to offend this
person
but he seems to do nothing but sit and wait for me to transmit so he
can jam
me.

-Sincerely Yours,

Dave Wiseman, KB8LZT

Looking to buy a house? Get informed with the Home Buying Guide from
MSN
House & Home. http://coldwellbanker.msn.com/

Sounds like our Woger all right. Now listen to him lie and squeal!
MUHAHAHAHAHAHAHAHAHAHAHAHAHA

And others' reactions' to the FUCK UP's assertions:

http://www.network54.com/Forum/message?forumid=279169&messageid=1087232534

How odd. Roger managed to reach into the 20M dead zone if you believe
that letter.
by J. D. Kraus
Propagation on 20M is such that signals usually completely skip over
locations which are around 200 miles from the transmitting station.

And that's the rough distance between Wiseman and the ham he allegedly
jammed! You're telling me that Wiseman could jam someone for hours
while that someone was located at a very bad distance for 20 meter
signal propagation????

I think that the letter is a forgery by someone who has no clue about
ham radio.

Posted on Jun 14, 2004, 1:02 PM
---

http://www.network54.com/Forum/message?forumid=279169&messageid=1087235795

And beside that, the guy supposedly being jammed has no 20 meter
priveleges
by Anonymous
He is a TECHNICIAN class licenseee, and it is illegal for him to
operate on 20 meters. I can see him writing to Riley and admitting his
illegal activities.

Geno Paris: You are too stupid to make forgeries. Give the idea up.

http://www.network54.com/Forum/message?forumid=279169&messageid=1087236525

Re: Will the real Woger please stand up?
by Anonymous
> Funny the incident is mentioned on the Arrl web site. sounds like more pissing and
moaning by Woger to me.

Funny you didn't provide a link. That should be trivially easy to do.

Nope, the letter claims that Wiseman was interfering with a Technician Class licensee, and that's just plain idiotic on the face of it. Technician Class licensees are NOT ALLOWED to operate on 20 meters.

For the complainent to admit to that would be for the complainent to admit that he was breaking the law.

Posted on Jun 14, 2004, 2:08 PM

Way to go, FUCKUP! You fucking IMBECILE!
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!

190. Re: Old SWL Cards and books

Awww shucks darn - we missed it.

Ok get the profit to predict when you'll rebroadcast it and we'all all
belly up and take a listen.

Do a google seach for QSL COLLECTION or such. There are guys who scan cool cards and put them on their web pages. You may find one that you feel is deserving.

for all on the google groups - this is of worldwide importance - we are going to be operating field day, we are hoping to reach out to the world

i would like to say a special thanks kf4gah, kg4zuo, ki4bbi and n9ee for all the help making field day 2004 come together. turnout looks like it is going to be great. lets all pitch in a bit, join my net friday night and we will discuss some more stuff related to 2004 n9ee field day in new port richey

73's to all of tampa bay

Don't forget my site, psk31.org

I have to say that this thread was quite interesting, and worthy of the newsgroup (in contrast to the name calling and infantile grade-school playground behavior that is so frequently seen here). It reminds me of the old days before the non-operating hams started using the newsgroups.

All the best, and 73,
Dave

Well it looks like i may have found some of the problem, after tracking down some of the voltages listed in the tech manual, i seem to have 2 x ï¿½PC1037H failed on the RX board, Q10 and Q11 since they are giving out no readings at all. (DEAD)

now does anyone know where i can get hold of 2 x ï¿½PC1037H or there equivlents

thanks all

Mike Lynn

204. spurious signal in IC735

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-18 10:43:33 UTC
From: sb <abracadabra@hotmail.com>
Message-ID: <dHzAc.1514$7n3.1281@reader1.news.jippii.net>
Source record: 57466

Hi!

there are very strong (s9+40dB) spurios signals in my
old
IC735 every 2MHz starting from about 2MHz and up. they
are
strong until about 20MHz, but still clearly heard.
they are generated inside the tranceiver.

anybody knows where to look for the problem?

Any reason to prefer ordering from Allied Electronics or from Mouser, assuming that both claim to stock what I want at similar prices? I've never ordered from either before.

Or is there a still better company with which to deal?

Hello, Alf,

This is a irewall problem, and the solotion depends on the kind of
mode/router you have with your ADSL connection.

These links might be helpful:

Also check the ports
From http://www.echolink.org/firewall_solutions.htm
EchoLink requires that your router or firewall allow inbound and outbound
UDP to destination ports 5198 and 5199, and outbound TCP to port 5200.
Source ports are dynamically assigned. If you are using a home-network
router, you will also need to configure the router to "forward" UDP ports
5198 and 5199 to the PC on which EchoLink is running.

This can be summarized as:
Allow UDP (source port any, destination ports 5198-5199) from Internet to
PC
Allow UDP (source port any, destination ports 5198-5199) from PC to
Internet
Allow TCP (source port any, destination port 5200) from PC to Internet

Solved my problems

I've used both a little. However, just comparing catalogs, I prefer
Allied for the sheer volumne of stuff they carry.

The ARRL Letter
Vol. 23, No. 25
June 18, 2004
[The ARRL has weighed in on behalf of Iowa amateur and ARRL member Jim Spencer, W0SR, of Cedar Rapids, who has suffered severe broadband over power line (BPL) interference for more than two months. A formal complaint to FCC Enforcement Bureau Chief David H. Solomon calls on the Commission not only to order Alliant Energy's BPL field trial system to shut down but to fine the utility $10,000 for violating the Communications Act of 1934 and FCC Part 15 rules. Alleging "ongoing harmful and willful interference to one or more licensed radio stations," the ARRL asked Solomon to intervene "on an emergency basis."]

http://www.uplc.utc.org/index.v3page?p=44489

http://www.uplc.utc.org/file_depot/0-10000000/0-10000/7966/folder/33324/UPLC%20Comments%205_3_2004.pdf

Power companies are in full denial! (Just saying it doesn't make it true.) If you believe what's being said by UPLC, I have some great land to sell you in Florida, and a wonderful bridge investment in New York. (When did the BPL interference spectrum drop to 1.7 MHz ??)

ak

- - - - - - - - - - - - - - THE UPLC STORY - - - - - - - - - - - - - -
SUMMARY
The UPLC generally supports the FCC's initiative to develop rules that will support the deployment of broadband over power line systems that will help achieve President Bush's goal of universal affordable broadband access by 2007.1 The President supports the development of technical standards for BPL towards that goal.2 Utilities and technology providers are poised to meet this ambitious goal and the UPLC appreciates the strong support of the FCC in its BPL proceedings.

The UPLC believes that the definition of Access BPL is potentially over-inclusive and should be slightly revised. The UPLC supports the proposal to retain the existing emission limits at the present time, recognizing that the FCC is proceeding cautiously, even though it has found that the interference potential from BPL is low.

Before the Federal Communications Commission
Washington, D.C. 20554
In the Matter of Carrier Current Systems, including Broadband over Power Line Systems

ET Docket No. 03-104
ET Docket No. 04-37
Amendment of Part 15 regarding new requirements and measurement guidelines for Access Broadband over Power Lines Systems
COMMENTS OF THE UNITED POWER LINE COUNCIL

Pursuant to Section 1.415 of the Federal Communications Commission ("FCC") Rules, the United Power Line Council ("UPLC") hereby submits its comments in response to the Notice of Proposed Rule Making in the above referenced proceeding.3 The UPLC supports the proposal to retain the existing emission limits at this time, and suggests only slight changes to the operational limits proposed for Access BPL systems, as well as the proposed definition of Access BPL. Finally, the UPLC supports the proposed measurement guidelines, which will produce consistent and repeatable results that demonstrate compliance with the Part 15 rules. The UPLC heartily thanks the FCC for its support in developing these rules, which strike a very conservative and pragmatic.

. . . .

The UPLC is dismayed by the misinformation accepted as gospel by opponents of Access BPL systems. Despite apocalyptic predictions that "BPL is a Pandora's box of unprecedented proportions", the UPLC agrees with the FCC that Access BPL devices will not cause the power lines to "act as countless miles of transmission lines all radiating RF energy along their full length."6 These opponents have produced no scientific evidence to show otherwise, and all the measurements in the field contradict their abstract calculations. The industry continues to test and to address these concerns with licensees in areas where systems have been deployed, but there needs to be a rule of reason when it comes to allegations of BPL interference, and the UPLC applauds the FCC for making that message clear in this proceeding.

Definition of Access BPL
The proposed definition of Access BPL systems should be narrowly tailored to apply only to systems used to provide broadband access to the customer premises. As such, the UPLC recommends this slightly revised version of the FCC's language in the NPRM: Access Broadband over power line (Access BPL): A carrier current system that transmits high frequency (>1.7 MHz) radio frequency energy by conduction over electric power lines owned, operated, or controlled by an electric service provider for the purpose of delivering broadband data services. The electric power lines may be aerial or underground, but do not include power lines within the customer premises or in riser conduit within buildings. Access BPL does not include power line carrier systems, as defined in Section 15.113 of the Commission's rules.

. . . .

220. Last Weekend To File FCC Comment

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-20 02:15:47 UTC
From: yea right <spam@spam.spam>
Message-ID: <pan.2004.06.20.02.17.18.449419@spam.spam>
Source record: 57482
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.swap,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

"The limit for an unintentional emitter on HF is 30 uV/m at 30 meters from the source," he said. "If you take a dipole cut for 3.5 MHz and put it in a 30 uV/m field, you'll have a noise reading of S9 plus 16 dB at your transceiver."

The FCC has extended the comment period for BPL. If you value radio, this may be the last and only chance to have your voice heard to stop BPL from destroying your hobby. The FCC has extended the comment period for BPL

Simple instructions are at www.vambo.org/a

Also posted below.....

It is VERY simple to file a FCC comment. Click the link below and enter

04-37

in box #1 (proceeding number) and fill in the blanks. The simplest way to comment is to type your comment into the box on the bottom of the form. Sample comment below.

http://gullfoss2.fcc.gov/prod/ecfs/upload_v2.cgi

If you see fit, please post this to as many groups as possible because numbers count! Please mention this in your nets!

More info at http://www.arrl.org/news/stories/2004/02/12/5/?nc=1

If you can't think of any thing to type or wish to make this as painless as possible, you can cut-n-paste the comment I typed below.

/******************************/

In Writing, I wish to persuade the FCC from allowing BPL to be implemented. The destruction or at the least, deterioration of the shortwave bands is not only a violation of ITU laws that protect international broadcasters from interference and jamming, it will be destroying many people's life hobby. Amateur radio will be reduced to users with high-power amplifiers and large antennas. Emergency communications will be hindered to levels directly responsible for the loss of life. Also, this will hinder military HF comms reducing national security

There are many technologies that make BPL unnecessary. BPL will never be able to carry the high bandwidth demands for mass distribution of video much less the up-and-coming HDTV.

Thank You!

Madison PD is pretty even-handed & tends not to jump to unjustified
conclusions. I suppose in that they reflect the people they serve.

Allied, Mouser, Digi-Key or Newark, doesn't seem to really matter. Sometimes one has an item/brand another doesn't. I often start w/ Mouser then Digi-Key.

What's all this fuss about BPL? Are the fussers trying to
make out that they're CBers who are unable to sort
out weaker signal reception? Ham Radio isn't about
broadcast-quality signals; it's about the technical
challenge of achieving communication under your
own efforts.

CBers might buy their rigs off-the-shelf and send them
back to the shop to be repaired when faulty but not _REAL_
Radio Hams!

Likewise, when there's a bit of QRN around such as BPL, that's no difficulty
for _REAL_ Radio Hams to sort out!

Oh, for God's sake leave Dan out of this. Just because a couple of YOU have been hammered by Riley I guess you think it fun to pick on Dan.
All Dan did was cuss out a couple of deserving individuals, but never did he throw carriers on his detractors, nowhere did he post malicious lies about them or slander anybody's character or go to great lengths to malign his detractors by posting bogus "police reports", "credit reports" or their home addresses. Dan is a bigger man than that and need not stoop to the low level of some Hams we know.
Dan, to my knowledge, has never stalked anybody either over the Internet or via the Ham bands and has been up front and honest about his disagreements. He does not lurk in the background, does not send anonymous magazine subscriptions to those with whom he disagrees nor does he practice making late night hang-up phone calls to their homes.
If Dan disagrees with you he lets you know up front and right now. And he lets it go. Dan has no interest in sending anonymous diatribes to the neighbors of his detractors. He sees no need to research the backgrounds of his detractors nor would he lower himself to making anonymous calls to their employers. Dan is above that sort of low level underhandedness. He tells it how he sees it and lets it go at that.

Apparently there a few scorned Ham ops who want to drag Dan down with them...misery loves company as is oft said. To those few Hams I say, sweep your own doorstep before you concern yourselves with others.

Dan may be controversial and perhaps lets his anger rule on occasion, and yes, he can be confrontative but he is up front and honest. He lets you know where he stands on issues but Dan will never stoop so low as to stalk his critics.
So, with this in mind, so what he got a warning letter from Riley? He was told to watch his language...unlike some of you dudes who were forced to retest or put on notice about malicious interference. Those of you who are guilty of more serious violations might best serve yourselves by shutting up and bearing in mind your own transgressions lest some of us "remind" you of yours.

Carry on, Dan.

Ohio/Penn DX Bulletin No. 665

The Ohio/Penn DX PacketCluster
DX Bulletin No. 665
BID: $OPDX.665
June 21, 2004
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AD1C, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, WA4AA, WA4PGM, W4VQ, KH6BZF, K8YSE, CT1END, DL1EK & The DX News Letter, DL5MO, EA8CAC, F5CWU & La Gazette du DX, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, IK4RUX, JI6KVR & JA-IOTA Islands News, JJ1BDX, LZ1PJ, PA7FM, SM0DTK, UA0MF, UT3UZ, VA3RJ & ICPO, YT1HA and Z36W for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/June, through Sunday, 20th/June there were 200 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5Z, 6W, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V5, V6, V7, V8, VE, VK, VP2E, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

EDITOR'S COMMENTS: Looks like DXing is on a summer decline. There were 200 DXCC entities reported this past week, and 212 and 215 the weeks before. Interesting, will it hit below 200 next week?

3Y0, PETER I ISLAND. It seems everything is a go for Peter I. Activity will take place in January 2005 according to their Web page at:

http://www.peterone.com
"The Daily DX" reports that the team has found new transportation to the island - a newly refurbished icebreaker formally in service of the Chilean Navy (no name provided). Just a reminder that this operation is a very expensive undertaking, and the team is looking for additional financial support and sponsors. More details on the upcoming DXpedition can be found on the Web page listed above.

4W, TIMOR LESTE. Peter, 4W3CW, was heard this past weekend on on 20/15/10 meters CW. Activity was between 0100-1500z. QSL via 4W3CW (QRZ.com).

ARRL FIELD DAY PROPAGATION. Propagation Guru Lee, KH6BZF, reports the following: "Since we have had some doldrums in propagation, there is some light at the end of the tunnel! Forecast data indicates that the 27.5-day solar cycle may peak close to ARRL (FD) Field Day! Flux levels upward toward 100+ level may be expected just prior to the FD. Event on June 25-27, 2004. However, some short skip on 6mtrs and 10mtrs may occur. Let 10mtrs dictate what may be expected on 6mtrs. For HF--both 20 and 17 meters seem to be where the dawn to dusk action will be, pending any solar perturbations which may always occur. Meanwhile, both 80/75 and 40 meters will be the bands to observe from grayline to night to grayline. The 30 mtr band is expected to be open to somewhere during the 24-HR period. Happy hunting." Lee, KH6BZF REPORTS.

CE0, EASTER ISLAND. Scott, AC3A, is expected to be active until June 24th as CE0/AC3A. He does plan to concentrate on 6 meters if the band cooperates. However, Scott will also be on HF during his evenings. QSL via his home callsign (QRZ.com).

GET WELL QUICK! OPDX and its readers would like to wish well-known "QRX DX" Editor Carl Smith, N4AA, a speed recovery. Carl informed his readers that after "failing" a stress test on Monday last week, he was sent directly to the hospital where he was given a heart catheter. This test revealed the main artery in the front part of his heart was 99% blocked. The doctor immediately performed the "baloon/stint" procedure to open up that artery. He is pleased to say that it apparently was a complete success, and he was allowed to come home on Wednesday evening. Once again, OPDX and its readers are glad to hear Carl is doing well and hope to see him back in print after a good rest and recovery.

IOTA NEWS.....
EU-020. Martin, SM0DTK, will be active as SM0DTK/1 from Gotland Island between June 24th and August 22nd. Skeds can be arranged via
E-mail at: sm0dtk@passagen.se
More info on: http://hem.passagen.se/sm0dtk/

EU-045. Thomas, DL5MO, will be on a holiday style operation from Orust Island and will be active as SM6/DL5MO from July 12-23rd. His activity will be focused on 40/30/20 meters. QSL via his home callsign. Visit his Web page for pictures, his QSL card and an online log search (after operation) at:
http://www.dl5mo.de

EU-054. Vanni, IK4RUX, will be active as IF9/IK4RUX from Favignana Island (Egadi archipelago, IIA TP-011) now through June 26th. Activity will be on HF SSB. During this operation other reference numbers could be activated and valid for the IIA Award, D.C.I. or WAIL- ARLHS. QSL via IK4RUX, direct or through the ARI Bureau.

NA-213. Members of the Tennessee Valley DX Association (TVDXA) will activate Dauphin Island using the callsign W4D. This island is part of the Alabama State group. W4D plans on being active about 1900z on Friday, September 24th, and will go QRT sometime on Monday, September 27th. The group will use 100w transceivers with various antennas and plans to be active on 80-10 meters SSB. Operators mentioned are: Barbarra/WA4RMC, Kathy/W4KRY, Lynn/KOMAI, Tom/K4VCM, Greg/WA4NFO, Kenny/AB4GG, Tommie/K4KWK and Paul/WA4AA. QSL via WA4AA (SASE) or bureau. A W4D website will be available to view contact logs.

KH0, NORTHERN MARIANAS (Update). Jim, KG8RP/KH0, Nao, NA8O/KH0, Yutaka, KH0/JQ2GYU, Koko, KH0/JM1MAC and Tomi, WH6CZC/KH0, will be active from Saipan, from July 9-12th. The operation will be on 40-6 meters including the WARC bands, but no 6m EME. Yutaka states, "We are planing to bring a 4-element Yagi for 6m band, 2-element HB9CV for 20/15/10m bands, a Zepp for 30m band, and an ATU + Long Wire for 160/80/75/40/17/12m bands with several barefoot radios, such as FT-897D, TS-480SAT, and so on." QSL info is as follows: KG8RP/KH0 via 7K4QOK, NA8O/KH0 via JK1FNL, KH0/JQ2GYU via JQ2GYU, KH0/JM1MAC via JM1MAC, and WH6CZC/KH0 via JF1UMK. QSL all direct or via the JARL bureau. Please do not send the QSLs to the U.S. QSL bureaus.

KP2, U.S. VIRGIN ISLANDS. The Pina Colada Contest Club will be active as KP2AA from St. Croix during the ARRL Field Day, June 26-27th. Activity will be on 80-2 meters, including Satellite. QSL via K7JA. PLEASE NOTE: Stations not involved in the Field Day competition are reminded of the exchange needed by Field Day stations. If you are at home on commercial power, your report is "1D DX" and if mobile you send "1C DX" to FD stations. More details may be found on the ARRL Web site at: http://www.arrl.org

LIGHTHOUSE ACTIVITY. A team consisting of Dima/RA0LQ, Oleg/RW0LL and Mike/UA0MF are preparing to visit Askold Island's Lighthouse (AS-066, LH-2159, RDA:PK-39) and operate as UE0LLH from July 2-5th. They will participate in the WLH Contest operating barefoot and a R7 antenna. They will be looking for ARLS and RRC/RLH numbers. More exact details and QSL info will be announced at the end of June.

MIA CONTEST. The Mediterraneo DX Club (MDXC), organizer Mediterranean Islands Contest, would like to invite Contester/DXers to join in on the contest which takes place from 1200z, September 18th to 1200z, September 19th. The complete set of rules can be found on the MDXC's Web page at: http://www.mdxc.org/contestmia/rules.htm

OH0, ALAND ISLAND. Operators OH3BHL, OH6JHU, OH6XX, OH8GCW and OH9MM will be active as OH0I during the CQ/RJ DX RTTY Contest (September 25-26th) as a Multi/2 entry. QSL via OH3BHL. They plan on using multiple beams

and vertical arrays on the low bands.

P3, CYPRUS. Skobelkin, RA3AMG, will be active as P3B in the CQ/RJ DX RTTY Contest (September 25-26th). QSL via his home callsign.

QSL INFO AND NEWS.....
Zik, YT1HA, informs all readers of Ohio/Penn DX Bulletin that the special QSL cards for 4N200A, 4N600A and 4N25K will be sent to the printer this week. The cards will be full color and nicely designed by YZ1ZV-Zoki. Also, Zik informs us that the QSL cards for the following special callsigns go to:
4N200A and 4N600A via 4N1A - Operating untill December 31, 2004.
4N25K via YU1SB - Operated between July 11, 2003 and December 31, 2003
4N1A (in contests) via YU1FJK
YT0T (in contests) via YU1FJK
YZ1V (in contests) via YU1AAV
For those who sent their cards, please be patient. You will receive your QSL cards!

CP4BT CORRECT ADDRESS. Claus, CP4BT, is stating that many HAMs are sending their QSL cards to his old address: Casilla 26, Uyuni, Bolivia. The address has changed to: Claus Braun, CP4BT, Casilla 26, Tupiza, Bolivia. Claus says, "Please can you change the city to Tupiza in the most looked for QSL info services." Please pass the word along to all QSL databases.

QSL DS3HWS/5, DS2GOO/5, DS5BSX/5 and 6K2CLF/5 via their home callsigns and bureau. Activity was from Gadukdo Island.

QSL ED8GCR via EA8AKN through the Bureau. Activity was during the DIE Contest. The Gran Canaria DX Group activated for first time the D.I.E. reference: S-349 (Roque del Burrero) from the Gran Canaria east coast.

Gerard, ON4AXU, announced this past week that the logs for his FO, FO/A and FO/M operations are available at: http://www.qsl.net/on4axu

"LZ04KM QSL cards are expected by the end of this month", states Ivan, LZ1PJ. He has uploaded on his web site the online log, QSL card preview, and some pictures from the SSTV activity. The URL address is: http:/www.qsl.net/lz1pj
Ivan also states that he has cleared all the backlog for the other callsigns he manages: LZ75A, LZ02JP, LZ02KM, LZ03KM and LZ100JVA. All future requests will be answered much faster than in the past. LZ1PJ's QSL Policy: "I answer all direct, bureau and e-mail requests. For direct requests, please include SAE + postage / 1 IRC or 1USD is OK/. All cards are 9x14 cm. Please do not send too oversized envelopes. If you don't have a suitable return envelope, an address label is OK. Please avoid sending Bulgarian stamps. Very often the post clerks do not know which stamps are valid."

Special event station CS2004REP now has its logs and an online request form for QSLs available online at: http://www.rep.pt

QSL via CT1REP, by the bureau or direct to: REP AWARD/CONTEST MANAGER, P.O.Box 483, 1112 Lisboa Codex, Portugal.

The logs for the recent TM7BDX operation from EU-159 are now online at: http://www.f5kbw.org/pagesperso/bdxgrp/

QSL via UT7UZZ/p via UT3UZ. Members of the EM0U team (UT3UZ, UT3UV, UT4UO, UT7UW, UT5UAE, UT4UAA and UT4UBS) were active over the past weekend from Ivankiv (for the Ukrainian Districts Award [URDA] Award - KO-16) and Poles'ke (URDA Award - KO-25) districts of Kiev region. UT3UZ address: Alex Arbuzov, P.O.Box 240, Kiev-232, 02232, UKRAINE.

Venco, Z36W, reports that members of the radio club Z37M (Z30M) will once again be at this year's Friedrichshafen in Germany. They will have logs for all club activites (Z37M, Z30M, Z3100IL, Z39A, Z37GBC, etc..) and also the logs for the personal callsigns Z31GX, Z31MM, Z33F (Z3100F), Z36W (Z31JA), Z32XX and Z32XA. Cards will be availble at their stand in Hall 1. Everybody is welcome to visit them.

UPDATE. Jim Reisert, AD1C, updates OPDX readers that the correct QSL Manager for ZK1VVV is W7VV.

SPECIAL EVENT. Look for the special event station ED8ERC to be aired between July 3-10th to celebrate the 2nd Canarias HamRadio Meeting (II Encuentro de Radioaficionados de Canarias). Activity will be on all HF bands SSB/CW, possibly PSK/RTTY and one APRS station on air. QSL via the info on QRZ.com. The special station will be operated by EA8ZS, the Gran Canaria DX Group members and others EA8 operators.

SPECIAL EVENT. To celebrate the Formule 1 French Grand Prix in Magny-Cours, a group will be signing TM0GP from June 20th to July 4th. Activity will be on 80-10 meters as well as 2 meters on the modes of CW/RTTY/PSK31/SSB. QSL to F5KCH via the bureau.

ST, SUDAN. OPDX was informed by Dennis, PA7M, that Michael, ST2DX, will be leaving the country on Saturday the 10th of July. So his last day of activity prbably will be on the 9th. The 10 element log-periodic antenna does a real good job from 30m through 6m. There is also a long wire for 40-160m, but daytime operation on those bands is of no use off course. Problems with his keyer forces him to do more SSB then CW. But he'll try again when it's possible. It's difficult to work stateside during daytime, while during nighttime there's no time to operate because the normal work days are from 6.30 a.m till 6.30 p.m. (but most of the times this is even longer). However, Michael will keep on trying - also on the longpath. The online log and also real audio of the recent 6m openings can be found on the following We page at: http://www.pa7fm.nl
Anyway, Michael has been heard over the past week on 30/17/10 meters. Watch around 10106, 28465 (+/- 30 kHz) and 18153 kHz between 1300-1900z. QSL to PA7FN (direct cards from outside EU with 2 USD or 1 IRC).

TK, CORSICA. Operators OK1FKL, OK1PGS, OK1JFH, OK1TIC and OK1MCS (not sure yet) will be here between June 24th and July 5th. The group of Czech hams will be active from the northest part of Corsica called Cap

Corse (GRID LOC JN42QX, about 600m ASL). Details on the operation and their QTH position can be found on the Web site at: http://www.qsl.net/ok1ofm Their main activity will be to focus on the July VHF/UHF Contest using the callsign TK/OK5DX/p. They will also be active (not during the contest) on HF with a FT100D and vertical antenna. There will NOT be any 6 meters operations. 50 MHz is prohibited in TK. The group will use the following during the contest:
144 MHz: PA 750W out, ANT 2x11 element Yagi ZACH ZZ 211
432 MHz: PA 130W out, ANT 20 element Yagi
Skeds can be made until the evening of June 22nd via E-mail at:
ok1mcs@seznam.cz
-or-
via PR, during their holidays in Corsica SMS:
+420 603 703 722 (OK1MCS) or +420 603 269 296 (OK1FKL)

USI NEWS (UNITED STATES ISLAND AWARD). Members of the Roanoke Valley Amateur Radio Club (RVARC), W4CA, will activate Christmas Tree Island (USI VA-New). This is a new island for the USI, and it is located on Smith Mountain Lake in Virginia. Activity will be on 80, 40 and 20 meters starting 1100z, August 28th and ending 2300z, August 29th. Look for the station on or about 14270, 7270 and 3860 kHz. QSL via CBA for a nice color QSL card from the RVARC.

V44, ST. KITTS AND NEVIS (Special Activity/Event). Andrei, EW1AR, will be active as NC2N/V44, July 5-12th, from the island of Nevis (IOTA NA-104. Activity will be on all bands - RTTY, CW and SSB including participation in the HF IARU Contest. QSL via W3HNK. SPECIAL NOTES: Do NOT send QSL via EW1AR please, this will delay QSL confirmation. Andrei states, "I devote this DXpedition to the 60th anniversary of the Liberation of my home country BELARUS from the faschists occupants on 3rd of July, 1944. I will transmit as NC2N/VICTORY-44 (on SSB). Special Awards will be issued to those hams who make SIX or more QSOs/SWLs on different Bands/Modes. (Applications and shipping fees of 2 USD should be sent direct to NC2N). For those who made Eight or more contacts, no fee required. The Three Special Prizes will be sent for free for those five hams who make most of the QSOs on different Bands/Modes......73s Andrei NC2N/EW1AR (ex NP3D)"

VK9C, COCOS-KEELING ISLAND. Bernd, VK2AI, has announced that he will be active as VK9AA in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via DL8YR. He will also be active in the CQWW DX CW Contest (November 27-28th) (See OPDX.648 for details.).

VP5, TURKS AND CAICOS ISLANDS. Dave, AH6HY, will be going back to VP5 in the fall on another scuba diving trip. So, look for him to sign VP5/AH6HY from Salt Cay, Turks Islands (NA-003), September 23rd to October 2nd. Activity will be on 20-10 meters SSB only. QSL to AH6HY direct or via the bureau. His Web page can be found at:
http://www.qsl.net/ah6hy

VP9, BERMUDA. Kyle, WA4PGM, will be active from Bermuda (NA-005, FM72) as VP9/WA4PGM from July 9-19th for the upcoming IARU and NAQP RTTY Contest. Activity is planned for CW, SSB, RTTY, 160-6 meters and maybe 2 meters.

QSL direct to: P.O. Box only, please do NOT use street address.

WANTED: Retired Military for DXPeditions. Bill, W4WX, is looking for
some individuals that are retired from the Military living near the
Jacksonville, FL, area that might want to go on some "Space A DXPeditions".
If you are retired and willing to make some trips, Bill wants to talk you
about it. E-mail him at: w4wx@bellsouth.net
He is only interested in locals within a couple of hundred miles so they
would be able to meet and chat.

ZK1, SOUTH COOK ISLANDS. Victor, ZK1CG, has been active on 160 meters the
last couple of weeks. He states that since his roomate Dr. Elisabeth is
on an around the world trip until the first part of July, he will try
and listen and call every night on the sked times (using the following
schedule below). Here are the times Victor will try to be on 160 meters
and 40 meters:
0415-0425z 1845.00 +/- QRM SSB
0425-0430z 1825.50 +/- QRM CW Send CW slow and Clear
0430-0440z 7160 to 7170 +/- QRM SSB Seems to be a radio station
on 7160 at this time
0915-0925z 1845.00 +/- QRM SSB
0925-0930z 1825.50 +/- QRM CW Send CW slow and Clear
0930-0940z 7160.00 +/- QRM SSB
Please note that Victor may be delayed going to 40 meters if he is working
stations on 160 meters.

-=-=-=

/EXIT
-=-=-=

If you decide to join us, please register on-line at
http://illw.net/index.html with details of your name, callsign to be
used, lighthouse/lightship, Country, qsl route etc. Although registration
is not compulsory, doing so enables us to maintain a detailed list of
participants at http://illw.net/2004.htm showing QSL address, web
site and any special event calls they may be using. E-mail addresses will
be modified with unicode to minimise harvesting by spammers.

So come and join us in the fun of the weekend, already over 100 stations
have confirmed their participation and numbers are expected to exceed 300,
establish a station at a lighthouse, lightship or maritime beacon.

IF YOU ARE UNABLE TO FIND A LIGHTHOUSE OR LIGHTSHIP TO MAN YOU CAN STILL
JOIN IN THE FUN OF THE WEEKEND BY CONTACTING THE WORLD-WIDE SPECIAL
LIGHTHOUSE/LIGHTSHIP STATIONS.

The more the merrier.

For those of you who don't know ...
The 64 Field Day Event will be held June 26-27,2004. It will start at 2:00pm Saturday and end 2:00pm on Sunday
There will be Ham radio testing Saturday night at 7:00 pm on site. A map of the location for the event is on the 64 website: www.the64machine.net

For any information contact this forum or email the editor at :

kg4coq@hotmail.com

Now a word from Rob,KG4ZUO,chairman of the 2004 Field Day committee about Field Day.....
==========

6 days and counting....here are some things to be thinking about....

food, now I know this group WILL NOT STARVE and wal mart is right there. But lets start talking about food on the nets. we will need the basics, hotdogs, hamburgers, i believe we will have chicken as well. buns ketchup, mustard etc...Lots of water.

remember not only will we need food for us, but also visitors, and park people.

insect repellent- we will all need some for protection.

committee member those who are there friday, we will organize exact meeting times on sat and sunday.

remember friday there will be study time for testing.

so far we are a 3a, pending one other station. Some people have asked to bring a station to set up.I'd prefer that we stayed with just what will be set up by ron, rich, bruno.One exception may be that someone may bring a better psk 31 station than i have.

Subject: [SoFlaHams] Iowa Ham is BPL Interference "Poster Child

NEWINGTON, CT, Jun 15, 2004--The ARRL has weighed in on behalf of
Iowa amateur and ARRL member Jim Spencer, W0SR, of Cedar Rapids, who
has suffered severe broadband over power line (BPL) interference for
more than two months. A formal complaint to FCC Enforcement Bureau
Chief David H. Solomon calls on the Commission not only to order
Alliant Energy's BPL field trial system to shut down but to fine the
utility $10,000 for violating the Communications Act of 1934 and FCC

Part 15 rules. Alleging "ongoing harmful and willful interference to one or more licensed radio stations," the ARRL asked Solomon to intervene "on an emergency basis." ARRL CEO David Sumner, K1ZZ, who signed the letter of complaint, said Alliant Energy has been aware since March 30--the date it installed Amperion BPL equipment in Spencer's neighborhood--that the BPL system was causing harmful interference. While Sumner acknowledges that the utility has been cooperative, mitigation efforts have been only marginally successful, and the BPL system continues in operation, despite repeated requests to eliminate the interference or shut the system down.

"It's simply unacceptable for Alliant Energy to continue to cause interference while they're trying to solve the problem," Sumner said. "Continuing to operate when they know they're interfering is clearly in violation of Section 333 of the Communications Act, which prohibits willful interference."

In late May, ARRL Midwest Division Director Wade Walstrom, W0EJ, called on Alliant Energy to shut down its BPL system "without delay" and not resume operation until "any and all interference issues have been fully resolved."

Sumner's complaint to Solomon cites the Commission's own Part 15 rules prohibiting harmful interference from the operation of an unlicensed intentional, unintentional or incidental radiator to a licensed radio service. "If harmful interference is caused, the radiator may not operate," the complaint says. "There is simply no room for interpretation that would lead to such harmful interference being permissible for any period of time--certainly not 10 weeks."

The letter of complaint summarizes and culminates a series of exchanges and actions in an unsuccessful effort to resolve Spencer's BPL interference. Sumner said the League got specifically involved in Spencer's case after United Power Line Council President William R. Moroney invited the League in mid-March to keep his organization in the loop on any cases of BPL interference that were not being satisfactorily addressed. Sumner said the League was delighted to receive the request, and, when Spencer's case arose, considered it "a good place to start."

Among other approaches, Alliant Energy has tried notching out the HF amateur bands. After notching attempts in late May, Spencer--a retired engineer and former Collins Radio employee--still reported "significant levels" of BPL interference on some bands and power line noise on 160 meter and 80 meters. Sumner says it's ironic that, while Spencer has suffered from serious--and unresolved--power line noise for some time, the BPL noise overall has been far worse--by 6 to 12 dB on some bands. That's just contrary to assertions the National Telecommunications and Information Administration made in its recent comments in the BPL Notice of Proposed Rule Making (see "NTIA Claims BPL Could Help Alleviate Power Line Noise". At one point, the ARRL also requested that Alliant Energy disable its system within a half-mile of Spencer's location and to coordinate additional mitigation testing with him.

An Amperion contractor indicated that the notching--or "power

masking" remains a "beta procedure" as well as "somewhat labor intensive." The contractor, Tom Luecke, indicated to Spencer in early April that he had cranked down the BPL system's gain "a notch below where I would like to have them" on three units closest to Spencer's home.
Although claiming Amperion's equipment to be FCC Part 15 compliant, "We are not a radio silent technology, nor do we claim to be," Luecke conceded. "Put another way, you can hear our signal, but we strive not to interfere with ham operators on the ham bands." He said his company has "a relatively good history" with ham operators in the vicinity of BPL deployment sites. "I'd like to think that the majority of apprehension about Amperion's technology lies in misinformation," he added.
Sumner said UPLC representatives have made good-faith efforts to persuade Alliant Energy to comply with the FCC rules." The League's complaint also points out that Spencer "has cooperated fully and patiently" with Alliant Energy's and Amperion's fruitless efforts to eliminate the interference, which Spencer has documented extensively. The BPL partner companies' best efforts to date notwithstanding, Sumner said, the time had come to say enough is enough.
"The situation in Jim's case is egregious, and it's been going on for 10 weeks," he said. "If this is the best we can expect when a BPL system causes interference, then the only answer is to prevent them from being deployed."
The letter of complaint calls on the FCC to notify Alliant Energy "immediately to cease operation of their BPL devices in accordance with ï¿½15.5(c), and to follow up that notification with a
Notice of Apparent Liability."
For additional information, visit the "Broadband Over Power Line (BPL) and Amateur Radio" page on the ARRL Web site. To support the League's efforts in this area, visit the ARRL's secure BPL Web site.

Announcing the N9EE Repeater Group's first Amater radio testing session !!!

When : Saturday, June 26th 7pm during field day.
Where : Werner Boyce Salt Springs State park (9120 Old Post rd) Port Richey, Fl
We will have testing for all Amateur license classes (elements 1-4)

If you are interested in testing please bring the following:
$12 cash,exact change
2 forms of Valid ID (ex: drivers license social security card)
2 photo copies of your drivers license or valid photo ID

If upgrading, please bring your original license and 2 copies or completed CSCE's and two copies.

the reason for the copies is that we will not have access to a copier at field day.

also bring 2 #2 sharpened pencils.

Any questions or to reserve a testing seat

It's That time of the year again--Field Day, and we've put together,
what I believe is going to be a great Field Day. This year we are
going to be at Werner Boyce Salt Springs Park located behind Wal-Mart
on Ridge and 19 in Port Richey. If you think you are going, please
Email me at sixfourfieldday@yahoo.com.

We will be in need of food and drink, night time operators, cw
operators, and we are thinking about having ve's, if you are a ve
contact me at the sixfourfieldday@yahoo.com so we can advertise the
testing sessions.

We have plenty of equipment, if you want to dx, we have beams, lots of
em' and wires and verticals. Oh and we are only 100 yards from the
Gulf, we even have small boat access right behind the operating area.

I will email a map this week and another update.

We look forward to seeing you there!

==========

The 2nd annual 64 Repeater Group Field Day Weekend will be held on the
last weekend of June. (June 26-27,2004) Fun starts at 2:00 pm Saturday
and ends Sunday at 2:00 pm.

We need Cw operators as well as Voice operators to man the radios during the 24 hour period.
Come and enjoy this great Emergency Communications Exercise.
Needed equipment include a 10 foot step ladder and PL259 coax connectors. We currently have all the radio equipment we need.

Last year we had over 50 Ham operators and their families at our event.
The 64 Field Day Weekend will be located at the new Boyce Park approx. 1 mile North of turn to "Hooters" .

Off US 19, 1 block South of Ridge Rd.to "Bay Dr." on the West side of US 19. Head West on Bay Dr. To the 4-Way Stop Signs.This is "Old Post Rd.". Turn Right (North) and follow Old Post Rd. past the 8 foot fence gate and beyond the start of the dirt Road. This is Boyce Park.

Ahead of you will be a intersection to the right.Field Day site will be directly ahead of you in large white office trailer and area.Parking will be along the side of the road .There will be no parking in front of the Field Day Site as there is no room to park at the Site trailer except for handicapped persons with State placards.

Talk-in will be on the 146.640 Repeater.Setup of equipment will start at 9:00 AM.We will be needing people to help in the setup as well.

If interested in helping setup,operating,or need any other info please contact me at the above email address or Rob,KG4ZUO at sixfourfieldday@yahoo.com

Thankyou for your time...

P.S. Please feel free to pass this email along to anyone whom might be interested...

The 2nd annual 64 Repeater Group Field Day Weekend will be held on the
last weekend of June. (June 26-27,2004) Fun starts at 2:00 pm Saturday
and ends Sunday at 2:00 pm. We need Cw operators as well as Voice
operators to man the radios during the 24 hour period.

Come and enjoy this great Emergency Communications Exercise.

Needed equipment include a 10 foot step ladder and RG-8 type coax and
rope and PL259 coax connectors. We currently have all the radio
equipment we need.

Last year we had over 50 Ham operators and their families at our
event.

The 64 Field Day Weekend will be located at the new Boyce Park.

Off US 19, 1 block South of Ridge Rd.to "Bay Dr." on the West side of US 19. Head West on Bay Dr. To the 4-Way Stop Signs.This is "Old Post Rd.". Turn Right (South) and follow Old Post Rd. past the 8 foot fence gate beyond the start of the dirt Road. This is Boyce Park.

Ahead of you will be a intersection to the right.Parking will be along the side of the road .There will be no parking in front of the Field Day Site as there is no room to park at the Site trailer.

Talk-in will be on the 146.640 Repeater.Setup of equipment will start at 9:00 AM.We will be needing people to help in the setup as well.

If interested in helping setup,operating,or need any other info please contact me at the above email address or Rob,KG4ZUO at sixfourfieldday@yahoo.com

Thankyou for your time...

P.S. Please feel free to pass this email along to anyone whom might be interested...

Hope to see you all at the 640 Field Day !! June 26-27 2004 .

One thing about Mouser is that they have no minimum order via internet and
their shipping is very fast.

Wowee Airy, Most of us get our real communications achievements working field day and contests, know what I mean Bean? BPL isn't QRN either Bubba. It is grade A certified RF Interference that we just do not need. Depending on you're QTH (station location) It could be absolutely overwhelming.

Butch KF5DE

On an order for some military-style connectors I found Allied's price was
quite a bit higher than Newark's.

Kenwood TS 480 online?

Anyone using a Kenwood TS 480 on line?

If so could I have the details to try it out remote.

three words for you: pot kettle black

you don't like trolls, filter them!
The less recognition they get, the faster they go away (kinda like on ham
radio, eh?).

WELCOME !!

This group is called rec.radio.amatuer.misc It's for talking about
ham radio and the rather eccentric old gentlemen residing thereon.

Unfortunately of late, every nutcake crystal-rubbing, bunny-hugging, tree-
sitting, tofu-eating, Volvo-driving, whale-watching, New-Age,
backyard-preaching, Bible-thumping, god-bothering, bigfoot-chasing,
spoon-bending, remote-viewing, star-gazing, reverse-swearing,
reptile-fucking, carpet-munching, fudge-packing, toad-licking,
goat-sucking, Clinton-loving, flame-trolling, pamphlet-peddling,
horoscope-reading, alien abductee seems to think it's fun to post his
or her juvenile dreck into r.r.a.m.

Not only that, but we're also plagued by every goddam hypocritical,
brain-dead, mega-dittoing, Reagan-worshipping, Newtie-following,
Clinton-bashing, Hillary-hating, gun-hugging, miltia-joining, bunny-
bopping, forest-raping, earth-paving, river-damming, species-
exterminating, ozone-trashing, pickup-with-gun-rack-driving,
Medicare- killing, tax-avoiding, mind-controlling, chip-in-yer-butt,
urban-legend-quoting, trickle-downing, "liberal"-hating, gay-bashing,
femiNazi-spewing, hate-spouting, Bible-quoting, Moral Mafia,
jack-booted,cross-burning, Klan-joining, Commie-baiting,
conspiracy-theorist, neo-Nazi, crypto- Fascist, radical-right-wing
ditto-head Liberty Net fruitcake that comes down the pike.

Then, when a few of us shred these senile fathead
refugees from 14.313 and 75 Meters to bits by debunking
their favorite fantasy, they start whining like stuck hogs.

Please lurk before you make a flaming asshole of yourself, then:
If you still can't stand the heat, stay the hell out of our newsgroup.

-------> "This is not a gentle place.

242. Can a kenwood commercial mic work on a kenwood amateur radio?

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-22 18:23:34 UTC
From: Evan Platt <evan@TheObvious.espphotography.com>
Message-ID: <c8ugd05tbhojlsml03ikr59ttphnc7du6p@4ax.com>
Source record: 57354

My mike broke for my Kenwood TMG-707 ham radio. A replacement mike is about $20 on ebay, as well as is a commercial palm mike. I much prefer the look of the commercial hand mike - I don't need all the buttons or functions.

Does anyone know if the commercial 8 pin modular mike will work on an amateur radio? Kenwood didn't have an answer either way...

Thanks.

Evan

243. Shithead Cop

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-22 23:22:58 UTC
From: llortamai <llortamai@lycos.com>
Message-ID: <dlfhd09dhbav9in4lg8rff3ueiubgci772@news.trace.llortamai>
Source record: 57355
Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc

So this asshole cop pulls me over today and starts asking me why I have a scanner in my car. I tell him it's a hobby and that NJ state scanner law states that having a scanner in your vehicle is not illegal unless it's used for commiting a crime or evading police. Which is true. It's says so right here:

http://www.siscanner.8m.com/laws.html

and here:

http://www.maxpages.com/frequencies/NJ_Laws

and here:

http://www.fordyce.org/scanning/scanning_info/nj-laws.html

That wasn't good enough for that asshole, so after he writes me for not having a seat belt on, he tells me that the "NJ scanner law stuff is hogwash" and that unless I'm a tow truck driver, EMT, fire fighter....(insert own bullshit) that I can't have it in my car and that he has 30 days to decide if he wants to charge me with the crime of having it in my car.

What should I do? I know for a fact that it's not illegal and this asshole harrassed me just cuz he was bored i suppose.

One thing you could do is go back and read the responses you got when
you posted this the last time. That might help. About a year ago,
wasn't it?

LOL!!!

Here I was thinking... holy crap... he posted the same thing as he
did last year.
Then I read your reply.
Way to go Tad!

So this asshole cop pulls me over today and starts asking me why I
have a
scanner in my car. I tell him it's a hobby and that NJ state scanner
law
states that having a scanner in your vehicle is not illegal unless
it's used
for commiting a crime or evading police. Which is true. It's says so
right
here:

http://www.siscanner.8m.com/laws.html

and here:

http://www.maxpages.com/frequencies/NJ_Laws

and here:

http://www.fordyce.org/scanning/scanning_info/nj-laws.html

That wasn't good enough for that asshole, so after he writes me for
not
having a seat belt on, he tells me that the "NJ scanner law stuff is
hogwash" and that unless I'm a tow truck driver, EMT, fire
fighter....(insert own bullshit) that I can't have it in my car and
that he
has 30 days to decide if he wants to charge me with the crime of
having it
in my car.

What should I do? I know for a fact that it's not illegal and this
asshole
harrassed me just cuz he was bored i suppose.

One thing you and the other morons that fell for this could do is not be so easily trolled in the future.

Your good buddy Cumbucket Curmudgeon is responsible for the post you're all replying to.

Next time you see him, ask him why Steve Gielda booted his dumb ass off Cotse and who was responsible for it.

He's just lashing out because it just so happened to be me.

Actually this one is beyond a troll. Excessive morphing and posting
substantively identical articles. Granted each one is a news story, but
the articles contain only text from news stories and if the user wants that
posted he should post it as links all in a single post rather than as 20
separate posts each just containing a news story. It's a slightly gray

issue of BI, but we decided that it was abusive if continued and because it is gray warned our user first.

/steve

Lol an annually repeating troll huh .. Thats a new one.
I suppose the possibilty exists that the same bored,asshole cop pulled him/it
over once again.

This is surely deliberate, to ensure that you won't miss an alarm
by having turned the volume down to nil. Our Sony clock radio is
the same. If you want to turn the volume lower than this minimum,
you have to cancel the alarm first.

Amateur Radio Newsline™ Report 1401 June 18, 2004

Now, Amateur Radio Newsline report number 1401 with a release date of Friday, June 18 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new ham-sat is made ready for launch and the B-P-L struggle continues. Find out the details on Amateur Radio Newsline report number 1401 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ECHO PREPARED FOR LAUNCH

The soon to be launched ECHO ham radio satellite has arrived safely at the launch complex in Russia and is being made ready for launch. This, according to Chuck Green, N0ADI, who is traveling with the bird to the launch facility. Bill Pasternak, WA6ITF, is here with more:

--

According to Green, once he and the team arrived at the launch site, the satellite shipping containers were opened and placed in the clean room. ECHO was taken out of it's shipping case and set up for completion. The bottom antennas were then installed.. So was the bottom solar panel, magnets, and corner reflectors.

ECHO was then powered on and the team successfully communicated with it over a hard wire connection from a computer. The four two meter receivers and the two 70 cm transmitters were all successfully tested. And that's good news for everyone waiting for the new hamsat
to take its ride into space.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, in Los Angeles.

--

Currently the planned launch period for ECHO is four weeks beginning June 28th. Once in orbit the command teams will be working together to assure everything is working OK and get ECHO into its initial 'normal' modes as quickly as possible. After that it will be open to the users in the ham radio community. (AMSAT)

**

THE BPL FIGHT: AN UPDATE ON WHAT'S HAPPENING IN THE USA

The fight to keep Broadband Over Powerlines from going nationwide continues. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here
with the latest:

--

With summer now here, expect the Broadband over Power Line Internet access issue to heat up - especially as more people get a chance to look over the latest filing from the National Telecommunications and Information Administration.

The federal agency, which advises the White House on telecommunications policies and oversees radio spectrum used by government agencies, weighed in with more BPL comments in a June 4 filing with the Federal Communications Commission.

And the American Radio Relay League and others who've analyzed the comments say it's clear the political considerations are overshadowing the engineering data which raises many questions about the viability of BPL.

In its filing with the FCC, the N-T-I-A's policy makers now call BPL a win-win situation for all and make what some call an outlandish claim - that deployment of the technology could actually lead to reduction, that's right, reduction of power line noise.

Now, the engineering types who've been studying the BPL and doing all kinds of test measurements are really scratching their heads trying to make sense out of that. The N-T-I-A filing also contains this comforting assertion for BPL opponents. It says that the current power line system is responsible for even greater local interference risks than what BPL would bring.

And, it says, B-P-L operators would implement procedures to eliminate any harmful interference.

The stack of complaints about BPL test sites and assertions by a lawyer representing one of the large utilities testing the technology might lead some to question that reassurance.

A source tells Amateur Radio Newsline the FCC has failed to "properly direct" BPL complaints to the appropriate FCC regulatory office for action. And, the source says, commissioners questioned about that haven't offered any explanation.

And a lawyer who has commented in writing to the FCC about some of the BPL complaints his utility company received claimed there was no basis for them, essentially saying the amateur radio operators making them don't know what they're talking about.

One thing the NTIA did suggest in its filing is the exclusion of certain bands and frequencies in specific geographical areas to protect critical government systems.

Does that suggest an agency confident BPL won't be an interference source?

The American Radio Relay League and others who've been vocal in this fight suggest otherwise.

They say BPL is far from a done deal and they're hopeful that the FCC's extension of reply comments to June 22 will net some helpful information. And, they say, they're not giving up or going away quietly.

In the meantime, there is a sense BPL is on a fast-track at the FCC where the majority of the commissioners view it as an engine to help stimulate the economy.

Could the FCC act on the BPL issue before the November election?

Anything is possible. And some close to the BPL debate say if the Bush administration believes it will generate a much-need bump in the public opinions polls or at the ballot box...well, you get the idea.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Mark will continue to monitor the B-P-L situation and report back in future Amateur Radio Newsline reports. (ARRL, CQ, Repeater Journal, Published news reports, others)

**

THE BPL FIGHT: AUSTRALIA REACTS TO THE BPL CHALLENGE

The United States is not the only place planning to introduce this controversial Internet access technology. Proposals for Power Line Communications or Broadband over Power Lines in Australia have become a concern many spectrum users down-under. This includes the Wireless Institute of Australia which is that nations Amateur Radio national society. From Brisbane, Q-News Graham Kemp, VK4BB, reports:

--

WIA President, Michael Owen, VK3KI has said that the WIA's position in relation to B-P-L is that it supports increasing broadband access and broadband competitiveness in Australia, but in a way that does not cause interference to legitimate users of the High Frequency spectrum. The WIA supports the development by the ACA of policies for BPL that protect existing users.

The WIA believes that one of the problems associated with B-P-L is that trials on a limited basis are not good indicators, and that the full effects of a problematic technology will not be seen with such trials. The WIA considers that B-P-L will not really serve the community's long run needs because of its limited bandwidth. A deep fibber network is to be preferred to using long runs of power lines.

The WIA has appointed a team to deal with this issue. WIA President has appointed Phil Wait, VK2DKN the director responsible for developing and advocating the WIA's position in relation to BPL. He has asked Owen Duffy, VK1OD Barry White, VK2AAB and David Wardlaw, VK3ADW to assist Phil, as the WIA's BPL Team.

--

A report on a recent small trial of B-P-L in the city of Hobart to some 4 houses and 2 floors of one building is on the WIA website. (Q-News)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the VE9BSQ repeater serving St. John, New Brunswick, Canada.

(5 sec pause here)

**

RADIO RULES: COMMISSION ADOPTS SPECTRUM SHARING PLAN FOR L AND S BAND

The Federal Communications Commission adopted a spectrum sharing plan for low earth orbit satellite systems in the 1.6 GHz and 2.4 GHz bands. The so-called Big Leo birds. And here's how it will work

In the 1.6 GHz or "L-band," mobile-satellite service operators with satellite systems that utilize code division multiple access and time division multiple access technologies will share 3.1 megahertz of spectrum at 1618.25 to 1621.35 MHz. At "S-band," the Commission allocated the 2495 to 2500 MHz band to fixed and mobile except aeronautical mobile services, in order to provide additional spectrum and to accommodate the relocation of Multipoint Distribution Service channels 1 and 2.

The commission says that its new spectrum sharing plan will further the agency's goal of efficient frequency utilization by increasing the number of providers offering services to consumers over the same spectrum. It will promote the deployment of more innovative services to consumers. (FCC)

**

ENFORCEMENT: COUNTY HAS DONE NOTHING WRONG

The FCC says that a complaint that a county is using ham radio for its routine business is without merit. The agency's Daryl Duckworth, NN0W, is here with more:

--

Duckworth: "A complaint concerning Bell County Communications
Center
and club license W5BEC was dismissed. There is no showing that this
station is operated by anyone other than amateurs, nor is there a
showing that it is there a showing that it is used or intended to be
used for routine county business."

--

W5BEC is the club station license issued to the Bell County Emergency
Operations Center in Belton, Texas. Its also the call sign of a wide
area two meter repeater that covers much of central Texas. (FCC,
RAIN)

**

ENFORCEMENT: STAY OFF 10 METERS

Meantime, the FCC's crackdown on 10 meter unlicensed intruders
continues. This time the agency acts in a New Jersey case. Again,
the FCC's Daryl Duckworth, NN0W:

--

Duckworth: Auto Elite Transportation of Morristown, New Jersey, has
been sent a warning notice about a vehicle of theirs; truck number
2113, as being the source of unlicensed radio transmissions on 28.085
Mhz."

--

Auto Elite was warned that continued unlicensed operation of radio
transmitting equipment without is a violation of Section 301 of the
Communications Act. That it could subject the operator to fine or
imprisonment, as well as seizure of any non-certified radio
transmitting equipment. Monetary forfeitures for this kind of
violation normally ranges from $7,500 to $10,000. (FCC, RAIN)

**

ENFORCEMENT: SAN DIEGO'S 96.9 MHZ PIRATE REACTIVATES

According to a news bulletin from Chris Carmichael appearing in the
CGC Communicator, San Diego's 96.9 MHz pirate is back on the air.
Chris says that there is no news on the location of the transmitter,
but he believes that will only take the Commission a short time to
figure out. (CGC)

**

ENFORCEMENT: SPAMMER GOES TO JAIL

A New York state man who sent out millions of "spam" e-mails has been
sentenced to three and a half to seven years in prison. This

according to a May 27th news release from that states Attorney General's office which said that Howard Carmack, known as the "Buffalo Spammer," received the maximum sentence for 14 counts of identity theft and forgery.

A spokesman for New York Attorney General Eliot Spitzer said that Carmack sent out hundreds of millions of bulk e-mail messages. That he flooded inboxes and saddled Internet providers with millions of dollars in costs. But it was his use of stolen identities and forged addresses that caused action by state prosecutors. New York has no state laws specifically dealing with spam. Carmack was found guilty of violating state forgery and identity-theft laws in April.

Internet provider EarthLink Inc. won a $16.5 million judgment against Carmack last year, and EarthLink officials testified in the criminal trial as well. (Published news reports)

**

EMERGING TECHNOLOGY: EARTHLINK VS. PHISHERS

Meantime, EarthLink claims that it has developed a program to fight phony websites like this,. The sites, called phishers are those designed to deceive e-mail users into providing personal information such as passwords and credit card or Social Security numbers.

Phisher sites pronounced "fishers" but with a leading "p" are called
that because they "fish" for personal information that can be used in identity theft. They work by telling an Internet user via e-mail that there is a problem with the service-provider account and providing directions to a Web site for clarification. The link takes the user to a hoax Web site that may be a perfect copy of a real page used by Earthlink, eBay or another legitimate business. That is where the user is deceived into providing personal information.

EarthLink's anti-phisher program will rely on a list of known fraudulent sites. When a subscriber responds to the e-mail message, he will be linked instead to a special Web page that warns the e-mail is a fraud. The site also will provide a chance to report the hoax attempt.

EarthLink says that it receives about 40,000 telephone calls or e-mails each month from subscribers who have received one of the fraudulent e-mails. (Earthlink)

**

HAM RADIO BUSINESS: A SEARCHABLE CQ MAGAZINE ARCHIVE

Finding an article or an advertisement in a back issue of CQ Magazine is about to become only a mouse click away. This, as CQ Communications and Buckmaster Publishing announce plans to create a searchable on-line archive of CQ magazines back issues.

Buckmaster, which produces the Hamcall CD has for decades filmed issues of CQ onto microfiche for use by researchers and hobbyists. Buckmaster also provides advanced scanning and searching technology for on-line posting of documents for major corporations. Now this same technology will be applied to back issues of CQ.

As currently envisioned, searches will be free, while access to reading and printing specific pages will require a subscription at a nominal fee. Eventually Buckmaster plans to have every issue of CQ available dating back to the magazine's first issue in January 1945.

A beta test version covering CQ from 1990 to 2002 is already on-line. The archive may be accessed at http://hamcall.net/cgi-bin/cqcgi. (CQ)

**

WITH ARNEWSLINE: YHOTY NOMINATIONS CLOSE JUNE 30TH

And a reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award closes midnight on Wednesday, June 30th. If you are planning to nominate a youngster for this years award or, if you want to update a previous years nomination -- and have not yet done so -- you have only about two weeks left to do so.

The Young Ham of the Year Award program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states. He or she must have made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org.

Again, the cutoff for nominations this year is midnight on June 30th. The award presentation takes place in August at the Huntsville Hamfest in Alabama. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: INSTANT MESSAGING EXPANDING WORLDWIDE

Wonder where some of your ham radio buddies are these days? Maybe they are now using Instant messaging instead of 2 meter FM. Norm Seeley, KI7UP, has more:

--

According to Tech Web News, Instant Message use is growing steadily among corporate workers who use free services from companies like America Online, Microsoft, and Yahoo to send quick text messages to coworkers, family, and friends. And by 2008 closer to 80 percent of corporations worldwide are expected to use either public or private Instant Messaging networks.

A recent study by The Radicati Group says that by 2008 the number of Instant Message users worldwide is expected to reach 670 million. Business wise, this equates to revenues in the $413 million range.

Even so, the percentage of people using public networks and private networks is expected to remain the same. That's at 88 percent public and 12 percent private, respectively. The reason: Its hard to get people to pay for what someone else is giving away for free.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, reporting.

--

Ham radio groups are also turning to Instant Messaging. According to Internet postings, it comes in handy when there is a net to be held and propagation goes away. (TechWeb Online)

**

HAM INTERNET NEWS: THE VHF REFLECTOR BACK ON LINE

And speaking about instant messaging, or almost instant messaging, news that the VHF Reflector is back on line. This, according to Bob Vaughan, KC6SXC, who oversees the systems operation.

In a posting, Vaughn explained that the W6YX server that hosts the VHF Reflector suffered a disk failure and was off line for the past month. Vaughn says that the team has now recovered the data from the failed disk and has put the system and the Reflector back on-line. (VHF Reflector)

**

ON THE AIR: KY REPEATER NEEDS A NEW HOME

The Repeater Journal reports that the Danville, Kentucky, 146 point 655 WD4DZC repeater is looking for a new site. According to trustee George Griebe, WQ4Z, the tower supporting the systems antenna is to be taken down and will not be replaced.

Griebe says that the Wilderness Road Amateur Radio club which sponsors the repeater plans to keep it on the air from a temporary location with reduced coverage. Meantime the club is continuing its

search for a suitable, high level, wide coverage permanent site. (Repeater Journal)

**

THE SOCIAL SCENE: OHIO IN JULY

Turning to the ham radio social circuit, the 7th annual OH-KY-IN hamfest is slated for the July 24th at the Diamond Oaks Career Development Center in Cincinnati Ohio. The event will feature commercial vendors, a flea market and much more. Information is on line at www.ohkyin.org or by e-mail to n8bv@juno.com. (OH-KY-IN)

**

THE SOCIAL SCENE: COLORADO IN JULY

And the Northern Colorado Amateur Radio Club will hold its 2004 Superfest at the Budweiser Events Center in the Larimer County Fairgrounds on July 17th. Talk-in is on the 145.115 Mhz repeater with a 100 hertz tone access. For information on this one contact Willis Whatley, WA5RVL, at his Callbook address. (E-mail)

**

INTERNATIONAL - GREECE: HAM RADIO AT THE SUMMER OLYMPICS

Some more good news for foreign radio amateurs visiting Greece for the Summer Olympic Games. From the August 1st through September 15th hams from CEPT signatory nations will be permitted to operate in Greece without the need to submit any papers for a license. They will also be allowed to use the special prefix J42004. Meantime, Greek radio amateurs can use the special prefixes SX2004 or SY2004 through the 15th of November in celebration of the games. (GB2RS)

**

DX

In D-X, word that MM0AFJ will be on the air from the Island of Harris. This, from the 27th of June until the 2nd of July, mainly in the mornings on 80 to 10 meters CW and SSB. There may be some activity on 160 meters in the evenings. Requests for skeds should be sent via e-mail to m0afj@tiscali.co.uk. QSL direct to MM0AFJ at his Callbook address. (RSGB)

Also, IK4RUX reports he will operate portable IF9 on HF SSB from Favignana between the 19th and the 26th of June. Side trips to other islands in the Egadis group as well as some lighthouse operations are also possible. QSL to the operators home call or via the bureau. (RSGB)

**

THAT FINAL ITEM: HAM RADIO HONORS THE MEMORY OF PRESIDENT RONALD REAGAN

And finally this week, ham radio finds a way to honor the memory former President Ronald Reagan. Here's Bruce Tennant, K6PZW with the
rest of the story:

--

Two suburban Los Angeles area radio clubs are joing forces to honor the memory former President Ronald Wilson Reagan. This, by operating Field Day in his honor from the Reagan Library in Simi Valley, California.

According to Peter Heins, N6ZE, the two groups joing forces to honor the late United States president are the Ventura County Amateur Radio Society and the Conejo Valley Amateur Radio Club. The Ventura County group has operated Field Day before from the Reagan Library. This year, the Conejo Valley club will be joining with them for the first time.

Heins says that 2004 is the fourth year a special event will have been held at the Reagan Library using the special N-6-R call sign. The previous three were dedicated to all members of the former first family. This years Field Day operation will be specific in its remembrance of President Reagan who died of Alzheimer's disease on
June 5th at age 93.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Field Day 2004 is the weekend of June 26th and 27th. Visitors to the Reagan Library will be able to listen in on amateur radio communication, talk to amateur radio stations located in other countries, and find out more about obtaining an FCC Amateur Radio License of their very own.

Also, the complete Field Day rules are on-line at the ARRL website. Its in cyberspace at www.arrl.org (N6ZE)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937,

Arcadia, California 91066.

Again, the cutoff for submitting nominations for this years Young Ham of the Year Award is midnight on June 30th. The award presentation takes place in August at the Huntsville. Full details are on our website at www.arnewsline.org

Also, don't forget Field Day the weekend of June 26th and 27th. We'll see you on the air.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don
Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

269. Ham Radio Deluxe v1.4 (build425b) now available

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-25 16:42:51 UTC
From: igoruberwald@home.nl
Message-ID: <e9b53b2a.0406250842.1eae38fb@posting.google.com>
Source record: 57381

Hi all,

The Ham Radio Deluxe Development Team is pleased to announce the release of Ham Radio Deluxe v1.4 (build425b).

This FREEWARE package is available from:

ftp://www.ham-radio.ch/kits/beta/1.4/HamRadioDeluxeVersion014b425.exe

and

http://www.ham-radio.ch/kits/beta/1.4/HamRadioDeluxeVersion014b425.exe

Changes since v1.3:

Macros now applied much faster, very noticable on Yaesu systems.

More IC-7800 support.

PSK31 Deluxe input/output level popups not initialising correctly has been fixed.

Added sound controls via the Tools/Soundcards menu.

IF Shift for ICOM: 746/746Pro/756Pro/756ProII/R75/7400.

Changed many ICOM sliders to show 0 - 100 instead of 0 - 255.

Made some parts of Mapper faster.

Added Digital-in (S/P DIF) sliders to Soundcard menu.

Added improved direct frequency entry, new option in the Tuning menu.

Reworking of band definition logic. The concept of locked definitions has now been removed, instead there is a set of default definitions and you can do what you want with them, similar in approach to the Favourites. Also the default custom band definitions are no longer shipped.

Changed Scan Favourites to Scan Frequencies, also reworked some of the internal logic.

Reworked some Mapper logic, mainly tidying up lose ends.

Made the DX Cluster window dockable at the bottom of the main HRD window.

Added a Web Page option - HRD can now upload a web page by FTP, substituting tokens in the web page template with the current

frequency, mode and radio model. Simon has added a page to his website as a trial- the URL is http://hb9drv.ham-radio.ch/radionow.htm. Note that we are still working on this.

Added the HRD Cluster Updates window which configures information sent to the HRD Cluster service on www.ham-radio.ch. The HRD Cluster web pages which are generated from this data are still being written.

HRD Remote - access your radio via the network - http://www.ham-radio.ch/forums/viewtopic.php?t=786

A logbook with QRZ.com lookup function .

The DX Cluster window now has a Submit Spot option

#########
You must have the Microsoft Data Access Objects (DAO) installed on your PC to be able to run the logbook.

If you get an error message if you try to open the logbook window then here is the kit to install:

ftp://www.ham-radio.ch/kits/dao/dao35.zip

Unpack to your hard disk, then start setup.exe from disk1.
#########

Anyone interested in using this FREE software is invited to join the Ham Radio Deluxe User Community at http://www.ham-radio.ch/forums where you will meet a friendly and knowledgeable group of people who will be able to help you with (most) problems you may encounter.

145, Pete/Igor PH1PH - G7ECN for the Ham Radio Deluxe Development Team.

270. UPLC on BPL: ignore armchair amateurs who still use vacuum tube transmitters

Newsgroup: rec.radio.amateur.misc

Good troll job, Chris.

" Moreover, these systems will incorporate adaptive interference mitigation capabilities that will effectively remedy any interference that might result to fixed and mobile operations in the High Frequency (HF) band (1.7-80 MHz)."

The "effective remedy" claim reminds me of the meeting I attended years ago before Texas Gulf started its phosphate mining operation in Beaufort County, NC. Everyone was pleased when the company categorically stated that the little fishing creek near their mine would not be affected and would remain "pristine" after their operations began. Yes, I do remember that Texas Gulf liked to use that word "pristine" in describing the results of their wastewater filtration!Within a year of operation, they had destroyed all fishing in the little fishing tributary to Pamlico sound, and soon they were destroying even the commercial fishing in the sound itself. But by then, Beaufort County had become dependent on their business, so little was done about it. "Abatement" and "adaptive interference mitigation" has the very same ring as the empty promise to maintain the purity of our nice fishing stream. But we sure would like to believe you Chris; trouble is, existing tests have already proven it's a lie. The mitigation just won't work. It's just a radio communications vs. big-business backed misuse of the power lines for profit option. And the truth is, the vast majority of people in this country don't need it and won't use it. A very bad trade-off; only the greedy could love it.

ak

Amateur Radio Newsline™ Report 1402 June 25, 2004

The following is an advisory and not necessarily for air. Ladies and gentlemen, Amateur Radio Newslines' Support Fund Administrator, Andy Jarema, N6TCQ:

--

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator, getting caught up with our supporters. In the month of September of last year we heard from Benton Bonney, W4PE of Orlando; monthly contributor Joseph Bartzi, Jr., KC8DKF of Columbus, OH; the St. Charles, MO ARC, WB0HSI; monthly contributor William Walters, WA2IBM, of San Jose; monthly contributor Scott Hensley of the Area Communications Team, also in San Jose and the Anchorage ARC.

Of special mention was support received in memory of the late Roy Neal, K6DUE, by the Brackett family of Cerritos, CA. Our thanks to Sharyn, Jim, KE6FVN, David, KE6OPK, and Lynn, WA6HBS.

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1402 with a release date of Friday, June 25 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Changes coming to ham radio in New Zealand and maybe to the 40 meter band here in the United States. Find out the details on Amateur Radio Newsline report number 1402 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: A NEW HAM RADIO IN ZED-L

Big changes appear to be in store for ham radio in New Zealand. This, as the current licensing system is replaced by one test and one class of ham radio operator. ,Jim Meachen, ZL2BHF, is in Auckland

where its all taking place:

--

Here's the bottom line. Our current New Zealand Amateur Radio licensing system is being renovated. We now have only one class of ham radio license in Zed-L called the General Amateur Radio License. This is just one of many changes coming to ham radio down-under as New Zealand radio amateurs discover the full outcome of their regulatory authority's review of the Amateur Radio service. It's all good!

The changes started on June 17th when a new revised Schedule attached to the Zed-L license came into effect. A Schedule here in New Zealand is kind of like a new set of rules. That's the first step. Other changes will take effect over the next 18 months or more. Many long standing problems are being eliminated and some of the changes are believed to be world firsts. Under the new structure there will be only one grade of Amateur operator license in New Zealand. That's the General Radio License that I mentioned earlier. One license means only one test needs to be administered.

A newly-licensed amateur will have immediate access to all amateur bands below 5 MHz and to all amateur bands above 25 MHz. After getting experience over 3 months and with at least 50 contacts logged, access is then permitted to all amateur radio bands.

All existing Limited Amateur licensees automatically became General Amateur licensees on June 17th irrespective of what is written on their existing licenses. There being only one license grade, callsigns will no longer indicate a class. There is already an established procedure to request a change of callsign if a licensee so wishes.

All amateur bands remain the same but a newly-extended Low Frequency band 130 to 190 kHz is being listed for the first time as an amateur allocation.

The permitted maximum transmitter power output for an amateur station on all bands is 500 watts P-E-P. With only one figure, the maximum power level in New Zealand is now mode-independent.

How about visitors to New Zealand? Touring hams holding a current amateur certificate of competency, authorization, or license issued by another administration, may operate an amateur station in New Zealand under a General User Radio License for visitors. A licensed visitor will be granted similar privileges to a New Zealand resident station for a period not exceeding 90 days. The present country-to-country reciprocal license agreements will disappear in time as more countries directly recognize the licenses issued by other administrations. This will make cross-border travel by radio amateurs a lot easier than it is today.

There are now minimum rules and restrictions for Amateur Radio in New Zealand and the future is positive.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, reporting from Auckland.

--

With one license exam, one license grade, and with new and simplified procedures, New Zealand telecommunications regulators say that they have positioned that nations Amateur Radio Service for an exciting future. (ARNewsline(tm), ZL2BHF, Q-News)

**

RESTRUCTURING: FCC RELEASES NPRM ON 40-METER CHANGES

The FCC says pending changes in the 40-meter amateur band as a result of the 2003 World Radiocommunication Conference will improve spectrum efficiency. It said so in a rule making notice dealing with the 40 meter band. Norm Seeley, KI7UP, has the latest:

--

The ARRL Letter reports that this remark came in an FCC Notice of Proposed Rule Making in ET Docket 04-139. This is an inquiry that seeks public comments on proposed rule changes to complete domestic implementation of various World Radiocommunication Conference allocation decisions made in 2003. Among them the future of the Amateur Service 40 meter allocation.

The regulatory agency says that it anticipates that administrations in I-T-U Regions 1 and 3 will, in the near future, authorize phone emissions in the 7 point 150 to 7 point 200 MHz band segment. The FCC notes that the ARRL has requested that the United States frequency segment for phone emissions be expanded to 7 point 125 to 7 point 300 MHz. The FCC says that authorizing voice operations in this band segment would permit same-frequency US-to-DX contacts, resulting in increased spectrum efficiency.

The N-P-R-M also addresses the deployment of Earth Exploration Satellite Service-Active spacecraft in the 70-cm band. The Commission says that this operation should not cause harmful interference to, nor claim protection from, any other services allocated in the band in the United States. This includes the Amateur Satellite service as well as any others.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Comments in the proceeding are due July 16, with reply by August 2. Interested parties may view the entire NPRM, file comments and view comments filed in ET Docket 04-139 via the FCC's Electronic Comment

Filing System at www.fcc.gov/cgb/ecfs/ (ARRL)

**

RESTRUCTURING: NO VANITY CALLS IN THE UK RIGHT NOW

Vanity callsigns 'are unlikely to be introduced in the United Kingdom before March of 2006. This, according to the Radio Society of Great Britain which says that for the last three years it has been in discussion with licensing authorities over the introduction of such a program for U-K amateurs.

The latest word is that telecommunications regulators have informed the RSGB that due to software issues it is unlikely that vanity callsigns can be introduced before March 2006. In other words, the waiting goes on. (RSGB)

**

More news in a moment, but right now its time for you to identify your station. Linda Reader, N-7-H-V-F, if you please: "From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W7FP repeater serving Salt Lake City, Utah."

(5 sec pause here)

**

THE BPL FIGHT: ARRL JOINS IOWA HAM IN BPL INTERFERENCE STRUGGLE

The ARRL has joined in the fight on behalf of Iowa amateur and ARRL member. This, following complaints from Jim Spencer, W0SR, of Cedar Rapids, that he has suffered severe Broadband Over Powerline interference for more than two months.

According to the ARRL Letter, a formal complaint to FCC Enforcement Bureau Chief David H. Solomon calls on the Commission to order Alliant Energy's B-P-L field trial system to shut down. It also demands that the agency fine the utility $10,000 for violating the Communications Act of 1934 and FCC's Part 15 rules.

Alleging that the ongoing interference is both harmful and willful to one or more licensed radio station the ARRL asked Solomon to intervene on an emergency basis. ARRL Chief Executive Officer David Sumner, K1ZZ, who signed the letter of complaint, said Alliant Energy has been aware since March 30th. Thats the date it installed Amperion BPL equipment in Spencer's neighborhood and the interference began. (ARRL)

**

ENFORCEMENT: EX-KG6IRO FINED $10000 FOR UNLICENSED OPERATION

A man who challenged the FCC and the southern California ham radio community has been fined $10,000. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the latest on a person who the F-C-C has told to stay off the air:

--

The FCC has issued a $10,000 Notice of Apparent Liability to Monetary Forfeiture -- that's a fancy way of saying a fine -- to Jack Gerritsen, the at least temporarily former KG6IRO. This, for operating a radio station in the Amateur Radio Service without the authorization from the FCC to do so.

In a June 15th letter to the Bell, California, former licensee, the regulatory agency notes his past record of non compliance with, among other things, its orders to keep off the air. It also notes his previous conviction for interfering with police radio communications in 2000 and the November 14, 2001 decision by the FCC to set aside his ham radio ticket based on complaints about the operation of his stations. Kit also raises questions regarding his qualifications to be a Commission licensee in light of his 1999 arrest and 2000 conviction on the police radio jamming charges.

At the time of the license set aside Gerritsen was warned that he has no authority to operate radio transmitting equipment. That doing so would be considered to be a violation of Section 301 of the Communications Act and could subject him to monetary penalties or imprisonment.

But on December 9th 2001, the Bell, California Police Department notified the FCC that it had received complaints against Gerritsen for making radio transmissions. On December 28th of 2001 the FCC's Los Angeles Office issued a warning letter to Gerritsen for unlicensed operation, and basically told him to get off the air. On January 2, 2002 Gerritsen replied and asserted that the set aide of his license was improper. On January 29th, the Bell Police and the California Highway Patrol arrested Gerritsen on a probation violation charge. On May 7th of 2002 he was found guilty of the parole violation and sentenced.

Soon after his release on July 28th of 2003 the FCC began getting complaints of unauthorized transmissions over local Los Angeles area amateur, business band and public safety repeaters. The complaints alleged that the person making the transmissions identified using the call letters KG6IRO. An investigation was launched. This lead to an agent positively identifying Gerritsen on November 6, 2003 as a person holding a transceiver while the investigator recorded the radio transmissions he was making. The investigation continued with the FCC identifying Gerritsen as the interference source on November 7th 2003 and on February 9th of this year.

Now, based on what the FCC cites as conclusive evidence it has levied the $10,000 fine against Gerritsen for willful and repeated

violations of Section 301. As usual, Gerritsen was given the customary 30 days to pay up or to file an appeal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Word is that Gerritsen has responded to the FCC with a demand that the agency rescind the fine. He reportedly claims that his license granted on November 14th 2001 has not been terminated, revoked or in any way modified to prevent him from being on the air. (FCC)

**

ENFORCEMENT: THE FCC ENFORCEMENT LOG

Gerritsen is not the only ham radio enforcement story making news this week. With more, heres the FCC's Daryl Duckworth, NN0W:

--

DO NOT READ: Audio report only. Hear it in the newscast at www.arnewsline.org

--

More ham radio enforcement news in upcoming Amateur Radio Newsline reports.

--

ENFORCEMENT VICTORVILLE CA PIRATE STILL ON THE AIR

A pirate broadcaster in Victorville, California, is still operating full time on AM 660 and FM 91.3. This, in defiance of FCC actions to shut it down.

Back on March 31st, the FCC issued a $20,000 fine to alleged station owner Stanley Mark Mayo. This, for willful and repeated violation of Section 301 of the Act for operating radio transmitting equipment without the required Commission authorization.

None the less, the stations remain on the air leading to speculation that another level of enforcement action might be taken. One that could lead to seizure of the broadcast equipment and jailing of those who put the stations on the air.

For a look at the Commission's action on these stations, see www.fcc.gov/eb/FieldNotices/2003/DOC-246123A1.html (CGC, others)

**

RESCUE RADIO: A 100 WATT TRAVELERS INFORMATION STATION AT LAX

The FCC has granted a request by the managers of Los Angeles International Airport for a ten fold power increase to their Travelers Radio Information Radio service. On December 4, 2002, managers filed the application that asked to increase power from 10 to 100 watts. The reason for the increase was to facilitate the airport's efforts to provide emergency communications to the traveling public in the event of a terrorist attack. The FCC has now granted the 100 watt request, due, it says, to the circumstances involved. More on this story is on-line http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-3843A1.doc (CGC)

**

THE SOCIAL SCENE: NEBRASKA IN JULY

Turning to the ham radio social scene, Nerbraska's Pioneer Amateur Radio Club will hold its flea market on Sunday, June 11th. The venue is the St. Charles Parish Center in North Bend. For more information e-mail mehaffey@dtnsped.net (E-mail)

**

THE SOCIAL SCENE: MARYLAND IN JULY

And the BRATS Hamfest and Computer Fest will take place July 25th at the Timonium Fairgrounds in Timonium, Maryland. This is one of the biggies that features more than 500 outdoor flea market spaces, hundreds of indoor vendors, free ham radio exams and much more. There is lots of information on this one on-line. You will find it in cyberspace at www.bratsatv.org (Press release)

**

HAM RADIO AND THE 2004 OLYMPICS: THE ATHENS 2004 AWARD

Athens 2004 Olympic Games Awards will available for all radio amateurs and short-wave listeners who make or log a requisite number of contacts with stations in Greece. This, during the period of the 15th of May until the 30th of September.

Special prefixes J4, SX and SY count 10 points each, normal SV stations count 5 points each and the Radio Amateur Association of Greece's HQ station SZ1SV counts 50 points. A total of 250 points is required for the Bronze Award, 350 for the Silver and 500 points for the Gold Award.

The address for applications is RAAG Award Manager, PO Box 3564, 102 10 Athens, Greece, or see the RAAG web site: www.araag.org/award2004.html (RSGB)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**
AN ARNEWSLINE FOLLOW-UP: MILITARY APPRECIATION DAY

A follow-up to a story we ran several weeks ago. Thanks to the efforts of several amateur radio operators in Ft. Wayne, Indiana a message of hope and appreciation was sent via the airwaves to our military personnel around the world. Newsline's Jack Parker W8ISH has the details:

It's official. By proclamation, May 29th, is officially Amateur Radio Military Appreciation Day in Fort Wayne, Indiana. The event was organized to honor and show appreciation to those that serve and have served in the military and related auxiliary groups. Planning for the event started last spring and quickly grew into a nationwide effort as organizer Emery McClendon KB9IBW spread the word to amateurs and MARS operators in the US and around the world.

The key to success centered on what Amateur Radio could do to let our Military members know that people supported them. Unlike written letters, amateur radio allowed Americans, in their own voice and words, tell the troops how much they care.

To get lots of public input, event organizers searched for a special event location. The Fort Wayne Wizards baseball team got into the game by offering up a spot at their stadium and a home game crowd. The effort grew momentum when radio volunteers from three Allen county amateur radio groups joined the ranks to spread the good word.

The amateurs ran three Echolink stations, IRLP, and two HF stations along with PSK31. The event scored local media coverage from newspapers, radio and network TV stations. Indiana Governor Joe Kernan, a former Vietnam POW and Indiana's senior Senator Dick Lugar both sent proclamations. They were just two of several proclamations read in a special ceremony before the first pitch of the baseball game. Many of the 65-hundred fans on hand, took advantage of the amateur radio connection to express their support to the military stationed around the world.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH

--

The Fort Wayne hams say their mission was a success. They now plan to make Amateur Radio Military Appreciation Day an annual event. (ARNewsline(tm), KB9IBW)

HAM RADIO ON THE INTERNET: THE AOL RADIO COMMUNICATIONS FORUM

If you use America Online to get your e-mail and have never explored the Radio Communications forum pages, then you are missing half the fun. Almost since the day AoL took to Internet, the Radio Communications Forum has been a part of the service, and its not just limited to ham radio operators either. No matter what you radio hobby interest, there is probably a board for you. C-B. Scanners. You name it. There's a place for you.

So the next time you sign on and hear the famous words -- "you've got mail" -- type in the keywords radio communications and join the other radio hobbyists around the world who make this area of AoL their cyberspace home." (ARNewsline(tm))

**

HAM RADIO IN SPACE: AN ORBITAL FIELD DAY

Ham radio space travelers Mike Fincke, KE5AIT, and Gennady Padalka, RN3DT, may participate in Field Day from the International Space Station if time permits. ISS Ham Radio Project Engineer Ken Ransom, N5VHO, sent Field Day operating instructions and pass times to the ISS support team at Johnson Space Center. If they were on, Fincke should have been operating as NA1SS. Padalka would likely have signed RS0ISS. Both stations would be classified as 1 Alpha operations. (ARISS)

**

HAM RADIO IN SPACE: ITS A GIRL

And less we forget, a word of congratulations to Astronaut Mike Fincke and his wife Renita on the birth of their second child. Tarali Fincke was born on Friday June 18th with KE5AIT himself making the announcement from the orbiting I-S-S. (N1ORC)

**

THE EDUCATION FILE: THE 2004 TAPR - ARRL DCC

On the educational agenda, the 2004 TAPR and ARRL Digital Communications Conference will be held September 10th to the 12. The venue is the Airport Holiday Inn in Des Moines, Iowa and the planners say that are now accepting papers for the conference proceedings. You do not have to be present at the conference to have your paper included in the proceedings.

Submissions are due before August 10th. Send them to Maty Weinberg at ARRL Headquarters, 225 Main Street, Newington, Connercticut. The zipcode is 06111 and you will find more conference information on the web at www.tapr.org/dcc (TAPR)

**

WORLDBEAT - INDIA: A NEW HAM RADIO INITIATIVE

In world news. India's national Amateur Radio society says that it plans to conduct various programs to promote Amateur Radio as part of a disaster mitigation program in many venues across that country. Many local radio amateurs and clubs across India plan to back this National Institute of Amateur Radio initiative and also take part in this program. (NIAR via Q-NEWS)

**

WORLDBEAT - SCOTLAND: RSGB DISTRICT NAME CHANGES

And some major changes to the two Radio Society of Great Britain Scottish Regions have been announced. Region 1, previously known as Scotland West and the Western Isles, becomes Scotland South and the Western Isles Region 2, previously known as Scotland East and the Highlands becomes Scotland North and the Northern Isles.

As a result of these changes, two new RSGB districts will be added to Region 1. These are District 15 to be called Lothians and District 16, the Borders. The Deputy Regional Manager for District 15 is Dave Stockton, GM4ZNX. (GB2RS)

**

DX

In D-X, word that IZ3EFL is currently active as S79DF from the Seychelles. Look for him during his evening hours on 20 meters SSB. He expects to remain there for quite some time so QSL as directed on the air. (GB2RS)

And PA5M is now in Sudan and will be active in his spare time as ST2DX. He will be there for about one month. QSL is via PA7FM. (GB2RS)

**

THAT FINAL ITEM: D-DAY AND HAM RADIO - NEW ORLEANS STYLE

And finally this week, the story of ham radio helping to celebrate a national holiday, southern style. It took place in New Orleans and Don Wilbanks, AE5DW, is there with the rest of the story:

--

The weekend of June 5th and 6th the Jefferson Amateur Radio Club, based in Metairie, Louisiana operated W5D, a special event station to commemorate the 60th anniversary of the D-Day invasion at the National D-Day Museum located in downtown New Orleans.

Event co-chairman Keith Barnes, W5KB reports that by all measures it was a rousing success. Just over 600 contacts were made and the station display was very well received by visitors and Veterans alike. The hams manning the booth didn't miss many opportunities to

talk up amateur radio.

The display, prominently located in the main entrance hall just past the front door, featured a large collection of World War II vintage military radio gear. Among the visitors to the station were former New Orleans Archbishop Philip Hannan, himself a World War II vet and member of the 82nd Airborne. The Archbishop actually jumped with the 82nd on D-Day.

Also stopping by was Louisiana governor Kathleen Babineaux Blanco. She even sat at the radio and made a contact.

Both Archbishop Hannan and Governor Blanco signed the commemorative poster along with World War II veteran radio operators and World War II veteran hams. The poster will be made into the commemorative certificate for those stations making contact with W5D.

For more information on the special event, along with pictures of the station and vintage radio display, take your web browser to the Jefferson Amateur Radio Club's website at www.w5gad.org. To find out more about the National D-Day Museum visit www.ddaymuseum.org.

From New Orleans, I'm Don Wilbanks, AE5DW for the Amateur Radio Newsline.

And their statement, "armchair amateurs that still use vacuum tube transmitters" shows their stupidy and ignorance. First, only a very small percentage of amateurs use vaccum tube transmitters, and second, it what does that have to do with the problem of BPL interference, which does exists even if the idiots at UPLC says it dosen't. As far as the FCC chairman, he wouldn't know a transistor from a doorknob and is probably just waiting for BPL to get rolling so he and other top FCC officials can move on to cushy, high paying, do nothing jobs in the BPL industry as payback for pushing this crap down our throats.

279. Kenwood TS-440 PLL Fix.....Best way to remove goop? What areas can one ignore?

Hello,

Just got done slaving over a TS-440S that has the well known VCO problem and can see it will take 10 hours or so to clean the VCO board using the technique that I am using. I read the tech service bulletin and it says it should take an hour, so I must be doing something "wrong".

I am using a tool that a dentist uses to clean teeth which is pointed and curved so you can get into tight places. Is this the best tool? If not what is?

Also, are there areas that one can do a sloppy job of removing the potting compound and are there areas that you should REALLY focus on to make sure it is clean??

Is it necessary to replace any components or can one "clean" the VCO PCB and re-align?

Any and all help and tips appreciated.

Thanks

Jim

I have two HTX-202 2 meter HTs in mint condition.

They come in the original box with manual, antennal,
wall charger, newly refurised 7.2 volt battery and belt
clip. Aesthetically and operationally they are a 10 of 10.

$105 firm ships conus.

30 money back guarantee if shipped back in original
condition.

Thanks for reading this post.

I think it was much quicker and dirtier. Based upon the premise that technican's time was the most expensive item and that spare parts were in stock, the idea was to remove all of the parts with an desoldering station, pull them out as best they could with no concern for damaging them and putting in new ones.

Dump a glob of hot glue in, wait for it to cool and retune the PLL. This could be done in about an hour.

Having done the eqivalent mod on an R5000, I can say the other method, carefully removing the glue while trying not to damage anything, takes a lot more time and patience. It took me 4-5 hours with a tweezer and magnifying glass and I only crunched one disk capacitor.

George Bush and his followers love all of that stuff. They also appreciate
the Chineese workers living under guard in concrete block dormatories where

they work 18 hours a day for 15 to 30 cents per hour - and then often aren't paid (hey, pay for your own housing and food at 15 cents per hour). Over 400,000 Chineese workers killed by industrial accidents or from disease caused by industrial work in 2003. Some commit suicide, but, what's good for Bull Moose is good for America.

I wonder what country is going to be accused of "weapons of mass distruction" next to divert attention. You can bet it won't be North Korea. Follow the money trail.

Best regards from Rochester, NY

Hi!
As most hams will know DRM (digital radio mondiale) is the upcoming digital shorwave broadcast standard. There are two different decoders at the moment: the commercial by Fraunhofer - http://www.drmrx.org/ and an open source project at http://www.sourceforge.net/projects/drm/
The open source decoder included a transmitter mode in the current CVS version. With it you are abled to transmit slide show pictures but no voice as there's no free DRM compatible AAC encoder. You also have to modify your tranceiver for the 10 kHz bandwidth signal.
Now HB9TLK modified this software and included Hawksoft's LPC-10 audio compressor - http://www.hawksoft.com/hawkvoice/ - to the DReaM proejct. As LPC-10 allows very high compression rates (of cource not at HIFI quality) the signal fits into a normal SSB channel so you don't even need to modify your transceiver's filters.

Of course this is not a DRM compatible mode as it doesn't use AAC compression and doesn't have the required bandwidth but it seems to allow digital voice QSOs on HF with a standard PC/transceiver only.

DReaM runs under Windows and Linux and is released under the terms of the GPL licence. You can download the binaries and the sources for free under http://www.qsl.net/hb9tlk/hamdream
Links:
http://www.qsl.net/hb9tlk/hamdream
http://www.sourceforge.net/projects/drm
http://www.hawksoft.com/hawkvoice

I also mirrored hamdream on my server as QSL.NET seems to be quite slow at the moment...
http://www.df1paw.de/hamdream.zip

some sort of shortened helical dipole with an ATU.

Do you know?

Yes, in fact it was a 6 ft pole with lumped inductance forming the end loading for the so-called "feeder" , which in reality was a single 30ft length of insulated wire, end fed from the transmitter via the Joymatch ATU and tuned against earth.
I understand that due to the highest current portion of the wave being along this "feeder", with highest voltage being in the lumped inductance, most of the useful part of the signal was radiated by the "feeder" rather than the antenna itself!
Nevertheless, the Joystick had its converts in those amateurs who found it allowed them to operate from locations where normal sized antennas were frowned upon or lack of space made it impossible to erect.
Whether they ever compared it to an end-fed random length of wire, I am not sure.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th/June, through Sunday, 27th/June there were 201 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1U, 4W, 4X, 5B, 5N, 5R, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9N, 9V, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J7, JA, JD/o, JT, JW, JY, K, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TI9, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VP2E, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO. Operators Gerry/IZ1DSH, Giovanni/IK1WEG and Riccardo/IZ1GDB will be active as 3A/IZ1DSH, 3A/IK1WEG and 3A/IZ1GDB from July 16-18th. Activity will be on 40-10 meters CW/SSB. QSL to the operator's home callsign, direct or via the bureau.

4U1, UNITED NATIONS HQ. Dmitri, N2OW, was once again active during the past weekend. This time he was active on RTTY (a rare catch!). Remember to QSL via HB9BOU.

4X, ISRAEL. Aharon, 4X1FQ, has been active on 17 meters CW/SSB lately. Look for him as early as 2100z or as late as 0500z. QSL via AA4V.

5A, LIBYA. Andy, DJ7IK, informs OPDX that there is a newly licensed operator in 5A-land. Start to look for Ali, 5A3A, a former operator of 5A1A, now operating with his own callsign.

FO, FRENCH POLYNESIA (IOTA Op). Jean Michel, F6AJA, informs OPDX that Alain, FO5RH, is active from Tuamotu Islands (IOTA OC-066). If he can find a plane, he will try to go to Reao Island (IOTA OC-238). Also, he will try to be active from different islands in the Tuamotu archipelago group. He hopes to activate Pukapuka (OC-062) and maybe Napuka (OC-094). He will be on 80-6 meters, mostly on CW and also on 14260 kHz. There are no more details about the dates!

FP, ST. PIERRE AND MIQUELON. Look for FP/VE7SV to be active from Miquelon Island (IOTA NA-032) between October 23rd to November 2nd, inclusive. This will include participation in the CQWW SSB Contest -- in the M2 category. Operations will be on 160-6 meters including the WARC bands -- CW and SSB only at this point in the planning process. Additional modes may be added. Suggested frequencies are:
CW - 1822, 3502, 7002, 10102, 14022, 18072, 21022, 24892, 28022 and 50102
SSB - 1842, 3795, 7052, 14195, 18145, 21295, 24945, 28495, and 50145
The idea of an expedition to St. Pierre & Miquelon
has been on the minds of Team Canada members Dale/VE7SV and Andy/VE7AHA since their return from the 2002 WRTC in Finland. From VE7-land, St. Pierre & Miquelon seems a good balance between its rarity for the worldwide ham community and the relative ease of transport and setup to deliver the operation. A 9-member team has now been selected, and all participants are members of the internationally well known British Columbia DX Club (BCDX). Team members include: Dale/VE7SV, Andy/VE7AHA, Jason/VE7AG, Lee/VE7CC, Steve/VE7CT, Dave/VE7VR, Paul/VA7NT, Dick/N7RO, Ramon/XE1KK and Paul/VE7AVV. Most team members bring tremendous experience from participation in previous DXpeditions on an international scale. Others, however, are newcomers who will get a taste of what drives the engine of success from the action side of the DXpedition radio. While the primary objective of the Team will be to achieve a high QSO total for the DXpedition, their parallel objective is to give FP/VE7SV to as many locations as possible. The team will have operational blocks of time set aside specifically for JA, VK, ZL and the Pacific -- as well as other areas where working FP as a new one is particularly challenging. In the remaining months of lead time till the Team departs the west coast, everyone is working on equipment planning and deployment preparation process. Major equipment sponsors for the DXpedition are being secured, but individual or Club donations would be gratefully received. Please check their Web site if you're interested in supporting the Team. Go to the Sponsor link. For complete details of the DXpedition, go to:
http://www.bcdxc.org/st_pierre_miquelon.htm

For updates and news releases on their upcoming activity, please go to:
http://www.bcdxc.org/fpve7sv_news_release.htm for the news

IOTA NEWS.....
AS-NEW. Members of the Russian Robinson Club (RRC) and the Mediterraneo DX Club are proud to announce that the team of RA3NAN, RZ3EC, RZ0OA, RW0OO and RN0CT, are going to activate the New Asian Group in R0C - SEA OF OKHOTSK COAST NORTH group, from Malminskiye Island, starting July 15th for one week. There will be at least two stations + amplifier using the callsign RI0CM. For more details and updates, visit the following Web pages at: http://www.mdxc.org/ri0cm
http://www.mdcx.org
QSL via IZ8CCW (world-wide), via RZ3EC (Russia ONLY!!!).
The project is expensive, so, any support and donations are very appreciated via Andy, at: rz3em@yandex.ru

EU-045. (Correction, not EU-043) Thomas, DL5MO, will be on a holiday style operation from Orust Island and will be active as SM6/DL5MO from July 12-23rd. His activity will be focused on 40/30/20 meters. QSL via his home callsign. Visit his Web page for pictures, his QSL card and an online log search (after operation) at: http://www.dl5mo.de

EU-061. A two man IOTA-expedition to Tromoy-Island will take place between July 1-6th. Activity will be on 40/30/20/17/15 meters CW and SSB. Antennas are a Butternut and a Spiderbeam. There will be no HF Bands during the time between 1400z, July 3rd and 1400z, July 4th (Participation in the VHF Contest). Mario, DL5ME, will be active as LA/DL5ME. He will later be joined by Gunter, DG3HWO, who will operate a second station. QSL via their home callsigns direct (prefer) or by the bureau (a longer delay for QSLs).

EU-170. A member of the Croatian Telegraphy Club (CTC) will activate the Island of Pag (CI-082, JN74MK) from July 1-10th. Operator will be Den, 9A3FO, and he will sign 9A3FO/P. Activity will be CW on 40/30/20/17/15/12 meters. QSL via the bureau or direct to 9A3FO (no eQSL). For more info about CTC, take a look their Web page at: http://www.qsl.net/ctc

SA-090. The Association of Radioamateurs of Venezuela and the Caracas DX Group are organizing an IOTA DXpedition to activate Chimana Island (Grid: FK70) to celebrate the 2004 Venezuelan Navy Day. Look for the callsign YW6C to be active July 14-18th. Activity will be on HF (CW/SSB/RTTY) and VHF (FM). QSL via W4SO (a mail drop). QSLs are verified and mailed from Venezuela. Please no USA stamps.

NEW CW CONTEST. Eric, ON4MIC, announces that the Belgian EUCW Society (The Club Francophone de Telegraphie), invites you to enter their first contest next September 19th. This contest is open to all the world's CW

lovers, members of the EUCW Society or not. SWLs are welcome as well.
The complete rules are available in French at: http://www.on5cft.be.tf/
The complete rules in the English language are available at:
http://users.skynet.be/sb334255/CFT%20activity%20day%202004_English.pdf
More details will be forthcoming at the end of August.

NEW OFFICERS FOR 2004-2006. The Long Island DX Association (LIDXA) has elected new club officers for the 2004-2006 term:
President : Martin Miller, NN2C
V. President : Pat Masterson, KE2LJ
Secretary : Ed Whitman, K2MFY
Treasurer : John Reiser, W2GW
Directors : Andy Cola, W2VZQ
Lew Reinberg, W2BIE
Emil Tillona, KD1F
For more information on the LIDXA, check out their Web page at:
http://www.qsl.net/lidxa/

QSL INFO AND NEWS.....
NEW QSL MANAGER. Fran, EA7FTR, informs OPDX that he is now the QSL Manager for Juma, A71EM.

Randy, W5UE, reports that new cards for HC8L have been received from the printer. QSL requests sent direct to him with SASE or SAE + IRC/GS will begin to go out by this past weekend. He currently has the logs for the Feb/Mar 2004 HC8L activity and anticipates receiving logs for pre-2004 HC8L activity shortly. Randy is now handling all QSL duties for HC8L. Check his Web page for details:
http://www.datasync.com/~w5ue/qsl-w5ue.html
Randy also handle QSLs for HC8N, PZ5A, PZ5UE, C6ARB and W4D (IOTA NA-213).

QSL Manager WB2RAJ confirms that he has acquired new logs from Dobri, LZ2TU. The new logs span from February 15, 2001 thru May 17, 2004, including contest contacts. QSL cards are at the printer now. To confirm any of these contacts with LZ2TU, QSL DIRECT ONLY to: Kash Kashdin - WB2RAJ, 4591 West Overlook Drive, Williamsville, NY 14221. WB2RAJ is also QSL Manager for EM3W, FK5DX, FK8GM, ST2/G4OJW, ST2AA (up to Feb. 1995), ST0K, UZ3AYR and WB2RAJ/VP9.

SJ9, MOROKULEN PEACE REPUBLIC (Interesting Operation of the Week!). OPDX was informed that the Norsk Radio Relae Liga, LG5LG, will be active as SJ9WL on 14277 kHz between July 27th and August 9th from Fredsriket Morokulen (Morokulen Peace Replic). We have been told that this is a little republic located between the borders of Sweden and Norway. It was founded to honor the peace between the two countries. QSL via PP5ASN.

SPECIAL EVENT. During the next "27th Jazz in Marciac Festival (South France, near Toulouse), look for special event station TM5JIM to be activated by the Gers Department area Hams from August 1-15th. Activity will be on CW/SSB on 80/40/20 meters, on HF and on 144 and 432 MHz. QSL via F6DJB by the REF Bureau or direct to: Claude Bonne, Garderes 3 Vallees,

F-32230 Monlezun, France. For direct QSLing, please use a SAE and 1 IRC (or 1 USD for Europe or 2 USD outside of Europe).

ST, SUDAN (Update/Correction). Last week in OPDX.665 there was a typo listed for Michael's, ST2DX, QSL Manager. Actually, it was listed wrong twice (first as PA7M and then PA7FN). The correct callsign for Dennis is PA7FM (the eyes are going or maybe the keyboard is being uncooperative). Anyway, Michael, ST2DX, was heard this past week on 17/15/10/6 meters. Watch 18140 kHz between 1520-1545z, 21030 kHz after 1615z, 28430 kHz after 1730z and 50110 kHz between 1545-1730z. Remember he is leaving the country on Saturday the 10th of July, so his last day of activity prbably will be on the 9th. His online log and also real audio of the recent 6m openings can be found on the following Web page at: http://www.pa7fm.nl QSL to PA7FM (direct cards from outside EU with 2 USD or 1 IRC).

TO4, MARTINIQUE. Jim, N6TJ, will be active as TO4A during the CQ WW DX CW Contest in November as a Single-Op/All-Band entry. He will be operating from FM5BH's QTH. QSL via VE3HO.

UK DX RTTY CONTEST. The Scottish-Russian ARS, who ran the UK DX CW Contest last weekend (June 25-26th), is honored to invite the radio amateurs all over the world to participate in the UK DX RTTY Contest (from 1200z, July 10th to 1200z, July 11th. For more details on the contest, please visit their Web page at: http://www.srars.org/ukdxc.htm

YA, AFGHANISTAN. Daniel, DL5SE, was quite active this past week, mainly on 17 meters CW, but there were also QSNs reported on 20/15/12 meters. It seems he is active between 1045-1400z and again at 0400-0730z. QSL via DL5SE.

YZ80, SERBIA AND MONTENEGRO. To celebrate 80 years of Amateur Radio in YU-land and the first ham radio activity (Radio club YU1AFS, 1924) look for HAMs in Serbia and Montenegro to use some special prefixes. Rodja, YZ1AA, is active already with the callsign YZ80A. QSL via his home callsign.

I got a JoyStick (the pole) and a JoyMatch (the ATU) in 1965 or 1966.
The combination wasn't very effective and performed more poorly than an
end-fed random wire to which I did compare it.

However, my JoyMatch, which I still have, doesn't look anything like
the one on Ebay. Mine is a simple L network tuner, nicely made of a
tapped coil on PVC and a 365pf capacitor in an open configuration
without cabinet. A label on the coil says JoyMatch. I still use it
with an ICOM IC-PCR10000.

306. Wanted: "fuel gauge"-like meter for deep-cycle batteries

Newsgroup: rec.radio.amateur.misc
Date: 2004-06-27 21:56:07 UTC
From: Jack Twilley <jmt+usenet@twilley.org>
Message-ID: <86zn6ofyx4.fsf@duchess.twilley.org>
Source record: 57418

```
-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

I like the idea of the Whatt Meter, and I've seen them for sale at
hamfests and they look great. I started looking at the specifications
and I discovered some limitations which make it much less useful for
my needs.

The deep-cycle batteries I use have much more capacity than the ones
they use for electric flight (that's the original target audience for
Astro Flight's products), so that's a minus. Also, the battery
system I have currently installed will charge when it's not
discharging, which doesn't fit the NiCad model very well.

Ideally, the meter I want to use would resemble an automobile fuel
gauge in that it would have some idea of what "full" was (whether by
testing via full discharge or by entering in data somehow) and it
would be able to handle charging and discharging without being
rewired. The latter is the truly crucial bit, as the former can be
implemented with a PIC. The PIC could do much more, of course, but as
a bare minimum, I'd like to know how much capacity remains and how
quickly I'm using it.

Is there anything out there like this? Is there a schematic for the
charge/discharge data collection which would be suitable for my needs?
I appreciate any help with this idea, as it might turn out to be
useful for more than just me.

Jack.

PL, as in 'Private Line', refers to sub-audable tones. The 1750 hz tone
is not sub-audable.

Subject: Tomb Guards
Date: Wed, 16 Jun 2004 21:50:27 -0400

I thought this was interesting.

1. How many steps does the guard take during his walk across the
tomb
of the Unknowns and why?

21 steps. It alludes to the twenty-one gun salute, which is the
highest honor given any military or foreign dignitary.

2. How long does he hesitate after his about face to begin his
return
walk and why?

21 seconds for the same reason as answer number 1.

3. Why are his gloves wet?

His gloves are moistened to prevent his losing his grip on the
rifle.

4. Does he carry his rifle on the same shoulder all the time, and if
not, why not?

He carries the rifle on the shoulder away from the tomb. After
his
march across the path, he executes an about face, and moves the rifle
to

the outside shoulder.
5. How often are the guards changed?

; Guards are changed every thirty minutes, twenty-four hours a
day,
365 days a year.

6. What are the physical traits of the guard limited to?

For a person to apply for guard duty at the tomb, he must be
between 5' 10" and 6' 2" tall and his waist size cannot exceed 30."

Other requirements of the Guard:

They must commit 2 years of life to guard the tomb, live in a barracks
under the tomb, and cannot drink any alcohol on or off duty for the
rest
of their lives. They cannot swear in public for the rest of their
lives
and cannot disgrace the uniform {fighting} or the tomb in any way.
After two years, the guard is given a wreath pin that is worn on their
lapel signifying they served as guard of the tomb. There are only 400
presently worn.

The guard must obey these rules for the rest of their lives! or give
up
the wreath pin.

The shoes are specially made with very thick soles to keep the heat
and
cold from their feet. There are metal heel plates that extend to the
top
of the shoe in order to make the loud click as they come to a halt.
There are no wrinkles, folds or lint on the uniform.

Guards dress for duty in front of a full-length mirror.

The first six months of duty a guard cannot talk to anyone, nor watch
TV.

All off duty time is spent studying the 175 notable people laid to
rest
in Arlington National Cemetery. A guard must memorize who they are and
where they are interred. Among the notables are: President Taft, Joe
E.
Lewis {the boxer} and Medal of Honor winner Audie Murphy, {the most
decorated soldier of WWII} of Hollywood fame.

Every guard spends five hours a day getting his uniforms ready for
guard
duty.

I don'! t know if you saw this in the news but it really impressed me.
Funny, our US Senate/House took 2 days off as they couldn't work

because
of the expected storm.

On the ABC evening news, it was reported tonight that, because of the
dangers from Hurricane Isabelle approaching Washington DC, the
military
members assigned the duty of guarding the Tomb of the Unknown Soldier
were given permission to suspend the assignment.

They respectfully declined the offer, "No way, Sir!"

Soaked to the skin, marching in the pelting rain of a tropical storm,
they said that guarding the Tomb was not just an assignment, it was
the
highest honor that can be afforded to a serviceperson.

The tomb has been patrolled continuously, 24/7, since 1930.

I don't usually suggest that many emails be forwarded, but I'd be DAMN
proud if this one reached as many as possible.

We can be very proud of our young men and women in the service no
matter
where they serve.

ETERNAL REST GRANT THEM O LORD,
AND LET PERPETUAL LIGHT SHINE UPON THEM

Hope to see you all at the 640 Field Day !! June 26-27 2004 .

Subject: FW: Field Day ...PLEASE READ.....
Date: Sun, 13 Jun 2004 11:55:27 -0400

Announcing the N9EE Repeater Group's first Amater radio testing
session !!!

When : Saturday, June 26th 7pm during field day.
Where : Werner Boyce Salt Springs State park (9120 Old Post rd) Port

Richey, Fl
We will have testing for all Amateur license classes (elements 1-4)

If you are interested in testing please bring the following:
$12 cash,exact change
2 forms of Valid ID (ex: drivers license social security card)
2 photo copies of your drivers license or valid photo ID

If upgrading, please bring your original license and 2 copies or
completed CSCE's and two copies.

the reason for the copies is that we will not have access to a copier
at field day.

also bring 2 #2 sharpened pencils.

Any questions or to reserve a testing seat

Previous copy of this email had incorrect directions....This has been
corrected...
==========

The 2nd annual 64 Repeater Group Field Day Weekend will be held on the
last weekend of June. (June 26-27,2004) Fun starts at 2:00 pm Saturday
and ends Sunday at 2:00 pm.

We need Cw operators as well as Voice operators to man the radios
during the 24 hour period.
Come and enjoy this great Emergency Communications Exercise.
Needed equipment include a 10 foot step ladder and PL259 coax
connectors. We currently have all the radio equipment we need.

Last year we had over 50 Ham operators and their families at our
event.
The 64 Field Day Weekend will be located at the new Boyce Park approx.
1 mile North of turn to "Hooters" .

Off US 19, 1 block South of Ridge Rd.to "Bay Dr." on the West side of US 19. Head West on Bay Dr. To the 4-Way Stop Signs.This is "Old Post Rd.". Turn Right (North) and follow Old Post Rd. past the 8 foot fence gate and beyond the start of the dirt Road. This is Boyce Park.

Ahead of you will be a intersection to the right.Field Day site will be directly ahead of you in large white office trailer and area.Parking will be along the side of the road .There will be no parking in front of the Field Day Site as there is no room to park at the Site trailer except for handicapped persons with State placards.

Talk-in will be on the 146.640 Repeater.Setup of equipment will start at 9:00 AM.We will be needing people to help in the setup as well.

If interested in helping setup,operating,or need any other info please contact me at the above email address or Rob,KG4ZUO at sixfourfieldday@yahoo.com

Thankyou for your time...

P.S. Please feel free to pass this email along to anyone whom might be interested...

Subject: K4EAC Santa Fe Community College Radio Society Equipment Sale

Date: Tue, 1 Jun 2004 18:13:45 -0400

The Santa Fe (Community College) Amateur Radio Society (SFARS), K4EAC,
is holding an inventory sale. We will now begin to accept reasonable
offers on the equipment listed in the attached .doc files. This email
is mostly a heads-up before these items begin showing up on ebay,
message boards, etc. Please send an email to any one of the following
contacts for further information.

73,

Juan Velez KG4ZYJ

SFARS President

KG4ZYJ@bellsouth.net

Advisors / Station Trustee:

Donated Equipment List

AC adaptor/power supply, Panasonic Model NV-B40 SN# C8A3331TY, DC out 12 volts, 1.8 amps
Antenna base, 2 each, magnetic mount w/coax and connector
Antenna/tower hardware, 2 boxes, assorted including 2 pulleys, clamps, lead anchors, slip-pole guy
rings, U-bolts, guy wire clips, hooks, screws, parts of three baluns, etc.
Antenna insulators, 10 each, one ceramic feed-through and one standoff
Antenna Relay, 24 volt (in relay box)
Antenna Relay, 6 volt (in relay box)
Antenna tuner, home brew with roller inductor (from Ham Radio Feb ’74, page 26)
Blower, squirrel cage encased w/inline off-on switch
Cabinet, metal, gray wrinkle finish, 3x2x4
Cabinet, metal, woodgrain finish, 3x9x6
Capacitor, fixed, glass hi power, 20,000 volt, 12 mmfds
Capacitors, fixed, assorted, many packaged in labeled shoebox
Chassis, home brew w/0-10 Milliammeter, tuning capacitor and slug-tuned inductor
Chassis, home brew oscillator w/schematic
Chassis, unidentified w/two tubes (sideband generator?)
Chassis, unidentified, w/SSB-9 filter
Chassis, unidentified, with tube
Chassis, unidentified
Chassis, unidentified, small w/four ï¿½ inch audio jacks
Chassis, vfo ? w/tuning capacitor and dial
Coax connectors, assorted UHF type PL259, and adaptors
Coax seal, old, small amount
Collins 75A-4 (round dial) receiver, SN# 4914 w/manual, extra tubes
Compass, radio, repeater
Components, 2 boxes containing parts bins filled with resistors, capacitors, etc.
Converter, Parks model 432-3 10 meters (28 MHz)
Converter, Gonset 10-20-75 meter ham band to AM car radio 455 kc IF
Cornell-Dubilier model CDB3 SN#11652 Decade Capacitor .01-1.0 mfd (cracked bakelite case)
Cornell-Dubilier model AR-22R rotator control box (no rotator) w/fused plug
Counter, Veeder-Root
Crystal Calibrator model 111 SN#3006
Dial lights and lamp bulbs, assorted in labeled shoebox
Dial, turn count, 0-99.99
Dial, vernier, 36 mm diameter, 0-10 dial divisions
Dial, 0-100 wplastic cursor
Dials, 3 each w/knobs and an audio xmfr
Diode, glass, Eimac (? VC12-32 ?)

Diodes and rectifiers, assorted, most packaged, in labeled shoebox
Dust cover, equipment, plastic
Earphones, mini, 2 sets
Eico model 377 audio square and sine wave generator
Filter, 75-ohm low-pass, home brew (ARRL Handbook, 1975, page 498)
Footswitch…home made (cable needs replacing)
Footswitch, Radio Shack 44-610A (has bent plug)
Frequency Counter, DSI Instruments model 3600A, 600 MHz, w/manual
Frequency Monitor, octal plug-in, 81.970 kHZ
Fuses, assorted in labeled shoebox
Fuseholders, 2 each in-line w/plugs

Gutter Clip, model M4
Hallicrafters model HT-7 Frequency Standard
Hallicrafters model R-46B speaker
Hallicrafters model SP-44 Skyrider Panoramic
Heathkit model XR-1 battery powered transistor AM radio w/manual
Heathkit HW-101 dial faceplate
Heathkit model AM-2 Reflected Power and SWR Bridge
Heathkit model B-1 4:1 balun (300 ohm to 75 ohm)
Heathkit model GD-1A Grid Dip Meter w/five frequency range coils
Heathkit UT-1 Utility Power Supply
Heathkit VTVM
Heathkit VTVM model IM-1B w/test lead
Integrated circuits, IC sockets, experimenter PC boards, most
packaged, assorted in labeled shoebox
Interface, RTTY-CW, Kantronics, SN#22019
Keyboard, CW-RTTY-ASCII, MFJ model J-496 w/wall wart power supply
Knobs, assorted, Heathkit and other makes
Meter, Galvin model P8100 50-microamp meter in wooden case, SN#847
Meter (only), Weston model 301 VM 3 1/2 inch calibrated in volts 0-800
Meters (only)…Box containing AC hour meter, DC amp meter,
ammeter from Ford Model A, DC 0- 300 V meter, Westinghouse 0-5-50 V,
“Balance” meter, unknown small “Tune to Max”
meter, and Simpson meter case only—no movement
Meters (only) … box containing 2 Triplet model 221 0-100 mA
meters, 2 Microna model 22-051 0-50 uA DC panel meters, and 1 Microna
model 22-037 0-100 uA DC panel meter
Microphone, Astatic model A-7 with stand
Microphone, Carbon, model M-64H
Microphone, Realistic dynamic model 21-1176, base station w/stand in
box
Microphone, model T-17 Carbon (bad cable)
Miscellaneous Box
Multimeter, 2 each, Micronta model 22-220A FET analog w/manuals (need
test leads and C battery)
Noise bridge, RF, MFJ-202B with built-in range expander
Oscilloscope, Du Mont type 208-B SN# 11615 (bad power cord)
Oscilloscope, Jackson model 521
Oscilloscope, Techtronics 465B SN# B011784, manual, on type 200C

‘scope cart (no trace, no probes)
Potentiometers, assorted in shoebox
Power cord, 4-foot w/plug
Power Inverter (DC to AC), SBE model SB-33, SN# 1153 (Gonsett’s
“Golden Toroid”)
Power Supply w/dual microamp meters, home brew, measured 16.9 volt DC
no load. HEAVY
Power Supply, 13.8 VDC, Clegg PS-12A, 12 amp
Power Supply, home brew, 6VDC, 24 VDC
Power Supplies, Wall Wart, 16 each (assorted); 14, 12, 10.5, 9, 7.5,
6, 5.8 and 5 v DC; 12, 9.3, 8 and 3.3 v AC
Precision Series 912 “Electronamic” Tube Tester
Relays and switches, 11 assorted
Relays, 12 assorted, clapper and potted
Resistors, assorted, fixed (most packaged) plus 6 each 25W power
ceramic resistors in labeled shoebox
Resistor, precision, 10 ohm wire-wound in glass tube
Resistors, 6 each, 10K ohm 25 watt
Rotator, CDR Ham-M w/manual and control cables
Rotator, no control box, type unknown, similar in size/appearance to
Hy-Gain AR-40
Signal tracer, homebrew, from 4/60 QST, P22
Speaker, 2 ï¿½” circular, Calectro S2-206, 100 ohm, 0.2 watts, not
encased)
Speaker, 3 ï¿½” circular, University, 8 ohm) in
shoebox
Speaker, 4x6 oval, SPECO 406, 8 ohm, 2 watts, not encased
)
Speaker, 5”, encased, unknown Z
Switches, assorted including 1 each 3-position, ABC Coaxial antenna
switch in labeled shoebox
Switch, SPST knife on a ceramic base
Switch, TV-Computer (for computer games)
Telephone headset (old), Roanwell w/microphone and earphone
Telephone induction pick-up w/suction-cup
Telephones, 2 each cordlessless (Lucent 900 MHz and Panasonic
KX-T4400-B)
Thermometer, thermocouple adjustable, 100-600 degree range, Athena
model 74-6 SN# 1716.
Transceivers, CB, 2 each, GE model 3-5816 all channel two-way mobile
(new in boxes)
Transceiver, HF 10-80 m Kenwood TS-120S SN#950512 w/PS-30 Spkr/PS,
mike, AT-230 ant tuner
Transceiver, VHF 2 m FM handi-talkie ICOM IC-2AT SN# 11764022, w/5
batteries (low output)
Transceiver, VHF 2 m FM mobile, KDK FM 2025A mark II, SN# 05289
w/fused power cord (no mike)
Transceiver, VHF 2 meter FM mobile, KDK FM-2033, SN# 003883, w/manual,
keypad microphone
Transceiver, VHF 2 meter FM, mobile, Swan model FM-12110-A, SN# 10268

w/microphone
Transistors, FETs, assorted, most packaged, in labeled shoebox
Transformer, unknown type, 22-tap
Transformer, Thordason Class B Modulation
Transformer, Triad 6522, 775-0-775 500 MA secondary, 125-115-0
primary
Transformers, small box containing 13 assorted power, filament, audio
xmfrs, 1 midget transistor xmfr
Transmitter, aircraft model BC-459, AM-CW 7-9.1 MHz
Transmitter, SBE model 33 SN# 1081 USB/LSB 3.8-21.450 MHz phone only
w/mounting plate
Tube hardware -- 1 bag containing 1 each 7-pin mini to 8-pin octal
socket adapter, 2 each ceramic 7-pin sockets, 3 each 9-pin plastic
sockets and 1 each 7-pin plastic socket
TV Pattern Generator, CONAR model 682
TV, portable AC/battery powered 5” B&W, KTV model KT506D, SN#
90502701, earphone
TV, portable, Panasonic Model TR-707 BW, SN# FB7662039, AC/12V DC or 9
D cells
TVI filters, 3 each in boxes, low pass, and 3 heat sinks
Wattmeter, Gold Line 10-100-1000 w, 8-30 MHz w/SWR nomogram

Miscellaneous…
cap pistol
vacuum gauge w/hose and instructions
1 partial roll of heat-shrinkable tape

Go placidly amid the noise & waste, & remember what comfort there may be in
owning a piece thereof.
Avoid quiet & passive persons unless you are in need of sleep.
Rotate your tires.
Speak glowingly of those greater than yourself and heed well their advice
even though they be turkeys;
know what to kiss and when.
Consider that two wrongs never make a right but that three lefts do.
Wherever possible, put people on hold.
Be comforted that in the face of all aridity & disillusionment and despite
the changing fortunes of time, there will always be a big future in computer
maintenance.
Remember the Pueblo.
Strive at all times to bend, fold, spindle, & mutilate.
Know yourself; if you need help, call the FBI.
Exercise caution in your daily affairs, especially with those persons
closest to you.
That lemon on your left, for instance.
Be assured that a walk through the ocean of most souls would scarcely get
your feet wet.
Fall not in love therefore; it will stick to your face.
Gracefully surrender the things of youth, birds, clean air, tuna, Taiwan;
and let not the sands of time get in your lunch.
Hire people with hooks.
For a good time, call 606-4311; ask for Ken.
Take heart amid the deepening gloom that your dog is finally getting enough
cheese; and reflect that whatever misfortune may be your lot, it could only
be worse in Milwaukee.
You are a fluke of the universe; you have no right to be here,
and whether you can hear it or not, the universe is laughing behind your
back.
Therefore make peace with your God whatever you conceive Him to be:
Hairy Thunderer or Cosmic Muffin.
With all its hopes, dreams, promises & urban renewal, the world continues to
deteriorate.
Give up.

So... Instead of wasting energy cussing at 'them,' why not HELP
someone, in a nice way, to migrate AWAY from IE and into something like
Opera or Firefox?

Oh, I forgot... It's easier and quicker to simply swear at someone
than it is to do something constructive.

Chris,

You are the one who is displaying ignorance. There are constant holes and security problems with not only many browsers, but operating systems as well. Apple is probably the only one with little or no viruses being written to attack it as it has a small presence. Unix (Linux) has holes. As far as browsers, Netscape, Opera, you name it, have security flaws. The reason O.E. is mentioned so much as it has a large following and is, therefore, an ideal target for worm/virus writers.

Everyone needs good antivirus software (updated *daily*) on their system as well as a good firewall (also updated). Everyone also needs a good anti-spyware running on their system - and it is also a good idea to have one that runs in background and blocks incoming spyware off the internet as you browse. I'm seeing quite a bit of blocking from Yahoo Groups (attempted incoming spyware).

Last, but most to the point of your post, everyone should be checking daily (whether automatically or manually) for updates to their operating system and browser. These are constantly brought out and if you bother to check (why don't I think you are well informed?), you will find patches coming out almost constantly for many different browsers and operating systems.

If you don't do this, you will eventually get bit regardless of what operating system you use.

73 from Rochester, NY
Jim

Yes. Opera. Foxfire. I think I just got an alert last week that Foxfire
has been found to have a security hole for which there is no known fix (as
of yet). Opera? It has holes. You can subscribe to these government
alerts and see for yourself.

BTW, we point fingers at browsers .... uh ... do you know that Real Player
has problems? Didn't think so. How about file sharing programs? Hehehe
HAR DE HAR HAR.

The list is virtually endless. Various instant messaging programs. Some
stuff that you wouldn't think could even cause a security problem.

I fixed a PC a few weeks ago. Some alleged tech "fixed" the computer.
Returned it sans anti-virus and firewall. Also didn't do updates. It got
hijacked. It took me quite a bit of effort which included removing spyware,
getting a firewall in place, anti-virus in place, and an on-line scan to
remove the last pieces of that nasty thing. I had even been locked out of
regedit! Finally, everything was working except I couldn't get the home

page back. Since I could get into regedit by this time, I simply edited the registry and it is finally working fine. The problem, in this case, wasn't with Microsoft or the users. It was a lazy tech that didn't want to do the whole job.

Best regards from Rochester, NY
Jim AA2QA

Three cheers for Mr. Hampton. Spear a few elitists. :) I know for a fact that *nix systems are every bit as vulnerable as Windoze systems, since my spouse does computer repairs for the US military, and almost everything they use is a *nix based system. They have problems with hackers on a regular basis, even through their substantial firewalls.

Point being, the only way you can begin to be sure you are protected is to have a good firewall and A/V, and keep them running and up to date. The only times I have EVER had problems with unauthorized ingress to my system have

been when both my firewall and A/V have been down (after a hardware failure usually)...

I wonder just how many different versions there are? Mine (Joymatch
IIIb) is in a very solid Hammerite-finished case with coloured plastic
covers front and rear. It's just an ordinary L-match inside - although
reasonably well-made. Oddly enough there's no provision for a
ground/earth connection at all on the tuner itself: that must have
caused a few surprises to unwary users in the past :-)

From: mikea@mikea.ath.cx
Message-ID: <cbp8n1pni6@puck.litech.org>
Source record: 57431

I'm working on getting my General, finally, after letting my Novice lapse in 1963 or 1964.

If one of you fine folks has a page from one of those callbooks showing

WN5EGO
Mike Andrews
7663 Belgard
Houston TX 77033

and is willing to copy-and-mail it, or to fax it, or to scan-and-E-mail it, I'd like to hear from you, as I'd like to use my existing credit for Element One.

It's worth a steak dinner at The Cattlemen's Cafe in Oklahoma City to the first one who sends it to me, next time he or she's out in the .okc.ok.us area.

Please respond by E-mail if you want to fax it or send snail mail to me. The reply address is valid if you want to scan-and-E-mail; PNG or TIF preferred, as Jpeg is lossy.

Thanks.

Hi all,

I've been studying for my Ham license over the last week, and if all goes well I'll be licensed in a few weekends with any luck :) So now the big step -- which radio to go with.

As I said, I'm a total rookie to the Ham radio world, so I have no idea what I'm looking for. I've just started reading-up on frequencies, so I'd like to find something that'll handle a majority of (if not all) the frequencies I'll be licened to use. Also I'd love a baseunit with PC software that'll allow me to control the radio via my computer. This isn't a must, but it'd be nice to have.

Also what antenna would you guys suggest? I live in the country, so I'm unrestricted on what kind of antenna I deploy. Also since I live kinda far out I'd like to have a radio powerful enough and antenna high enough to reach the larger cities around me (15-20 miles away as the crow flies).

Pricerange is $200-$400, but I can go abit more if needed. I want to buy something with TONS of stuff I have no clue about so I can learn :)

My future goals are to eventually setup an IRLP repeater since I do have broadband, plus a good friend of mine lives some 1500 miles away and there's an IRLP repeater not far from him. Also I'd love to give back to the local HAM group (what little of a group there is anyway). I also ran across this guy's website - http://www.gravitywell.org/index.htm - and I'd love to get a rig going like his.

Thanks for any comments or suggestions, and take care --

- Ringo -

I am *not* changing the subject. There are a *ton* of security holes in
other software too - including Real Player and others.

If everyone changed to Linux, you can bet the virus and worm writers would
be writing most of the stuff for Unix systems.

As to CERT .... that is where I am getting my information about all of those
other "secure" systems and browsers. The fact remains that Internet
Explorer, Outlook, and Outlook Express are popular, thus the huge number of
viruses written for them - not that they are more or less secure than other
browsers. If one keeps a firewall in place, anti-virus in place,

anti-spyware in place, updates them daily, and *uses* them properly, one is as protected as one can be.

BTW, please ZBM-2. I suspect I'm dealing with someone with a very modest double-digit IQ here.

With all due regards,
Jim AA2QA

In my experience with Mike, I've learned that while he is interested
in conservation of effort, he is more interested in principle.

Yes, he could take the 5WPM test again, and pass it. That's not the
point here. If your elmer let his license lapse and needed a callbook
reference for credit, would you tell him to take the damned test
again, or would you consider helping a friend out with a trivial task?

Mike, I'll ask around some of the old-timers at my club and see if
anyone's got what you need. Best of luck to you and I look forward to
working you on the air.

Jack.

Hi,
Welcome in the world of ham radio! ;-)

Here are some useful tips,
http://www.astrosurf.com/lombry/menu-qsl.htm
mainly about antennas, how to select a transceiver, but all is
interesting...

I am a boater who uses deep discharge marine batteries. I purchased
from West Marine a gauge that measurea percent discharged, based on a
narrow voltage band. Voltage itself is not a good indicator. A battery
can show 12V and be almost dead.

Check out West Marine or Defender Industries.

What principle would that be? He let his license lapse 40 years ago
but now he wants to use the element that was given by a single
licensed amateur (no VE examination, no FCC) and have it apply to a
license he is attempting to obtain in a vastly different time with no
intevening amateur operation to which it would apply, whatsoever.

>Yes, he could take the 5WPM test again, and pass it. That's not the
>point here. If your elmer let his license lapse and needed a callbook
>reference for credit, would you tell him to take the damned test
>again, or would you consider helping a friend out with a trivial task?

See above. The principle has to do with making the effort to obtain a
credit in a legitimate way, not through the back door after 40 years
of inactivity. To answer your question, if my Elmer (who died shortly
after I was licensed in 1963, presumably an unrelated event) was
trying to get an upgraded ticket after he had let his lapse for 40
years, I would counsel him exactly the same way: take the test.

The lead-acid battery does show capacity by measuring voltage, but it
MUST have "rested" for some time. That is, no discharge or charging.

I don't know how long, for sure, but I think it is on the order of
hour(s); perhaps one or two. A fully charged battery will show just over 13
volts...13.2 or 13.3 I don't remember the exact number, I always go on the
web for the exact numbers, or I just use the approximation. A dead one will
be on the order of just under 12 volts. Around 11.9 or 11.8. There's lots
of info on the web. No other common type of battery has this type of a
voltage characteriscic.

Hello, Dan

True enough, but the fact is that the problem is the screwball folks that get their jollies writing the darn things in the first place.

Yes, I.E. is a major problem - mostly because it is popular and your comparison with cars and trucks makes sense.

Meanwhile, back at the ranch, I'm having fits getting my dial-up to work properly and still have the DSL.

It's a DARN SHAME that R. Hollingsworth ran people
like the poster and his ilk below, from off of 14.313 and
75 Meters. There's something sterile and plastic reading
flames like this on UselessNet. It was MUCH MORE FUN
when you could hear it on a daily basis LIVE and IN COLOR
on the ham radio bands. Spontaneous radio fun where any
one goofy ham-op with a microphone could become a
chimpanzee-in-a-cage, tossing turds between the bars and
all over the RF of 14 and 3 mHz SSB! Those were the days!
Alas however, today all we have is keyclowns in cyberspace.
Not much better than a lukewarm Swanson TV dinner.

How sad. :(

> Did Echo launch today?

From: VEFRH@aol.com
Subject: [amsat-bb] President's Message - Special Edition -
To: amsat-bb@AMSAT.Org, bod@AMSAT.Org, Advisors@AMSAT.Org,

1 - ECHO
It is with very great pleasure that I acknowledge the ANS news release
concerning the successful launch of ECHO and the other related satellites
from Baikonur this morning.
This achievement is due to many individuals around the world, who have
helped in the design, building, integration, testing and launching of
this satellite. Also the members of AMSATs in many countries who have
helped us by funding this "Electronic Adventure".
Without your financial support the satellite could not have been
completed, and would never have been launched, Give yourselves a "pat on
the back" for a job well done. Lee McLamb, KU4OS, Senior Editor of the
AMSAT News Service will be issuing up dated bulletins over the next few
days to advise you on the progress being made during commissioning.
At the proper time, when sufficient data has been confirmed, Past
President Bill Tynan will issue a bulletin giving the AO-XX designation,
updated Keplerian Elements will be issued as soon as they are received.
MEANWHILE please DO NOT Transmit to the satellite - commissioning must
take priority. A bulletin will be released when the satellite is open
for general use.

From Amsat-BB

The so called integration that IE and Outlook have with the operating system makes for more security flaws than other systems. All the bad guys have to have is access to the machine - Internet Explorer - then access to the OS - that integration, through either a door put in there purposely or inadvertently, and there you have it. It isn't a good system security wise. And we should demand more. The typical PC user apparently doesn't have very high expectations.

Other systems have the occasional flaw, just not so darn many of them.

BUT!

The real disservice that computer geeks have foisted on the world is the idea of "one platform, one OS".

The PC world is going to treat us to the computer equivalent of the Irish Potato Famine one of these days. We are inbred, we are monoculture. We all have the same vulnerabilities.

What we need is machines that are enough different that what takes one out does not take all the others out. We also need operators that are not so far into the woods that they can't see the trees.

> *Everyone* needs good antivirus software (updated *daily*) on their system
> as well as a good firewall (also updated).

I need that on my PC's. My Mac doesn't.

> Everyone also needs a good
> anti-spyware running on their system - and it is also a good idea to have

> you browse.

I need that on my PC's for sure.

> I'm seeing quite a bit of blocking from Yahoo Groups (attempted
> incoming spyware).

Oh yes. It is amazing the source of some of the spyware.

> Last, but most to the point of your post, everyone should be checking daily
> (whether automatically or manually) for updates to their operating system
> and browser. These are constantly brought out and if you bother to check
> (why don't I think you are well informed?), you will find patches coming out
> almost constantly for many different browsers and operating systems.

Here is another problem though. These updates not only protect your computer by patching security holes, they sometimes protect your computer by causing it to cease operating. (a computer that doesn't work catches no virii) On my PC, I will usually wait a few days in order to hear what problems the "updates" are causing.

> If you don't do this, you will eventually get bit regardless of what
> operating system you use.

I get bit regardless. My Norton's finds a virus here and there despite my running a proxy server, 2 firewalls, and updating the virus def's all the time.

I use both PC's and Macs extensively, so I feel I can comment knowledgeably. Using a PC is getting to be operations under siege. What the PC users consider to be normal operations is not what normal operations should be. Meanwhile, I just use my Mac and do the work I need to do without all the fuss and muss. (p.s. - you should see all the cool ham radio software that is out for OSX!)

And my final note is that you have done just what the original poster noted in his post. (albeit his more crudely) That is to blame it on the user. That doesn't flush. Don't blame the victim. We can't expect all users to be IT professionals or even highly competent.

If the manufacturers produce software that has gaping security flaws, it is their fault, not mine.

Blaming the victim again, Jim. Like blaming a sexual assault victim
because she was pretty and dressed nice.

You seem to accept the flaws as inevitable and a normal part of
operating. you would never accept a car that has as many flaws as a
typical PC OS.

Browsers and mail readers should never never ever be integrated with
OS's. Ports should be inaccessible unless you tell it to be accessible.
Address books should be encrypted (although there is a chicken and egg
thing going on in that case) The list goes on and on.

Demand competent software!

Yup. Blame the victim and shift the argument. The fact is that the Unix machines and the obscure browsers are *not* the machines that fill up my mailbox with virus laden attachments. The infected machines are running the microsoft stuff. Game set match.

And the expectation that all PC users attached to the net should have to become minor IT experts is ludicrous. blaming the victim again.

Demand competently written software!

Tom,

I think it's just become fashionable to be a self-righteous bitcher against "Them"!

Here in reality computing has advanced light years in just a couple of decades. My first computer (a Heath H89) had an amazing 48KB of RAM which I upgraded all the way to 64K for the princely sum of $129, dual boot (HDOS or CPM), a single floppy drive, no hard drive, no CD drive, no DVC drive and an upgrade to a 12" amber screen (none of those primitive green CRT's for me!). Processor (Zilog Z80) speed was measured in KHz. Total price for the whole thing was just under $2,500. Software was scarce and expensive, and web crawlers, usenet, and email were Buck Rogers stuff. Not available to me at home, but forward-looking companies were willing to pay $2,500/mo for 9.6KHz DDS connectivity!

My current 'hobby' computer came with a measly 512MB of RAM which I upgraded to 1GB for $92. It still has only one floppy drive, but 120GB hard drive, a DVD (r/w) drive, a CD (r/w) drive. Processor speed is 2.5GHz, I have fulltime broadband connectivity to the world-wide-web for under $50/mo, and more choices of reasonably priced software than I can count. All thanks to those assholes at Microsoft and Intel. Ain't it just awful?

1. Who said that?

2. Can you let us know specifically what the Linux flaws are, and how
they compare numerically and in severity with the integrated systems in
the Microsoft applications?

Their integration with the OS is one of those concepts that sound good,
but unless you have incredibly competent software writing, will be a
constant source of security problems.

> It's like looking at stats for fuel usage of passenger cars and

There is that. We just have to quit making their dirty work so easy.

> Yes, I.E. is a major problem - mostly because it is popular and your
> comparison with cars and trucks makes sense.

If IE was a car, you would have to put new lug nuts on it every day because the wheels would fall off otherwise. No one would put up with a vehicle built like PC's are run.

> Meanwhile, back at the ranch, I'm having fits getting my dial-up to work
> properly and still have the DSL.

Hey, I just spent around 30 hours cumulative time working on a laptop computer to get a logging program that the writers insisted would work to work on it. First it said that the .ocx files for the program weren't registered. I went in to manually register them, and one would register but the other wouldn't. So I upgraded the OS, then found out my bios was behind and needed upgraded then I got a VFAT error, and the machine wouldn't respond to anything. In the meantime I'm troubleshooting all the error messages, and being led down blind alleys and getting nowhere. Applying all kinds of updates and "security" patches. Finally, I could get the computer to boot up in safe mode, and verified that the software would run. But the video wouldn't work correctly then. Oops, the VFAT problem comes back.

So I gave up and recovered the original OS on the laptop, and used my home desktop for Field day. Now I have a video problem with the home computer that showed up probably from operating it in the great out-of-doors. My opinion of PC's is oddly poor right now

I love my G5 dual processor. My Macs have never ever given me problems like what PC users seem to take for granted as part of the territory. Upgrades, software installation, it's all good.

A big part of my job is to whip PC's into submission, so I think I can give an informed opinion between the two systems.

So you are stating that Linux has the same number of security flaws as
the triumvirate of IE/Outlook/and whatever Windows OS?

Might want to check that out.

> Windows/IE/OE gets the viruses because Windows/IE/OE has the users.

You don't get spam or viruses? Not even the scattershot address stuff?
You should be giving computer security seminars! 8^)

I got taken out of context there, Fred. I was responding to the blame the victim comments. I do use Microsoft's OS's from XP to Win95 (Yet!) Mostly because it's part of my job. But I don't use the triumvirate. I only use the OS. If you are using IE and Outlook in addition to the OS, then you're asking for trouble.

Hans .... yes you are right ...it's easy to bitch at the fellows who for what ever reason made things the way they are. If all the other systems were that good then by golly we all would have them and their inherent faults. I think it is base envy of those that brought what ever to the unwashed masses that gets some upset and made a whole bunch of money in the mean time. I was hooked when ever I saw those old "kits" back in the 60's but couldn't afford the freight. The first computer I ever had a hand in working with was a Burroghs (sp?) in 1965 which was used by the Port Vue-Liberty school district for payroll. We managed to get to use the unit with the guidence of the "special math" instructor. It used pins in sets of 3 per step in a program ...K-1-1 et al. and the problem was that the darn exponent had "floated" and had to be reset within the program lest all was lost. The Commodore units of the early 80's provided my impetus. Again look what 2K $ got you then ... and now ...all at the expense of those "greedy" risk takers.

Take care ...Tom Popovic KI3R Belle Vernon Pa

Not really Tom. My experience in computers has been that whatever gets adopted as a "standard" is related to the golden rule. He who has the gold makes the rules - and the standards.

I also use both extensively and feel you're not being entirely forthright. The Mac is certainly not without its own "fuss and muss." The sheer volume of problem-related questions in the Mac newsgroups is clear testament to that. And the amount and quality of radio related software for a Windows-based computer dwarfs that available for the Macintosh (the same with most any catagory of software, or hardware).

> If the manufacturers produce software that has
> gaping security flaws, it is their fault, not mine.

Yet my experience suggests users are a large part of the problem - everything from engaging in high-risk activities to not maintaining, and even by-passing, the installed security features. I manage the IT department at a local college. I cannot even count how many computers I've seen with virus problems that also have illegally obtained software installed and security features disabled to allow the download of that software.

Apparently, you are unaware of the high level of poverty that exists in the country to our south. The sad thing is that such a statement is probably more true than it was humorous.

I don't have any recent statistics but in the mid 1990's, it took only about $800/year [per person] for an average Mexican to cover all their living expenses in rural Mexico. With a family size of 6, due to sharing of housing and utilities (where available), that cost dropped to about $600/person.

Thanks for the accusation, Dwight, but no, I don't. BTW, the computer doesn't get infected, but Norton's isolates the file, and I have to manually delete it.

Yup, that's why places have entire staffs of PC jockeys that work full time to beat the things into submission. We who own Macs, at least where I work, have to maintain their own computers. And at least where I work, all the Mac users are artists, not computer jocks (with the exception of me)

Yup, but I wanna run what I need to do my job and hobby. I could care less about the other apps. Sometimes I think PCphiles would insist on only one type of car for the entire world with that mindset.

I do agree that there are more ham apps on PC, which is a big reason why I have one at home. I'm likely to pick up an Imac at salvage to try out the new Mac Ham apps tho'

I won't deny that under the current state of affairs, people should practice safe computing. And if a person is running illegal software their ass should be busted.

My point is that the crap software is so insecure that the bad situation comes about anyhow.

Glad I go an IT pro here, as I have been wondering something for a while. Isn't it possible to find these infected devils and isolate them somehow? Might be a naive question, but I'm not an IT person, just a program jock.

Mike,

My only point is that other software *also* has holes. The only reason Internet Explorer has been singled out is that it is so popular and widespread. Heck, there may be some folks with the old TRS-80 model 1 with a modem and bulletin board software. I'd bet there are no viruses written for it. I wonder why ... LOL.

I.E. is a big and tempting target, but not any more or less buggy than other browsers (or, as I mentioned, Windoze vs other systems). Other operating systems may be more stable (such as Linux), but have security problems as well.

Best regards from Rochester, NY
Jim

Outgoing mail is certified Virus Free.
Checked by AVG anti-virus system (http://www.grisoft.com).
Version: 6.0.713 / Virus Database: 469 - Release Date: 6/30/04

Sometimes people don't have a choice. For example, my employer will allow only IE on company computers. I had put Mozilla on my company PC and got my hands slapped. Sometimes I use OE to sendmail from my laptop but never use it to receive mail. Most of the time I use Linux on my personal computers.

The real problems are that we have a lot of non-technical people using the Internet that obviously don't know what they are doing and they don't think that Internet security is their responsibility. Another problem is all the crappy program code that is being written without any regard to providing security to prevent such things as buffer overflow exploits of their code. As for tracking down the spammers and black hat hackers, good luck. Ultimately, though, we'll only be able to reduce the amount of security problems and we'll never be able to eliminate them. There's just too many jerks out there that don't have anything better to do with their time.

So if the problem is the users, and not the software that is now being written, I guess the answer is for only IT professionals to be able to have access to the internet, eh?

Hey Jim. I think IE is not only a big target, it is an easy one too.
It's integration with the OS looks good on the surface but is a fatal flaw.

I don't think I can convince too many people of that tho', as the
arguments are getting redundant at this point. If you wish, use IE and
Outlook, just be sure to never ever miss an update, and hope the update
works for you. I'll do a different path.

So I'll just have to say "Practice safe computing, in whatever form you
may wish, and all be careful, eh"?

It wasn't an accusation, Mike. I was simply pointing out that some activities more risky than others (and gave an example). If you're not comfortable with that example, we could use email as another (for example, no matter how many times you warn people not to, some just can't seem to resist opening those questionable files).

> Yup, that's why places have entire staffs

> not computer jocks (with the exception of
> me)

There is an entire staff because there are a lot of computers, not a single computer you're maintaining yourself. We have a number of Macs at the local college and I see many of the same types of problems - missing or damaged drivers, questionable software installed, tampering with things that should be left alone, and so on. Some are downright silly. For example, there isn't a week that goes by that we don't see a computer problem traced to someone dragging things out of the System folder.

> (snip) Sometimes I think PCphiles would
> insist on only one type of car for the entire
> world with that mindset.

You're assuming I'm a "PCphile." I purchased my first Apple in 1981 and first Mac in 1986. Even though I used other computers, the Mac was my main focus for many years. I recently switched focus to Windows, but still own two PowerBooks to allow me to keep up with events in that platform. The college is slowly getting rid of the Macs, but a number of teachers still use them (including my wife).

> Glad I go an IT pro here, as I have been
> wondering something for a while. Isn't it
> possible to find these infected devils and
> isolate them somehow? Might be a naive

> question, but I'm not an IT person, just a
> program jock.

Since they're very unpredictable, it's not really that easy on an active computer. Most large IT departments have computers sat aside to solely watch how these things work and what exactly they do. That information is then used to develop tactics to deal with threats to other computers. The information is also widely shared, and can usually be found on the internet very shortly after a new threat is discovered. Indeed, by the time we see the results of a new virus or whatever, information about it is usually already available.

hi!

i really don't know.
i used the 735 only on a few ham-bands in the past,
1990-1999 and didn't notice anything as those spurious
appear outside those ham-bands.

they start from about 1.900 - 1.95 MHz up into 20 Mhz
(4.8 MHz, 6.7Mhz, 8.5MHz etc...)

VERY annoying...:(

they are generated within the receiver, as they are
there even with shorted antenna.input..

cheers,

staffan

Hello!

Downloaded and tried it but can't get it to work.

I have two computers that are now connected line-out to line-in. I can
see the transmitted signals spectrum show up on the receiving end but
the receiver does not synch.

Any hints?

Maybe there is hope. Wired magazine just reported that the CERT announcement caused mozilla / firefox downloads to double to more than 200,000 per day.

See http://www.wired.com/news/infostructure/0,1377,64065,00.html

Some of the shitheads aren't afraid of change, which of course means that they aren't shitheads after all.

Will it change anything? Probably not. Shitheads are a plentiful species.

391. Martin Brandeaux Marlon Brando KE6PZH FO5GJ SK

Have a quantity of Radio Communications Service Manuals, both Commercial & Amateur that I have rescued from the Dumpster. If you are a Johnson 2 way dealer, I have a large amount of surplus manuals, RF Transistors, SMT components, covers, parts in general that came from the PPL-6050, 577 generation of Johnson Equipment. I have itemized some parts, but am considering selling them ALL as a LOT purchase especially the smaller (don't know what they are) parts...CHEAP!

Please check my site: www.rodemi.com for what is available. I am updating the site as time allows.

If you are interested in buying the Jsn parts as a LOT purchase at a very reasonable Price, let me know and we can work it out. Contact me if you have any interest
I'm quite negotiable..have to make room in the garage for my vehicles!
Thanks for looking....Norm VE3CZI

Thank God he's getting off the air -- if he was ever on the air in the first place. Has anyone ever actually talked to him??? Burt, please sell the rest of your gear. Stick to the internet, please, and leave us hams alone. We can use kill files here.

All I had to do was to put him in my kill file and I never saw postings here, other than from followups from people whom he slandered. And gloriously, he's selling gear (old, obsolete, just like he is).

While setting a record as being the first (and only?) electronics teacher who didn't know the collector voltage (Vcbe) of a saturated transistor, he was able to simultaneously insult over five hundred thousand hams who passed the test that he himself could not pass.

Loser.

He's also the first horse's ass published on QRZ.

He also seems to have modified his 751 to transmit out of band, although he is not a MARS or CAP licensee. Criminal, asshole, degenerate, bungholer(*).

Loser.

This (the link) is the most offensive thing I have ever seen towards ham radio in my 34 years as a ham. Thank to Chris for printing the URL.

To me, it equates to someone standing on the ruins of the WTC on Sept 12th, and flipping the bird to ham radio.

Sept 12th is important because by then, ham operators had already put in 24 hours of non-stop, volunteer, world-class operation.

Anyone who says differently about ham radio, GFY.

Hey, are you that blind? Read the whole article. It ends with the
following
statement:

"Founded in 1948, UTC represents the telecommunications interests of
electric and gas utilities, water companies, gas pipelines and other
critical
infrastructure entities, along with their technology partners."

Of course it's one sided trash. That's the whole point of the organization
that wrote it!

It said it wasn't "accepting" mail. And it wouldn't be the first time an
ARRL address had done this. Just forget it.

AND, I do NOT conclude deals in open forum. If you were truly interested in selling the stuff, seeing I had a problem getting a message through, you'd have e-mailed me privately to conduct some business. I told you how to get through to me. I showed interest replying in the first place. I told you my message bounced. "I" have no problem. As I said, this isn't the first time an ARRL address has bounced or not accepted mail. Good luck.

Lou
J M Noeding is the one who asked "what is your problem? "
Norm VE3CZI is the one with the manuals!
Two (2) different people!

SB DX @ WW < KB8NW $OPDX.667
Ohio/Penn DX Bulletin No. 667

The Ohio/Penn DX PacketCluster
DX Bulletin No. 667
BID: $OPDX.667
July 5, 2004
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, W1BYH, N2OO, N2YO, W2CE, N3SL, NG3K, W3UR & The Daily DX, KU4J, N4AA & QRZ DX, WB4ZNH, W6NV, K8YSE, WB8YJF, AJ9C, CX7BY, DL/VE3ZIK & www.contesting.info, DL1EK & The DX News Letter, DL2VFR, DL5NAM, F5CWU & La Gazette du DX, F5NQL & UFT, G3NKC, G3XSV, HK3JJH, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, OH2BH, OH2BN, SM5DJZ, SM5DQC, TA3J, UA0LMO, VA3RJ & ICPO, VK4FW, ZL1CT and ZL3IX for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th/June, through Sunday, 4th/July there were 206 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, I, IS, J7, JA, JT, JW, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP5, VP9, VR, VU, XE, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

9A, CROATIA. Franz/DL3PS and Zik/DL/VE3ZIK (4N1DX) will be active from Bilice (near Sibenik, GRID JN73) now through July 31st as 9A/VE3ZIK and 9A/DL3PS. They will be active on 40-6 meters. Also, they will (for one weekend) be active from YT6A's location (callsign probably YU6/DL3PS and 4N1DX/6). They will also participate from one of Islands in Croatia

(the island is still not known yet) in the IOTA Contest. QSL for all activity is via DL3PS, bureau is OK. While Zik DL/VE3ZIK is one of Web Administrators at www.contesting.info , there will be no QSL information at this site until August 3rd.

9Y, TRINIDAD AND TOBAGO. Operators Mike/AJ9C, Gerard/KE9I and Philip/N9LAH will be on the Island of Tobago now through July 17th. Activity will be on 160-6 meters SSB, CW and RTTY/Digital. Operators will be signing 9Y4/ homecall. All QSLs go to the operator's home call. SASE appreciated for direct QSLs. The 6m station will be a FT-897 (100w) and M2 6M5X. Grid is FK91. During the IARU Contest they will be using the 9Y4ZC callsign. The 9Y4ZC QSLs "FOR THE IARU CONTEST ONLY" will go to AJ9C (again please SASE for direct cards).

CU7, AZORES. Uwe, DH9YAT, will be active as CU7/DH9YAT from August 3-20th. Activity will be on 40/20/15 meters QRP on CW. QSL via the bureau.

CX1, URUGUAY. Look for the official station of the Radio Club Uruguayo (RCU), CX1AA, to be in the IARU HF World Championship Contest, July 10-11th. Activity will be on all bands. QSL via P.O.Box 37, 11000 Montevideo, URUGUAY or via the Bureau.

DX BANQUET. Tim, KU4J, President of the NADXC, informs OPDX that the North Alabama DX Club (NADXA) announces its annual DX Banquet in conjunction with the Huntsville, Alabama hamfest on August 21st, 2004 at 6:30pm. The guest speaker will be Jess Lewis, KR4OJ, from the T33C 2004 Banaba DXpedition. Tickets are 25USD/each and available from Vic Holland, K4RVH (k4rvh@arrl.net). Make checks payable to NADXC with SASE to Vic Holland, 219 Cedar Pond Drive, Madison, Alabama 35757-7633. For additional information Phone 256-721-9106 or E-mail.

HA, HUNGARY. Berkin, TA3J, will operate from different locations in Hungary, and sign HA(?)/TA3J between July 18-21st. Look for activity on 160, 80, 40, 20, 15, 10, 6 and 2 meters (including the WARC bands), on SSB and FM. QSL via his home callsign, direct (only SASE and 1 IRC, no green stamps please) or by the bureau. SWL QSL cards are OK.

HI9, DOMINICAN REPUBLIC. Ralph, DL9MWG, will be active as HI9/DL9MWG from July 28th to August 16th. Activity will be mostly CW on all HF bands with 100w. QSL via the bureau.

IOTA NEWS.....
AS-109. Operators UA9JRN, UA9JPB, RW9JT and RX3BP will start their trip on July 12-13th (4 days on the road) to Obskoj Guby Islands.
They will take a boat to the island, and they will use UA9JRN/mm, UA9JPB/mm, RW9JT/mm and RX3BP/mm as callsigns. They expect to be active on July 16th for 3 to 4 days.

EU-015. Rolf, DL6ZFG, will be active as SV9/DL6ZFG/p from Crete, July 27th through August 8th. There is the possibility that he will use the special event call J42004ZFG after August 1st. Activity will be mainly on 20 meter SSB and RTTY using a TS-480SAT (100 watts) and vertical antenna. QSL via his home

callsign, direct or by the bureau.

EU-030. Ric, DL2VFR, will be active as OZ/DL2VFR from Bornholm Island August 15-27th. Activity will be mostly CW during the ILLW (August 21-22nd) together with OZ/DL2SWW from different lighthouses there. QSL via the bureau.

EU-121. Look for the special callsign EJ2MT to be activated from Bere Island, July 21-27th. Also, the Bristol Contest Group (G6YB) and the East Cork Radio Group (EI7M) are joining forces for the Multi-op section of the IOTA Contest July 24-25th, using the callsign EJ2MT. The EJ2MT call signifies operation from Bere Island's historic Martello Tower. Please QSL via EI6HB for this operation. QSL will be 100% to all cards received.

EU-132. Rolf, DL6ZFG, will be active as SP1/DL6ZFG/p from July 9-11th from Wolin Island (Polish-Island-Award: SZ-02 and SPIA: SZ-03). He may also try to activate Karsibor Island (IOTA EU-132, SPIA SZ-03) for a short period of time. Activity will be on 20 meter SSB and RTTY using a TS-480SAT (100 watts) and a vertical antenna. QSL via his home callsign, direct or by the bureau.

NA-067. Jon, WB8YJF, will be active from Ocracoke Island, NC (USI NC-001S) from July 18-25th. His activity will include an entry in the RSGB IOTA Contest. His callsign will be WB8YJF/4. Operations will be on 80-10 meters, CW, RTTY, and SSB. Also, Jon informs OPDX that he will take a 6M rig with him this year. He will be using a TS-830S barefoot to a vertical. Please QSL direct for FAST response, and by the bureau is OK. If direct, please send an SASE or IRC for return postage. Jon's address is: Jon Severt/WB8YJF, 5586 Babbitt Rd., New Albany, OH, 43054 USA.

OC-016. Look for Norm, W1BYH, to be active as 3D2BY from Viti Levu from July 5-14th. Activity will be on 40-10 meters, CW, SSB, RTTY and PSK. QSL via e-QSL or W1BYH.

OC-201. The first ever amateur radio operation from Mana Island will take place during this year's IOTA Contest (July 24-25th). Operators Chris/ZL1CT and Franz/ZL2III will use the callsign ZL1V/p. On 40m SSB to Europe, ZL1V/p will transmit around 7190 kHz and listen below 7100 kHz. Access to Mana Island is weather-dependent.

WHY ARE KP1 AND KP5 NOT ON THE AIR?? DXer Carl Henson, WB4ZNH, provides the following information to help get KP1/KP5 back on the air: "Many DX groups in the USA have been trying unsuccessfully for about 12 years to receive permission to activate KP1, Desecheo Island and KP5, Navassa Island. My group has been working hard on this problem for several years now. We keep reaching a dead end. It has now become more important that someone go, regardless of who. Please non-USA Hams

write to:
The President, 1600 Pennsylvania Avenue NW, Washington, DC 20500
president@whitehouse.gov
vice.president@whitehouse.gov
and US Hams please write, E-mail, and phone your Congressman and Senator
and urge them to bring pressure to bear on the Department of Interior
to allow an operation from both of these DX locations. One third of
the US Senators and all of the US Representatives are up for reelection
this year, not to mention the President and Vice President. If you would
like to go to one of these islands, E-mail me and I will give you the
information for application and how to cause the most work for the
Department of the Interior..... 73, Carl

P.S. Oh, I forgot, Fish and Wildlife has to comply with 50cfr2545,
so please include the following download information."
http://members.megapipe.net/wb4znh/50cfr2545.doc
(This is a Word document.)

LIGHTHOUSE ACTIVITY.....
Yuri, UA0LMO, will operate CW, RTTY, PSK31 as UA0LMO/P from the
Bryusa Lighthouse (Japan sea) ARLHS ASR-018, RLHA RLA-016 on July
16-18th. QSL via his home callsign, direct or by the bureau.

Bob Schenck, N2OO, Public Relations Chairman of the Old Barney ARC,
informs OPDX that they will be operating from the Tucker's Island
Lighthouse which is in the Tuckerton Seaport in Tuckerton, New Jersey,
on the weekend of August 21-22nd. This counts for ARLHS Lighthouse
#USA-911. Operation will be primarily on 20 and 40 meters SSB but
other bands are possible. A nice full color photo QSL of the Lighthouse
is available. QSL via Bob Schenck, N2OO, PO Box 345, Tuckerton,
NJ 08087 USA. Visitors are welcome. This is also the 4th Annual Classic
Boat Festival weekend at the Tuckerton Seaport. The show runs from
10 a.m. to 5 p.m local time each day. Join the Tuckerton Seaport and
the Philadelphia Chapter of the Antique and Classic Boat Society for
two splendid days of classic wood and glass boat exhibitors,
demonstrations, and entertainment. Watch the parent/child boat building
contest or take a cruise up the Tuckerton Creek. The Classic Boat Show
is fun for the whole family.
Old Barney Amateur Radio Club - http://www.obarc.org
Tuckerton Seaport - http://www.tuckertonseaport.org

MD4, ISLE OF MAN. Dave, G3NKC, informs OPDX that MD4K plans to be active
again during the IOTA Contest, July 24-25th, on SSB/CW. QSL as usual via
G3NKC direct; via the bureau or direct request through their Web page at:
http://www.md4k.com
Please note that direct requests must have either IRC or USD for return
postage. All IRCs have to be stamped by the issuing post office to be
valid - Dave states that he has a large number that are not stamped, so
they are of no use. In future, anyone not submitting valid IRCs will have
their cards sent through the bureau.

NU1, UNITED STATES (Contest Station). This coming weekend, look for NU1AW (ARRL HQ station) during the IARU Contest. They will be operating on all bands from 160-10 meters on both CW and SSB. They will be operating from the stations of K2LE and W2AX in Southern VT, so this should be a good chance to pick up Vermont for those looking for new bands/modes WAS. QSOs with NU1AW will also count towards the "Order of Boiled Owls 50th Anniversay Award." See CQ magazine or their Web page for full details at: http://reallybig/obo

OA9, PERU. Look for Bonnie, KQ6XA, to be active as OA9/KQ6XA from now through August 25th from the Andes mountains in the Amazonas area of Peru. The ham radio operation is in conjunction with an international expedition of cave scientists (speleologists) to survey and map the deepest previously unexplored vertical caves in the southern hemisphere. In addition to the regular HFpack schedule at 1630z and 2230zC on 18157.5 kHz, the expedition will use the following schedule:
Daily at 0030z on 18157.5 kHz USB
Daily at 0030z on 18158.2 kHz CW
Daily at 0100z on 7087.5 LSB
Daily at 0100z on 7087.0 kHz CW
QSY frequency for CW will be 18095.0 kHz; 21437.5 kHz USB as needed; 10117.5 kHz CW as needed.
The Cave Expedition Peru 2004 will operate on HF using a 20W transmitter and battery power charged by solar. Transmitting time will be somewhat limited. To conserve battery power during cloudy days, OA9/KQ6XA will not call CQ, but instead will just listen for calls on schedule and respond to them directly. Radio operators around the world are invited to QSO with OA9/KQ6XA; please call at the above scheduled times and frequencies on SSB or CW. Listen for response in CW or SSB. QSL via KQ6XA by e-QSL.

OE, AUSTRIA. Berkin, TA3J, will operate from different locations in Austria, and sign OE(?)/TA3J between July 21-23rd. Look for activity on 160, 80, 40, 20, 15, 10, 6 and 2 meters (including the WARC bands), on SSB and FM. QSL via his home callsign, direct (only SASE and 1 IRC, no green stamps please) or by the bureau. SWL QSL cards are OK.

OH0, ALAND ISLANDS. Operators OH1JT, OH3WW, OH4JFN and OH5DX will be active as OH0Z during the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. QSL via OH5DX (ex-OH1EH).

OH0 & OJ0, ALAND ISLANDS AND MARKET REEF (AND PARTY @ SEA). This press release was sent out early last week by Jarmo, OH2BN, for Martti, OH2BH. However, activity will be coming to an end by the time you read this (expected Monday) in spite of a delay in landing on OJ0 due to bad weather. Martti, OH2BH, stated that the landing on Market Reef was under very difficult conditions. Getting all the team members and their equipment onto the reef using a dinghy took some three hours. OPDX felt that the earlier press release was interesting and should be published anyway. The following is from Martti, OH2BH:

"It was early July, thirty-five years ago when a party was heading to
Market Reef aboard a large sailing yacht to put OJ0DX on the air for

a first major activity from that barren rock, located at open sea
between Finland and Sweden, west of Aland Islands (60° 05' 45" North &
19° 54' 40" East). Lars, OH0RJ, one of the members of the original
party, has now invited the original team with their friends to share
the spirit of the initial discovery of Market Reef, to sail again
toward the open sea and find the low lying reef. But now more in style.
The 160 ft. schooner Linden (http://www.linden.aland.fi), a replica of
the ocean-going ships used 100 years ago, will set sail on Tuesday,
June 29 and journey to Market Reef. The callsigns at sea will be
OH0S/M and OJ0J/MM and a Zodiac landing can be expected, depending on
the seas, during the nightless night of these northern latitudes, just
into the next day UTC. Playing on board will be the Seven Seas DX
Orchestra, featuring a piece entitled "Untuned Guitars", specially
composed for this outing. The total party of thirty (30) includes:
OH0NA (original OJ0MA), OH1XX, OH0RJ, OH0XX, OH1MA, OH1NM, OH1NOR,
OH1RX, OH1TV, OH1TX, OH2BAA, OH2BAD, OH2BC, OH2BR, OH2KH, OH2MM, OH2PM,
OH2QV, OH2TA, OH2WC, OH3UU, OH4NS, OH5NE, OH5NQ, ES1AR and OH2BH & OH2KK,
the initial discoverers of Market Reef. A tribute will be paid to those
early members of the OJ0DX team - OH1NK, OH1SY and OH0NI - who are no
longer sailing these waters. All Silent Keys. While Aland Islands are
celebrating this year the 20th anniversary of the first release of
their own postal stamps
(http://www.goaland.net/shownews.asp?lang=en&newsID=25748&style=index)
each QSL request relating to OH0S and OJ0J will be answered from Aland
Islands, using current OH0 stamps. QSL address: Lars Nikko, OH0RJ,
Matrosgatan 5L, 22100 Mariehamn, Aland Islands, Finland."

OJ0, MARKET REEF. Seppo, OH1VR/OJ0VR, is leading an international team
to Market Reef for the IARU Contest and will be active as OJ0U during
the contest. Team members include: OH2KI/Jorma, OJ0RJ/Lasse, KX7M/Denny,
W6NV/Oliver and DL8YHR/Frank. Antenna work and initial operations are
scheduled to begin on July 8th. Home callsigns signing portable OJ0 may
be used before the contest. DL8YHR will activate VHF bands.

OK, CZECH REPUBLIC. Berkin, TA3J, will operate from different locations
in the Czech Republic, and sign OK(?)/TA3J between July 23-25th. Look for
activity on 160, 80, 40, 20, 15, 10, 6 and 2 meters (including the WARC
bands), on SSB and FM. QSL via his home callsign, direct (only SASE and
1 IRC, no green stamps please) or by the bureau. SWL QSL cards are OK.

QSL INFO AND NEWS.....
QSL Manager Update: June 2004
GM3WOJ, GM4YXI, 9M2/GM4YXI, GS2MP, ZL1CT and ZL1V via N3SL
GM4AFF, GM7V and GZ7V via M0CMK

QSLs for the CT9P and CT9X operations will not be printed until after
the trip is complete. The QSL Manager for both callsigns is Kim Larson,
daughter of N3SL, via N3SL's CBA. QSL direct with SASE or SAE and
IRC/USD. Bureau cards are OK, but are shipped out only quarterly. The
logs will also be uploaded into the LoTW by N3SL as soon as they are
received.

QSL HK3JJH/0A direct only to HK3JJH. Petro, HK3JJH, was active over the past weekend from NA-132 (Bajo Nuevo and Serranilla Bank Cays). Remember, this operation will only count for DXCC as San Andres.

S79, SEYCHELLES. Look for Igor, RN3OA, to be active as S79OA from the Island of Mahe (AF-024), August 16-31st. He may also activate the Island of Alphonse (AF-033).

SILENT KEY. The following was taken from the DX-List E-Mail Reflector: "One of the best-known names in cinematic as well as Amateur Radio circles, actor Marlon Brando, died in Los Angeles July 1 at age 80. Known to hams worldwide as KE6PZH and FO5GJ, Brando is listed on the FCC database as Martin Brandeaux. He was on the air occasionally through the years with his FO5 callsign from his private island in French Polynesia. In an interview with Larry King on CNN in 1994, Brando confirmed his continued interest in Amateur Radio. In response to a caller's question, he said ham radio provided him with the opportunity to just be himself. The iconoclastic actor was best known for his roles as Stanley Kowalski in 'A Streetcar Named Desire,' a dockworker in 'On the Waterfront,' and Vito Corleone in 'The Godfather.' He was nominated for eight Academy Awards and won twice."

SJ9WL AND LG5LG, MOROKULIEN STATION (Update/Clarification/Correction). Last week OPDX was misinformed about the station at Morokulien and thanks to Osten, SM5DQC, a clarification/correction was provided. It seems that Morokulien is not a republic as mentioned last week (MOROKULEN PEACE REPUBLIC). However, there is a peace monument there; it was named in a sort of show radio-program in the fifties -- "moro" in Norwegian means fun and "kul" in Swedish also means fun. The ARIM (Amateur Radio In Morokulien) is an association which maintains and runs the amateur radio station in Morokulien. According to their Web page, ARIM has a management of 3 Swedish and 3 Norwegian radio amateurs. The main task of ARIM is to provide courses that give handicapped people radio amateur lisenses. The radio shack can be rented by worldwide radio amateurs, and it is very popular because of its very attractive callsigns, the Norwegian LG5LG and the Swedish SJ9WL. The location of the amateur station is also unique, because this is probably the only amateur station worldwide which is operating from the borderline between two countries. The shack is made useable for handicapped people. The income from rental activities are used to help Norwegian and Swedish handicapped to get amateur lisense. The QSL Manager is John, SM5DJZ, for both callsigns. LG5LG will count as Norway and SJ9WL will count as Sweden towards DXCC. Please visit their interesting Web site (with pictures and history) at: http://www.east.no/priv/la7tia/arim/

TX/C, CHESTERFIELD ISLAND. Chris, DL5NAM, informs OPDX and the Northern Ohio DX Association (NODXA) that with the great access of their last DXpedition (to the Sudan as ST0RY), the team has annnounced their next project will be to activate Chesterfield Island in October of this year. Activity will be on all bands 160-6 meters, CW, SSB and RTTY. He states that the flight tickets and vessel are booked; callsign is in hand. The operators mentioned are: Chris/DL5NAM, Jan/DJ8NK, Hawa/DK9KX, Dieter/DJ9ON, Dieter/DL3KDV and Heye/DJ9RR. They are still looking for one more operator.

This DXpedition will not be cheap (est. budget is 45,000-50,000 USD), so they are looking for funds. For any questions, please feel free to contact Chris, DL5NAM, at:
E-mail - dl5nam@arrl.net
Snail Mail - Chris Sauvageot, Guttenburg 19, D-91322 Graefenberg, Germany
F A X - ++49 9192 998968
Ph. # - ++49 9192 998967

V26, ANTIGUA AND BARBUDA. An early announcement reports that a number of operators (to be announced) will be active as V26DX during the CQ WW DX SSB Contest (October 30-31st) as a Multi-?/Low Power entry. QSL via KU9C.

VK9L, LORD HOWE ISLAND (News Release Update #2). Bill Horner, VK4FW, sent OPDX the following release on the upcoming operation to Lord Howe Island to take place October 9-23rd: "All accommodation is finalized along with plane flights. We arrive on October 9th at approx 14.45 local time. By the time we get checked in and gather all the equipment, it will be getting close to darkness; however, we hope to have one station on air very quickly followed soon after by a second. The rest will be installed when daylight breaks.
Because of severe weight restrictions we have to boat freight most of the equipment over next month. DONATIONS to help offset this cost would gladly be appreciated and can be sent direct to Oceania Amateur Radio Dx Group Inc, PO Box 513, Nambour, 4560, Australia.
The operators that are absolute confirmed starters are:

YLs

Vicki/VK2IVK - Operates SSB. She was part of the VK9CT team in 1996.
Elvira/IV3FSG - Operates SSB and specializes in RTTY. She was part of the VK9WM/VK9WY team in 1997 and has also done many other operations throughout European areas.

OMs

Eric/VK4NEF - Operates SSB. He is a keen contester who is no stranger to working pile ups.
Mike/VK3SU - Operates SSB. He has been dxing for many years and will get to be on the other side of the pile up.
Carlo/IK6CAC - Operates SSB, CW & RTTY. He is a very dedicated operator who knows how to work pile ups. He has operated from many places throughout European areas.
Bill/VK4FW - Operates SSB & CW. He is no stranger to thinning out pile ups.
It is very unfortunate that George, VK6NKG, has been forced to pull out of this trip due to unforeseen business commitments. This leaves us with 2 vacancies at the time of this release. We require 1 more YL op and 1 OM. If this interests you please E-mail me direct at: vk4fw@westnet.com.au
We will endeavor to operate with 4 stations on HF and 6m bands. The following frequencies will be covered:
6m -- 50.100 MHz CW and SSB

HF SSB -- 3790, 7045, 14195, 18140, 21245, 24945 and 28.445
HF CW -- 1807, 3507, 7007, 10107, 14007, 18077, 21007, 24897 and 28007

Lord Howe Island is ranked at 65 on the wanted list from the greater European area. We will make sure that the EU areas get a good shot at getting us in the log. We again ask you to be so kind as to send a donation today.... Bill, VK4FW" Any questions or suggestions please send them to: vk4fw@westnet.com.au

YO, ROMANIA. Special event station YR500S in Suceava county is active during July to commemoration the 500th anniversary of the death of Moldavian King Stefan the Great. QSL via YO8KGA. For more information, please visit the Web page at: http://www.qsl.net/yo8kga
ADDED NOTE: A special event station from Moldova was also active only through July 4th in celebration of the 500th anniversary of the death of Moldavian King Stefan the Great. QSL ER500S via ER1DA: Valery Metaxa, Box 3000, Chisinov, MD 2071, Moldavia.

ZK1, SOUTH COOK ISLANDS. Victor, ZK1CG, will be using the ZK1USA callsign as his callsign for the month of July. QSL to the address in any callbook or QRZ.com.

ZL, NEW ZEALAND. During the IARU HF Championship, look for the new contest callsign ZL1V to be on the air for the first time during the contest on July 10-11th. Activity will take place from the ZL6QH contest station. QSL ZL1V via N3SL.

ZL, NEW ZEALAND (ZL 160m Change). Greg, ZL3IX, announced on the Top-Band Reflector this week that after a successful remit to their national body (NZART), the standard Region 3 bandplan for 160m has also been adopted for ZL - ie narrow band only modes from 1.800 to 1.840 MHz, other modes from 1.840 to 1.950 MHz.

410. Strange Antenna in old 73 magazine ?

Newsgroup: rec.radio.amateur.misc

Hi,
Does anyone remember a weird compact antenna that was featured in a 60's (or early 70's) edition of "73" magazine. Had 2 etched PCBs (like spaced plates) mounted inside a plastic bucket, and fed with coax?
Does anyone know more details of this?
JEFF
ZL3TNV

That would certainly be a greater challenge than posting an email to
VE3CZI, you might have a definite problem with
FFSTA17NO@SPAMACCESS995.COM

WHY? All you need to do is remove the "NO SPAM". AND if you had read my reply to him in group when my message bounced, I even stated that. So, unless someone has trouble reading, then they wouldn't have that problem!

But ya know.... right now, I don't really give a rats ass. I've had enough of this crap. My message bounced, I replied in group. I've yet to hear from him, SOooooo......

Was it in the April issue? A lot of "fools" fell for such articles in
73 Magazine, Hi.
One such antenna was to be buried under ground then the "polarity" of
the radiated
wave would be "inverted". ;-)

There are a few who experiment with "EH" antennas, where a coil is
placed in coffee cans,
spaced at different intervals for the band the antenna is to be used.

>>> Does anyone remember a weird compact antenna that was featured in a
60's<<<

I recall one in a publication (S9) aimed at CB'ers back in the 60's. It used
printed circuit boards as you mentioned but also incorporated a nice husky
resistor that turned the critter into a dummy load. The article didn't fess
up that it was an April fool joke until the next issue. Wonder how many fell
for it? RM~

>>>Latter when the Browning labs introducedtheir "Eagle" series, I often wondered why the TR switch they used was configured to produce that feedback ping,<<<

Ok, I'll fess up; I had the eagles but mine refused to ping after I built a Wayne Green circuit (I think he nick named it the "Mule Box") which was a clamp tube circuit that ran the Brownies double sideband reduced carrier. It drove the locals nuts watching their s meters going nuts. I wasn't much into gab but enjoyed tinkering with the equipment more than gabbing on them so soon sold out except for a CB I used in the truck. I drove an 18 for a living and retired in 84 and haven't keyed anything since. RM~

Hi OM,

More efficient that what, a resistor? 75% less energy than what, a
resistor?

The eh antenna is one of several of a class that take more effort for
less return than simply putting up as much wire as you have room for -
even if it is the same size as any of these "amazing!" antennas.

The absurd claims that attend the cfa/eh/fractal crowing societies is
matched by their inability to prove them except through their own
special math (never mind the S-Meter).

However, there are those who argue SWLers need poor antennas and I
suppose these fit the bill nicely. The technical equivalent of cell
phones VS string-and-dixie cups tho'.

Well, since the topic is shifting, can anyone tell me what the echo is supposed to do? in my travels, with my CB on, I can "hear" people with echo mic's and I'll be darned if I can hear them well at all. Now echo AND way overmodulated, now there's the ticket to complete unintelligibility! (is that a word?)

They "think" it makes them sound better or more cool, not sure which.
Problem is, most are turned up TOO far. Some isn't so objectionable and
doesn't sound bad, even though they're not supposed to be permitted per part
95. I've heard so many that sounded like they were talking either
underwater or with a mouth full of something. REALLY SUCKED.

Being both a ham and Cber, I can't see what their sense of existence is.
Then too, you got everyone and his brother cranking up the RF out, and if
they go channel hopping, that bleeds like hell. I had to take a double take
one time when I and a friend of mine were in another CB shop, and actually

heard two CBers swear off the extra garbage and go back to stock TO HEAR! WOW. I asked my friend if I heard right, and he agreed. I don't do any mods to CBs or other radios unless permitted by law or needed to get the thing working, when a unit comes to my shop. Many don't like my approach, but so be it.

Lou

Subject: 64 group Field Day
Sent: Monday, June 28, 2004 12:28 PM

Hi to all.

Boy did we have a Field Day this year. Lots of food, lots of hams and
their families joining in, about 60 last count, the ham testing went
great with 9 taking test, one for the code, and lots of radios and
operators on all rigs. We had all rigs except VHF/UHF manned all 24
hours. Since 6 and above were not open not much activity. It did get
exciting with the PSK31, the ARRL bulletin and a slow scan contact
with a VA station. We got at least 800 of the bonus points. Wish we
had APRS, but can't do it all.

We need to thank Bruno and Rich for without them and all the equipment
we would have had little to work with. The $400 bug zapper running

off battery and propane was different, but did the job. Got a great collection of dead bugs.

The food and drink they supplied was great. However, we do need to work on spreading the food input around.

Rich's large tri-band beam worked great. 15 was hopping almost all of the 24 hours. Think this band accounted for most all our contacts.

We did have a few snags. One was when one generator smoked and then a second. For about 20 minutes we were dead, but since we had a third on site got things up and running until we could get a fourth.

We tried the weather balloon thing with 80, 40 & 20 meter dipoles, but the wind killed the project. I will pass my experience with the balloon and some dos and don'ts that I observed. Sounded like a great thing to do and if it did work it would have been a good Field Day project. Well have a year to plan, hi.

We must thank the state of Florida for allowing us to use the Werner Boyce Salt Spring Park. This is a major undertaking by the Florida park division. It is in its 4th year of construction with about 2 to go. This park is 4000 acres from around Ridge Rd going up the coast to SR52. Lots to be done. Unfortunately the state is providing hardly no money for the effort. Almost all is from volunteers and private contributions. The state did provide much of the funds to purchase the land and it is becoming more difficult due to the developers wanting it to build expensive housing. Try $100,000 per acre.

If you've got an RV almost any Florida park will give free hook up, electric, water, etc, for up to 6 months if you provide 20 hrs/week of volunteer work. Something to keep you young and healthy and a chance to help the community. The park has one volunteer who is of the age I just hope to get to who has logged over 3000 hours in last 2 years. This is about full time. The ranger has trouble keeping up with him. The ranger has tons of stories about the people of Florida, including the scouts who get there own funding for park projects, and many others volunteering. When this park opens it will be one of the best in the state. We are lucky to have this one close to us.

Lots more to say, but have kept this going on too long as it is.

Well a great year. Look forward to next.

KG4COQ-Don

Has three national shortwave radios

Special 60 national shortwave radio receiver
Price: $30.00 or best offer

Very large national shortwave receiver- No labels for the dials
Price: $40.00 or best offer

National receiver- Taken apart and has all the parts but needs to be rebuilt.
Price: $25.00 or best offer

AEA digital reader (Multi-reader)

Price: $15.00 or best offer

Two mutimeters- Only one has leads- Old

Price: Best offer

Contact: kg4coq@hotmail.com

W4AIG- Phil

Needs a 2meter mobile antenna. Needs the element only

Contact: w4aig@yahoo.com

N9PYM- Kurt

Has a Sentor 220 FM potable that comes with two batteries, charger, software, and a programming cable.

Price: $185.00 or a trade for a Motorola saber 2 or a saber 3 (Radio only)

Contact: n9pym@juno.com or (618)-410-8042 (Will be in the Tampa area until Tuesday)

WA4RLK- David

Has a Radio Shack HTX-10 a 10 meter rig in mint condition (7 months old)

Price: $50.00

Has a 12 volt, 12 amp power supply in mint condition

Price: $20.00

Contact: davy2@ij.net or (727)-443-3568

73,

Shoen

RC,

Instead of playing the 'game' of posting a reply to anything I post.

Why don't you be helpful to the original poster and attempt
to answer his question.

First - What type (name) antenna is he talking about ?

Second - What is your 'expert' opinion about this antenna ?

Third - What are the technical aspects of this antenna ?

- - - - - The Original Question - - - - -

Hi,

Does anyone remember a weird compact antenna that was featured
in a 60's (or early 70's) edition of "73" magazine. Had 2 etched
PCBs (like spaced plates) mounted inside a plastic bucket, and
fed with coax?

Does anyone know more details of this?

JEFF
ZL3TNV

- -

It's much nicer and rewarding to be honestly helpful
. . . then simply hateful.

After reading the first 1/3 of the story, I instantly thought about the The Bricklayer's Song which can be heard occasionally on the radio, especially on St. Patrick's Day.

Like you? ;-)

Instead of playing twenty questions:
>First - What type (name) antenna is he talking about ?
>Second - What is your 'expert' opinion about this antenna ?
>Third - What are the technical aspects of this antenna ?
Let's all note that it was your introduction of 6 off-topic links to
an antenna who I have already responded to against these same three
preceding questions.

Hi OM,

The eh and their ilk are on every sucker list on the web. It is a
simple matter to NOT cross post your responses if they don't shine
under examination. It is also a simply matter to either stay
on-topic, or to at least follow your own side-thread.

Respond to the technical issue, or learn to unlink your posts.

I don't know who's more stupid. The 'alleged' guy who wrote this BS
by modifying a story that's been floating around as an insurance claim
letter from the 60's, or the people who actually believe it.

The only intelligent guy in the whole mess is the unknown comedian
from probably the 50's that started the whole thing as the 'farm accident'.

No! no! In Wal-Mart you take peanut butter and go into the bathroom and
smear a bit on some toilet paper. Then when someone comes into the
next stall you flick the paper under the wall, then say "Excuse me, sorry.
Would you mind just kicking that back over here please?"

It started life as part of a speech given by Gerard Hoffnung to the
Oxford Union (a debating society) in 1958. It was recorded by the BBC
and is available on a CD. In the original the unfortunate man is a
bricklayer explaining to his boss why he is absent from work.

Amateur Radio Newsline™ Report 1403 – July 2, 2004

Amateur Radio Newsline report number 1403 with a release date of
Friday, July 2, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The score is now Ham Radio one, BPL zero; OSCAR Echo is alive, and business is
good for CW.

Find out the details on Amateur Radio Newsline report number 1403 coming your
way right now.

(Billboard Cart Here)

**

BPL: SCORE ONE FOR THE GOOD GUYS

A major broadband-over-power line pilot test by Alliant Energy in Cedar Rapids,
Iowa is shut
down after local hams document the harmful interference and the Federal
Communications
Commission gets a formal complaint from the A-R-R-L. We get the details from
Amateur Radio
Newsline's Mark Abramowicz NT3V:

****

It took nearly three months to accomplish the mission, but amateurs in Cedar
Rapids - armed
with ample data and the muscle of the American Radio Relay League - convinced
Alliant to
prematurely halt their B-P-L test.

Jim Spencer, W0SR, first discovered the interference on his HF radio right
after Alliant
launched its B-P-L testing March 30.

Spencer, who quickly mobilized other Cedar Rapids hams to form a technical
committee,
says the interference was so severe that it wiped out his and others' ability
to use
their radios.

Spencer says the group worked with Alliant officials to try to resolve the
interference
and conducted several test measurements with the utility's cooperation.

Spencer tells Amateur Radio Newsline the group appealed to Alliant to shut down the system and stop the interference on several occasions. But it was clear the B-P-L industry was telling Alliant's managers something else.

"There's a lot of regulatory uncertainty here," Spencer explains. "And that what the hams were calling harmful interference - in my case S-9 signals, you know, every 1-plus kilohertz across the band, they were being told that wasn't really harmful.''

Spencer says communications between his technical group and Alliant officials were civil, but they accomplished little action. He says he and others filed complaints with the FCC.

"I think in 21 communications I received one simple response basically told me to go back to the power company - the operator of the system," Spencer says. "And, of course, I had done that all the time. So, we had been asking the utility company to close it down, we had been asking the FCC to help us and then the ARRL went and escalated that."

Wade Walstrom, W0EJ, is the ARRL's Midwest Division Director. He says the league's FCC complaint finally got the utility's attention.

"The thrust of the complaint was that they were now aware that the system was causing interference and didn't shut the system off so now that makes it willful interference," Walstrom said...

Alliant stopped the B-P-L pilot test on June 25 saying it had gathered the necessary data to make a determination on whether a general rollout of B-P-L would be worth pursuing, according to Spencer. He says Alliant's project leader told him the ARRL's FCC complaint was just one factor in the company's decision.

"Obviously we're happy, but we didn't feel like we had won," Spencer said. "We felt like this was a technical problem and that we tried to communicate some of the technical parameters to them and that they'd made a good business decision."

Spencer says an Alliant representative told him the company has no plans to pursue B-P-L at this time.

"In order to distribute it out to a sparsely-populated rural area with all the equipment it would take, it's not clear that this thing makes economic sense," Spencer says. "And that this really can meet the goals of the rural user which is
one of the things that people touted."

The ARRL's Walstrom is cautiously optimistic Alliant's decision might have a ripple
effect.

"We would hope that other utilities or other organizations that were looking to

possibly use B-P-L as a source of revenue will look and see the decision that Alliant
has made and re-think their own plans and hopefully decide that maybe there are other
ways to provide broadband internet connections to the population as a whole," Walstrom says.

Walstrom says the Cedar Rapids group led by Spencer has set a precedent.

"All the proof on how well it's going to work isn't there yet," Walstrom says.

"And the proof that we have established here in Cedar Rapids and is coming out from other parts of the country is that it's not an interference-free system by

any means and in fact it causes a lot of interference and we've documented that here."

Spencer says his committee, consisting of a group of engineers - most of them retired from Rockwell Collins - stuck strictly to technical evidence in communications
with Alliant. But he says its clear B-P-L has taken on a very political tone.

"Obviously the problem has got a lot of political implications, but the thing that
hams can do is remain professional and keep it primarily on a technical level," Spencer says.

The ARRL's Walstrom says if he could stand before the FCC panel to make his case,
he would strongly urge the commissioners to postpone action on or even walk away from B-P-L.

"I think they need to delay it until they're satisfied that they're able to mitigate any
interference problems at all and by mitigate from an amateur radio standpoint that really
means eliminate," Walstrom says.

Spencer adds, there are no hard feelings toward Alliant. Spencer says he and members of
his technical group still have a good, working relationship with the utility.

"We've had quite a bit of communication back and forth through this whole thing," Spencer
says. "I mean I've had many, many e-mails and some phone calls and I would say that it
was pretty positive and still is."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

****

In addition to operations in Cedar Rapids, Alliant also provides utility services to
customers in sections of Minnesota and Wisconsin, and a small strip of northwestern Illinois

(W0SR, ARRL)

**

HAM RADIO IN SPACE: ECHO IS UP AND RUNNING

The newest Amateur Radio satellite is now in orbit and doing fine. Chuck Green, N0ADI,
reported by phone from the Baikonur Cosmodrome that the launch of AMSAT Echo and the
other satellites occurred on time on June 29th at 0630 UTC. He watched the rocket climb
out and said it appeared to be flying straight and true. A second phone call from Chuck
18 minutes later confirmed that the launch carrying AMSAT OSCAR Echo was successful and
that all spacecraft had separated successfully.

Chuck was assisted in the final integration and checkout process at Baikonur by the team
from SpaceQuest which included Dr. Dino Lorenzini KC4YMG, Mark Kanawati N4TPY, and Lyle
Johnson KK7P. The SpaceQuest team members are also AMSAT members and volunteers.

First contact with Echo was at 1452 UTC on June 29th. After collecting a bit of TLM the
435.150 MHz transmitter was turned off at 1500 UTC. The preliminary keps were observed
to be pretty close. The first look at Echo’s telemetry shows things are looking good.
The battery was fully charged and the panels were delivering about 950 ma, which is fine.
The panels were supporting the transmitter power adequately at about 2.3W output. The
bird appeared to be tumbling as expected. Internal temperatures are around 10 degrees
Celsius which is also as expected.

On the second pass the loading of software began and good progress was made.

Telemetry continues to look very good. While fades clearly indicated Echo continues to
tumble (as expected), at 2.2 Watts output good bits were received without difficulty.
Rather than turn the transmitter off at the end of that pass, based on a very good
looking power system, the power was turned down to about 0.3 Watts.

The hour between passes was spent closely examining the captured telemetry and comparing
it to pre-launch testing, as well as tweaking the keps a bit.

During the second set of passes approximately twelve hours later, the command team
finished loading the housekeeping software. The housekeeping task is up and running
as of June 30th at 0525 UTC. With more data available on the power systems performance
the transmitter has now been left at about 1.2W.

The morning passes on June 30th concentrated on gathering telemetry. The evening passes
continued with checkout activities.

A telemetry decode program, TLMEcho, is available for those who would like to view and
report data from Echo. It may be downloaded from AMSAT.ORG in the Echo project area,
http://www.amsat.org/amsat-new/echo/

If you record telemetry please send the CSV files to ke4azn@amsat.org.

Please do not transmit to Echo until checkout and commissioning has been completed and
the satellite is made available for general use. Unexpected uplinks may cause delays
in verifying the proper operation of ECHO and delay the opening of the transponders to
general use.

(AMSAT, WD0E)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin
stations around the world including the N7SKO repeater serving Arizona, California and Nevada.

**

WITH NEWSLINE: SEND US YOUR ID - PLEASE

Would you like to ID your own repeater or bulletin station here on Amateur Radio
Newsline? Well here is how you can do it. Record the following sentence and include
the call sign and location you want to honor.

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin
stations around the world including the xxx repeater serving yyy zzz. The xxx is the
call sign. The yyy and zzz are the city and state.

Then, take the tape and mail it to Amateur Radio Newsline, Editorial Office, 28197
Robin Avenue, Santa Clarita, California, 91350. As time permits, we will select an
audio I-D and include it in the newscast.

All tapes submitted become the property of the Amateur Radio Newsline and cannot be
returned. Again, the address to make yourself a part of this bulletin service is
Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita,
California, 91350.

**

RESCUE RADIO: VA HOSPITALS SAY YES TO HAM RADIO

Hospitals in Roanoke, Virginia, will soon be ham radio equipped. Mike Knight, K4IJ,
reports through the Repeater Journal that a budget of twenty-five thousand dollars has
been approved for the installation of Amateur stations at between ten and twelve primary
healthcare facilities in the Roanoke area.

Knight says that the system will include a dual band base radio, a mobile radio, a power
supply, antennas and full lightning protection at each hospital. Also going on-line will
be a pair of commercial grade FM voice repeaters with back-up generators, and a dedicated
digital repeater. The voice systems will have IRLP and Echolink tie-ins to communicate
outside the local area.

When completed, the Roanoke system will consist of five to six linked repeaters. The
base stations will be connected to each hospitals emergency power system to keep them on the air.

(Repeater Journal)

**

RADIO LAW: COURT SAYS NO TO EXPANDED MEDIA OWNERSHIP

A U.S. Court of Appeals in Philadelphia has thrown out most of the Federal Communications
Commission's new and controversial media ownership deregulation. Its Thursday, June 24th
decision means that for the time being, ownership levels of broadcast properties and
related media will remain at current levels.

Back on June 2nd of 2003, the FCC's Republican majority voted to dramatically ease a
prohibition barring daily newspapers from buying broadcast stations in their markets.
The agency lifted caps limiting how many radio and TV stations a broadcaster could own
in the same area.

But in its 2 to 1 decision the Philadelphia court said that while some relaxation of the
ownership limits might be reasonable, the agency had failed to adequately justify the
limits it had put in place. The court announced that its original stay on the FCC's media
ownership deregulation would continue until the agency fixes the regulations to the court's
liking.

(TV Week)

**

ENFORCEMENT: TOO MUCH MORSE CODE

The FCC is asking a Missouri ham why he is running a Morse code training program smack in
the middle of the 40 meter band. The target of the inquiry is Paul D. Westcott, KC0OAB of
Purdy who apparently has code practice on the air around the clock.

Its June 21st letter to Westcott notes that the agency had previously discussed this matter
with KC0OAB and was given assurances that the transmissions he was making were for Morse
Code practice. Since that time the agency has received another complaint which alleges
that the purported 40 meter code practice transmissions are 24 hours a day, seven days per
week. The FCC says that due to the crowded nature of the 40 Meter Band, it is extremely

inconsiderate to take up spectrum in that area for transmissions 24 hours a day. This,
even if it is purportedly for “code practice” purposes.

The agency has posed several questions to Westcott to explain his operation and was given
20 days from the date of the FCC letter to provide a very detailed response.

**

ENFORCEMENT: NO LICENSE - DON’T OPERATE

The town of Reseda, California, is only about 10 miles from the Newsline studio. It’s
also the place where the FCC alleges that someone has been operating a ham radio transmitter
without the benefit of being a licensed ham.

In a letter to a resident identified as Joseph A. Mosbergen, the FCC says that he or someone
in his residence has been operating radio-transmitting equipment on several Los Angeles area
Two Meter Amateur Radio repeaters. The agency warns Mosbergen that this is a violation of
it rules and will subject him or whoever is proven to be operating to punitive action.
This could include a fine or imprisonment, as well as seizure of any non-certified radio
transmitting equipment. It also tells Mosbergern that this is the last warning that he
will receive.

**

HAM RADIO BUSINESS: HEIL TO MARKET CLEAR SPEECH SPEAKER

Turning to the ham radio business scene, word that the NCT Group has appointed Heil Sound
Limited as its prime worldwide manufacturer and distributor of the Clear Speech Speaker
system. Under the terms of the deal, Heil Sound will distribute Clear Speech speakers to
their present amateur radio dealers and commercial broadcast distributors. Also, the
Clear Speech speaker will be improved and several new products will be brought to the market
using the NCT Group technologies. According to Heil Sound these new product models are in
development and will be available for market by the end of July. More is on line at
www.heilsound.com

**

COMMUNICATIOS NEWS: DUAL-CORE PROCESSORS ON THE WAY

Tech News reports that Advanced Micro Devices plans to begin selling microchips with
the equivalent of two microprocessors in one next year. The Sunnyvale, California based
company said it plans to offer dual-core processors for data-serving business computers
in the middle of next year, and for high-end home computers in the second half of next year.

Dual-core technology combines the power of two processors in one package. This permits
the creation of a more powerful computer and increased computation power when multitasking.

Last month, Intel said it would bring dual-core chips to the marketplace in 2005. That’s
more than a year ahead of schedule.

**

HAM RADIO BUSINESS: CW IS GOING STRONG

If you think Morse code is on its way out, the ham radio business community probably
disagrees with you. At least that’s the impression one gets thumbing through the articles
in the July issue of CQ Magazine.

Not only are the ads for Morse related products holding steady, but the new products area
has some reviews of the latest CW related products. And not to be outdone, Dave Ingram,
K4TWJ, devotes his World of Ideas column to Morse Keys from around the world.

If you are a Morse lover, this is the CQ edition for you. It’s on your newsstand now.
More information is on the web at www.cq-amateur-radio.com.

**

THE SOCIAL SCENE: COME TO THE TENNESSEE HAM BREAKFAST

On the ham radio social scene, the Middle Tennessee Ham Breakfast takes place at the
famed Tennessean Truckstop on the second Saturday of every month. People begin to
gather there at about 9 a.m. and it’s billed as a chance to meet the middle Tennessee
hams you may have contacted on the air.

Interested in attending? For full information simply send a note to kenbreed@surfmore.net
or call Ken, AI4DV at area code 931 – 424 – 9523 during normal business

hours.

(Do Not Read: Repeater Journal)

**

THE SOCIAL SCENE: ROANOKE VA. IN JULY

And still in the South, mark down July 31st to attend the annual Roanoke Hamfest.
This event is sponsored by the Roanoke Valley Amateur Radio Club and will be held at
William Byrd High School in Vinton, Virginia starting at 8 a.m. local time. Full
information on this friendly event is on line at w4ca.host4www.com

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America,
We are the Amateur Radio Newsline with links to the world from our only official
website at www.arnewsline.org and being relayed by the volunteer services of the
following radio amateur:

**

COLOR TV IS CELEBRATING ITS 50TH ANNIVERSARY THIS YEAR

Now for a bit of a history lesson. Although color TV transmissions were in the

development stages many years earlier, the broadcast industry is celebrating its
half century mark this year. This is because it was 50 years ago that color broadcasts
were initially
made available to the public.

Now, National Public Radio has posted a story and some interesting historical resources
at its website. It is very interesting reading. That URL is in this week’s printed
Amateur Radio Newsline report.

(www.npr.org/features/feature.php?wfId=1789944 (CGC))

EMERGING TECHNOLOGY: NEW DVD PLAYER FILTERS OUT BAD WORDS

Wal-Mart is selling the world's first DVD player that can seamlessly skip over violence,

swearing, nudity and other potentially offensive movie content. The $79 unit features
technology by ClearPlay and is manufactured by Thomson Inc. under its RCA brand.

The DVD player is the latest development in a legal battle between the Salt Lake City-based
software company and Hollywood. Members of the Directors Guild of America filed suit
against ClearPlay in September 2002, when the filtering product was available as a
computer program claiming it impinges on intellectual and creative rights. Those legal
proceedings are still under way in Colorado's 10th District Court. Both sides currently
are waiting for a ruling on a summary judgment filed by ClearPlay.

**

WORLDBEAT - SLOVAKIA: FIRST CELLPHONE VIRUS ANNOUNCED

On the international scene word that a group of underground virus writers have announced
what is believed to be the world's first worm that can spread on advanced mobile phones.
According to news reports, the worm named Cabir, was sent to security software firms in
the United States and Russia by a member of 29a.

29a is described as a group of virus writers from the Czech Republic and Slovakia who
pride themselves in creating proof of concept malicious viruses. Thankfully, Cabir has
been found to have no damaging code attached that might destroy files or execute other
harmful operations.

**

WORLDBEAT – UK: RSGB QSL BUREAU CHANGE

On a more positive note, word that Marc Litchman, G0TOC is the new RSGB QSL Bureau
Sub-Manager for the G7AAA through G7ZZZ series of callsigns. Litchman can be reached at
26 Oak Tree Close, Loughton, Essex IG10 2RE, in the U-K.

**

WORLDBEAT – NEW ZEALAND: ZL1AN HONORED FOR EDUCATIONAL WORK

And a word of congratulations to New Zealand’s Dr. Gary Bold, ZL1AN. Bold is a physics
lecturer at the University of Auckland and he has been awarded the Prime

Ministers
Supreme Prize based in part on his 43 years of dedication to teaching.

Bold has taught every course in the physics department, all courses in geophysics signal
processing and network theory. He has also devised and revised experiments and designed
the curriculum for many second and third year physics courses. A dedicated C-W enthusiast,
in his spare time he writes the NZART Break-In Magazine column "The Morseman."

The presentation was made at the recent 2004 Tertiary Teaching Excellence Awards.
ZL1AN was one of 12 academics from nine institutions presented with awards, each of which
brings with it a $30,000 prize.

**

DX

In D-X, word that several O-H prefix operators will be operational from Aland Island as
OH0I during the CQ Magazine and RTTY Journal RTTY DX Contest. This, from September 25th
to the 26th. They will operate as a Multi class 2 entry using multiple beams and vertical arrays on the low bands. QSL via OH3BHL.

And keep an ear open in September for RA3AMG from Cyprus. He will also be active in the
same contest signing P3B. QSL via his home callsign.

Lastly, ST2DX will be active from the Sudan until the 10th of July. Look for him mainly
on SSB, with some CW, on all bands between 30 and 6 meters. QSL this one as directed on the air.

**

THAT FINAL ITEM – HAMMIN’ OLDIES ON WBCQ

And finally this week… who says hams and short wave listeners are nothing but a bunch of
stuffy old geezers?

The Peacock Project is a group of Internet broadcasters that have banded together to
present a variety of music eras, styles and talk over WBCQ on Saturday nights at 8PM
Eastern time, which is Midnight Universal Time, Sunday. Named in tribute to one of their
group, Rob Peacock, who suddenly passed away in January, the show features a different
host each week with a program that is unique to his own musical preference and

personal
presentation.

The first weekend of every month will feature Dave Kirby's look back at
Old Time
Radio and some non-English language versions of American songs. The second
weekend is
The Voice of Savage Henry, a 1960's and 70's "Garage Band" rock show hosted by
Steve Evanchuck,
KG8KO. Tim Gaynor is heard directly from Australia on the 3rd week and the 4th
week is S
teve Coletti, aka “Big Steve Cole”. Four times a year there is a 5th
Saturday to the month
and on those weekends it is time for "Hollow-State Hound", a show scheduled to
feature
big band music with Mike "The DX Hound".

The broadcasters got together in an odd way, and going on WBCQ's 7415
kHz frequency
is like going home to where it all started. A few years ago there was a group
of ham radio
operators who were also listeners to shortwave broadcasters and utility
stations. Under the
umbrella organization of the Association Of North American Radio Clubs,
(ANARC), they would
join into a ham traffic net every Sunday morning on 7240 kHz to compare their
station
loggings. While the net still has a lot of good memories for those who joined
in or only
listened in, the group eventually disbanded. The net then moved to an Internet
Relay
Chat channel that was already in existence.
To a few die hard members like Dave Kirby, N1DK, the discontinuance of
the radio
net was only a minor setback. Dave began doing weekly reports by way of the
Cyber
Shortwave real audio file that was available for download by anyone. It was at
the suggestion
of member Pete Costello that Dave began doing his presentations as a live
interactive program
by way of sending sound via live365.com and receiving typed comments back from
listeners via
the IRC chat channel.

As loggings and SWL news tapered off, Dave began doing more music and
off topic bantering.
This led the powers that be at the chat room to ask Dave to create his own chat
room for the show.
The kick in the butt turned out to be a blessing as now the door was opened for
others who wanted
to do interactive radio using Dave's chat room

We hope that you will enjoy the diversity of programming that these enterprising hams and
SWLs have created. The Peacock Project begins July 3rd on WBCQ at 7415 kHz and your fellow
broadcasters, hams and SWLs at the Amateur Radio Newsline wish you the best.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the
Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all

440. Manual needed for Motorola Micor Vhf Receiver

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-06 22:17:59 UTC
From: Stuart Cole <sacole@cableone.net>
Message-ID: <10em984sst38p52@corp.supernews.com>
Source record: 57102

If you have a manual for a TRD1803BB Micor Vhf receiver that you are willing to part with
please let me know. I believe the manual # is 68P81013E65.

Thanks

Stuart N5LBZ

441. FS: HTC-202s

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-06 22:37:44 UTC
From: W4PHM <W4PHM@ARRL.NET>
Message-ID: <YQFGc.4290$sD4.892@newsread3.news.atl.earthlink.net>
Source record: 57103

Good evening,

I have two new in the box, with manual and batteries
HTX-202s. They seem to be selling pretty high on Ebay
but I don't deal there. These rigs are true FM 2 meter
rigs that can put out as much as 6 watts under full
power with a 12 volt battery. I have included with them,
the RS Speaker mic that fits them and most Icom HTs
as well as the orignal 9 volt AA battery pack and the
7.2 volt newly refurbished battery pack.

Both rigs are a 10 out of 10 operationallly and aestheically
there is not a scratch on either one. 1 of the rigs has about
3 liftime hours of receive and about 30 minutes transmit while
the other has been used only enough to test its receiver and out
put.

Originallly I was looking for $110.00 or so per rig with me paying
the shipping CONUS.

If anyone wants to make me a fair offer on either or both let me know
and I will see what I will let them go for. Franklly I would not mind
keeping both of them but If someone wants to make a fair offer
below the original price, let me know.

Thanks for reading this post and best 73.

Patrick,
W4PHM@ARRL.NET

If anyone wants pictures and/or serial numbers let me know,
both are later production maxon rigs.

Source record: 57108

What was going on yesterday with radio? Sunspots? Something else weird with the earth's magnetic field? The alignment of Mars?

I didn't get on ham, but I heard 6M and 2M went nuts.

And my daughter picked me up about 5:15 and the car FM radio was dead until after 6PM. At first I thought my radio was broken and I'd have to get it fixed, but then a friend called me on the cell to shoot the breeze on his commute because his FM was out too.

By 7PM it seemed fine.

Mike

Doing the math, that comes out to about $2.08
per year, or 0.0057 CENTS per-day over the
course of a 10-Year period...........

How much do you wanna bet however that the
average traditionally el-cheapo ham radio operator
will piss-and-moan like a stuck pig over a 0.0057
Cent-per-day fee...??? (my guess is alot will !)

For example, I was selling at a hamfest in Pa last
month. Had a shoebox full of miniature tubes for
$1.00 each. A real bargain considering tubes are
going for much more on e-Bay. This putz comes
walking up, digs thru the box for 2 minutes and pulls
out *one* tube and wants it for 35 cents. I was willing
to let it go for 75 cents but he wants it for 35 cents.
No deal. He puts it back (tosses it) and gets all
smart-ass saying "you'll sell it to me later for 35 Cents."
The schmuck comes back 1/2 hour later digs it out
and asks for it for 35 Cents again. I say OK, offer to
wrap it, he hands it to me and while he's reachin for his
35 cents, I dropped the tube on the ground and smashed
it with my trusty Nike, then told him I changed my mind
and wanted $1.00 for it. This putz goes completely nuts saying
he's looked all over 4 hamfests for this tube and he
couldn't believe I smashed it. Jumpin up and down like a looney
and me quietly hoping he would have a stroke right there
as he must have weighed 300 pounds. A real "Eddie Slobbo"
fer sure - baaaaaa hahahahah!! I just laughed and offered
him a pleasant balance of the afternoon.

After he left the dealers either side of me were almost teary-eyed
laughing at the spectacle of this event, and we each shared a Pepsi
from my trusty Coleman cooler and had a nice late-lunch at the
pizza hut afterwards.

El-Cheapo hams....always too much FUN to pass up
the opportunity to poke'em-with-a-stick thru the
monkey bars !! :) :) :)

Sorry, this is where credibility of the story gets weak. The image of a fat
guy buying fat tubes is much more beliveable. Next time, bust up a good 50
or even a NOS S-bulb 80.

459. Introducing HamBlog.Com

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-08 18:40:51 UTC
From: Charles Brabham <n5pvl@sbcglobal.net>
Message-ID: <TygHc.7210$6A4.6036@newssvr23.news.prodigy.com>
Source record: 57121

HamBlog http://www.hamblog.com is a weblog host exclusively for amateur radio operators. The hosting service is free of charge.

Many hams have questions about blogging. If you are wondering what the bloggosphere is all about, there is a definition of blogging on our main page, along with a link to a very good blogging FAQ list. (Frequently Asked Questions) The information there will give you a solid footing as you step into the blogging world.

Why a "HamBlog"?

Hams have a lot of information to pass on to each other that traditional information systems such as magazine articles or speaking engagements at fests have proven to be unsuitable for. Weblogs are highly flexible and highly individualistic. It is our hope that the public weblogs at HamBlog will provide a wellspring of knowledge about Amateur Radio that would be impossible to express, access or distribute by traditional methods. Perhaps in some way HamBlog will expand the capabilities of our present "Elmering" setup, which many feel has suffered and diminished in recent decades.

As is the case outside of the Amateur Radio community, word gets around about outstandingly informative and useful weblogs. There is a global syndication system for weblogs that HamBlog,Com participates in, just as other blog hosts do. What is different about HamBlog is also the thing that makes it special.... It's all Hams!

If you are an Amateur Radio operator who would like to post a weblog of your activity for the benefit of your fellow Hams, where would you go?

HamBlog.Com, of course!

Charles Brabham, N5PVL

460. Announcing 'hifi-am', to discuss High Fidelity AM tuners and hobbyist transmitters

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-08 18:54:49 UTC
From: Jon Noring <jon@noring.name>
Message-ID: <t26re0p91qmjp4hn9egms9k7n1g18bk32p@4ax.com>
Source record: 57122
Cross-posted to: rec.radio.amateur.misc,rec.audio.tech

Hello,

I've created a discussion group (mailing list) to discuss high fidelity AM tuners and hobbyist transmitters. Appended below is the more detailed group description.

To subscribe to this group, either go to the group home page (at Yahoo) and subscribe there (you will need a YahooID):

http://groups.yahoo.com/group/hifi-am/

Or, if you don't have a YahooID, send a blank email to:

hifi-am-subscribe@yahoogroups.com

Looking forward to seeing you there!

Jon Noring

****

Group Description for hifi-am:
==========

The purpose of hifi-am is to explore the possibilities of high fidelity AM tuners and hobbyist transmitters for medium-wave (or better known as the broadcast band, appr. 520 to 1720 khz.)

Although most commercial AM broadcasts are definitely not high fidelity (due to various factors including, in many countries, audio bandwidth restrictions), there are nevertheless a few commercial stations which broadcast with audio quality approaching high fidelity. For example, in Australia, because the number of stations is fewer and the country quite large, many stations broadcast with quite wide audio bandwidth, approaching 15 khz.

There is steady growth in interest (in the U.S.) for non-licensed hobbyist broadcasting in the BCB (per FCC "Part 15"), which is restricted to 100 milliwatts and a three meter antenna (among a few other minor restrictions). With a high efficiency antenna, it is possible for such neighborhood broadcasting to be heard about 1/2 to 1 mile from the transmitter. There are quite a few progressive and alternative stations broadcasting this way. For a wonderful example, see Radio KMTZ.

More importantly, it appears there is no specific restriction on audio bandwidth for Part 15 transmissions. Thus, if this is true, the broadcasts can approach high fidelity (15 to 20 khz audio bandwidth.)

Although discussion can focus on the general topic, it is hoped this group will catalyze the development of hobbyist kits for high fidelity AM tuners (digital, solid state, and tube) and for high fidelity low-power (Part 15) AM transmitters. It should be fun to consider the many possibilities.

Good one ..... I've been involved in this hobby, service, endeavor, passion or whatever for 40 years plus. It is always an amazement to me the cheap-Os that are out there that want something for nothing or near it. OTOH I have met a lot of nice people who would bend over backwards to give me parts for nothing for my projects. That is the ham spirit at work and those are the ones that I remember after all these years.

God Bless 73 KI3R Tom Popovic Belle Vernon Pa.

Uh oh -- worlds are colliding. Remember, rec.radio.shortwave is not a radio newsgroup, the people there are not knowledgeable about, or interested in, the technical aspects of radio. If it doesn't involve nasty name-calling or wild-eyed, mouth-foaming political looniness, then it doesn't belong in rec.radio.shortwave.

I had a similar experience several years ago. I went to the local
once-a-month ham radio sidewalk sale and had a really clean, nice
working Hallicrafters S-40 for sale. This guy walks up and offers me $25
less than what I was asking. I refused. He said I would never get the
asking price and would be lucky to get what he was offering. I said if
it did not sell, HamCom was comming up in a couple of weeks and the
price there would be even higher. He stomped off but came back a few
minutes later and lays down the amount he offered and picked up the
radio. I ask just what the H did he think he was doing. "I am buying the
radio". I informed him that my asking price still stood and please put
the radio back and take his money and go somewhere else. Now he is
really POed.
Well as luck would have it he saw the radio at my table at HamCom marked
up at almost twice what I was asking at the sidewalk sale. He looked it
over and walked away only to come back about an hour later, with money
in had, to find the set was gone and asked if I had sold it. "Yep" I
smiled, "and at the asking price too". Doncha just luv these clowns?

[snip]

Sounds like the presumed greedy ham should have bought the hard-to-find
bargain tube for a buck just to keep it out of the hands of the other hams!

Well I price things 25 to 50% high and since all buyers dearly love and must have "a bargain" -- they offer me a riduclous low ball offer.
We barter, shout, accuse each other of taking food from our childrens mouth etc
Finally we agree on the price I would have sold it for to start with.
They snicker as they take away the treasure and just know they beat me down.
I snicker as it worked again -- seldom fails.

All this is not limited to Hams -- it is an international practice. In some countries they have no respect for you if you don't go thru the drill of bartering. I have experienced this same drill in the good old USA for used goods, flea markets, newspaper ads, et al.

We all have heard:
I just went to the sale -- saved $40
He/she started at $100 I stole it for $75
The guy/gal was desperate sold it for $50 less
I can turn around and sell this for a profit
on and on goes the bartering process

Ya know they gonna low ball you so start high and spend the time to bargain -- old american custom, everyone walks away happy.

I'm sorry, but our official position on that is going to have to be that
HamBlog.Com cannot be responsible for anything which may become stuck on
your shoe while "stepping into the blogging world".

You're on your own, and will have to answer your own questions about any
possible HamBlog-Smurf connection.

This is why you should only cross post for a really good reason.

The amateur newsgroups seem to have a plentiful supply of people that
are not knowledgeable about the radio hobby.

The example above is just the end of a thread of the BS that poses as
"knowledge" on the amateur news groups most days.

Since we got this Carny/Rube thing goin' on.....

It isn't all the buyers with the problems, though. I've managed to
insult a lot of sellers with my first offer. So while they are bitching
and moaning at me about how much the thing is worth, and probably think
of me as the type described in the original story, all they had to do
was deal for a little while, and then we likely arrive at a price that

satisfies both of us.

This is America, and you are allowed to ask any price you want for what you sell. The buyer can also offer any price they want.

I would suggest that if a person is firm on all their prices, and doesn't want to deal, they might want to sell retail.

479. Audio problem when using an antenna multicoupler, how to solve?

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-09 15:11:40 UTC
From: gordon@scangwinnett.com
Message-ID: <bd553e83.0407090711.2e74bceb@posting.google.com>
Source record: 57191
Cross-posted to: rec.radio.scanner,rec.radio.shortwave,rec.radio.amateur.misc

I'm using a Stridsberg antenna multicoupler to connect three scanners to the same beam antenna. The audio of each of the three scanners is fed to the line input of three separate computers.

After I connected the scanners to the multicoupler I noticed that in the audio of each of the scanners you can hear the audio of the other two scanners (but at a much lower volume). If I disconnect the scanners from the multicoupler and switch to separate antennas the problem goes away.

Is there something I can do to prevent the audio from each scanner completely separate from the other two scanners?

Thanks for any suggestions,
Gordon

You say three scanners.

As far as I know, John S, makes a 4 input multicoupler. If you have a 4 input unit and are using only three, make sure you terminate the unused input.

Use a formal terminator (cheap) for best results, or solder a 50 ohm resistor across a make BNC if nothing else. Don't use a 75 ohm terminator such as is used in CCTV systems.

Unused and unterminated inputs in a multicoupler can cause unpredictable results.

Also call John Stridsberg and ask him. He knows his product. I expect the first thing he'll tell you to do is terminate any unused input and get back to him.

Make sure you don't have ground loops. Look for bad coax shields on all RF coaxes. If signals can't find the path they expect for the return line, they'll force their way through the equipment.

Swap stuff around and try to narrow the problem down to one component.

> Is there something I can do to prevent the audio from each scanner
> completely separate from the other two scanners?

I've used many of John S' couplers and not had this problem.

I suspect you have a ground loop (open ground) in the RF or audio wiring. Find and fix that and your problem will clear up.

Steve

My intuition is that it's a ground loop in the audio path. Try
unplugging audio from the other computers and see what happens.

If the crosstalk goes away, I'd try a radio shack audio isolation
transformer ($15) in the audio lines to the computers.

Thanks Tom. Were U at the hamfest by chance?
For those wondering, the tube that was "sacrificed"
was a common garden variety JAN 6005 (6AQ5A)
(I sure would not have broken anything like a 7060
or similar! That tube would be in my collection)

A 6AQ5 and he couldn't find one other than there? Hmmmm. I see them damned near every hamfest. He must not be looking too hard. OR maybe THEY wouldn't give him one at "HIS" price - either.
Lou

No Lou I wasn't around when the tube tale went down ....but I was up at Butler. Always enjoy looking at the junque that I have seen guys carying around for at least 2 decades and trying to dump the same. I gave up that scene about 20 years ago after filling the back of my Surburban with ballast and then realizing that my vehicle and back were taking a beating. The garbage men really went wild the next day when 90% of my junkbox went out to the alley.

My comments are also directed at the sellers who use something for 10 years and want 95% of the retail price.

Take care 73 KI3R Tom Popovic Belle Vernon Pa.

Personally, I believe Amateur Radio Licenses should cost $75 per year for
regulatory fees and the Commission should elimanate testing. I also believe
that is how it will eventually be in the near future.

73,

Doubtful that testing would be eliminated. International treaties require that there is proof the operators meet minimum qualifications.

Since the FCC has given testing responsibility to the amateur community, the FCC simply issues the license so they don't have any vested interest in eliminating testing. And of course they issue the regulations and enforce those regulations like they do for all communications services.

Besides testing is needed to attempt to insure that the licensees will have learned the basics of operating. Hams have such a wide range of privileges and frequencies that some basic knowledge truly is a necessity. We already have enough lids slip through so let's not make it worse.

Unless, of course, their price is already ridiculously low. I was selling a used tuner at a hamfest for 1/4 of what a new one would be as I simply didn't like it, wanted to get a different one, and wanted to be sure to sell it. A guy tried to bargain me down but I simply told him that we both knew what they sold for both new and used and I wasn't budging. He forked over the asking price.

I've had the same problem, but was only using two computers. It was a ground loop. Simple take a heavy gauge wire (12 in my case) and ground each computer chassie to eachother then ground that to the Stridsberg multicoupler. In my case I didn't need to physically ground the cases of the scanners as that was already taken care of my the outer sheld of the coax between the scanner & stridsberg.

Someone mentioned terminating the unused Stridsberg output. I have 2 of the amplified 4 port multicouplers and 1 of the 8 port amplified couplers and never terminated unused ports so in my case that wasn't an issue.

You're crazy if you beleive that. I could see the vanity call fee
eventuallly getting that high, but the rest of your prediction is way off.

This may seem a bit obvious, but... Assuming this is indeed some
sort of short-range consumer communications device (along the lines of a
no-license-required kid's 'walkie-talkie'), you would need a matching
unit for it to talk to.

In other words, you would need a similar unit on the same
frequency as the existing one. A radio signal does no good if there's
nothing around to receive it.

Happy hunting.

And that's the norm for every swapmeet, ham or otherwise, I've ever been to. If I'm selling I mark it high expecting haggling. When buying I always make a lower offer than the asking price. I do occasionally run across people that get their panties in a wad over this practice, but that's their problem, not mine. If I want something bad enough I pay the full price, but I'll always try for a better price first. Nothing ventured nothing gained. And when I'm selling and someone pays me full price, I really get a big smile on my face... ;)

Ground loops produce hum, not usually cross-talk audio.

Try the cheap radio shack isolator first. If that doesn't work try
the Royal PAD.

Royal DB-25 attenuation boxes with ground lift solve most of the audio
problems I've had.

Alun, are you saying that its the vanity people that require them most
regulatory attention, and thus should pay more?

No. How could you get that from what I said?

All I am saying, if I have to spell it out, is that there is absolutely zero probability of theory testing being abolished and not much more likelihood that fees will be reintroduced for other than vanity calls.

And furthermore, a $75 fee is not in the least likely to reduce bad behaviour on the air.

At 1/4 price, sure! I usually won't buy above 1/2 of currently
manufactured price. Elswise, I'm happy to buy new, with a warrantee and
I'm also not buying someone elses problems. My main point in this whole
discussion is that there are a lot of sellers that seem to hate buyers.
The Carny vs Rube thing.

My point was that he STILL tried to bargain me down even though we both knew
it was already lower than it should have been.

They used to require Morse code. The testing requirements could be
removed just as easily as the Morse requirements were.

and OTOH, Riley is an ass...If he was smart, he'd have his own law firm making hundreds of thousands of dollars a year defending clients against the FCC. But working a Gov't job proves that he can't survive in the REAL world, folks. I'll just give you a couple of examples of his stupidity. First he tells hams that they can't operate on 146.52 and that they should make contact and then QSY. Second, he tells us hams that we can't use phonetics when ID'ing...I mean come on people, you don't need to be a rocket scientist to know that!!

Hi everyone
I have a question please. I just purchased a IC2100H 2 meter.
Does any one have any Info(Good/Bad/Indeferent)about this radio.
Are there any mods that can be done to this radio?
Or do you know where Info may be obtained?

Thanks In Advance
Don

Hello me ??????? oh well ....

You have an excellent suggestion there regarding the 75 bucks a year. That would get the Feds the kind of enforcement clout that would have all the echo chambers, illegal KW users, freebanders, shrimp boat screw-ups, 25 alternator pick-ups, 10 meter truckers, illegal 11 meter bums ETC. running for the hills, burying their illegal rigs under the manure pile and getting into leather working or beanie babies. The enforcement WAS that way. I know a lot of people in the past who got hit with $500 (1965 dollar) fines. So me you have a very positive idea there ...one that I would have no trouble with. IF one really wanted to be a ham then 75 clams would be a bargain. However the cheep-Os would be squealing like a greased pig if this were to pass. Also the testing could be given back to the FCC where it belonged in the first place where, like I said before, shenanigans could be minimized.

Testing elimination ? ..... probably not for a while but one thing I would suggest is that with the funds the present 11 meter system could be shut down permanently and placed up on UHF where CB would realize its original intent.

Take care all ..... KI3R Tom Popovic Belle Vernon Pa

It is a good radio, you can modify the power in the radio, there is a output power adjustment on it, as well as the out of band modification..

Fred Riley is an eccentric electronic engineer whose theories have put him into the heart of a controversy he never intended. That he is being remarked upon here is evidence as to just how far out of hand this issue has gotten, inducing passionate, emotional diatribes in place of calm, civil debate. - A situation that Doctor Riley would never have countenanced.

Please leave this innocent, torented scientist alone, unless you can come up with the math to refute his theories - as none have so far been able to do!

Charles, N5PVL

Go to name search, and type ANY name...

There are 4294967294 records matching 'Gondolaf Lord Of The Rings'.

There are 4294967294 records matching 'Gobbeldey Gook'.

And so on.

In case anyone can help, I need a copy of the March 2004 issue of Elektor Electronics magazine (Nr 330), to complete a break in a library sequence.

I will of course pay for the copy plus postage.

Please help if you can.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th/July, through Sunday, 11th/July there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EZ, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4S7, SRI LANKA (Ham in need!). Rohan, 4S7RO, is urgently wanting someone to scan the wiring diagram of a TS-850S for the page that contains the RF Board X44-320-00. He has a manual for it but has left it in Jamaica and is now back in Sri Lanka for a few months of R+R... If someone

has an 850S and has the capability to scan the necessary diagram page, please send it to Rohan. He would be very grateful. His E-mail address is: sparkrohan@yahoo.com

9A, CROATIAN ISLANDS (Hungarian IOTA/Contest Activity).....
Feco, HA8KW, will be active as 9A/HA8KW from the Island of Rab (IOTA EU-136, IOCA CI-096), July 19-26th. He will participate in IOTA Contest (Low Power, 12-hour). After his activity from the Island of Rab, he will activate the Island of Brac (IOTA EU-016, IOCA CI-010) from July 26th to August 2nd. After August 2nd, Feco will go to Pag Island (EU-170, IOCA-082). Activity from all locations will be on 30-10 meters. QSL via his home callsign either direct or through the bureau.

Look for Laci/HA6NL to be active as 9A6NL and Zsolt/HA6PS, Tibor/HA6ZV, Al/HA7JJS to be active as 9A/homecall, from the QTH of Branko/9A2ZD at Maly Pasman, Pasman Island (IOTA: EU-170, IOCA: CI-085) between July 20-30th (IOTA Contest included). They will build up a portable contest station with Yagis, TEN-TEC radios and so on. QSL via their home callsigns either direct or through the bureau. They are expected to do some 2 meters operations also.

Aniko/HA5TAA (XYL) and Feri/HA5AAZ have plans to activate different Croatian islands between July 19th and August 1st. They will use 9A/homecall from the IOTA EU-016 group, near Rogoznice, including CI-171, CI-187 and CI-193 for IOCA. QSL via their home callsigns either direct or through the bureau.

C3, ANDORRA. Reports indicate that the hams in C3-land are now authorized to use 6 meters. Johan, ON4IQ, reports that Jordi, C31JI, near Andorra La Vella, has become active. Also, Fred, C31HK, is still active on the bands but keeps a low profile and prefers to listen a lot.

CFT PARTY POSTPONED. To avoid interferences with the Scandinavian Activity Contest (CW) and the 2004 High Speed Telegraphy Championship, the first EUCW Belgian Society CFT (Club Francophone de Telegraphie) Party which was scheduled for September 19th has been postponed. This Party is still on the agenda, and the new date will be published in the near future.

CN, MOROCCO. Look for Andre, HB9HLM, to be active again this week as CN2DX until August 8th. Activity will be on 6 and 2 meters, possibly from either grid IM63 or other grid locators. QSL via his home callsign.

CT3, MADEIRA. Operators EA2RU, EA2BXV and EA2RY will heading to this island of the Atlantic September 20-30th, to participate in the 2004 CQ WW RTTY Contest as CT9R. Activity will be on 80-10 meters with 100w and wire antennas. They will be on SSB, but operations will be mainly on the Digital modes. QSL via the Bureau or direct to EA2RY. Visit their Web page at: http://www.rtty.org/madeira2004

FP, ST. PIERRE AND MIQUELON ISLANDS. Pete, NN9K, will be on Miquelon Island, September 10-18th. He will use the callsign FP/NN9K. Pete states, "My operating goal is to make FP as available as possible on 30-meters especially for Asia and the Pacific Rim amateurs. This will be a CW only

expedition and although the plan is to spend as much time as possible on 30-meters I may be found on other bands as well." For more information please visit the Web page at: http://nn9k.home.mchsi.com/

FP, ST. PIERRE AND MIQUELON ISLANDS (Update to OPDX.666). Due to numerous requests, the FP/VE7SV team going to Miquelon Island (NA-032) between October 23rd to November 2nd have added the RTTY, PSK31 and Satellite modes to their operating plan. For more updates and details, please visit their Web page at: http://www.bcdxc.org/fpve7sv_daily_updates.htm Or the DXpedition's Web page at: http://www.bcdxc.org/st_pierre_miquelon.htm

HA, HUNGARY (Update to OPDX.667). It seems Nilay (XYL), TA3YJ, will be joining Berkin, TA3J, to operate from different locations in Hungary, and will sign HA(?)/TA3YJ between July 18-21st. Look for activity on 160, 80, 40, 20, 15, 10, 6 and 2 meters (including the WARC bands) on SSB and FM. QSL via her home callsign, direct (only SASE and 1 IRC, no green stamps please) or by the bureau. SWL QSL cards are OK.

HB0,LIECHTENSTEIN. Geza/HA4DX will operate from Masescha (1350m ASL) as HB0/HA4XG between August 28th and September 4th. He will be active on 30-10 meters (CW, SSB) with GP antennas and on 2 meters with a 8 element Yagi and also on WSJT. QSL via their home callsign either direct (QRZ.com) or through the HA Bureau.

IOTA NEWS.....
AF-018. Operators IK2JUB, IZ2ABI, IZ2ABZ, IW2HAJ and IH9GPI will activate IH9/IQ2CJ from Pantelleria Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. QSL via the Bureau.

AF-018. Operator IT9BLB and an international team will be active as IH9P from Pantelleria Island (IIA: TP01, WAIP: TP and ITU Zone: 37) during the CQ WW DX SSB Contest (October 30-31st) as a Multi-Single entry. This is another Tikirriki Contest Club's Multi/Op. operation. QSL via KR7X.

AS-017. Look for JH1MUK to be active as JH1MUK/6 from Ie Island (JIIA-017-011) on July 22nd and then from Iheya Island (JIIA-017-012) on July 23-24th. QSL to this home callsign either direct or via the JARL bureau.

AS-079. Seiji, JH6RTO, will sign JH6RTO/6 from Miyako Island on July 16-20th, using his IC-706 and R7000. Activity will be on 40-6 meters, CW and SSB. QSL via the bureau.

AS-147. Takeshi, JI3DST, will be active as JI3DST/8 from Okushiri Island from about 0700z on July 24th through about 0000z on July 27th. He is expected to be active during the IOTA Contest. QSL via JI3DST by the bureau.

EU-064. Jerome, F5ASD, will be active from Noirmoutier Island (AT 020) between August 2-15th. Activity will be on SSB for the most part, and on 80-2 meters. QSL to his home callsign, either

direct (SASE + 1 IRC or 1 USD for Europe; 2 USD outside of
Europe) or via the French REF Bureau.

SA-045. Operators PQ8KGB, PQ8VA and PT7BI will activate Maraca Island
(DIB 39) as ZX8M from July 21-25th. Activity will be on all
bands CW/SSB (possibly RTTY). QSL via PT7BI. The DXpedition's
Web page is at: http://geocities.yahoo.com.br/ilhademarac

IOTA SPECIAL EVENT OPERATION. To celebrate the 2004 Olympic Games in
Athens, look for a group of Greek amateurs to be active as SY2004KF now
through September 15th, from Kefalonia Island (IOTA EU-052) in the Ionian
Sea. Operators mentioned are: SV1BJW (Vasilis or Bill), SV8CKJ (Panayiotis)
and assisted by SV1DPI (Costas) and SV1CIB (Dimitris). Activity will be
on 160-10 meters (including the WARC bands) and probably some 6 meters.
Modes will be: mostly CW, SSB, RTTY and PSK31. Antennas are: Long wires,
Windoms, G5RVees, Verticals, Tribander yagis and Quads. Power is be within
legal Greek State limits. Simultaneous multiband operation is expected.
The CW operators are expected to transmit as : SY2004KF or SY2TT4KF or
SY04KF. The recommended split frequencies are 1-5 kHz UP on the CW mode.
The recommended split frequencies are 5-10 kHz UP on the SSB mode. Listen
for QSL instructions. QSL can be either by the operator's instructions
or via SV1BJW, by the Bureau or the address at QRZ.com (provided that
the other operator encloses a SAE + IRC or equivalent for the postal fee).

J45, DODECANESE. Anton, PA7DX, informs OPDX that he will be on his first
"DXpedition" on his own for the 2004 IOTA Contest (He was on Malta as
9H3UJ with a group some years ago.), and states this is "so very exciting".
Look for him to be active as J45C from Kos Island (EU-001).

OJ0J, MARKET REEF (Party at Sea Wrap-up!). A press release from Martti,
OH2BH (via Jarmo, OH2BN), states: "The weather was calm this morning
(Monday, July 5th) and the party at OJ0J had no difficulty departing
Market Reef. They have now returned safely to Aland Islands. Due to bad
weather, dipole radiators had to be used most of the time while a beam
was hoisted only on the last day of operations. Total time on the reef
was 84 hours, and 12,414 QSOs were made with two radios, resulting in
150 QSOs per hour for the entire stay. Only 30, 40, 20 and 17M bands
were activated. QSL via OH0RJ."

QSL INFO AND NEWS.....
Laci/HA0HW (CTC 264) and Tomi/HA4DX (CTC 192) were active as 9A/HA0HW
and 9A/HA4DX from Silo, Krk Island, in the North Adriatic (IOTA: EU-136,
IOCA: CI-046) between July 2-12th. This was a family holiday. QSL via
their home callsigns either direct (QRZ.com) or through the HA bureau.

9K2ZZ ON LOTW! Ray, W8CNL, has uploaded all 253,600 plus contacts with
9K2ZZ to the "Logbook of The World" (LoTW). He states, "I am very sure
there will be some missing QSOs due to broken calls, etc. If you are
one that needs the card, please send a SASE or SAE and postage, with
all the details you can come up with and I will try every means to find
you in the logs."

QSL B4HQ via BA4RD (P.O.Box 538 Nanjing, China). This activity was by the Chinese Radio Sports Association (CRSA)> They had 5 stations set up for the IARU HF World Championship, and all the stations were located in Nanjing.

Operators JA4BBP/4 and JA4TI/4 were expected to be active from Mu Island (AS-117 and JIIA AS-117-073) (QTH Okayama) over the past weekend. QSL to their home callsign either direct or via the JARL bureau.

Operators JE4TST/4,JE4WIP/4 and JE4QIG/4 were expected to be active from Mutsure Island (AS-117) (QTH Yamaguchi) over the past weekend. QSL to their home callsign either direct or via the JARL bureau.

Operators JA5BEX/5 and JA5BQX/5 were to be active from Ibuki Island (AS-076) (QTH Kagawa) over the past weekend. QSL to their home callsigns either direct or via the JARL bureau.

QSL OY1CT via the CBA or the address on QRZ.com. Activity was during the IARU HF World Championship Contest as the official station of the Foroyskir Radioamatorar [FRA].

QSL P40HQ via Mario, I2MQP. Activity was during last weekend's IARU Contest. Jacobo (Jacky), P43P, states that since Aruba is celebrating its 50th Carnival this year, they will be printing full color conmemorative QSL cards that are sure to become collector's items. He also mentions that a special P40HQ team T-Shirt and a small surprise sponsored by ACOM will be given to the first Single Op or Multi Single station to work them on 6 bands (SSB, CW or mixed).

The special callsign YT80HQ commemorating 80 years of ham activity in Serbia and Montenegro was active over the past weekend during the IARU HF Championship as a SCG Multiplier. Special YT80HQ QSL cards confirming all contacts will be sent automatically via the bureau. In case you need it, their mail address is: Savez radioamatera Srbije
Trg republike 3/6
11000 Beograd
Serbia & Montenegro

OE, AUSTRIA (Update to OPDX.667). It seems Nilay (XYL), TA3YJ, will be joining Berkin, TA3J, to operate from different locations in Austria, and will sign OE(?)/TA3YJ between July 21-23rd. Look for activity on 160, 80, 40, 20, 15, 10, 6 and 2 meters (including the WARC bands) on SSB and FM. QSL via her home callsign, direct (only SASE and 1 IRC, no green stamps please) or by the bureau. SWL QSL cards are OK.

OK, CZECH REPUBLIC (Update to OPDX.667). It seems Nilay (XYL), TA3YJ, will be joining Berkin, TA3J, to operate from different locations in the Czech Republic, and will sign OK(?)/TA3YJ between July 23-25th. Look for activity on 160, 80, 40, 20, 15, 10, 6 and 2 meters (including the WARC bands) on SSB and FM. QSL via her home callsign, direct (only SASE and 1 IRC, no green stamps please) or by the bureau. SWL QSL cards are OK.

P4, ARUBA. Look for John, KK9A, to be active as P40A in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (20m) entry. Activity

will be from the Iguana Villa [http://www.iguanavilla.com]. QSL via WD9DZV.

SI9, SWEDEN (Special Event). Look for SI9AM to be active now and then, July 17-19th (Open House) on HF CW/SSB. SI9AM is located close to the King Chulalongkorn Memorial in Utanede, Sweden, the largest Thai Pavilion in the world outside Thailand. The radio shack can be rented by worldwide radio amateurs, and it is very popular because of its very attractive callsign. QSL via SM3CVM CBA or via bureau. For more information about this station, please the following Web page at: http://www.qsl.net/si9am

SILENT KEY. David A. Whitaker, BRS 25429, informs OPDX that his brother Mike, G3IGW, became a Silent Key on June 29, 2004, after a short illness. Mike was very well known throughtout the world for his CW transmissions, especially on the LF Bands. Besides being a member of the RSGB for over 50 years, he was a highly respected member of the FOC for his superb operating on the key. OPDX and its readers would like to send out our deepest sympathy to Mike's family and friends.

SPECIAL EVENT. From July 22nd to August 1st, look for the special callsign LX8LGS (Luxembourg Guides and Scoutes) to be active from an International Scout Camp from Lasauvage (South of Luxembourg). Activity will be on all bands and modes (especially the Scout frequencies). Operators are Tobias/ DL4KBS, Dan/LX1JU, Mike/LX1KQ, Gilles/LX3GR and Philippe/LX2AJ/LX7I. QSL via LX2AJ (by the Bureau or direct). Visit the camp's home page at: http://4u.lgs.lu -or- http://www.qrz.com/lx8lgs

SPECIAL EVENT. Look for the following French activities to celebrate the 60th anniversary of the Allied Forces landing in Provence, August 1944. From various locations on Provence landing Coast, the following stations will be active as:
TM3ID - August 7-21st, under Patrick, F4TXE, leading, and also from Cavalaire on August 15-16th. Activity being part of the Official commemoration. QSL via F4TXE, either direct or via the French REF Bureau.

TM6ANV - Activity will take place during the same period (August 7-21st). Also look especially on CW. QSL Manager: Guy, F5MNW, either direct or via the French REF Bureau.

ST2, SUDAN. QSL Manager Dennis, PA7FM, informs OPDX that ST2DX has gone QRT on the afternoon of July 9th. Online logs, audio files and some photos are available on the following Web page at: http://www.pa7fm.nl
Dennis states, "The QSL design will go to the printer as soon as possible now....and will try to answer all direct QSLs before the end of August (off course depending on the card delivery from the printer)." He also wants to remind those who still need the Sudan, ST2T is active inbetween work from the same QTH, and in a few weeks LA5PN is expected in Sudan (Who also works for the World Food Program of the UN). His callsign is unknown yet. ST2T was heard on 15 meters over the past week and weekend (in the contest). QSL via S57DX.

SY2004, GREECE. Look for Nikos, SV2WT, to be active as SY2004WT now through September 15th. Activity will be on 160-10 meters, SSB, CW, RTTY, PSK and SSTV. QSL via the Bureau. The SY2004 and SX2004 are two special prefixes that can be used by Greek radio amateurs for the period before and during the Olympic Games in Athens. For more details and information, please visit the Web page at: http://www.raag.org

XU, CAMBODIA. Claude, XU7ABN, has been active over the past week on 20/15 meters RTTY. Watch 20 meters between 1830-2230z and after 0600z. On 15 meters, watch after 1000z.

YJ0, VANUATU. Franz, DK1II (ZL2III), will be active from Port Vila, Vanuatu (IOTA OC-035), from August 6-15th. He plans work mainly on CW on 40-10 meters, depending on propagations. Franz has applied for the callsign, YJ0II, but this is not confirmed yet. Please QSL via DK1II.

ZP, PARAGUAY. Look for Tom, ZP5AZL, to be active as ZP0R in this year's CQWW SSB DX Contest as a Single-Op/All-Band entry. QSL via W3HNK.

The problem with Dr. Riley's theories is that not once, during any of
his recorded lectures, did he explain his findings without giggling.

Personally, I find it disturbing when a scientist of such high regard
offers a proof of his findings in mathematical format and when it comes
to the hard math, he simply leaves it as "well, the numbers lie a little
but you should just take my word for it". His highly controversial
paper "Tesla Stole My Underwear", while entertaining and a good read
while listening to Jimi Hendrix with low-light conditions and smoking
marijuana, really seems to be a little beyond science.

Dr. Riley does sometimes giggle during his lectures, but the behavior has nothing to do with the materiel he is presenting. Instead, it stems from an unfortunate incident during his first public speaking engagement, where stage-fright almost kept the poor man from ascending the podium in the first place. At the last moment, the exasperated dean of the college suggested to the shy doctor that he imagine the members of the audience were all sitting in their underwear. This allowed the shy, asocial doctor to present his lecture, but to this day he still sometimes giggles at the podium...

Yes, Einstein was saying much the same thing when he spoke of the probability of "God playing dice". Many of his colleages were disturbed by the reference then, just as you are now. The same can be said for Watt's contention that we declare research to have come to a "conclusion" when we tire of gathering and weighing the facts, as opposed to when we have actually gathered and weighed all of them. Nonbody wanted to hear about

that, either.

>His highly controversial

Well there you are... I never saw much entertainment value in the paper, perhaps because of my preference for Eric Dolphy accompanied by a bright Pinot Grigio, as opposed to your taste in auditory and chemical amusement aid. Turn up the lights, open the windows, air out the place a little and I'm sure you'll have an easier time appreciating the doctor's work. After all, it's not as if his tenure were at Harvard!

Surely "Tesla Stole My Underwear" should have given you a clue to Fred Riley's giggling behavior, but it appears you never made the connection and turned to drugs. You really owe it to yourself to review the doctor's work while in the proper frame of mind. Many have claimed that the man is unbalanced, but I can assure you that Dr. Riley's balance is a delicate one, maintained by will alone. You could do worse than to follow his example, there.

Crank up the Eric Dolphy... Throw back a glass or two of Pinot... It will all start to come to you as the evening progresses, I'm sure.

Charles Brabham, N5PVL

That story is older than Riley and has been told many times about "shy"
speakers.

Looks like Jon has been suckered into posting more urban legends on
his web page at http://myrockport.com/world.htm

The Fall of the Athenian Republic letter is mostly crap. See
http://www.snopes.com/politics/quotes/tyler.asp

The Allah or Jesus story is more distorted crap. See
http://www.snopes.com/politics/religion/allah.asp

But then those letters are typical of the gullibility of most hams
anyway. I always shake my head in disbelief when I drop by Jon's
site. How can any group of people be that stupid?

Hello,

Does anyone know if the Yaesu FT-5100 and FT-5200 are the same radio?
I know one has a removable faceplate. I need to know if the basic unit
is the same inside.

Any ideas where I can find a Service Manual for the FT-5100
specifically? (I've been watching eBay, but no luck).

Thanks,
John

My world band receiver, Sony ICF-SW55 is acting up. When you power on, it goes into a short calibration procedure and then the radio comes on. Lately, it goes into CAL (displayed on screen) and then shuts off after about 20 seconds. It started doing this from working one day and not the next. Does it w/ ac power or batteries. Have tried reset button many times. Does anyone have any help or comments? Thank you!

You miss the whole purpose of Jon's site, that being satire.
My advice to you "chris" is not to take life so seriously
unless you want to look like a fool and an object of ridicule.

Perhaps Mr Hoagues, but consider this. Satire attempts to be funny, and
the best examples of humor have their roots in the truth. Then again,
I stopped reading Jon's page when he started featuring heavy doses of
pornography. Boring! A pair of female breasts is a pair of female
breasts.
To each his own. It's Jon's web page, and he can do it up anyway he
pleases.

Blueberry

>Thanks.

If you mean how do you run a TNC using a serial port from a computer that only has USB ports (like mine), then you will need to get a USB to serial adaptor. They run around US$30 to $50 at most computer stores. Then you are back to just making sure the com (com1 com2 ect) numbers and speed match between the computer and TNC as you would when using a regular com port. I use this method for computer control of my serial port TS870 HF rig as well as hot syncing my old serial port PDAs. It should work (never any guarantees of course) with a TNC as well.

Makes my point: Not only is this guy unable to figure out the proper
usage of "to" and "too," he top posts to boot.

That makes him a typical Jon Cunningam web page aficionado.

555. New York Times artical on BPL

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-13 12:38:01 UTC
From: Victor <vcarnuccio@mindspring.com>
Message-ID: <JIQIc.5703$sV2.1945@newsread2.news.atl.earthlink.net>
Source record: 57167

In the artical "Is Broadband Out of a Wall Socket the Next Big Thing?" by James Fallows on BPL technology that has recently been introduced as a means of transmitting internet conductivity there was no mention of the severe interverence that this mode causes to the radio frequency spectrum. The American Radio Relay League as well as other organizations has been conduction tests proving the potential disruption that this BPL service would cause. There are ways to deliver broadband that do not pollute the radio spectrum as Broadband over Power Line (BPL) does. These include fiber-to-the-home, cable, DSL, and wireless broadband.

562. DC-to-DC conversion

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-13 21:04:28 UTC
From: Jack Twilley <jmt+usenet@twilley.org>
Message-ID: <86pt6zzkir.fsf@duchess.twilley.org>
Source record: 57174

```
-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

I have a situation where I have some devices running off of 48VDC and
some devices running off of 12VDC[1] and I'm interested in a single
power source for both. Obviously, this will require DC-to-DC
conversion. The only way I know to convert DC to DC is to pass
through AC first. This has two potential drawbacks of being
inefficient and causing RFI. I've ordered the ARRL Handbook and it's
on the way, so I'll read what they have to say, but I was curious
about what the newsgroup residents thought about this concept.

Anyway, I have two questions: is there a clean way to do this, and is
it better to go from 48 to 12 or from 12 to 48? Another question: if
48 to 12 is better, where can I get a honking charger/supply that
can supply the higher voltage?

Thanks!

Jack.

[1] Yes, I know it's 13.8VDC and not 12VDC, and about 55.2VDC for
48VDC, but focus on the real issue, 'kay?

Whether a magazine is "good" or not can be a pretty individual thing. CQ magazine specializes in covering the various operating contests. It has good articles, reviews, etc... Their coverage of digital ham radio took a nose-dive a few years back when K4ABT Buck Rogers' column was replaced by some pencil-necked dweeb from TAPR who wastes the majority of his space talking about - TAPR - instead of digital ham radio. They would have been better off with no digital column at all.

CQ has good ads, which is one of the things I like about all of the magazines. CQ is basically a good magazine. Whether its worth subscribing to is up to you. Buy a copy at the book-store and check it out before subscribing. I don't read CQ anymore because of the way they dumped on the digital enthusiasts, but that's just me.

565. Subject: Arizona Sheriff Joe Arpaio's Tent City

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-14 02:13:31 UTC
From: kf4toh@aol.com
Message-ID: <20040713221331.25600.00001949@mb-m29.aol.com>
Source record: 57180

Subject: Arizona Sheriff Joe Arpaio's Tent City

He has jail meals down to 40 cents a serving and charges the inmates for them.
He stopped smoking and porno magazines in the jails.
he took away their weights.
he cut off all but "G" rated movies.
He started chain gangs so the inmates could do free work on county and city projects, then he started chain gangs for women so he wouldn't get sued for discrimination.
He took away cable TV until he found out that there was a federal court order that required cable TV for jails. So he hooked up the cable TV again, but only let in the Disney channel and the weather channel. When asked why the weather channel he replied, "So they will know how hot it's gonna be while they are working on my chain gangs."
He cut off coffee since it has zero nutritional value. When the inmates complained, he told them, "This isn't the Ritz/Carlton. If you don't like it, don't come back."
He bought Newt Gingrich' lecture series on videotape that he pipes into the jails. When asked by a reporter if he had any lecture series by a Democrat, he replied that a democratic lecture series might explain why a lot of the inmates were in his jails in the first place.
More on the Arizona Sheriff...
With temperatures being even hotter than usual in Phoenix (116 degrees just set a new record), the Associated Press reported:
"About 2,000 inmates living in a barbed-wire-surrounded tent encampment at the Maricopa County Jail have been given permission to strip down to their government-issued pink boxer shorts.
On Wednesday, hundreds of men wearing boxers were either curled up on their bunk beds or chatted in the tents, which reached 138 degrees inside the week before. Many were also swathed in wet, pink towels as sweat collected on their chests and dripped down to their pink socks.
"It feels like we are in a furnace," said James Zanzot, an inmate who has lived in the tents for 1 1/2 years. "It's inhumane."
Joe Arpaio, the tough-guy sheriff who created the tent city and long ago started making his prisoners wear pink, and eat bologna sandwiches, is not one bit sympathetic. He said Wednesday that he told all of the inmates: "It's 120 degrees in Iraq and our soldiers are living in tents too, and they have to wear full battle gear, but they didn't commit any crimes, so shut your damned mouths!" "
Way to go, Sheriff! Maybe if all prisons were like this one, there would be a lot less crime and/or repeat offenders. Criminals should be punished for their crimes - not live in luxury until it's time for their parole, only to go out and commit another crime so they can get back in to live on taxpayers money and enjoy things taxpayers can't afford to have for

themselves

Wouldn't take one if it was free. They are J-U-N-K.
The manufacturer says it's all in the installation. Trouble is, no one has
ever found out what the parameters of this mysterious "installation" are
that will allow this piece of junk to put a signal on the air.

NEWS UPDATE :

On 7/13/04 at 5:30 pm some lid got on the 146.64 repeater and said "George Bush is a lying A-- Republican". this persons voice did not sound familiar to any users of the 146.64 group. nobody knows who this was. ** this persons opinion does not reflect the views of the 64 group. This is just a reminder that the jammers are still out there.

all else is good on the 64 repeater, lots of ham radio fun in the florida sun

73's for now

I was going to bitch about this posting because it is off topic. So after reading the whole posting, I will instead just ask this: Is anyone going to work the VHF contest this weekend? It should be great! Any mode, 6m and 2m. Stay away from calling freqs. Details at http://cq-amateur-radio.com/

Get your HT on 146.49 and call "CQ contest". If you have 6 meters, get on any freq where you hear stuff, and jump in. It's a friendly contest. It goes from 2pm Saturday 7/17 (Eastern time) until Sunday 5pm the next day.

Please read all of this that follows. Especially if you are a potential criminal in Arizona. I met Sheriff Joe when I was in Az in 1997. He is one of the good guys.

Ranger 2950 mods

Frequency Modification
1. Remove the case. I *think* you can remove either the top cover
or the bottom cover to get to the PC board with the jumpers.
It will be a small PC board immediately behind the front panel.
2. Locate "J2". There will be a jumper on pins P3 and P4.
3. Remove this jumper to expand coverage to 26 MHz - 29.7 MHz.
4. Move the jumper from P3-P4 to P1-P2 to expand coverage to
26 MHz - 32 MHz.
5. After moving (or removing) the jumper, press the CPU reset button

(located below J2).
NOTE: Operation between 30-32MHz may require retuning the VCO.

CB Channel Readout Modification
1. Locate J1. There will be a jumper on pins P1-P2.
2. Remove jumper and place on P2-P3.
3. Press the LOCK button on the front panel. The readout will now
display the CB channel number 1-40 -- also will display "A" channels.
4. Press LOCK again to return to VFO mode.
NOTE: The SHF button will not operate while in CB mode.
This modification will disable the frequency lock function.

CB Channel 9 Select Modification
1. Locate J3. There is a jumper between P1-P2.
2. Remove the jumper and place it on P2-P3.
3. Press the "roger beep" button to go directly to CB Channel 9.
NOTE: Doing this modification makes it impossible to turn off the
roger beep feature (unless, *possibly* you make sure the
roger beep is turned off before moving the jumper. I'm not
sure).

"Tuneup" Modifications

Adjust VR14 (AMC) for maximum forward modification. Mod limiter
Q32 can be removed for more modulation, but it also disables VR12
(SSB ALC) and disables variable power for SSB. I do not recommend
removing Q32; you'll have plenty of modulation as is.

Tune L34, L13, L14, L46 and L10 in AM mode for maximum forward
swing, using a peak-reading wattmeter. Try to balance for even power
from top to bottom of frequency range.
NOTE: You'll have a LOT of trouble identifying these cans. Sorry,
I don't know for sure where they are either.

Adjust VR13 (AM High Power) for 12 watts dead key with the front
panel RF power control at maximum. Adjust VR15 (AM Low Power) for
2 watts dead key with front panel RF power control at minimum.
From the 12-watt dead key you should see a forward swing of 30-40 watts.
From the 2-watt dead key you should see a forward swing of 18-20 watts.

Adjust VR12 (SSB High Power ALC) for maximum PEP on SSB, then
back off just a little, with front panel RF power control at maximum.
Adjust VR16 (SSB Low Power ALC) for 5-6 watts PEP on SSB with front
panel RF power control at minimum. You should see 40-50 watts PEP
on SSB with front panel RF power control at maximum.

Totally Agree.....but, let us not forget the ACLU who are lurking
in the wings. I am for humane treatment, but not for giving the
criminals a "rest home".

Bummer about the virus aspect... probably a good idea to stay away from
these titties.

At first glance the message seemed rather off-topic for radio
newsgroups. However, I suppose this unconventional use of silicon could
make it slightly on-topic. Silicone is certainly a more common material
for boob work. Silicon seems a bit hard and brittle for the task. The
new knockers must have been expensive, though.

Does anybody recognize the closing word? Looks vaguely Eastern-European.
How does one pronounce it? (I know... "just like it's spelled.")

What's that? Another shitizen's bandits' garbage?

Are there real useful and serious mods available out there such as variable sidetone volume for CW, automatic offset and single side band receiving for CW, frequency display mod when driving a transverter, adding a TX-ground jack for PTT keying any amplifier or transverter?

Adding a switchable QRPP driving output is quite easy but did anybody ever get further to make this rig more suitable for hamradio use?

Whatever... I know a guy who has been married three times!

Did you hear about the Gitmo detainees who thought that air-conditioning was
a torture device when their quarters were being improved?

I thought that was a hoot. A few of them actually filed complaints.

588. Required info on QSL ?

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-15 16:24:20 UTC
From: j999w@aol.com
Message-ID: <20040715122420.26618.00001831@mb-m03.aol.com>
Source record: 57050

I'm chasing my 6 meter WAS and VUCC and have been receiving quite a few cards with missing information ... no RST, no DATE, without my CALL !

From the ARRL site under DXCC rules it states:

4. Confirmation data for two-way communications must include the call signs of both stations, the Entity name as shown in the DXCC List, mode, and date, time and band. Except as permitted in Rule 1, cross-mode contacts are not permitted for DXCC credits. Confirmations not containing all required information may be rejected.

Does a QSL require a RST report?

I've been sending them back with a SASE to be filled out.

Thoughts?

John K9RZZ

Signal report is not required. For VUCC, the grid square is required in
addition to the normal items.

Yeah, I saw that you are allowed to write the grid square on the address side
of the card in pencil, if it's not clearly marked on the info side of the card.

As for the other comment ... what have YOU accomplished lately other than down
a few beers???

In the past I have had HF cards rejected for lack of RST and dates.
I do not know if this applies to VHF cards or still applies to HF cards ?
Best ask the local ARRL awards manager
See awards managers for your locale at the ARRL pages

At least you are receiving cards -- I sent out 142 6M cards for VUCC with
SASE's and return rate is about 60 %

And for WAS cards of the 48 I have worked -- still missing 2 cards -- sent
with SASE over a year ago.

Oh well work em again I guess.

Without even the 'basic' information of Callsign, QTH (Grid for VHF/UHF)
date/time of qso and frequency (band) and mode....Then it is not a QSL.
QSL means to confirm. How can it be a confirmation without even the basic
info.

I would just trash it.

Some VHFers are not from the same cloth as HFers -- so may not realize the
importance of the items that conststitute a complete and proper QSl card.

I would send the cards back with a note outling the proper QSL info.

Folks can work hard and spend many hours trying for six meter contacts.
Worked All States on six meters is achievable but can be very difficult.
QSLing is especially important on six meters due to the goofy propagation
patterns.

It was rejected for lack of the MODE. That is mandatory. RST is not. The
ARRL rules are very clear on that.

That doesn't surprise me. I've seen a few QSLs get turned away like that. Usually, they have QSL checkers at some of the bigger hamfests, rather than send mine away, I'd rather have them checked personally, then I can argue the point right there. Have them show me the rules they used to disregard it.
Just another guy!

Either something else was missing or you should have made a fuss about it.
RST is NOT required.

That doesn't mean the morons checking the cards know what they're looking
at. Sometimes, the contestants know the rules better than those judging. C.

611. N4PY Software/TS-570

Newsgroup: rec.radio.amateur.misc

Has anyone used the N4PY software with the Kenwood TS-570? I was looking at the Ten-Tec RX-320 as a sub-Rx and general coverage receiver; mainly due to the DRM 12 kHZ output. Has anyone used the TS-570 and RX-320 as a combo with the N4PY package? Or, even just the software as a controler for the TS? Any feedback is appreciated.

612. mux-ing noise?

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-16 10:27:27 UTC
From: David J Windisch <davidw@copper.net>
Message-ID: <40f7adcf_1@newsfeed.slurp.net>
Source record: 57071

Hi, all concerned:

I bought a rig which has a removable control panel.

While running the r-f gain up/down, and the a-f gain u/d, wearing good-quality cans, I hear what I believe are artifacts of the mux-ing of signals between the front panel and the set.

Has anyone else noticed this?

73, Dave, N3HE

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday July 18th 2004
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

Well in all walks and crawls of life -- one can encounter downright
unfriendly folks (;-(

While waiting in a Bank or Post Office line, to make the time go quicker --
strike up a convesation with the person next to you -- get that "How dare
you talk to me stranger" look

In NYC -- Ya talkin to me?

Old Hag -- Ya hittin on me Sonny ??

Down South -- Durn Yankee!

Back east "I don't know you"

California "You from Orange County"

Midwest -- get that "you must be some kind of fernanor" look

So why would you expect anything different in an unmoderated no-pay forum.

Of course I ain't no Brad Pitt look a like
My wife is a ringer for Catherine Zeta Jones -- never gets those reponses

So change ur anon to Zeta or Britney -- folks will be real friendly (;-)

A lot of the music out there is noise. Indeed, depending on the definition used, it could all be noise.

I have the 40 meter version and love it. I only bought it instead of a vertical due to all the (19 I believe) excellent reviews on eHam.net. I will say the Isotron's have the best reviews than any of the verticals.

However I'm having a bit of a problem with the 10/15/20 Meter combo.

Put the 40 meter version up on a 12 foot mast, super easy to tune, worked great, 1.2:1 SWR across the 40 Meter CW portion of the band without the use of a tuner. Made better 40 meter CW contacts on the Isotron than on my dipole, I still can't believe how good that "birdfeeder" works.

Well I'm putting the 10/15/20 combo version together and its been more of a problem. Can't get a good SWR, about 2:1 is the very best I can do on any of the bands.

Each antenna has an SO259 connector and each antenna is connected in parallel via short piece of twinlead. So I don't know which antenna I really should connect my coax to, the 10, 15, or 20? Anyone have experice with the 10/15/20 combo who can offer some suggestions....

George

620. Is there a general consensus at all for best ham radio prices?

Newsgroup: rec.radio.amateur.misc

I buy most of my gear at HRO, but I'm getting to where I'm not exactly smiling at some of the prices. I know ham radio gear is expensive, but I get almost sick to my stomach the thought of paying $90.00 for a rapid charger for my IC-190A.

Is there a better deal on the web anywhere?

621. Re: Isotron 40m & 80m antennas

It is well known and proved that all the eHam.net reviews were sent in
by the same person, who is related to the manuafacturer.

Any time I see an Isotron at a hamfest all I hear are negative comments
about it. If you own one, try selling it! You cannot pay people to
haul it away.

As one poster said, the Isotron is ham radio J-U-N-K.

Then I must have a really crappy dipole because my 40 Meter ISO is doing a better job. 1 S-unit less noise and 2 S-Units more signal in side by side Comparison using a coax switch to switch back and forth....

I've seen many neg. comments about other products on eHam.net. You have to have faith in something being on the up-and-up.... Sorry but so far I like my 40 M Iso....

But on think I've quickly discovered is this, most people who say neg. things about a product are people who have never owned or tried one. They simply are spreading what they've heard from others who as well never owned or tried one. That is true for all products, not just ISO's or Ham equipment but all things in general....ya just have to try it for yourself.... Now I'm just trying to get my other ISO's to work as well as the 40 does....

You have clearly made a poor choice of antenna in attempting to
put any kind of signal on the air with a very limited space Isotron.
If you want to defend your poor choice of antenna, hey, go for it.
Like the man said, ISOTRON = JUNK
Have yet to hear a valid positive comment about one, till you
came in here and started spewing your personal nonsense.
No wonder you have such a pee-willy signal on the air
ROTFLMAO!

I recently aquired a Harris Medalist 12 and no longer need these boards. the Newer SS8810(working) will go for $300.00 Firm(this is what it cost me)

the older SS7600 parts/repair will go for $150.00 obo(free w/purchase of 8810)

These are the mccurdy boards previously listed

Can be seen here (****7 LARGE PIX****)

http://www.radio-info.com/mods/board.php?Post=216298&Board=community

Must pick up in 08826

Thanks,

I just got this radio last night. It's supposed to have a built in
mic. How can I test the mic? What button do i push?
I already read the online manuals for it but it doesn't even tell you
how to do the most simplest things.

http://support.radioshack.com/productinfo/DocumentResults.asp?sku_id=19-1120&Name=Ham%20and%20Marine%20Radios&Reuse=N

thanks

Sorry I asked a question about an ham radio antenna problem....I didn't
realize this was a CB radio group.

George

Hi,
Does anyone remember a weird compact antenna that was featured in a 60's (or
early 70's) edition of "73" magazine. Had 2 etched PCBs (like spaced plates)
mounted inside a plastic bucket, and fed with coax?
Does anyone know more details of this?
JEFF
ZL3TNV

Wouldn't be a patch antenna by any chance?

Obviously you have a real problem your 40 meter dipole. Sorry. I am
putting the Isotron's down, but I suspect you have some issues with
the dipole that should have been addressed.

Pete

SB DX @ WW < KB8NW $OPDX.669
Ohio/Penn DX Bulletin No. 669

The Ohio/Penn DX PacketCluster
DX Bulletin No. 669
BID: $OPDX.669
July 19, 2004
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NG3K, W3UR & The Daily DX, W3YY, N4AA & QRZ DX, WW4LL, W5KNE, N6HR, K8YSE, W8CNL, WB8YJF, VQ9LA/N0QM, CO2TK, CO8TW, CT1EEB, DL/VE3ZIK & www.contesting.info, DL1EK & The DX News Letter, DL6UAA, DL7DF, EA4ST, F5CWU & La Gazette du DX, F5NQL & UFT, G3XTT, HA0HW, I1JQJ/IK1ADH & 425 DX News, IZ2ELA, JE1RXJ, JI6KVR & JA-IOTA Islands News, LZ1BJ, MM0DFV, OE3EPW, OY1CT, SM3CXS, SP3BJK and VA3RJ & ICPO for the following DX information.

** SPECIAL ADVANCE NOTICE BY EDITOR (by KB8NW): There will "NOT" be an OPDX bulletin for August 2nd. I know, you heard this before, but it is true this time. My wife (chief proof-reader), daughter and I will be going to Las Vegas to visit my dad and step-mother (who we haven't seen in 2 years). Besides, I can really use the break! However, PLEASE continue to send your DX info to me.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11th/July, through Sunday, 18th/July there were 213 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9U, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J6, JA, JD/o, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV9, T33, T5, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP5, VP8/h, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/R, ROTUMA. Reports indicate that Christian, 3D2EA, is expected to operate as 3D2EA/R for one or two weeks starting around July 26-27th. His plans of activity were not provided. QSL via EB2AYV.

3Y0, PETER I ISLAND. Another press release was posted July 11th on the 3Y0X DXpedition Web page by Bob/K4UEE and Ralph/K0IR. The DXpedition, which is scheduled to take place between January 20/21st and February 5th, is planning to a have multi-national team of twenty operators. The current list of operators are: K0IR, K3NA, K4SV, K4UEE, F2JD, HB9AHL, HB9BHW, LA6VM, NP4IW/6, N2WB, N4GRN, N6OX, UA3AB and W0RUN. Several invitations are pending that will complete the team. A backup list is also in place, and they are seeking potential team members who might want to go in the event of a cancellation. If interested, please contact Bob, K4UEE, via E-mail at: mallphin@aol.com
Also, the press release lists the team's scheduled itinerary and states they expect to be active with 4-6 high power stations operating around the clock for about 2 weeks. Operations will be on 160-6 meters CW, SSB, RTTY and PSK31. The team still needs funds, as well as additional financial sponsors for this DXpedition. This is a very expensive DXpedition. The Web page states, "Fundraising is continuing with the addition of several area fundraisers: W3WL (North/South America), JA1ELY (Asia), F2JD (Europe and Africa) and ZL2AL (Pacific). For more details and updates, please visit the DXpedition's Web site at: http://www.peterone.com

7P, LESOTHO. John, G4IRN, is planning a DXpedition to here and will be active as 7P8RN from September 3-12th. This will be mainly on CW on 160-10 meters. QSL via G4IRN; bureau, E-mail requests, or direct cards with $ plus a SAE is accepted. The station will be comprised of a 4 element tribander at 80 ft plus 2 element on 12/17 and slopers on the low bands. Further details are available at: http://www.qrz.com
Also, on-line logs will be available after his operation at: http://www.qsl.net/g4irn

C5, THE GAMBIA. Josep/EA3BT and Nuria/EA3WL will be active from July 29th to August 4th. Their expected callsigns will be C56BT and C56WL (not yet confirmed). They will operate during their spare time only on SSB, on 40-6 meters. QSL via EA3BT.

CO5, CUBA. Juan, CO8TW, will be active in the IOTA Contest as a Mixed-Mode entry. QSL via IZ8CCW, and the log will be available after the contest at: http://www.qsl.net/co8tw/

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following are approved for DXCC credit:
3DXQZ - Republic of Guinea - April 20-30th, 2004
5V7AD - Togo - June 12-22nd, 2004
HZ1AN - Saudi Arabia - All operations
HZ1IZ - Saudi Arabia - All operations
YA7X - Afghanistan - March 1st through April 30th, 2004

YI9MC - Iraq - Current operation effective March 23rd, 2004

HI3, DOMINICAN REPUBLIC. Mark, KB2MS, will be active as HI3/KB2MS from July 29th-August 15th. Activity will be mainly on 20 and 6 meters. QSL via his home callsign. By the way, Mark is the QSL Manager for HI3NR.

IOTA CONTEST REMINDER. Don, G3XTT, IOTA Contest Manager, sent out the following reminder: "With the IARU contest out of the way, the next 'big one' is the IOTA Contest on 24/25 July (1200z to 1200z). There should be plenty of island activity, as always, with lots of island expeditions already announced. This year it's also a great opportunity to work islands towards the IOTA 2004 40th Anniversary Award (for details go to the Chiltern DX Club (CDXC) Web pages at: http://www.cdxc.org.uk
Many European islands count for premium points for the award during July. An up-to-date list of expected operations appears on NG3K's Web site at http://www.cpcug.org/user/wfeidt/Misc/iota2004.html
and on DL2VFR's Web page at
http://www.iota-post.de/iotatest/hauptteil_iotatest.html
- thanks to both of these supporters.
The contest rules are unchanged from 2003 and can be found on the RSGB HFCC Web site at: http://www.rsgbhfcc.org
If you take part, we are very keen to receive your log. Logs go to iota.logs@rsgbhfcc.org (not rsgb.org - this was an error on the Web site and has been corrected). This year you will get an acknowledgement E-mail, asking you to visit a Web page to complete your submission. This way we can ensure that we will not need to get back to you to check on the exact category you have entered, etc. My thanks to Marios 5B4WN/G0WWW for helping to write the scripts for this. It will save a lot of post-contest correspondence with entrants. E-mail logs should be sent with a single (ideally, Cabrillo) attachment. There is good news if you are a CT user, which is that Ken K1EA has now implemented Cabrillo for the IOTA contest. Please ensure you are using the latest version of CT, and you will be able to send in a conformant Cabrillo log. Most other logging programs (SDI, Writelog, N1MM, TR, LuxLog, etc.) already support Cabrillo for the IOTA contest. A reminder, if you are deciding what category to enter, that Braco, OE1EMS, has kindly compiled a list of records for the contest, and they appear on the IOTA Contest pages on the RSGB HFCC Web site (see above). We look forward to receiving your IOTA contest log. If you have any queries, you can contact us at: iotacontest@rsgbhfcc.org ..."

IOTA NEWS .....
AF-014. Some operators of the Agalega team that activated the Lighthouse Ilheu de Cima (AF-014, LH. numbers: LH 0830/FMA01) as CT9P this past weekend are planning a second operation and will participate in the IOTA contest from Porto Santo Island as CT9X. Porto Santo is a small island 50 km away from Madeira. Activity will be July 24-25th from the shack of CT3BX as a Multi-Single on CW/SSB. Operators mentioned are: CT1EPV/Antonio, CT1AGF/Luis, CT3EE/Luis, CT3FN/HB9CRV/Hermann, CT3MD/Jose, HB9EBV/Toni, DJ2VO/Juergen and VA2AM/Rejean. QSL Manager is Kim (daughter of Steve N3SL) via N3SL CBA or QRZ.com.

AS-108. Operators Alfeo/I1HJT, Tony/IK1QBT and Claudio/I1NVU will be active as OD5/homecall/P starting July 24th. They will be joined by Naim/OD5LN and will participate in the IOTA Contest from Ramkin Island. They will have two stations active on all bands (160 meters excluded) SSB and CW, with at least one power amplifier and verticals. Expect activity from the island until July 26th in the local afternoon, then operations will continue from the mainland until the 29th. QSOs are also valid for "The ARLHS - Lighthouse Awards" ref. LEB 001 and "The WLHA - World Lighthouse Award" ref. AS0020. QSL via I1HJT, direct or via the Italian Bureau. On-line logs and further information will be available at: http://www.qsl.net/ik1qbt/ramkin_index.htm

AS-117. Kenji, JA4GXS, will be active as JA4GXS/4 during the IOTA Contest this weekend from Yashiro Islands (JIIA-117-118), July 24-25th. Look for him on CW and SSB on 21260, 14260 and 10117 kHz. QSL to his home callsign either direct or via the JARL bureau. JA4GXS's address is: Kenji Sasaki, 2-15 Ishikannon-cho,Yamaguchi,753-0038 Japan.

EU-028. Marco, IZ2DVI, will be on a work trip to Montecristo Island (IIA LI-015) and will be active on SSB in his spare time as IA5/IZ2DVI/p. Dates were not provided. QSL via his home callsign by the bureau or direct.

EU-040. A Hipano-Belgium-Portuguese team will activate CS7T from Berlenga Island during the IOTA Contest as a Mixed-Mode/Low-Power entry July 24-25th. Operators mentioned are: CT1CJJ, CT1ILT, CT1EEB, CT1APE, CT2GLO, EA1CA, EA1OS, EA1DKV, EA4ST and ON5NT. QSL via CT1ILT. For more inforamtion, please visit the Web page at: http://www.qsl.net/ct1eeb/cs7t/

EU-048. Oleg, ES1RA, will be on the Island of Saaremaa now through July 24th. His callsign will be ES1RA/0. Oleg will use 500w, a 20m Loop, vertical and a 30, 40, 80 meter dipole. QSL via the Bureau or direct.

EU-110. Look for Emir/9A6AA, Zoli/HA1AG, Peti/HA1TNX, Lacy/HA3NU, Anti/HA3OV and Zoli/HA6OI to be active as 9A0CI in this weekend's IOTA Contest from Sveti Nikola Island (IOCA CI-118) as a Multi-Op category. QSL via HA3KNA (for this operation only!) Before the contest all the operators will be active as 9A/homecalls. QSL via the operator's home callsign to the HA QSL Bureau, or direct. More information is available at: http://www.inet.hr/9a6aa/IOCA_IOTA_LH/next.htm

EU-111. Look for MM0CWJ/p to be active from the Monach Islands during July 22-26th, including the RSGB IOTA Contest. Activity will be on 80-6 meters, SSB only. QSLs should be sent via WA3RHW: Bruce T. Carroll, 529 Charleston Rd., Mount Laurel, NJ 08054, USA.

EU-123. GM2Z will operate from the Isle of Bute during the RSGB IOTA Contest [1200z, July 24th until 1200z, July 25th]. Administratively, the Isle of Bute is in Argyll and Bute Council Area [CAOSA: AB]. Reference numbers for other awards are: IOSA CL02, SCOTIA CS19, WAB NS05. Co-ordinates are: 55°46'48"N and 05°06'30"W [QRA Locator IO75KS]. Pertinent equipment available to the station is Icom IC-706 transceiver and a number of portable antennas. Contacts will be carried out on all HF bands, CW only. It is also planned to take numerous pictures of the island. All the pictures and further information will be presented as an addition to the publications on the Scottish HAM Portal - http://www.scotham.net
QSL cards for contacts with GM2Z should be sent via RSGB QSL Bureau or direct to MM0DFV: Jurij Phunkner, P.O. Box 7469, Glasgow, G42 OYD, Scotland, U.K. ADDED NOTE: A second station on SSB will be active as GM4TOQ/p, also from Bute Island in the IOTA Contest.

EU-132. Zick, SP3BJK, will be active from Wiselka on Wolin Island (SPIA- SZ02) between July 20-27th as SP3BJK/1. Activity will be on SSB and CW on the HF bands. He is expected to be active during the IOTA Contest. QSL to his home callsign via bureau or direct.

EU-136. (Correction to OPDX.668) Laci, HA0HW, informs OPDX that he provided the wrong month on his upcoming operation. So, Laci/ HA0HW (CTC 264) and Tomi/HA4DX (CTC 192) are expected to be active as 9A/HA0HW and 9A/HA4DX from Silo, Krk Island, North Adriatic (IOCA: CI-046) between August 2-12th. This is a family holiday, but they will be active during the early morning and later evening hours on all HF bands (depending on the free space available for all of the antennas). Activity will mainly be on CW and PSK31, RTTY and SSB. QSL via their home callsigns, either direct (QRZ.com) or through the HA bureau.

EU-149. Oskar, ES7NY, will be on the Island of Naissaar for about 2 months. His callsign will be ES7NY/2. Oskar will use 100w and a Delta Loop antenna. QSL via the Bureau or direct.

EU-172. Axel, DL7VEA, will be active as OZ7VEA from the islands of Fyn (DIA FY-001) and Langeland (DIA FY-019) now through August 6th. Activity will be on 80-10 meters SSB and PSK31. QSL via his home callsign, direct or by the bureau.

EU-176. Operators SM3CXS, SM3EVR, SM3GSK, SM3JGG and SM3XGV will participate in the IOTA Contest (July 24-25th) as SM3S on CW/SSB from Grimskar. QSL via SM3GSK, by the bureau or direct. For activity outside of contest, please QSL via operator's home callsign.

EU-177. (Attention Prefix Hunters!) Kjell, SM4DDS, will be active as 7S5A from Stora Alo Island, July 21-28th. His activity will included the IOTA Contest (July 24-25th). Operations will be

on 80-10 meters CW/SSB. QSL via SM4DDS, direct or by the bureau.

EU-181. Boyan/LZ1BJ and Ely/LZ1JB will be active as homecall/1 from Sveta Anastasiya Island, July 23-31st. They plan to operate on 80-10 meters SSB and CW using 1 Kw, 10 element logoperiodic ACOM LS108 antenna and vertical antennas. The aim of this activity is to give opportunity to all IOTA chasers who still need EU-181. QSL via operator's home calls, preferably through the bureau.

NA-061. Hillar/N6HR and Elsie/N7YX will be active from the QTH of Ron/VE7EDZ on Kaien Island (BC) during the IOTA Contest. Callsigns most likely will be just homecall/VE7. QSL to N6HR.

NA-067. (UPDATE) Jon, WB8YJF, will be active as WB8YJF/4 from Ocracoke Island, NC, now through July 25th. His grid square will be FM25ac. Jon states he will be using an IC-551D and a whip antenna mounted on the SUV. Hopefully, running the full 100 watts on CW and SSB (hopefully some RTTY too!).

OC-237. Dudy/YB0DPO and possibly others will go to the Peucang Island near the Ujung Kulon Banten Province. They will be there from July 21-25th, and will enter the RSGB IOTA Contest as YE1P. QSL via YB1TC, either by the Bureau or direct to: Soekardi, P.O. Box 151 BSD, Serpong 15330, Indonesia. More info on the Island can be found on: http://www.peucang.org

KH2, GUAM. Tack, JE1RXJ, and his wife will be going here for a holiday to do some sightseeing and diving. However, Tack informs OPDX that he will operate only during the weekend as NB6A/KH2 from Guam (OC-026) between August 6-8th. Activity will be on 160-6 meters CW/SSB/RTTY. He does state that he will mainly operate 6m, 160m and the WARC bands. QSL via his homecall, JE1RXJ, either direct (15-11 Saiwai, Hiratsuka-City 254-0804 Japan) or through the JARL Bureau.

M, ENGLAND. Bob, W3YY, informs OPDX that he "is in London and active as M/W3YY/P through July 20th. Even with a barefoot FT-897D to a random wire inside his hotel, room he reports working stateside and many European DX stations."

OY1, FAROE ISLANDS. Look for Carsten, OY1CT, to be active from Stroemoy in the RSGB IOTA Contest (July 24-25t) as Single-Op/All-Band CW entry. QSL via direct. Logcheck or questions can be sent to: oy1ct@post.olivant.fo

PJ4, BONAIRE. Fred/WW4LL and John/K4BAI will be active as PJ4Z during the ARRL 10 Meter Contest December 11-12th. They will be active as PJ4/WW4LL and PJ4/K4BAI on both SSB and CW beginning December 8th through December 15th. QSL both via the Bureau and/or K4BAI.

QSL INFO AND NEWS.....
3B8MM/3B9MM QSLS. Mart, DL6UAA, informs OPDX that all direct QSL requests for the 3B9MM and 3B8MM (Paradise on Air Mission 2004) are answered. He also mentions that the first batch of incoming bureau

QSLs are answered. Mart does provide an online log on his homepage at http://www.dl6uaa.com and http://www.hamraido-mauritius.com for his "P.A.M." activities. He does not accept eQSLing because he is a QSL collector.

Ray, W8CNL, reports that the logs for 9K9Z (all 14,000 QSOs) and 9K2ZZ/NLD (8295 QSOs) have been uploaded to the LoTW. He has also uploaded 7703 QSOs for 9K2USA. Again, Ray states, "I DO NOT HAVE ANY QSL CARDS FOR THIS OPERATION (9K2USA) !! You must go to 9K2RA for cards." This completes the loading of all of Bob's, (9K2ZZ) logs from his stay in Kuwait. Ray will continue to answer card requests for 9K2ZZ, 9K9Z and 9K2ZZ/NLD. A SASE or SAE and postage is a must!! Cards received without SASE or SAE and postage will be destroyed.

NEW MANAGER. Pepin, CO2TK, informs OPDX that he has a new QSL Manager as of July 15th. His new Manager is F5CWU: Flo Moudar, 25 rue du castel salis, 37100 TOURS, FRANCE.

AK0A, reported last week (Sunday, July 11th) that all direct QSLs for T30WB were mailed.

ONLINE LOGS FOR OExxxx/90KK STATIONS. Peter, OE3EPW, President of the AMRS, informs OPDX that "the 'AMRS' now provides an ONLINE LOG for all those friends being interested in knowing whether or not they are in the log of one of those "90KK" stations. The update is usually made within 6 to 10 hours." The Web address is as follows: http://www.amrs.at After being connected to the Web page just click on the "90KK / Info & Logs" button.

NEW QSL MANAGER. Mike, K3AIR, announces to please update your databases to show that effective August 1st, he will be assuming the QSL Manager duties for Pri/YB0ECT and Dudy/YB0DPO. K5ZE has managed these stations for the last 5 years but has had to step down due to a job relocation. Mike will respond to both bureau and direct cards. Direct cards, of course, must have the appropriate return postage, IRC or GS.

SILENT KEYS.....
Bob, W5KNE, informs OPDX that Morris Guzick, W5IO, of Sherman, Texas, became a Silent Key July 8th and was laid to rest July 12th in Sherman. Bob states, "He was a well known DXer with 385 countries confirmed. I have placed his obit (from the funeral) on my Web site and added some DXCC data at the end", at: http://www.dxer.org

Dave, VA3RJ, reports that Ronald ("Ron") Mervin Brown, VE3WZ, of Pickering, Ontario, became a Silent Key Thursday, July 15th, at the age of 72. He was an avid QRPer and Contester.

OPDX and its readers would like to send out their deepest sympathy to the families and friends of both W5IO and VE3WZ.

SPECIAL EVENT. In commemoration of the 60th anniversary of the Liberation of the Town of Saint Lo, by the 29th American Infantry division, Major Howie (killed on July 17th, 1944), the Manche area hams will air the

special callsign TM6SLO now through July 25th. QSL via F9CH. Suggested frequencies are: 3644, 7074, 14174, 18160, 21174, 24940 and 28574 kHz. For more info on the Battle of Saint Lo, please visit the following Web page at: http://www.normandie44lamemoire.com/version%20anglaise

SV8, GREECE (Maritime Mobile Op). Pietro, IZ2ELA, informs OPDX that he will be active between August 7-21st, during his holiday on a boat sailing from Corfu Island to Zante Island. His callsign will be SV8/IZ2ELA/MM. Look for activity on 10/15/17/20 meters, CW-SSB. No IOTA activity is possible. QSL via his home callsign, direct ONLY (SAE only, 1 IRC is appreciated..., no green stamps please). IZ2ELA's address is: Pietro Volpi Longari, Via M.Buonarroti 7, 20149 MILANO, ITALY.

TJ, CAMEROON. Operators Manfred/DK1BT, Wolf/DL4WK, Reiner/DL7KL, Sigi/DL7DF, Frank/DL7UFR and Les/SP3DOI will be active from Kribi as TJ3SP and TJ3FR, October 6-20th. Sigi, DL7DF, informed OPDX they received their license on March 23rd. They plan to have 4 stations (3 w/amps) active. Their radios and antennas are: IC735, IC706, PA's, Vertical Titanex V80E, Vertical for 40m, Vertical for 30m, Beam A3WS and a Beam for 20, 15, 10m. Activity will be on 80-10 meters and the WARC bands. There will be no 6m and 160m (NO LICENCE/AUTHORIZATION in CAMEROON). Most of the activity will be on the low bands and on RTTY, PSK31 and SSTV. They are looking for some support for their DXpedtion because of some problems with transportation of oversized and extra baggage. The operation's Web page is at: http://www.qsl.net/dl7df

VQ9, CHAGOS ISLANDS. Larry, VQ9LA (N0QM), has been QRT for a couple of months and has been on vaction back in the states. He is presently in the Philippines. He informs OPDX that he will be back in VQ9-land on July 26th and will start operating again. Larry states that he has taking another year contract with his company, so VQ9 will be active again when he arrives at Diego Garcia. His plans are to operate a lot on the low bands this season for those who need 160 meters to 30 meters on all modes. He hopes to confirm as my QSOs as possible. QSL via the address on QRZ.com.

YV0, AVES ISLAND. Word out of Japan reports that Mike, K6MYC, (via Lance, W7GJ) states, "We leave Venezuela on July 28th on a 24 hour boat ride to Aves. We may get on the air late on July 29th but don't count on it. I'll try to have 14.345 com set up immediately with Quad loop and 100W. We should have GPS timing working so we can take skeds for JT65A and should be operational some time on July 30th. Best guess is we tear down on August 7th or 8th. We are there for ten days, but I believe that includes the two travel days. Keep an eye out for the official announcement on the DX sites. To repeat, earlier equipment I will have: 1 KW (8877) on 6M and 2 x 41 feet yagis (M2 specials) (no elevation) and 350W on 2M and 15.7 dBd yagi with elevation to about 45 degrees. Martti, OH2BH, is going and will be taking his two, now famous, solid state HF KW amps, and at his request were made special to get about 500W on 6M so we have a backup amplifier if 8877 has problems. Please pass this message to all 6M friends and all 2M EMEr friends. Gary/KB8RQ and Dave/W5UN will probably have most consistant comm to me on 14.345 and can handle questions and sked times. Try to make

2M JT65A skeds after my moon is over 25 degrees on my rise and before 25 degrees on my set. My above the noise random frequency will be 144.080 Xmit, and I will listen up 2 to 5 KHz for randoms. Grid square for YV0 is FK85eq."

Hi George.

As a more usable answer for you, as opposed to some, the Isotron is a member of a class of antennas that claim to put out a good signal, despite having a very small size.

Another example of this sort of antenna is the Backpacker.

Pretty much what these antennas do is place a significant tuned circuit at the end of your coax. The shield of the coax then acts as a radiator.

Does the antenna work? Despite what some say, it will work as long as you have that length of coax doing the radiating.

So why the hand wringing and gnashing of teeth? Well, there are better ways of getting a signal out - and safer ones - than having radiating coax. In general coax is meant to take a signal from one place to another, not serve as the launchpad for it! 8^)

One of the hazards of radiating coax is the possibility of RF getting into places where you don't want it, such as the radio in general, the audio signal you are transmitting, or your person. I got one rf burn, and plan on no more!

Now the comparison to your dipole. When comparing the two, it is good to know what the conditions were. Did you do a direct comparison, or was it displaced by time? Also the frequency and distance can be important. Were both DX? That radiating coax would likely be functioning as a vertical, with a lower angle of radiation.

But in general, a decent dipole should outperform an Isotron. So I suspect there might have been a problem with the dipole.

Hope this helps.

QST:

Where can I find a reference to the accepted standard for using the 30-A power-pole connectors? It would seem you could slide the red one and the black one together in two ways. Which is considered to be the universal standard for emergency use?

I'm getting rid of the previous universal standard Molex connectors.

Amateur Radio Newsline™ Report 1405 - July 16, 2004

Here's a brief message from Amateur Radio Newsline's Support Fund Administrator Andy Jarema, N6TCQ:

"The following is an advisory. This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator.
We'd like to thank everyone who helped us during our campaign in June, and we'll have the on-air
thank-yous in the next week or so. Don't forget that the Young Ham of the Year Award is coming
up in the next few weeks, so try to note our support address at the end of the newscast, as we're
not out of the woods, yet.

And now, as every week, the latest breaking news of Amateur Radio follows"

Amateur Radio Newsline report number 1405 with a release date of Friday, July 16, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The ARRL board of directors discuss BPL and other hot issues, it's still a go with ECHO and a
satellite TV company makes a costly move. The details are coming up on Amateur Radio Newsline
report number 1405 coming your way right now.

**

BPL AMONG HOT TOPICS FOR JULY ARRL BOARD SESSION

The American Radio Relay League's board of directors sits down for a weekend of critical meetings.
Amateur Radio Newsline's Mark Abramowicz NT3V has the preview...

--

Broadband Over Powerline internet access is one of the hottest topics on the ARRL board agenda.
It is likely BPL has been the subject of committee meetings leading up to the weekend board sessions.

Dealing with BPL issues is priority No. 1 for ARRL President Jim Haynie WB5JBP. Haynie tells Amateur
Radio Newsline in a recent interview, he expects the Federal Communications Commission will act soon

on the matter. While it's difficult to put a timetable on how soon, Haynie tells us he wouldn't be surprised to see the panel come out with a decision before the presidential election.

President Bush is solidly behind BPL as part of his broadband-technology initiative - this despite Haynie and the ARRL's plea for him to reconsider. Democratic challenger John Kerry's campaign position speaks of a variety of technologies for broadband but does not directly mention BPL.

Haynie concedes the way the political winds are blowing, some form of BPL activity is likely to be approved.

But the 64-thousand-dollar questions are: How much and where?

With the National Telecommunications and Information Administration already raising red flags about interference, and a BPL industry spokesman throwing verbal missiles at the amateur community, Haynie tells us here at Amateur Radio Newsline he's hoping some FCC commissioners might re-examine their BPL positions.

Haynie calls the recent suspension of the Alliant Energy BPL project in Cedar Rapids, Iowa, an important step. And, Haynie says, he suspects the electric utility industry will have to consider any fallout and who could be next to answer an interference complaint at the FCC.

As to complaints, Haynie says the ARRL will be especially vigilant if BPL becomes a reality. He says the organization will be before the FCC to press interference issues with those who are cause them.

And, he has told Amateur Radio Newsline, he will also press the FCC to fully empower those charged with enforcement issues in the agency to go after BPL providers who fail to resolve any interference complaints.

Among the other items on the board agenda, the status of amateur license restructuring which includes provisions for a "no-code" HF license for entry-level hams.

The July board meeting also is where the announcement of the winner of the Hiram Percy Maxim award comes along with host of other ARRL awards.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Check next week's Newsline for a report on the ARRL board happenings.

(ARRL, NT3V)

**

HAMSATS: ECHO TESTS CONTINUE

Testing of the newest ham radio satellite, ECHO, continues and all is, as they say in the space biz…
nominal. The remainder of this week is expected to be spent loading some new code, testing the S
downlink and the UHF B transmitter. Note that the S downlink, when in digital mode, will always be
at 38.4 kilobits or higher. It is not capable of 9.6 kilobits due to limitations involved in making
it work properly at speeds up to 76.8 kilobits. AMSAT is pleased so far with the strength of the
2.45W S downlink. At times the UHF A transmitter will be off or at very low power. They will also
be testing transmitters at higher data rates. Listeners should not be surprised or alarmed if the
UHF A transmitter is not on or if they are unable to copy it at 9.6k during some orbits.

The Command Team is carefully checking off the tests and measurements that are part of the commissioning
process. They ask everyone to be patient. And again, AO-51 is not yet open for use. Any transmissions
aimed at AO-51 by other than command stations will slow down the process and delay the day when it is
open for all to use.

The coloradosatellite.com/echo web site was off line for a few hours last weekend due to a data center
move. Stations who want to upload telemetry should find it on line now.

(WD0E, AMSAT)

**

SPACE: ARISS SCHOOL CONTACT LIST UPDATED

While we're on the subject of ham radio in space, the list of Amateur Radio on the International
Space Station, or ARISS, school contacts has been updated. To check if a school in your area is on
the list or to find out how to schedule a contact at your school please visit www.amsat.org or

http://ariss.gsfc.nasa.gov. There is no "www" in that last URL. Of course, these addresses will
be in the print edition of this week's Amateur Radio Newsline report.

(ARISS)

**

RADIO LAW: MDS & ITFS SPECTRUM RECHANNELIZED - MDS BECOMES BRS

Big changes are coming to the Multipoint Distribution Service and the Instructional Television Fixed
Service. These are better known by the acronyms M-D-S and I-T-F-S.

As part of its ongoing effort to promote the deployment of wireless broadband services, the FCC has
adopted a Report and Order and Further Notice of Proposed Rulemaking dramatically changing the rules
governing MDS and ITFS operations in the 2500-2690 MHz band.

For starters, the Order renames the M-D-S service the Broadband Radio Service or B-R-S. It does
however maintain the I-T-F-S label for Instructional Television Fixed Service licenses and operations.
The newly rechannelized I-T-F-S slash B-R-S band will group high and low power operations together
in spectrum chunks. This, the agency says, will make low power two-way data communications possible
in some parts of the band.

Finally, to make all this happen the band will soon become 5 MHz larger. This, as restructuring of
other services in the adjacent electromagnetic spectrum permits the FCC to extend the low end of
this band down to 2495 Mhz. (CGC)

**

RADIO LAW: FCC CLARIFIES ITS ROLE REGARDING INTERFERENCE AND CUSTOMER EQUIPMENT

The FCC has clarified its role regarding interference issues, consumer antennas and Part 15 unlicensed

equipment. Regarding antennas, we all know that consumers have the right to install and operate -
on property they control - antennas for over-the-air broadcast, terrestrial and satellite reception.
Now the regulatory agency has added license-free Wi-Fi antennas of one meter or less to the list of
what may be installed. The same one meter size limit also applies to antennas used in conjunction
with fixed wireless services that are licensed by the FCC.

In the area of radio frequency interference or R-F-I, the FCC says that it and it alone holds exclusive
jurisdiction over the regulation and resolution of R-F-I issues. It adds that regulation of R-F-I
phenomena shall be imposed only by the Commission noting that both the FCC and the federal courts
have overturned attempts by third parties to regulate RFI matters. This, in light of the FCC's
exclusive authority in this area.

To read more go to:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1844A1.doc
(CGC)

**

ENFORCEMENT: CATV LEAK RESULTS IN $6400 FINE

A cable TV system in Cornersville, Tennessee has been fined for excessive signal leakage in the
aircraft communications band. Small Town Communications Partners has been ordered to pay $6,400
for excessive leakage on 121.2625 MHz.

At that frequency a maximum leakage of 20 microvolts per meter at a distance of at least three
meters from a CATV cable is allowed. The FCC says that the measured leaks in this case ranged
from 255 microvolts per meter to 2080 microvolts per meter.

The Commission notes that excessive cable TV leakage can interfere with a wide variety of communications.
This can include emergency services, aviation, and Amateur Radio.

More is on-line at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1751A1.doc
(CGC)

**

ENFORCEMENT: DIREC-TV FINED FOR UNAUTHORIZED SATELLITE MOVE

The Commission has proposed an $87,500 fine against DIRECTV, Inc.
This for repositioning its

DIRECTV 3 satellite without FCC authorization.

DIRECTV had filed a request with the FCC for special temporary authority to relocate the DIRECTV 3 bird, but admits that its employees began repositioning the satellite the next day, without waiting for Commission approval.

In setting the amount of the fine, the FCC noted that strict adherence to the rules governing modification of satellite authorizations is critical to minimizing the risk of collisions between satellites. (CGC)

**

FCC INTRODUCES NEW EXHIBIT ON HISTORY OF THE INTERNET

The FCC has introduced the third in a series of exhibits on the history of various communications technologies. The latest presentation focuses on the history of the Internet, including the communication technologies used to access the World Wide Web. More is on line at www.fcc.gov/omd/history (CGC)

**

ON THE AIR: THE .275 YOUTH GROUP NET

Timothy Little, W-8-L-B-O has announced the start-up of a new 40 meter 275 Youth Group. According to his posting on the Q-R-Zed dot com super site, this is an informal ragchew group that meets every Saturday at 9:00 P.M. Eastern time on 7 point 275 MHz, +/- 10 KHz.

Little says that the main purpose of the net is to promote the use of HF by younger hams so that they can get to know one another. The net also tries to help them perfect their operating skills including Morse code operation and D-Xing.

Anyone young or young at heart is invited to take part. More information about this net is on line at www.275youthgroup.4t.com)QRZ.com)

**

THE SOCIAL SCENE: NORTHERN ALABAMA DX BANQUET

The North Alabama DX Club has announced that its annual DX Banquet will be held in conjunction with this year's Huntsville, Alabama hamfest on August 21st. The

guest speaker will be Jess
Lewis, K-R-4-O-J, from the T-33-C 2004 Banaba Island DXpedition.
Tickets are $25 each and available
from the NADXC in care of Vic Holland, 219 Cedar Pond Drive,
Madison, Alabama 35757-7633. For
additional information phone 256-721-9106 or E-mail k4rvh@arrl.net.

CHANGING OF THE GUARD: ASCII DEVELOPER NOW S.K.

Bob Bemer, a computer pioneer who published warnings of the Y2K
problem in the early 1970s and
helped invent a widely used coding system, has died. This,
following a battle with cancer.

While not a radio amateur, Bemer played a major role in how the
world's computers operate and,
indirectly, in how hams communicate today. He began his career in
1949 working at companies including
Rand, IBM, and Honeywell. He also helped develop the ASCII coding
system that is used to represent
letters, numbers and other characters in the data world. He also
contributed the escape key and the
backslash to the computer language.

Bemer first published warnings of the Y2K computer problem in 1971
and again in 1979. He also made
several public appearances to discuss the issue in the years leading
up to the millennium.

Bob Bemer died Tuesday, June 22nd at his home some 120 miles west of
Dallas, Texas. He was 84. (Published news reports)

**

EMERGING TECHNOLOGY: FEW KNOW ABOUT DIGITAL TV

The General Accounting Office says that more than 80 percent of
Americans are either unaware or only

"somewhat aware" of the transition to digital television signals. But federal officials have
expressed shock and indignation at the survey results.

Congress plans to sell the analog spectrum that will become available when TV stations convert from
analog to digital. Lawmakers are counting on the money to help balance the budget. However, the
digital transition may be years away unless more consumers start buying digital TV sets and most
are not willing to pay the additional cost. (TechBriefs)

**

EMERGING TECHNOLOGY: CELL PHONE "WAITING LOT" IN OPERATION AT LINDBERGH FIELD

Following the lead of several other busy airports around the nation, officials at San Diego's
Lindbergh Field have opened a convenient "cell phone waiting lot." This is a place where drivers
can park for up to an hour while awaiting phone calls from arriving passengers. Airport managers
hope that the new lot will cut down on the congestion caused by vehicles circling the airport loop,
waiting to pick up passengers. More is on-line at http://tinyurl.com/yplws (CGC)

**

ON THE AIR: 6 METERS ACROSS THE ATLANTIC POND

It's looking like it could be a big DX season for hams and SWLs on both sides of the Atlantic.
GB2RS reports that during a Sporadic E opening on June 19th a path opened from Europe to North
America. The Maximum Usable Frequency rose at least as high as the FM broadcast band. A North
American station was received on and recorded at 88.5 MHz between 13:10 and 13:30 UTC. During
the event, trans-Atlantic television carriers were also received on 55.25, 61.25, 67.25 and
83.25 Mhz. (VHF reflector)

**

50 & ABOVE: 144 MHZ QSO DATA WANTED

If you've made any long distance 2-meter contacts in excess of 1,600 miles, or 2,600 kilometers,
Volker, DF5AI wants to know the details of your contacts. He's interested in the frequency, the
UTC time & date, and particularly the grid square locator. He's

also quite intrigued in double-hop
sporadic E skip. He can be contacted via his website. It's in
cyberspace at www.df5ai.net (VHF Reflector)

**

WORLDBEAT - ISRAEL: NEW SIX METER BEACON IN ISRAEL

4X4SIX is the new 6 meter Israeli beacon operating on 50.080 MHz.
4X6ON and 4Z5AY built the
station which announces its call sign on CW around the clock. The
beacon is located in grid
square KM72JB running 5 watts out to a J-Pole antenna. (Hagal)

**

DX

In D-X, the Ohio Penn D-X Newsletter reports that DL3PS and VE3ZIK
will be active on 40-6 meters
from Bilice, Croatia through July 31st. The call signs being used
are 9A slash VE3ZIK and 9A slash
DL3PS. While VE3ZIK is one of the Web Administrators for the
www.contesting.com info website, there
will be no QSL information there until August 3rd.

Meantime word that D-H-9-Y-A-T will be active portable CU7 from the
Azores. Listen for him from
August 3rd to the 20th. Activity will be on 40, 20 and 15 meters
QRP on CW. QSL this operation
via the bureau. (Various DX sources)

**

THAT FINAL ITEM: MUSEUM SHIPS CASTING FOR CONTACTS

And finally this week, dozens of ships from around the world
get "radio-active" July 17th and 18th
for the annual Museum Ships Weekend Event. Amateur Radio Newsline's
Mark Abramowicz, NT3V is back
with us and he checks in on preparations being made about the U.S.S.
New Jersey....

--

Dave Burgess, WA2TVS, is chief engineer for the Battleship New
Jersey Amateur Radio Station aboard
the New Jersey. Look for NJ2BB (New Jersey 2 Big Battleship) to be
very active during the event.

Burgess says the weekend was the brainchild of the USS Salem Radio
Club, K1USN, in Salem, Mass.
He says it actually started in 1997 as a way to get museum ships at
dry-docks around the world to

get on the air by way of amateur radio.

Burgess says it's the New Jersey's third year taking part.

"Last year, the number grew to about 87 or 88," Burgess says. "Right now I think the pre-registration right now is about 77. But seems like there's always a half a dozen or so right at the last minute that get their act together and get on the air."

Burgess says the event gives radio operators around the world a chance to contact a variety of these special ships and their volunteer crews.

"One is just to have fun and a reason to get the ships on the air," Burgess says. "Of course, whoever is in charge of taking care of the ship gets some PR out of it, we hope.

"They have an opportunity for the public to see amateur radio which is new to a lot of people. But to advertise the ships worldwide. I never knew there were so many ships out there. Just museum ships that is. It's amazing how many there are out there and what their diversity is."

Burgess says there are tugboats, river boats, submarines and even a midget German submarine left over from World War II. All are part of the museum ship flotilla.

He says there's no contest exchange involved in this one. Ship operators get on the air and look to contact land-based stations as well as other museum ships. It's a chance, Burgess says, to showcase a ship and its history. And, of course, there's an exchange of QSL cards and you can be guaranteed some pretty impressive history and photos of the ship you contact.

For the New Jersey's part, Burgess says he's planning an active weekend with operations through the evening of July 18th.

"We'll be on all HF bands, probably concentrating on 20 (meters), but we have capabilities (with the) ship's antennas to do 160 through 10 meters," Burgess says. "We'll be on all modes. This year we'll be introducing true, green-key operation for teletype. We'll be using the ship's old mechanical teletype machines to get on the air."

Look for NJ2BB, Burgess says, for a memorable QSO and QSL.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Camden, New Jersey, the home of the

Battleship New Jersey.

--

Thanks Mark. This sounds like a great opportunity to collect some very interesting "wall paper" for
the ol' shack.

The only thing I get is that maybe ham radio isn't for me. Sorry for trying to get involved in this hobby. I read where hams were to be helpful and friendly. But I've seen something which I don't need involvement in. I have enough of this kinda talk and attitude at work, don't need it in my spare time too.

George

Don't be so sensitive George. This is USENET not Ham radio.

George:

Most hams are both helpful and friendly. When I was thinking about getting my ticket (Oct., 01), I made the mistake of checking out the newsgroups. I was rather worried that the nastiness which is way too common here is typical of the hobby in general. The good news is that it is not (well, much of 75 SSB is, note the handle of the guy you are quoting .. <grin>). Luckily, I got my ticket anyway.

Ignore the bozos whose emotional development stopped around age 3. And try to understand that some of these guys are trying to be helpful but lack certain social graces.

It really is a great hobby .. whether you use a Isotron or a stack of 4-element SteppIRs

There are several ways to put them together. Here is a picture of the
standard.

http://home.comcast.net/~buck0/app.htm

NOTE: The radio connector-pair and the source connector-pair are IDENTICAL.
This was done to allow connecting a lead acid battery to a 13.7V source for
float charging (or a higher voltage for regular charging - assuming the
proper procedures are followed). It also allows connecting two power
sources of any kind together which can be a problem

In addition, it allows you to connect two radios together - makes no sense,
but can be done and won't cause problems.

Perhaps you should talk to one of your local expert ham friends...

The on-line info looks pretty complete to me... ??
Don't know what you mean by "Built-in"??
Pick up the microphone, push the PTT button & talk. Let go and listen...

LOL
haven't you been reading the on going thread about Isotron
antennas? They are one of the worst performing antennas
ever made.

ISOTRON = J-U-N-K

In my area, you would have to pay someone, just to haul an
Isotron away for scrap.

659. House alarm -> Tx -> Handheld - How to?

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-19 20:42:11 UTC
From: desinfection@yahoo.se
Message-ID: <56ec801f.0407191242.79ad5004@posting.google.com>

I would like to interface the house security alarm with my 2m Tx and
my handheld. When the system is triggered, simultaneously with a local
sound alarm, I would like to receive a simple CW message (no repeater
need to be involved)
Any ideas? Tnx in advance.
/M

I'd start with a "unique" Subaudible tone on the Tx them program that tone into the handheld & put it on CTSS receive. You could put any audio you want on the TX. No CW required. Any time the squelch opens - alarm = true.

Or if you really want CW, just get/build any CW IDer and key the TX & IDer with the alarm. Lotsa' PIC IDers around & In the various mags & QST.

How-zat?

Thank you. Yes, that would be very simple. I was thinking about CW
because one could create a different receptor points with the unique
identifiers.
In the more advanced system one could wish to send back a DTMF and
initiate an appropriate action. How to achieve this...the easiest way?
/M

Well, I'd go to a PIC chip like the 16F84 (since I used them in my
microprocessor basics class). There are (were) DTMF chips and the Pic could
easily send whatever they need. The DTMF decoder is a bit more complex at
the other end.

Another easier choice might be to simply use single tones and PLL (NE567 I
believe is the number) tone decoder chips. You should easily be able to fit
quite a few tones in the audio BW.

664. Hustler Antenna part needed..

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-21 01:08:58 UTC
From: kl0an@msn.com
Message-ID: <6886d537.0407201708.4d41d075@posting.google.com>
Source record: 57022

Hello all,

I have the Hustler coils but, I'm missing the 54" mast they mount on. The coils I'm talking about are the old white coils for 10-15-20-40-80 meters that were kinda popular 10 or 15 years ago. I'd be more than happy with the solid mast but, a folding one is acceptable as well.

Does anyone have one of these laying around they want to part with??

OR, maybe someone has come up with a work around for the mast. I'm trying to mount these on the roll bar on my pickup truck so height is not a problem.. I can only get them down to a 3:1 swr though.. Any ideas??

Drop me an e-mail and we'll work out the $$'s.

Thank you so much. Now I have enough starting info. The NE567 chip
seems to be the best choice for my project.
/M

The mast is the most important part. It is where the majority of the
radiation happens. The coil and "stinger" are there primarily to get
resonance. It is also the combination of the mast-length and coil-whip
which gets the feed impedance closer to 50 ohms. Since it is a 3/8-24,
anything you come up with is ok. Any kind or tube, pipe, angle iron &
bracket you can come up with should work. It can be a little longer and the
stinger will be shorter or visa-versa. A good (short length) connection to
the car frame-roll bar is also important for the "low" side of the coax.

THE APOLLO HOAX FAQ version 4.3 - July 2004
Written by Nathan Jones

Subject: (1) Forward and Intent

In recent years there have been many criticisms and
refutations made in various media of the Apollo record, the
so called proof of the Apollo space missions that allegedly
landed astronauts onto the surface of the Moon during the
period 1969 to 1972. The criticisms and refutations by authors
such as David Percy, Ralph Rene, the late James Collier, Bill
Kaysing and others take the form of analysis of the photographic
record and video footage shot by NASA astronauts and questions
about the viability of other aspects of the operation such as
the flight worthiness of the Lunar Module (LM) and the
radiation risk posed to astronauts who venture outside of the
Earths protective shield - the Van Allen belts.
Critiques of the Apollo record have sprung up all over the
internet in various websites and in the form of books,
television documentaries and video presentations such as James
Colliers "Was it only a Paper Moon?".
Counter claims (debunking arguments) made by so called "skepti-bunkies"
have also appeared in websites such as
http://www.badastronomy.com/bad/tv/foxapollo.html
http://www.uwgb.edu/dutchs/PSEUDOSC/ConspiracyTheoryDidWeGototheMoon.htm
and http://www.clavius.org/techengine.html

A rational and scientific analysis of many of the Apollo anomalies
is made here in the form of a FAQ.

Subject: (2) Table of Contents.

(1) Forward and Intent
(2) Table of Contents
(3) What does it take to prove we went to the Moon?
(4) The public are dumb, they'll buy into any idea say the Apollo fanatics.
(5) No stars are visible in the images, where are they?
(6) The flag waves.
(7) There's no dust on the lander footpads.
(8) Why is no engine noise audible in the LM radio broadcasts?
(9) Where are the flames from the landers engines?
(10) What about the shape of the exhaust and its effects?
(11) Was the Lunar Module (LM) tested on Earth?
(12) Where's the blast crater?
(13) Dust kicked up by the Rover wheels acts strange.

(14) Radio telemetry proves man went to the Moon say Apollo fanatics.
(15) Laser ranging reflectors on the Moon are proof right?
(16) Why don't they point the HST at the landing sites?
(17) The Russians had to be in on it right?
(18) What about Apollo 8, 9 and 10?
(19) The radiation hazards facing the missions.
(20) The Lunar surface brightness misconception.
(21) Photographic anomalies, heiligenschein, shadows and perspective.
(22) What still film was used?
(23) In a vacuum there is no heat?
(24) The noon day temperature misconception.
(25) How did the space suit cooling system work? (or not) (NEW)
(26) How much insulation does it take to keep an astronaut warm?
(27) Can the Moon rocks be faked?
(28) Is unmanned retrieval of Moon rocks possible?
(29) The Eagle landing site anomalies. (NEW)
(30) Some skeptics websites.

Subject: (3) What does it take to prove we went to the Moon?

I would remind the reader that It's up to scientists and
claimants of this or that fact to provide proof of their claims.
That's how it works in science and to do this scientists use
something called "the scientific method". When they are done
presenting their case anyone may examine it for errors and
so forth. If we find flaws or errors in their method or in the
results of their scientific work then we may call in to question
the validity of their claims. It's just not up to us to prove
that man did or did not walk on the Moon. We are only to show that
the evidence as presented to us is faulty, contrived or in some
way unrepresentative of what we know and we may then throw the
evidence out. Claims based on discredited evidence have no
scientific validity and may be ignored or discarded altogether.
Sometimes people claim Apollo is a historical fact and that it
is different from scientific fact. But Apollo was not so long ago
that we must rely on peoples memories and just a few scraps of
circumstancial evidence. No, the Moon landings were exceedingly
well documented with photographic imagery and technical data
pertaining to the missions and to the Lunar environment. It is
those facts that we may scrutinize. The landing claims are just
that, claims. It is the factual evidence upon which the balance of
probability weighs.

Subject: (4) The public are dumb, they'll buy into any idea say
the Apollo fanatics.

Many of the NASA "believers" (aka debunkers some of them) that
swallow the NASA story hook line and sinker usually end up making
remarks of this kind or worse.
It has been said that up to 20% of the American public believes
we did not go to the Moon and that there is no idea so dumb that

they will not buy it. Or something of that sort.
This is a non-argument. It is neither supportive of nor detremental of any scientific analysis of the Apollo record. It is merely an attempt at ridicule and should be ignored.

Subject: (5) No stars are visible in the images, where are they?

In order to capture stars on film you need very long exposures in comparison to "daylight" scenes even if the sky is pitch black. Just try and take a photo of stars for yourself whilst including some brightly lit scene (say a lighted car park at night) and you should find that the car park images are "burned out" when the stars begin to show in the pictures. Though it's correct that stars will have been absent from the Lunar photographic images it is strange that none of the astronauts remarked on the stars in the sky. The stars really will have been a magnificent sight at all times from the Moon

Subject: (6) The flag waves.

The only footage I have seen where the flag waves or flaps about is when the astronaut is adjusting the flag pole. Because he had his hand on the flag pole and was making adjustments to it then I would expect the flag to wave around for a time. Note also that the flag had a rigid horizontal support along the top.

Subject: (7) There's no dust on the lander footpads

The Moon has no atmosphere in which eddies and such can cause the dust to swirl and "float around". Dust is "shot" away when there is no atmosphere. Therefore it is difficult to say whether the foot pads would have been covered in dust with any certainty. The chances are that some hollows and crevices will contain trapped dust but all of the images I have seen look remarkably clean. Nothing conclusive here in my opinion though.

Subject: (8) Why is no engine noise audible in the LM radio broadcasts?

Hmm... Your guess is as good as mine. At least we should hear the sound of the attitude control thrusters right?
The LM was pressurized to about 5 psi (oxygen rich atmosphere) during the landing and ascent phases of the missions so that the astronauts could breath the cabin atmosphere. The LM cabin will have been filled with the sound from the engine and control thrusters. The following website has an account from a book about the shuttle describing the noise from the engines on the space shuttle orbiter; http://internet.ocii.com/~dpwozney/apollo1.htm
Quote: "The forward primary thrusters sound like exploding cannons at thrust onset". Each primary thruster produces a thrust of only 870 pounds. The LM engine produced a 3000 pound thrust and would have made much more violent sounds and actions.

"jets of flame shoot out from the orbiter's nose. ...The orbiter reacts to the primaries' shove by shaking slightly and moving very noticeably. For the crew on board, a series of attitude changes using primaries resembles a World War I sea battle, with cannons and mortars firing, flashes of flame shooting in all directions, and the ship's shuddering and shaking in reaction to the salvos". How come the Lunar Modules attitude control thrusters were not heard as they were fired on and off during flight corrections? They were 110 lb thrusters each and there were 16 of them. Debunkers claim that once in constant burn that the LM motors were very quiet and they would not have been heard. Even if that were true and I'm not personally convinced that it is what happened to the noise from the attitude control thrusters which will have been firing intermitantly? The ascent engine was mounted inside the cabin only inches away from the astronauts and there was no noise pick up by the astronauts microphones, not even after they had been actuated by the astronauts own voice during comms.
Remember that the Lunar Module was of a metal construction and any engine sounds or vibration will have easily been transmitted through the structure just like road noise from your car tyres is transmitted into the passenger compartment where the driver is seated.
Debunkers have made comparisons with engine noise levels inside commercial jets claiming that passengers cannot hear engine noise coming over loadspeakers when the pilot addresses them on the intercom so why should anyone expect to hear engine noise over the radio say by ground controllers? I say that the reason passengers may not hear engine noise via the loadspeaker is because the passenger compartment is already filled with engine noise so what comes over the speaker is overwhelmed by existing similar noise. As for not hearing engine noise via radio comms I'm 100% certain I heard just that many times over vhf radio myself!

Subject: (9) Where are the flames from the landers engines?

The Lunar Module engine and the Space Shuttle Orbiter both use hypergolic fuel engines of the same type and fuel and yet the Space Shuttle Orbiter does produce a visible exhaust flame but the Lunar Module never did.
The flame from the Orbiter is plainly visible in the image at this website: http://internet.ocii.com/~dpwozney/apollo1.htm.
It is often claimed that a visible flame is produced during ignition transients only but images of the Titan2 rocket which used exactly the same fuel and oxidizer mix as the LM produced copious amount of visible exhaust flame but the LM never did.
Comparisons of LM type engines and other types have been made but when considering them the reader must insure that they are fair comparisons. For example exhaust nozzles must not flare excessively thus diluting the exhaust and its luminosity.

Flared exhausts result in wasted thrust and will not be part
of a working system.

Subject: (10) What about the shape of the exhaust and its
effects?

It is often claimed that in space the exhaust spreads out
greatly immediately it exits the exhaust nozzle but that is
wrong. Take a look at the photograph at the url
http://internet.ocii.com/~dpwozney/apollo1.htm and see
how much the flame spreads. It spreads only a little. Also the
exhaust bell on the LM will have been only a couple of feet
above ground as the LM touched down and given that the bell
was five feet in diameter the ground just below will have felt
the full effects of the engine as it set down. From a couple
of feet away the LM motor should have left unmistakeable marks
on the Lunar surface where it blasted the surface powder
(which was inches thick) away. It is a matter of record that
during the Eagles descent the motor was not turned off untill
after the Eagle had set down.

Subject: (11) Was the Lunar Module (LM) tested on Earth?

Basically, no. The Lunar Module was the vehicle that was
supposed to take the astronauts down to the Moons surface and
allow them to take off again back up to rendezvous with the
command Module. The LM just wasn't designed for reuse and for
flight in Earths gravity where it's weight would have been six
times what it would have been on the Moon. That's why they
developed simulator vehicles for training. NASA had Lunar
Module "simulators" built for astronaut training but four out
of the five training/research vehicles crashed.
NASA experimented again with VTOL (vertical take off and landing)
rockets during the 90's and had some successes but cancelled the
program in 96 just after it's last test ended in a crashed
landing. NASA claims that the LM underwent successfull "testing
and manouvers" out in space and in orbit around the Moon.
Given the record of the training vehicles that would have
been risky. On Earth the pilot could (and did) eject in cases
of failure but in space it would almost certainly mean curtains
for the astronauts flying the LM.
The simulators or training vehicles were actually called
LLRV's and LLTV's - Lunar landing research vehicles and Lunar
landing training vehicles but they were nothing like the LM.
See here: http://www.astronautix.com/craft/apoollrv.htm.
Jim Collier the late investigative reporter had some remarkable
things to say about the interior conditions and dimensions of
the Lunar Module based on measurements of the crew cabin
simulator at Houston Space Center and the LM museum piece in
Washington. In his video he is seen to measure various
dimensions of the LM crew cabin simulator including the hatches

through which the astronauts would have had to egress. He concluded that the astronauts suited up and with their back packs on would not have been able to get out of the LM. That there was not enough room for them to manouver in the cabin also. He discovered that the clearance between the the LM/command Module hatch and the top of the ascent engine housing was only three feet and yet in the Apollo 13 mission, NASA's own footage shows astronauts plunging through wide open space into the LM cabin when there should have been a rocket motor engine in the way but the footage clearly shows the astronaut diving through as if it was not there to obstruct him. How could that be unless the Apollo 13 footage was a fake, a set up, all a fraud, he asks?
While Collier was no physicist and that is obvious in his video I have no reason to doubt his sincerity, or his ability to use a tape measure.

Subject: (12) Where's the blast crater?

The Moon is covered in powdered rock and rubble. The dust has a consistency described as being like cornflour. The blast emitted by the descent engine 3000 or so pounds and averaged out over the exit area of the exhaust "bell" came to about 1.5 pounds per square inch. That's some draft. In some instances it is known that the rocket motor was still firing when the LM set down. There should have been a lot of evidence of disturbed surface soil. There should have been a "star burst" type of pattern on the ground made by the relocated powder but there was none. See this image: as11-40-5921.jpg. It's not a blast crater, it's more like someone swept up with a broom just underneath the bell. All the pictures I have seen showing the ground under the bell are like that.

Subject: (13) Dust kicked up by the Rover wheels acts strange.

A claim on the badastronomy dot com website said; "you will see dust thrown up by the wheels of the rover. The dust goes up in a perfect parabolic arc and falls back down to the surface. Again, the Moon isn't the Earth! If this were filmed on the Earth, which has air, the dust would have billowed up around the wheel and floated over the surface. This clearly does not happen in the video clips; the dust goes up and right back down. It's actually a beautiful demonstration of ballistic flight in a vacuum".
So, badastronomy dot com tells us how it is supposed to be, what is supposed to happen on the Moon, however frames from NASA's own footage of the Lunar rover show us a very different picture. It reveals the presence of atmosphere. In parts of the rover footage "vertical walls" or "curtain" formations of dust are seen to form in the wake of the dust kicked up by the rear wheels. Look at http://www.empusa.demon.net/Lunar/Lunar6.jpg and notice that clouds of dust form behind the rover's wheels.

It looks just like there is an atmosphere!
It is easy to get the curved arc effect driving on sand for example so a few ballistic looking dirt trails proves nothing here but the impeding effect of an atmosphere is absolutely conclusive.

Subject: (14) Radio telemetry proves man went to the Moon say Apollo fanatics.

Jodrell Bank and various scientists around the world might have pointed their antennae at the Moon and received signals from that direction in space but that does not prove that man set foot on the Moon.

Subject: (15) Laser ranging reflectors on the Moon are proof right?

No, they are not proof that astronauts put them there. NASA and debunkers have claimed that astronauts placed reflectors on the surface of the Moon so that astronomers may bounce laser beams off of them in order to better determine various Lunar parameters, distance from Earth, period and so on. That fact is often incorrectly cited as a proof. There may well be reflectors on the Lunar surface but that doesn't prove anyone set foot on the Moon. The Russians deposited a reflector during their Luna (Lunakhod) series of unmanned missions to the Moon some time in the early nineteen seventies. In fact the Russians were first with the ability to "soft land" instrument packages on the Moon in February 1966 with the Luna 9 mission. The Soviet success was closely followed by the American Surveyor missions which also "soft landed" instrument packages.
No proof of a manned Moon landing there then.

Subject: (16) Why don't they point the HST at the landing sites?

Even today, the largest telescopes in the world and the Hubble space telescope (HST) do not have the resolving power to identify the LM or what would be left of it on the Moon's surface. The smallest object they can discern is something about the size of a football pitch at the distance of the Moon and even then it would be hard to tell exactly what it was they were looking at.
In order to make a specific determination you will need more information than size alone.

Subject: (17) The Russians had to be in on it right?

No, the Russians would have exposed the Missions if they could have. The 60's was the peak of the propaganda wars between the US and the USSR as it was known then. There was no known technology available that could detect the presence of humans aboard a capsule from a distance. The only means of detecting a hoax would have been from the "leakage" that may have resulted in relaying communications from the Earth to the capsule in order to make it appear to originate from the capsule or from the Lunar surface.

That would not have proven a problem however as microwave links are highly directional and thus inherantly very "leak proof" and when that is coupled with secure communications methods such as frequency hopping, spread spectrum techniques, encryption and any other unusual modulation methods it's virtually certain that an outsider of that time would not have detected it.

Subject: (18) What about Apollo 8, 9 and 10?

Apollo 8 orbited the Moon and returned to Earth. Apollo 9 never left Earth orbit. The astronauts allegedly practiced deploying and docking with the LM. Apollo 10 practiced everything but the landing itself. Lunar orbit, deployment and docking with the Lunar Module. If they were "real" then there's no technical reason we could not have gone on to land astronauts on the Moon is how the argument goes. The answer to that is, why should the deployment and docking trials of the LM be any more real than the Moon landings? If the LM wasn't fit to land on and takeoff from the Moon with then why would anyone risk any space manouvers with it? It would have been illogical to do so. Apollo 8, 9 and 10 don't prove astronauts landed on the Moon.

Subject: (19) The radiation hazards facing the missions.

- From http://www.aulis.com/nasa6.htm "According to an expert at DERA in the UK: Radiation is the biggest show stopper affecting mankinds exploration of the universe. As far as the probability of encountering SPEs or solar flares went, the thin-walled Apollo craft (from 8 through to 12) travelled during a solar maximum period, a time when there was a likelyhood of three or four severe flares per mission. The ability to predict solar flare activity was very poor indeed. The CSM did not have any shielding against such an event. Neither did the LMs, nor did the spacesuits". Even NASA admitted that should there have been a severe flare while astronauts were on the Moon the likelyhood would have been a fatal dose of radiation. There is no comparison with the international spacestation which does have shielding and which orbits inside the protection of the Earths Van Allen bands as well.
Now here's what is typically said in response to questions about the problem of radiation: from: http://www.clavius.org/envsun.html "A major solar event doesn't just cut loose without warning. It is possible to observe the "weather" on the sun and predict when a major event will occur. And this is what was done on the Apollo missions. To be sure, the missions were planned months in advance and the forecasting was not that farsighted. But they would have had enough warning to call off the mission should a solar event have started boiling up from the depths of the sun". Except that's not quite right, It takes millions of years for anything to "boil up" from the depths of the Sun and It just wasn't possible to accurately predict when a solar flare would occur. About the best that could be done is say they correlate with high sunspot numbers but the Sun can have high sunspot numbers

for months on end.
- From http://www.Lunaranomalies.com/fake-moon.htm
"As to the issue of solar flares and the danger they presented, there simply weren't any major ones during any of the Apollo missions. So the biggest reason that none of the astronauts died from their radiation exposure was that they simply did not get a bad dose to speak of".
That's right, they gambled with the astronauts lives. The chance of encountering a severe solar flare was 3 or 4 per mission, any single flare of which could have proven fatal to the crew. To tackle this problem NASA had a "Sun" watch going by the name of SPAN, the solar particle alert network. This was a network of telescopes that monitored the Sun day and night for flares. It was known that electromagnetic radiation, the gamma and radio bursts for example would reach the Moon (and Earth) well ahead of the solar particles that were thought to be more dangerous. This might have bought anywhere from 10 to 100 minutes time for the astronauts to find shielding from the deadly particle stream. NASA says the astronauts would have been ordered to leave the Moon and fly back up to the safety of the command Module. But the command Module didn't have the sheilding to protect against a severe flare. Oops! Another NASA clanger.
Another potentially serious radiation hazard are the Van Allen belts or zones. They are regions in space near the Earth where the Earth's own magnetic field traps and "concentrates" radiation from the Sun. The most damaging form of radiation that we need worry about are the solar wind particles that the Sun continuously emits and which is prevented from reaching the Earth's surface by the Earths magnetic field. Whilst we are protected from this radiation on the Earth just above us at a range of approximately 500 to 20 thousand miles the radiation is concentrated and transit times through these regions must be kept to a minimum. It is not thought that any of the Apollo mission astronauts will have spent sufficient time in the Van Allen belts for it to have been a worry. The International space station however must keep clear and thus orbits underneath the Van Allen zones and whilst keeping away (most of the time) from a related problem known as the South Atlantic Anomaly.

Subject: (20) The Lunar surface brightness misconception.

It is sometimes argued by Apollo yes men that the surface of the Moon is so bright that it accounts for all the so called fill-in lighting that critics of the Apollo record claim has been used. For example it has been argued that, "One celebrated picture shows an astronaut with the sun behind him, and the Lunar lander and American flag reflected in his visor. According to critics, the astronaut should have been merely a silhouette. And so he should, if he weren't

surrounded by brightly-lit ground. If the full Moon can
brightly illuminate the earth from 250,000 miles away, just
imagine what it can do to an astronaut standing on it".
That argument is about as wrong as it can get.
Here's what NASA had to say about the Moons surface brightness.
From: http://liftoff.msfc.nasa.gov/Academy/UNIVERSE/MOON.HTML
"Next to the sun, the full Moon is the brightest object in the
heavens. However, its surface is rough and brownish and
reflects light very poorly. In fact, the Moon is about the
poorest reflector in the solar system. The amount of light
reflected by a celestial object is called the albedo (Latin:
albus, white). The Moon relects only 7% of the sunlight that
falls upon it, so the albedo is 0.07."
The reflectance of grey paper is 18% and the Moon (close up)
is brown with a reflectance of only 7%. This means that
close up on the Moon the lanscape is going to look very
gloomy because the ground is brownish and the sky is black.
- From a distance the Moon might be a beacon of light
(comparatively) but it's not that way close up.
Now, concerning the photography, the Lunar soil has a
reflectance of 7% and the astronauts in their white suits
have a reflectance close on 100%. Slide film cannot cope
with a 10:1 highlight to shadow ratio and so it cannot be
reflected light from the ground that provided fill-in
lighting when the sunlit subject is correctly exposed
for highlights.

Subject: (21) Photographic anomalies, heiligenschein, shadows
and perspective.

Note, all the images referred to here used the same file name
as that used in the NASA online archive and were easily located
with Google <filename> or alternatively at the following
websites:
http://Lunar.arc.nasa.gov/archives/images/USA/
Apollo_11/Spacecraft/medres/
http://Lunar.arc.nasa.gov/archives/images/USA/
http://www.hq.nasa.gov/office/pao/History/ap11ann/
kippsphotos/apollo.html

The following images all contained "photographic"
anomalies or inconsistencies. In aS11-40-5903.jpg there is a
strong lighting hot spot very near the subject and the brightness
of the ground fades rapidly into the distance to nothing. The hot
spot is indicative of spot lighting and may not have been caused
by the Sun which illuminates all the ground equally and nor is
it caused by reflections from Lunar Module panels or altered surface
characteristics due to the ground being swept by the landing engine
exhaust gases (see section 28 for more about this). Neither is the
hotspot due to a curious phenomena that goes by the name of
"heiligenschein" effect. Lighting has to originate from behind the

observer in order for heiligenschein to be visible but in this case the Sun is almost 90 degrees to the right of the camera.
Some of the shaded areas of the astronauts suit is brighter than the Lunar ground which if it is the only source of fill in (light reflecting from the ground acting as fill in light) is not possible. Why is the brightness of the astronauts suit (his right ankle/calf) so bright near the ground? There should be much less reflected light reaching him down there and yet the brightness is the same as it is at the top of his suit.
Try looking at as11-40-5902.jpg for all the same anomalous features and inconsistencies. What about the following images, 10075741.jpg and 10075742.jpg. In these images Mt Hadley is the back drop but with a small change in veiwing position and a slight increase in camera height of a couple of feet the top of Mt Hadley has completely changed it's angle relative to the horizontal. Mt Hadley is 3 miles in back so a small shift of a few feet in camera position ought not to produce such a large shift of perspective at the top of Hadley.
Many images look like the background is dropped in to the foreground and some are obviously air brushed just like 10075841.jpg. There are many more examples of images that are not right and which may be described as fakes.
In some NASA film footage included in the late Jim Collier's video "Was it only a paper Moon?" Young and Duke of Apollo 16 can be seen against exactly the same backdrop on two different EVA's (EVA1 and EVA2) which were on different days at alleged different places and in different directions from the LM base camp. On EVA2 Young describes the scene as "absolutely unreal". On another EVA to and from a site near Hadley Young makes a similar remark about the scenery being unreal during the return journey when exactly the same backdrop (which should have been laterally reversed with respect to the origin but which was not) was displayed as that used in the forward (to) journey.
Of course the whole debacle is explained away as human error in the editing room by debunkers.
What can I say except, "It's absolutely unreal".
Next have a look at AS14-64-9089. Examine the astronauts shadow paying particular attention to the shadow of his legs. See anything funny about them? They are like matchstick leg shadows. Compare them with the astronauts legs which are wide due to the bulk of the space suit. Both shadows also exhibit straight edges which do not correspond with the form of the astronauts legs and if there were to be a terrain feature such as two parallel trenches that modified the fall and representation of the shadow from the cameras veiwpoint I very much doubt it would happen twice and exactly in parallel like that. The ground looks reasonably flat there anyway. It's an obvious fake shot.

Subject: (22) What still film was used?

- From http://www.aulis.com/nasa6.htm
"It was actually ordinary Ektachrome film emulsion. However,
it is now claimed by the Enterprise Mission
(post justification) that there was a special transparency
film created for these missions under a NASA contract. Called
XRC,apparently this was a specially extended range color
slide film that allowed the astronauts to take perfect
National Geographic-quality pictures. So you might ask how
does the agency justify the fact that according to Kodak in
1969 and confirmed again in 1997 the film was just ordinary
160 ASA high speed Ektachrome?"
Ordinary ektachrome slide film will shatter at -4F. The Lunar
temperature will drop to as low as -200F in the shade and
the cameras had silver cases presumably to reflect the solar
heat so how did the film stay warm enough not to shatter?

Subject: (23) In a vacuum there is no heat?

"So it may be +200F in the Lunar sunlight and -200F in the
shade, but in a vacuum there is no heat". Wrong!
There is plenty of heat in the vacuum and especially close in to
a star. Heat is energy and there is plenty of it in the "vacuum"
of space in the form of an energy flux. The sun pours out massive
amounts of heat energy and other radiation. We can feel this heat
energy often termed infra-red when we feel the Sun warming our
skin. At the distance of the Earth (and this goes for the Moon too)
the amount of heat energy in the "vacuum" of space amounts to 1.36Kw
per square metre also known as the solar irradiance. Both the Earth
and the Moon receive this amount of energy from the Sun but at the
Earths surface you can sometimes subtract about 30% from the solar
irradiance figure due to reflection by clouds in the atmosphere.
What people often confuse is temperature with energy. Things can
have high temperatures but very little heat. Or even low
temperatures but have large amounts of heat. That is because heat
is energy and not temperature. Hot and cold are measures of
temperature not heat. So, again things can be hot and have very
little heat if they have small specific heat capacities. The amount
of heat an object or material may hold varies with it's specific
heat capacity and has nothing to do with its temperature or how
hot it is.

Having said all that physicists do actually ascribe temperatures
to energies too but that need not concern us here. There is also no
such thing as a completely empty vacuum with no energy in it. There
is a virtual partical flux throughout the whole of space and there
is a base level of energy associated with that flux. It's called the
zero point of energy. It's not zero energy but a baseline of energy
below which we cannot work with.

Subject: (24) The noon day temperature misconception.

It is often said or implied that it takes 14 days for
temperatures to reach +200F on the Lunar surface. That is

plainly wrong. Claims that astronauts landed on the Moon during the "Lunar morning" in order to "avoid noon day heat" are ridiculous. They might say they landed at that time but it would not have helped them to avoid any heating problem that they will have faced.

Heating to +200F or more can happen in less than 24 hours of exposure to sunlight on the Moon's surface. Here's how; surface temperatures (not the regular air temperature measurements) may reach 200 degrees fahrenheit on Earth in places like deserts and so forth. If we consider that during the night the temperature may in all probability have dropped to freezing (-32F) or near freezing then we may note that the Sun's energy in a matter of only a few hours (less than 12 hours) will have brought about a temperature rise of around 200 degrees fahrenheit and that is after the additional cooling effects of atmospheric convection which are not found on the Moon have done their worst. If we remove atmospheric cooling then the ground will heat up much faster because there will be no convective heat losses caused by the presence of the atmosphere which are far more severe than the radiative losses and the final temperature may even be more than 200F.

Now that is a very important point to understand. The heat losses into the atmosphere are more severe than the radiative losses per unit time. On the Moon there is no atmosphere so this avenue (atmospheric losses of heat) does not exist and radiative cooling only will occur. Since radiative cooling is smaller than losses due to atmospheric effects then comparable surfaces on the Moon will experience a faster temperature rise than their Earthly equivalent.

Now, hypothesizing a world where the minimum starting temperature is -200F (that's what the surface temperatures on the Moon can cool off to during the night and in the shade) those same 12 hours of sunlight would also easily bring a rise in temperature of 200F. Cooling processes are faster at higher temperatures so it is easier to bring the temperature up from low values than it is to raise the temperature starting with high values. Thus there is no special difficulty here just because we are starting with a large night time low of -200F.

We can see now that it is easier for the Sun to raise the temperature of a surface on the Moon starting from -200F. Now if in 12 hours the Sun can warm a desert surface to +200F from a night time low of -32F with the added severe heat losses caused by the atmosphere then on the Moon the same heating time will cause a larger and faster heating response. What this means is that we can expect a Lunar surface to go from -200F to +200F in less than 24 hours. Actually in significantly less time than 24 hours.

None of this takes into account that the Lunar day is 14 Earth days long. What that fact results in is even more extended periods of heating since the Sun's rays will be shining down

on any particular surface at any given angle for 14 times as long as they do on Earth. Searing heat for 14 times as long! An important factor in all this is the angle which the surface presents to the rays from the Sun. In the Lunar morning it will be hillsides and other vertically oriented things (like astronauts and their Lunar Modules) that will feel the full force of the Suns power. When the Sun is overhead at 7 days it will be surfaces like horizontal ground and the tops of things like the Lunar Module that will capture the full magnitude of the Suns heating power. Landing on the Moon in the "morning" just means that the insulation in the soles of the astronauts boots will not have to work so hard since the angle presented to the Sun rays by the surface of the ground is not optimal for maximum exposure and thus the current temperature of the surface will be lower as a result of that. If he picks up a boulder which had presented a surface facing toward the Sun then that surface will be searing hot and the insulation in the astronauts gloves will be working hard to protect him from the heat.

Subject: (25) How did the space suit cooling system work? (or not)

They had backpacks which dissipated heat via the sublimation of ice from a porous plate located inside their backpack which, presumably, because it would have been in the shade and out of the sunlight would have been very cold. The trouble with this is that we now know that ice deposits have been found on the Moon's surface on the permanently shady side of some polar craters. So, water ice either "evaporates" away or it doesn't. Which is it? Actually if we study the phase diagram for water we discover that water does actually exist as both solid and vapour below it's freezing point. Not only that but that it (water ice) exerts a vapour pressure from its solid form (of which there are several) and it is this which carries away the heat load produced by the astronaut as he toils on the Lunar surface. Just like we lose heat by water evaporation from our bodies when we are hot the porous plate in the backpack dissipates heat generated by the astronaut which would make it unbearable inside the space suit otherwise. The trouble with this is that the vapour pressure of solid ice decreases rapidly with temperature and below zero degrees Celsius it is a small fraction of what it is at room temperature. And at very low temperatures like -200F it is quite negligible. In basic terms what this means is that there is not enough water vapour emitted (sublimated) by the solid ice on the plate to cool the astronaut fast enough. Not unless he has a porous plate with maybe 4 times or more the surface area of the human body. And that is at the melting point not -200F where something the size of a football field will be required. So, the temperature of the plate if it is a small one will have to rise significantly in order to increase vapour pressure as it inadequately tries to dissipate the heat generated by the astronauts metabolism and in a short time it will have melted all the ice on the plate. Thereafter huge coolant

water losses ensue as the liquid water practically explodes out
of the plate and into the vaccuum but the plate cannot cool down
with this expansion because the astronaut is heating it to this point.
Liquid coolant water loss ensues. How much and at what rate depends
on the size and properties of the porous plate of course.
The astronauts backpack would have to have housed many porous plates
in order to have provided sufficient vapour pressure in order to
provide sufficient cooling of the astronaut but there is no mention
of multiple plates just "a porous plate". Not only that but the
backpack would have to have been continuously vented to prevent heat
build up and "melt-down" but the backpacks appeared to be closed.
Postulating that they had a small aparture for water vapour to escape
from would still cause heat build up in the interior of the backpack
as the warm vapour touched the insides of the backpack. Any usefullness
provided by insulating the insides of the backpack from solar
radiation would have rapidly been lost and the temperature inside the
backpack where the plates were would have risen untill it reached
"melt-down" and liquid water loss ensued. The porous plates should
have been located outside in free space and shaded from direct
sunlight in order for the system to work correctly.

Subject: (26) How much insulation does it take to keep an
astronaut warm?

Not much. The biggest problem is in keeping him cool. However,..
In order to maintain a normal temperature (37C) the human body
(naked) would have to radiate about 800 watts of heat to the cold
sky of space. With an average layer of clothing the losses can be
considerably reduced to around 200 watts but the average daily
calorific intake is only sufficient to support losses of around
100 watts. Therefore a little more clothing on top will suffice
to stay warm under a cold sky and losses would then be at the
normal 80 to 100 watt level which is easily sustained given
proper calorific input.

The reader should not allow himself to be confused here because
of the fact that a cooling system was also required for the
astronauts. You see a spacesuit is a tightly closed environment,
it is highly insulated from losses to the outside as well as
affording strong insulating properties from the searing inward
heat of the Sun. Basically, it shuts out the external thermal
environment and the astronaut must be kept in an artificially
created atmosphere within the suit. Without built in
thermo-regulation an astronaut performing heavy aerobic work
or exercise in a closed environment permitting no heat
dissipation could as a worse case scenario find his body
temperature trying to go from 98F to a theoretical 140F but of
course nature butts in at 111F and the astronaut dies.

Subject: (27) Can the Moon rocks be faked?

They don't need to be faked - see section (27)
While I do not offer an opinion on the authenticity of the samples I think it is important to "tidy up" a couple of related issues.

- From http://www.uwgb.edu/dutchs/PSEUDOSC/ConspiracyTheoryDidWeGototheMoon.htm
"You simply do not see unaltered olivine on earth. This could not have been faked. These rocks have grains easily visible to the unaided eye, which means they cooled slowly. To have made these materials synthetically would have required keeping the rocks at 1100 C for years, cooling them slowly at thousands of pounds per square inch pressure. It would have taken years to create the apparatus, years more to get the hang of making the materials, and then years more to create the final result. Starting from Sputnik I in 1957, there would not have been enough time to do it. And, you'd have to synthesize several different types of rock in hundred-pound lots".

The curator at JSC claims that sample sizes are of the order of a few tens of milligrams. That's sugar lump size. There's no need to manufacture "hundred pound lots at once or in single pieces. I'd think the manufacture of small sample sizes is easier and faster than large ones.

"All I did to get the Moon rock specimens (on loan) was write in and sign an agreement to keep the materials secure when not in use. NASA had no control over any non-destructive tests I might do when I had the specimens. I could have, for example, zapped the rock with X-rays to get its chemical composition. So the faked specimens would have to stand up to any kind of scrutiny that researchers might give them".

Researchers had to supply a protocol to the curator at JSC that described exactly their intentions. If anything "funny" happened or showed in undisclosed testing then they broke protocol.

"Whoever came up with the faked specimens would have to have devised a story of Lunar evolution to fit the samples".

Lunar evolution is still undecided. We still aren't sure exactly how the Moon formed. Whether it is a piece of the Earth broken away after a collision with a small Mars sized planet or whether the Moon evolved on its own in an orbit near ours and was captured. The former hypothesis was not even publicly proposed until the Kona conference in 1984!

"And you'd have to put in exactly the right amounts of radioactive elements and daughter products to get the rocks to date radiometrically at 4 billion years old - older than any terrestrial rocks. And you'd have to anticipate the development of new dating methods not in use in 1969 and make

sure those elements are present in the correct abundance.
And it's not like adding carrots to a stew, either. To mimic
the results of potassium-argon dating, you'd have to add
inert argon gas and trap it just in the potassium-bearing
minerals, and in exact proportion to the amount of potassium".

K-Ar dating is often unreliable. Volcanoes that errupted only
a few hundred years ago yeild dates of millions of years! And
another thing, K-Ar dating is patched with fixes up to its
neck and some. Depending on what you think happened to the
rock sample you apply factors because of the mobility of the
argon. I'm not saying K-Ar dating is total hogwash you
understand but....

More info on moon rocks can be found at:

Subject: (28) Unmanned retrieval of Moon rocks possible?

Lets not forget that the Russian unmanned mission actually
brought back about 100 grams or so of Lunar rock so it wont
have been beyond the wit or wisdom of NASA to do it bigger and
better will it? In the light of the above and when you take into
account all the anomalies and flaws in the Apollo record that
have been demonstrated to exist why should we believe that the
samples were retreived manually just because they say so?
All claims require evidence and extraordinary claims require
extraordinary evidence (favourite skeptic/debunker terms of
evidential proof). So where is it?
According to Jim Collier "30 billion dollars were spent in
sending man to the moon but all the paper work has been flushed
down the toilet. All we have is a bunch of faked photos".

Subject: (29) The Eagle landing site anomalies.

Serious discrepancies in the photographic evidence still remain
to be explained by the "pro Apollo" fanatics. All images may be
viewed or located by google at the NASA archive as described in
section 21.
In attempts to explain away the lighting hotspot visible in images
AS11-40-5902 and AS11-49-5903 it may be 1) postulated that it was
as a result of Solar reflection off of an instrument housing panel
or 2) postulated that it may have been due to changed optical
characteristics of the Lunar surface after it had been swept over by
the engine as the Eagle landed.
The first postulate is easily falsified with examination of image
AS11-40-5915 where it becomes apparent that the reflective panel is
facing almost directly at the Sun and not angled anywhere near

sufficiently to cause the reflection in question. The second postulate is also falsified when consideration is given to the trench dug in the ground by the footpad probe (contact probe) as the Eagle landed.
The footpad is about 3 feet in diameter and the contact probe is about 6 feet in length. The boot impressions in the ground must be at least 12 inches in length. The footpad and contact probe concerned are in the lower right corner of AS11-40-5915 and it is clear that the last 3 metres if not more of flight of the Eagle was in a straight line and came in from the right side as viewed in the image. This is clearly evident from the gouge in the ground made by the surface probe which was attached to the foot pad. The lighting hotspot in the ground is to the left in the picture and if it were caused by the ground being swept by the engine exhaust gasses then that would indicate that the engine (and the Eagle) followed a last few metres trajectory different to that indicated by the gouge in the ground made by the contact probe. The swept area indicates a possible landing trajectory originating from the left side in the picture but the evidence left in the ground by the contact probe indicates a landing from the right.
The only way the exhaust gasses could have swept the ground in the left of the picture and at the same time the Eagle come down to land from the right as evidenced by the trench is if the Eagle had landed with a severe list to the right. If that had happened then the probeless leg on the Eagle, the one on the right side in back of the picture would have dug into the ground first and caused the LM to spin clockwise when veiwed from above in AS11-40-5915. That would have meant that the footpad and the trapped contact probe would no longer have aligned with the trench in the ground so neatly and all in one straight line. Had the Eagle listed so during the last few metres of travel then the contact probe would have made an arc shaped trench. Thus the "swept area" is not consistent with a landing from the right as is implied by the trench made in the Lunar ground by the contact probe. This leaves the lighting hotspot anomaly intact and without reasonable explanation so far.

Another Shaw Cable user clicks on a Virus and now tries to infect
the rest of USNET. Meanwhile the Dead heads that run the abuse
department at Shaw dont do jack because they dont have the technical
ability to even log on.

oh crap.

the flag waves cos they put SPRINGS on it to make it look like there was
a breeze..

Radiation - the van allen belts have gaps and are strictly deliniated..

can't waste any more time..

> Subject: (19) The radiation hazards facing the missions.
>
> - From http://www.aulis.com/nasa6.htm "According to an expert at
> DERA in the UK: Radiation is the biggest show stopper affecting
> mankinds exploration of the universe. As far as the probability
> of encountering SPEs or solar flares went, the thin-walled Apollo
> craft (from 8 through to 12) travelled during a solar maximum
> period, a time when there was a likelyhood of three or four
> severe flares per mission. The ability to predict solar flare
> activity was very poor indeed. The CSM did not have any shielding
> against such an event. Neither did the LMs, nor did the spacesuits".
> Even NASA admitted that should there have been a severe flare while
> astronauts were on the Moon the likelyhood would have been a fatal
> dose of radiation. There is no comparison with the international
> spacestation which does have shielding and which orbits inside the
> protection of the Earths Van Allen bands as well.
> Now here's what is typically said in response to questions about
> the problem of radiation: from: http://www.clavius.org/envsun.html
> "A major solar event doesn't just cut loose without warning.
> It is possible to observe the "weather" on the sun and predict
> when a major event will occur. And this is what was done on
> the Apollo missions. To be sure, the missions were planned
> months in advance and the forecasting was not that farsighted.
> But they would have had enough warning to call off the mission
> should a solar event have started boiling up from the depths
> of the sun". Except that's not quite right, It takes millions of
> years for anything to "boil up" from the depths of the Sun and
> It just wasn't possible to accurately predict when a solar flare
> would occur. About the best that could be done is say they correlate
> with high sunspot numbers but the Sun can have high sunspot numbers
> for months on end.
> - From http://www.Lunaranomalies.com/fake-moon.htm
> "As to the issue of solar flares and the danger they
> presented, there simply weren't any major ones during any of
> the Apollo missions. So the biggest reason that none of the
> astronauts died from their radiation exposure was that they
> simply did not get a bad dose to speak of".
> That's right, they gambled with the astronauts lives. The
> chance of encountering a severe solar flare was 3 or 4 per
> mission, any single flare of which could have proven fatal
> to the crew. To tackle this problem NASA had a "Sun" watch
> going by the name of SPAN, the solar particle alert network.

> This was a network of telescopes that monitored the Sun day
> and night for flares. It was known that electromagnetic
> radiation, the gamma and radio bursts for example would reach
> the Moon (and Earth) well ahead of the solar particles that
> were thought to be more dangerous. This might have bought
> anywhere from 10 to 100 minutes time for the astronauts to
> find shielding from the deadly particle stream. NASA says
> the astronauts would have been ordered to leave the Moon and
> fly back up to the safety of the command Module. But the
> command Module didn't have the sheilding to protect against
> a severe flare. Oops! Another NASA clanger.
> Another potentially serious radiation hazard are the Van
> Allen belts or zones. They are regions in space near the
> Earth where the Earth's own magnetic field traps and
> "concentrates" radiation from the Sun. The most damaging form
> of radiation that we need worry about are the solar wind
> particles that the Sun continuously emits and which is
> prevented from reaching the Earth's surface by the Earths
> magnetic field. Whilst we are protected from this radiation
> on the Earth just above us at a range of approximately 500 to
> 20 thousand miles the radiation is concentrated and transit
> times through these regions must be kept to a minimum. It is
> not thought that any of the Apollo mission astronauts will
> have spent sufficient time in the Van Allen belts for it to
> have been a worry. The International space station however
> must keep clear and thus orbits underneath the Van Allen
> zones and whilst keeping away (most of the time) from a
> related problem known as the South Atlantic Anomaly.
>
>
> Subject: (20) The Lunar surface brightness misconception.
>
> It is sometimes argued by Apollo yes men that the surface
> of the Moon is so bright that it accounts for all the so
> called fill-in lighting that critics of the Apollo record
> claim has been used. For example it has been argued that,
> "One celebrated picture shows an astronaut with the sun
> behind him, and the Lunar lander and American flag reflected
> in his visor. According to critics, the astronaut should have
> been merely a silhouette. And so he should, if he weren't
> surrounded by brightly-lit ground. If the full Moon can
> brightly illuminate the earth from 250,000 miles away, just
> imagine what it can do to an astronaut standing on it".
> That argument is about as wrong as it can get.
> Here's what NASA had to say about the Moons surface brightness.
> From: http://liftoff.msfc.nasa.gov/Academy/UNIVERSE/MOON.HTML
> "Next to the sun, the full Moon is the brightest object in the
> heavens. However, its surface is rough and brownish and
> reflects light very poorly. In fact, the Moon is about the
> poorest reflector in the solar system. The amount of light

> reflected by a celestial object is called the albedo (Latin:
> albus, white). The Moon relects only 7% of the sunlight that
> falls upon it, so the albedo is 0.07."
> The reflectance of grey paper is 18% and the Moon (close up)
> is brown with a reflectance of only 7%. This means that
> close up on the Moon the lanscape is going to look very
> gloomy because the ground is brownish and the sky is black.
> - From a distance the Moon might be a beacon of light
> (comparatively) but it's not that way close up.
> Now, concerning the photography, the Lunar soil has a
> reflectance of 7% and the astronauts in their white suits
> have a reflectance close on 100%. Slide film cannot cope
> with a 10:1 highlight to shadow ratio and so it cannot be
> reflected light from the ground that provided fill-in
> lighting when the sunlit subject is correctly exposed
> for highlights.
>
>
> Subject: (21) Photographic anomalies, heiligenschein, shadows
> and perspective.

>
> The following images all contained "photographic"
> anomalies or inconsistencies. In aS11-40-5903.jpg there is a
> strong lighting hot spot very near the subject and the brightness
> of the ground fades rapidly into the distance to nothing. The hot
> spot is indicative of spot lighting and may not have been caused
> by the Sun which illuminates all the ground equally and nor is
> it caused by reflections from Lunar Module panels or altered surface
> characteristics due to the ground being swept by the landing engine
> exhaust gases (see section 28 for more about this). Neither is the
> hotspot due to a curious phenomena that goes by the name of
> "heiligenschein" effect. Lighting has to originate from behind the
> observer in order for heiligenschein to be visible but in this case
> the Sun is almost 90 degrees to the right of the camera.
> Some of the shaded areas of the astronauts suit is brighter than
> the Lunar ground which if it is the only source of fill in (light
> reflecting from the ground acting as fill in light) is not
> possible. Why is the brightness of the astronauts suit (his right
> ankle/calf) so bright near the ground? There should be much less
> reflected light reaching him down there and yet the brightness is

> the same as it is at the top of his suit.
> Try looking at as11-40-5902.jpg for all the same anomalous
> features and inconsistencies. What about the following images,
> 10075741.jpg and 10075742.jpg. In these images Mt Hadley is
> the back drop but with a small change in veiwing position and
> a slight increase in camera height of a couple of feet the top
> of Mt Hadley has completely changed it's angle relative to the
> horizontal. Mt Hadley is 3 miles in back so a small shift of a
> few feet in camera position ought not to produce such a large
> shift of perspective at the top of Hadley.
> Many images look like the background is dropped in to the
> foreground and some are obviously air brushed just like
> 10075841.jpg. There are many more examples of images that are
> not right and which may be described as fakes.
> In some NASA film footage included in the late Jim Collier's
> video "Was it only a paper Moon?" Young and Duke of Apollo 16
> can be seen against exactly the same backdrop on two different
> EVA's (EVA1 and EVA2) which were on different days at alleged
> different places and in different directions from the LM base
> camp. On EVA2 Young describes the scene as "absolutely unreal".
> On another EVA to and from a site near Hadley Young makes a
> similar remark about the scenery being unreal during the return
> journey when exactly the same backdrop (which should have been
> laterally reversed with respect to the origin but which was
> not) was displayed as that used in the forward (to) journey.
> Of course the whole debacle is explained away as human error in
> the editing room by debunkers.
> What can I say except, "It's absolutely unreal".
> Next have a look at AS14-64-9089. Examine the astronauts shadow
> paying particular attention to the shadow of his legs. See anything
> funny about them? They are like matchstick leg shadows. Compare
> them with the astronauts legs which are wide due to the bulk of
> the space suit. Both shadows also exhibit straight edges which
> do not correspond with the form of the astronauts legs and if
> there were to be a terrain feature such as two parallel trenches
> that modified the fall and representation of the shadow from the
> cameras veiwpoint I very much doubt it would happen twice and
> exactly in parallel like that. The ground looks reasonably flat
> there anyway. It's an obvious fake shot.
>

> Subject: (22) What still film was used?
>
> - From http://www.aulis.com/nasa6.htm
> "It was actually ordinary Ektachrome film emulsion. However,
> it is now claimed by the Enterprise Mission
> (post justification) that there was a special transparency
> film created for these missions under a NASA contract. Called
> XRC,apparently this was a specially extended range color
> slide film that allowed the astronauts to take perfect

> National Geographic-quality pictures. So you might ask how
> does the agency justify the fact that according to Kodak in
> 1969 and confirmed again in 1997 the film was just ordinary
> 160 ASA high speed Ektachrome?"
> Ordinary ektachrome slide film will shatter at -4F. The Lunar
> temperature will drop to as low as -200F in the shade and
> the cameras had silver cases presumably to reflect the solar
> heat so how did the film stay warm enough not to shatter?
>
>
> Subject: (23) In a vacuum there is no heat?
>
> "So it may be +200F in the Lunar sunlight and -200F in the
> shade, but in a vacuum there is no heat". Wrong!
> There is plenty of heat in the vacuum and especially close in to
> a star. Heat is energy and there is plenty of it in the "vacuum"
> of space in the form of an energy flux. The sun pours out massive
> amounts of heat energy and other radiation. We can feel this heat
> energy often termed infra-red when we feel the Sun warming our
> skin. At the distance of the Earth (and this goes for the Moon too)
> the amount of heat energy in the "vacuum" of space amounts to 1.36Kw
> per square metre also known as the solar irradiance. Both the Earth
> and the Moon receive this amount of energy from the Sun but at the
> Earths surface you can sometimes subtract about 30% from the solar
> irradiance figure due to reflection by clouds in the atmosphere.
> What people often confuse is temperature with energy. Things can
> have high temperatures but very little heat. Or even low
> temperatures but have large amounts of heat. That is because heat
> is energy and not temperature. Hot and cold are measures of
> temperature not heat. So, again things can be hot and have very
> little heat if they have small specific heat capacities. The amount
> of heat an object or material may hold varies with it's specific
> heat capacity and has nothing to do with its temperature or how
> hot it is.
>
> Having said all that physicists do actually ascribe temperatures
> to energies too but that need not concern us here. There is also no
> such thing as a completely empty vacuum with no energy in it. There
> is a virtual partical flux throughout the whole of space and there
> is a base level of energy associated with that flux. It's called the
> zero point of energy. It's not zero energy but a baseline of energy
> below which we cannot work with.
>
>
> Subject: (24) The noon day temperature misconception.
>
> It is often said or implied that it takes 14 days for
> temperatures to reach +200F on the Lunar surface. That is
> plainly wrong. Claims that astronauts landed on the Moon
> during the "Lunar morning" in order to "avoid noon day heat"

> are ridiculous. They might say they landed at that time but
> it would not have helped them to avoid any heating problem
> that they will have faced.
> Heating to +200F or more can happen in less than 24 hours of
> exposure to sunlight on the Moon's surface. Here's how;
> surface temperatures (not the regular air temperature
> measurements) may reach 200 degrees fahrenheit on Earth in
> places like deserts and so forth. If we consider that during
> the night the temperature may in all probability have dropped
> to freezing (-32F) or near freezing then we may note that the
> Sun's energy in a matter of only a few hours (less than 12
> hours) will have brought about a temperature rise of around
> 200 degrees fahrenheit and that is after the additional
> cooling effects of atmospheric convection which are not found
> on the Moon have done their worst. If we remove atmospheric
> cooling then the ground will heat up much faster because there
> will be no convective heat losses caused by the presence of
> the atmosphere which are far more severe than the radiative
> losses and the final temperature may even be more than 200F.
> Now that is a very important point to understand. The heat
> losses into the atmosphere are more severe than the radiative
> losses per unit time. On the Moon there is no atmosphere so
> this avenue (atmospheric losses of heat) does not exist and
> radiative cooling only will occur. Since radiative cooling is
> smaller than losses due to atmospheric effects then comparable
> surfaces on the Moon will experience a faster temperature rise
> than their Earthly equivalent.
> Now, hypothesizing a world where the minimum starting temperature
> is -200F (that's what the surface temperatures on the Moon can
> cool off to during the night and in the shade) those same 12 hours
> of sunlight would also easily bring a rise in temperature of 200F.
> Cooling processes are faster at higher temperatures so it is
> easier to bring the temperature up from low values than it is to
> raise the temperature starting with high values. Thus there is no
> special difficulty here just because we are starting with a large
> night time low of -200F.
> We can see now that it is easier for the Sun to raise the
> temperature of a surface on the Moon starting from -200F. Now if
> in 12 hours the Sun can warm a desert surface to +200F from a
> night time low of -32F with the added severe heat losses caused
> by the atmosphere then on the Moon the same heating time will
> cause a larger and faster heating response. What this means is
> that we can expect a Lunar surface to go from -200F to +200F in
> less than 24 hours. Actually in significantly less time than
> 24 hours.
> None of this takes into account that the Lunar day is 14 Earth
> days long. What that fact results in is even more extended
> periods of heating since the Sun's rays will be shining down
> on any particular surface at any given angle for 14 times as
> long as they do on Earth. Searing heat for 14 times as long!

> An important factor in all this is the angle which the surface
> presents to the rays from the Sun. In the Lunar morning it
> will be hillsides and other vertically oriented things (like
> astronauts and their Lunar Modules) that will feel the full
> force of the Suns power. When the Sun is overhead at 7 days it
> will be surfaces like horizontal ground and the tops of things
> like the Lunar Module that will capture the full magnitude of
> the Suns heating power. Landing on the Moon in the "morning"
> just means that the insulation in the soles of the astronauts
> boots will not have to work so hard since the angle presented
> to the Sun rays by the surface of the ground is not optimal for
> maximum exposure and thus the current temperature of the surface
> will be lower as a result of that. If he picks up a boulder
> which had presented a surface facing toward the Sun then that
> surface will be searing hot and the insulation in the astronauts
> gloves will be working hard to protect him from the heat.
>
> Subject: (25) How did the space suit cooling system work? (or not)
>
> They had backpacks which dissipated heat via the sublimation of
> ice from a porous plate located inside their backpack which,
> presumably, because it would have been in the shade and out of
> the sunlight would have been very cold. The trouble with this is
> that we now know that ice deposits have been found on the Moon's
> surface on the permanently shady side of some polar craters.
> So, water ice either "evaporates" away or it doesn't. Which is it?
> Actually if we study the phase diagram for water we discover that
> water does actually exist as both solid and vapour below it's
> freezing point. Not only that but that it (water ice) exerts a
> vapour pressure from its solid form (of which there are several)
> and it is this which carries away the heat load produced by the
> astronaut as he toils on the Lunar surface. Just like we lose
> heat by water evaporation from our bodies when we are hot the
> porous plate in the backpack dissipates heat generated by the
> astronaut which would make it unbearable inside the space suit
> otherwise. The trouble with this is that the vapour pressure of
> solid ice decreases rapidly with temperature and below zero degrees
> Celsius it is a small fraction of what it is at room temperature.
> And at very low temperatures like -200F it is quite negligible.
> In basic terms what this means is that there is not enough water
> vapour emitted (sublimated) by the solid ice on the plate to cool
> the astronaut fast enough. Not unless he has a porous plate with
> maybe 4 times or more the surface area of the human body. And that
> is at the melting point not -200F where something the size of a
> football field will be required. So, the temperature of the plate
> if it is a small one will have to rise significantly in order to
> increase vapour pressure as it inadequately tries to dissipate the
> heat generated by the astronauts metabolism and in a short time it
> will have melted all the ice on the plate. Thereafter huge coolant
> water losses ensue as the liquid water practically explodes out

> of the plate and into the vaccuum but the plate cannot cool down
> with this expansion because the astronaut is heating it to this point.
> Liquid coolant water loss ensues. How much and at what rate depends
> on the size and properties of the porous plate of course.
> The astronauts backpack would have to have housed many porous plates
> in order to have provided sufficient vapour pressure in order to
> provide sufficient cooling of the astronaut but there is no mention
> of multiple plates just "a porous plate". Not only that but the
> backpack would have to have been continuously vented to prevent heat
> build up and "melt-down" but the backpacks appeared to be closed.
> Postulating that they had a small aparture for water vapour to escape
> from would still cause heat build up in the interior of the backpack
> as the warm vapour touched the insides of the backpack. Any usefullness
> provided by insulating the insides of the backpack from solar
> radiation would have rapidly been lost and the temperature inside the
> backpack where the plates were would have risen untill it reached
> "melt-down" and liquid water loss ensued. The porous plates should
> have been located outside in free space and shaded from direct
> sunlight in order for the system to work correctly.
>
>
> Subject: (26) How much insulation does it take to keep an
> astronaut warm?
>
> Not much. The biggest problem is in keeping him cool. However,..
> In order to maintain a normal temperature (37C) the human body
> (naked) would have to radiate about 800 watts of heat to the cold
> sky of space. With an average layer of clothing the losses can be
> considerably reduced to around 200 watts but the average daily
> calorific intake is only sufficient to support losses of around
> 100 watts. Therefore a little more clothing on top will suffice
> to stay warm under a cold sky and losses would then be at the
> normal 80 to 100 watt level which is easily sustained given
> proper calorific input.
>
> The reader should not allow himself to be confused here because
> of the fact that a cooling system was also required for the
> astronauts. You see a spacesuit is a tightly closed environment,
> it is highly insulated from losses to the outside as well as
> affording strong insulating properties from the searing inward
> heat of the Sun. Basically, it shuts out the external thermal
> environment and the astronaut must be kept in an artificially
> created atmosphere within the suit. Without built in
> thermo-regulation an astronaut performing heavy aerobic work
> or exercise in a closed environment permitting no heat
> dissipation could as a worse case scenario find his body
> temperature trying to go from 98F to a theoretical 140F but of
> course nature butts in at 111F and the astronaut dies.

> samples were retreived manually just because they say so?
> All claims require evidence and extraordinary claims require
> extraordinary evidence (favourite skeptic/debunker terms of
> evidential proof). So where is it?
> According to Jim Collier "30 billion dollars were spent in
> sending man to the moon but all the paper work has been flushed
> down the toilet. All we have is a bunch of faked photos".
>
>
> Subject: (29) The Eagle landing site anomalies.
>
> Serious discrepancies in the photographic evidence still remain
> to be explained by the "pro Apollo" fanatics. All images may be
> viewed or located by google at the NASA archive as described in
> section 21.

> In attempts to explain away the lighting hotspot visible in images
> AS11-40-5902 and AS11-49-5903 it may be 1) postulated that it was
> as a result of Solar reflection off of an instrument housing panel
> or 2) postulated that it may have been due to changed optical
> characteristics of the Lunar surface after it had been swept over by
> the engine as the Eagle landed.
> The first postulate is easily falsified with examination of image
> AS11-40-5915 where it becomes apparent that the reflective panel is
> facing almost directly at the Sun and not angled anywhere near
> sufficiently to cause the reflection in question. The second postulate
> is also falsified when consideration is given to the trench dug in the
> ground by the footpad probe (contact probe) as the Eagle landed.
> The footpad is about 3 feet in diameter and the contact probe is about
> 6 feet in length. The boot impressions in the ground must be at least
> 12 inches in length. The footpad and contact probe concerned are in the
> lower right corner of AS11-40-5915 and it is clear that the last 3
> metres if not more of flight of the Eagle was in a straight line and
> came in from the right side as viewed in the image. This is clearly
> evident from the gouge in the ground made by the surface probe which
> was attached to the foot pad. The lighting hotspot in the ground is
> to the left in the picture and if it were caused by the ground being
> swept by the engine exhaust gasses then that would indicate that the
> engine (and the Eagle) followed a last few metres trajectory different
> to that indicated by the gouge in the ground made by the contact probe.
> The swept area indicates a possible landing trajectory originating
> from the left side in the picture but the evidence left in the ground
> by the contact probe indicates a landing from the right.
> The only way the exhaust gasses could have swept the ground in the left
> of the picture and at the same time the Eagle come down to land from
> the right as evidenced by the trench is if the Eagle had landed with a
> severe list to the right. If that had happened then the probeless leg
> on the Eagle, the one on the right side in back of the picture would
> have dug into the ground first and caused the LM to spin clockwise
> when veiwed from above in AS11-40-5915. That would have meant that the
> footpad and the trapped contact probe would no longer have aligned with
> the trench in the ground so neatly and all in one straight line. Had
> the Eagle listed so during the last few metres of travel then the
> contact probe would have made an arc shaped trench. Thus the "swept
> area" is not consistent with a landing from the right as is implied by
> the trench made in the Lunar ground by the contact probe. This leaves
> the lighting hotspot anomaly intact and without reasonable explanation
> so far.

I like your attitude, Mark. If more hams would tell the obvious riff-raff where to go (Don't look at me, I've already been there!) and refuse to let these clown trash up our discussions, we would all be much better off.

As a fellow Ham, I'd like to thank you for speaking up.

From Yahoo News:

"It actually appears to be working. With pilots in a handful of states, a rising tide of interest in establishing technical and safety standards, and growing political support in Washington, broadband over power lines (BPL) is quietly yet quickly moving from the drawing board into the marketplace."

(Article continues at http://tinyurl.com/5ou5x)

It looks like BPL has won. With the IEEE and the FCC on the side of the BPL'ers, the ARRL doesn't stand a chance in you-know-what.

I have been working on a commercial auction/discussion site for the
past three months and the day has finally come to launch it! The site
is http://www.geektraders.com. It is a site for geeks to go and
sell/discuss geeky stuff ! It caters to many aspects of geekyness,
including photography, astronomy, musicians, ham radio (engineering)
and car enthusiasts. It is even run by geeks and musicians !

This is a unique site, as it not only allows for standard auctions,
but it allows for swapping as well. I have set up this site as a FREE
service with the following features:

FREE auctions with 'buy now', dutch, swap etc.
FREE personalized store (you can upload your own logo)
FREE chat and discussion board to discuss your store/auctions with
your customers
FREE advertising on the board (musicians, hams ...)

There will be a charge for bold and featured items on the site.

This is a brand new site so lets generate some traffic !

Have fun and thanks for your support !

ANDREA HARTLAGE, KG4IUM, NAMED ARNEWSLINE(TM) YOUNG HAM OF THE YEAR

Andrea Hartlage, KG4IUM, has been named 2004 Young Ham of the Year by the Amateur Radio Newsline. And since this is a story about the success of the younger members of the hobby we asked our 2002 Young Ham of the Year, Josh Abramowicz, KB3GWY, to bring us the rest. Josh:

--

It was only a few years ago that I got a call at the Hawk Mountain Scout Reservation in Schuylkill County, Pennsylvania, telling me to call someone from Amateur Radio Newsline. It was during that phone call, that started out as an interview, I learned of my nomination and selection as the Young Ham of the Year.

Andrea, it turned out, was with her grandparents on vacation in Florida at the time she got the call on a cell phone from Amateur Radio Newsline's Bill Pasternak, WA6ITF. Here's her first reaction after getting the news:

"I'm very happy and excited."

Andrea, who earned her Extra Class license at the age of 14 - less than a year ago , was first licensed in 2000. She's 15 years old and going into her sophomore year at Grayson High School in Grayson, Georgia, north and east of Atlanta, where she's an honor student.

Andrea has been quite active since getting her ticket just four years ago.

"I do a lot of public service with parades and different types of marathons and things like that," she says. "I write the youth column for ARRL website. The Youth@HamRadio.Fun column. I'm assistant section manager for youth of the Georgia section and I'm a member of several local radio clubs."

Andrea is proud of her ham radio activity and is promoting the Amateur Radio service among youth.

"I spoke briefly at the Youth Forum in Dayton and I also led a Youth Forum at the hamfest, the local Rockville hamfest, and I also helped put hamfests on with the Alford Memorial Radio Club," she says.

She's also part of the ARRL's Big School Project and serves as a leader and teacher at the Richards Middle School Amateur Radio Club. There, she teaches electronic theory and has come up with a series of fun games to help reinforce the lessons.

So how did Andrea get started in Amateur Radio? She credits her father with kindling her interest.

"My dad interested me, he introduced it to me, Scott Hartlage, KF4PWI and he introduced me to Amateur Radio - I guess it was four years ago," she says. "I just sort of got interested in the public service side and I also serve as net control and I enjoy doing that and all the other things."

Andrea says Amateur Radio and all the opportunities it has given her, also has opened her eyes to some career possibilities.

"I'm possibly thinking about some kind of journalism and writing these (ARRL) columns helps me develop writing skills," she says. "And, I'm also thinking about some type of communication field that I really enjoy, like, for example, serving as net control and learning how to communicate effectively."

Andrea has made quite an impression on hundreds and hundreds of people already. You can bet it won't be the last time we'll hear from her, now and in the future.

From the 2002 award winner - Congratulations, Andrea, the 2004 Young Ham of the Year.

For Amateur Radio Newsline, I'm Josh Abramowicz, KB3GWY.

--

Andrea Hartlage, KG4IUM, will get her award at a special ceremony on Saturday, August 21st at the Huntsville Hamfest. In addition to a plaque from Amateur Radio Newsline Andrea will receive a gift of Yaesu brand ham radio gear from Vertex Standard and a week at Spacecamp courtesy of CQ Magazine. Vertex Standard and CQ are both major corporate underwriters of the Young Ham of the Year Award program. (ARNewsline (tm))

**

ANDREA HARTLAGE, KG4IUM AND JAY THOMPSON, W6JAY, NAMED TO RECEIVE HIRAM PERCY MAXIM AWARD

At almost the same time that Andrea Hartlage was getting word that she had been named as Amateur Radio Newsline's Young Ham of the

Year
she was also hearing good news from the American Radio Relay League.
So was our 2003 Young Ham of the Year Jay Thompson, W6JAY.
Here's
Amy Abramowicz, KB3IJW, with more:

--

Both Andrea and Jay learned the ARRL's board of directors had selected them to receive the coveted Hiram Percy Maxim Memorial Award.

The ARRL board was so impressed by the nominations for each that they decided to give both of them the award. That means a cash prize of $1,500 each and a special plaque.

Amateur Radio Newsline spoke with ARRL President Jim Haynie, W5JBP. He says there's no doubt Andrea and Jay are the brightest stars among the young hams today.

"Both are just absolutely stellar examples of Amateur Radio and the young crowd that we're trying to encourage at the League," Haynie says. "You couldn't pick anybody any better than these two. And, I'm just amazed at their accomplishments and how they've managed to be so professional in all the things they've done.

"I've read some of their papers and when we chose them as the HPM award winners, what they had accomplished in their brief careers as amateur radio operators. The only thing I would say to young people is use these two people as examples because they are the best. They are the best of the best. And, speaking as president of the League, I congratulate them both and I admire them both because of what they've managed to do."

Mister Haynie also tells us the 1997 Amateur Radio Newsline Young Ham of the Year, Brian Mileshosky, N5ZGT, is in the same class. Brian was the 1999 Hiram Percy Maxim Award winner. He's now 24, married, heading to grad school in the fall, and still very active in Amateur Radio activities in New Mexico.

"All his work in Scouting and DFing and things of this nature that are the epitomy of Amateur Radio again for young people," Haynie says. "When I first met Brian, I was just blown away by his professionalism and how he handled himself as a young amateur. These three young individuals I think set the example and set the standard which we would like to see Amateur Radio go toward."

Mister Haynie says now that the Hiram Percy Maxim selections have been made for 2004, it's soon time to begin identifying candidates for 2005. You can find out more about the award, the qualifications, and the nominating process at www.ARRL.org.

To learn more about Andrea and Jay's accomplishments, you can also check out our website at www.arnewsline.org

For Amateur Radio Newsline, I'm Amy Abramowicz, KB3IJW.

--

We know that all of you join us in congratulating Andrea Hartlage, KG4IUM and Jay Thompson, W6JAY, on being selected top receive these very special awards. (ARRL S.W. Division Newsletter, ARNewsline (tm))

**

HAM RADIO POLITICS: ARRL BARD MEETING

The naming of Andrea Hartlage, KG4IUM, and Jay Thompson, W6JAY, as winners of the Hirum Percy Maxim Award was only one of many decisions made at the recent meeting of the ARRL Board of Directors. Many of the Boards actions will impact on all of ham radio for years to come. Here's another Abramovich clan -- Mark Abramovich, NT3V,
with
that part of the story.

--

In an historic step, the ARRL's board approved the launch of a grassroots lobbying campaign designed to raise awareness among legislators and government agencies about the Amateur Radio service.

ARRL President Jim Haynie, W5JBP, says there was careful deliberation before the board decided to launch the campaign.

"With all the things we have going on right now, such as BPL, our CC&R bill, our Spectrum Protection Act and even the restructuring program that we have it's time to raise our level of visibility," Haynie says.

Haynie says the ARRL board put the directors in charge of appointing volunteers to staff three positions in each division to work as Congressional Action chair, coordinator and assistant.

He says the chair would be someone who has had some experience in lobbying. A coordinator, with the blessing of section managers, would be selected for each state to work with the chair. And, he says, that coordinator would seek assistants to help spread the ARRL's message to congressmen and senators.

"This is a very orchestrated effort and I'm happy to see it happen," Haynie says. "It's something that's been needed to be done for a very, very long time. And it's a good thing, Mark. It really is. It's something we should have done years ago, actually."

Haynie says recent pronouncements by the FCC's chairman clearly pose a threat to the Amateur Radio service.

"I heard Michael Powell say at the NAB (National Association of Broadcasters) conference in Las Vegas this year that everything was on the table," Haynie says.

"All frequencies were on the table for various types of services. "So, Amateur Radio has got to get in there and make sure that it's voice is heard and its importance of the communities that they serve and the people that like to do volunteer work."

Haynie says the league will also ask members to get more active in contacting their representatives in the U.S. House and U.S. Senate to express their views or simply introduce them to the value of the Amateur Radio service in their communities.

"And I'm not asking the league members to do too much, actually, but sit down and write their representatives," Haynie says. "And you don't have to complain about anything. Just tell them about Amateur Radio. Tell them how much it's meant to you and your life and how it may have shaped it or changed it.

"I've said for years some of the finest people I ever met have been through ham radio. But there's many hams out there that have whole careers based on it. And this is too important not to bring the level of visibility to a higher plain."

In other board business, Haynie says there was considerable discussion of Broadband over Power Line internet access and the pending FCC action. Haynie says the board was encouraged that the Alliant Energy BPL trial in Cedar Rapids, Iowa was terminated early because of interference complaints.

He says that move sent a message to other electric utilities exploring BPL.

"It's several dozen utilities now that have looked at BPL and said that it's not something they want to get involved with," Haynie says. "And our message is not economic because they can figure that out for themselves. Our message is the fact that under Part 15, there are certain rules that have to be abided by and we want to make sure that they do that."

Haynie emphasizes the league's position on BPL is clear and consistent and can't be perceived as denying people access to technology.

"We're not against people having broadband access, we're really not," Haynie says. "It's the fact that the interference that this

particular technology would bring to the HF bands is going to be a real problem and we've got to hold people's feet to the fire when they say that they're going to mitigate interference. That goes from the White House all the way down."

Finally, Haynie says he is growing cautiously optimistic about the BPL fight and the impact the ARRL's position is having on the industry and some in government agencies.

"I think that our message is beginning to get out, and, like I say, we're not confrontational" Haynie says. "We're just trying to say look at the facts, look at the engineering studies, look at the NTIA studies and draw your own conclusions. If you've got engineers on your staff, they're quite clear."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

A more in-depth report on the actions of the ARRL Board will appear in an upcoming issue of QST Magazine. (ARNewsline (tm))

**

RADIO RULES: VANITY CALL SIGN FEEE GOING UP

The FCC regulatory fee to obtain an Amateur Radio vanity call sign will rise from $16.30 to $20.80 later this year. According to the ARRL Letter, the FCC announced the new fee in a Report and Order in MD Docket 04-73. Thats also known as the "Assessment and Collection of Regulatory Fees for Fiscal Year 2004" and the FCC says it anticipates 7800 applications for that time frame. The FCC expects revenue collected from the vanity call sign regulatory fees in Fiscal Year 2004 to rise by more than $2100. The Report and Order becomes effective 30 days after it's published in The Federal Register. (ARRL)

**

ENFORCEMENT: CBS SAYS IT WILL NOT ACCEPT SUPER BOWL INCIDENT FINE

CBS says that it will fight any fines leveled against its television stations over Janet Jackson's startling Super Bowl performance. This, according to a top executive with parent company Viacom Inc. on July 19th.

An FCC staff recommendation did not call for fining CBS affiliates that aired the Super Bowl halftime show but are not owned by Viacom. But CBS itself could face a fine of $550,000 or of $27,500 for each of its 20 owned and operated stations that asired the so called Janet Jackson wardrobe malfunction.

Now, in a recent talk before the Television Critics Association, Viacom co-president and co-chief operating officer Leslie Moonves criticiszed any fine as being grossly unfair. He said that CBS considers the idea of a fine as patently ridiculous and that the company will take the matter into court if such a penalty is imposed. (Published news reports)

**

ON THE AIR: SAN DIEGO'S 96.9 MHZ PIRATE REACTIVATES

According to a news bulletin from Chris Carmichael, San Diego's 96.9 MHz pirate is back on the air. No news on the location ofthe transmitter site. (CGC)

**

RADIO LAW: HAWAII'S GOVERNOR VETOES AMATEUR RADIO ANTENNA BILLS BUT OVERICDE MIGHT BE ATTEMPTED

The ARRL Letter reports that Hawaii Governor Linda Lingle has vetoed two Amateur Radio antenna bills. Both pieces of legislation would have provided limited opportunities for amateurs living under private deed covenants, conditions and restrictions to erect antennas.

HB 2773 would have opened the door for amateurs living in condominiums to make arrangements with the homeowners' association board to install an antenna without having to change the CC&Rs. HB 2774 would have granted similar rights to the relatively few amateurs who live under CC&Rs in agricultural-zoned property.

Lingle, a Republican, invoked the same reason for refusing to sign both bills into law. She said that the bills were objectionable because they amount to an inappropriate and unacceptable governmental intrusion into the contractual affairs of the property owners.

But it may not be over yet. According to word from former Westlink News Production Coordinator Bill Orenstein, KH6QX, there is a move afoot to overide the Lingle veto in the Hawaii State legislasture. Orenstein, who now lives in Hawaii could not say when the overide action might take place or if it had any chance of success. (ARRL with additional information by KH6QX)

**

HAM RADIO ON THE NET: HAMBLOG.COM

www.hamblog.com is a new weblog host exclusively for amateur radio operators.

What is a blog you ask? Simply, its a spot in cyberspace where people post their thoughts and ideas on just about any subject. Some blogs let you do just that while others like hamblog.com are targeted to a particular subject. In the case of hamblog.com its our hobby of

Amateur Radio.

Charles Brabham, N5PVL, who administers hamblog.com says that hams have a lot of information to pass on to each other but traditional information systems such as magazine articles or speaking engagements at fests have proven to be unsuitable for. He says that Weblogs are highly flexible and highly individualistic and they hope that hamblog.com will provide a wellspring of knowledge about Amateur Radio that would be impossible to access or distribute by traditional methods.

Oh yes. Charles says that the service is free of charge so go check it out. The URL is simply www.hamblog.com (Via e-mail)

**

HAM RADIO CONFERENCES: THE DCC IN IOWA IN SEPTEMBER

On the ham radio social scene, the 2004 joint TAPR and ARRL Digital Communications Conference will be held September 10th to the 12th. This, at the Airport Holiday Inn in Des Moines, Iowa.

As part of the program, confereence planners are now accepting papers for the published proceedings. Submission are due by August 10th and should be sent tyo Maty Weinberg, ARRL, 225 Main Street, Newington, Connecticut, 06111. You can also e-mail them to maty@arrl.org

And very important. You can even take part even if you cannot be there in person. Thats because you do not have to be present at the conference to have your paper included in the proceedings.

Again, thats the 2004 joint TAPR and ARRL Digital Communications Conference fropm September 10th to the 12th at the Airport Holiday Inn in Des Moines, Iowa. More information is on-line at www.tapr.org/dcc (VHF Reflector)

ARNEWSLINE™ SUPPORT FUND REPORT WITH N6TCQ

Ladies and gentlemen, once again with some thank-you's, here is Amateur Radio Newsline's Support Fund Administrator, Andy Jarema,

N6TCQ.

--

We'd like to take a moment to thank everyone who helped us during our June
campaign. We heard from Brian Boccardi, N2MPM of North Brunswick, NJ; Lloyd Smith, WA9NLA and the Peace River Radio Association of Port Charlotte, FL; Billy Bryant, Jr., of Harvey, LA; The Reading, PA Radio Club, W3BN; Eric Olena, WB3FPL of Mohnton, PA; monthly contributor Joseph Bartzi, Jr., KC8DKF of Columbus, OH; our friends at the Dayton Amateur Radio Association; Mark Otspaih, also from Dayton Ernest Clark in Greenwood, IN; and C. Mark Burlingame, KB9TVD of Northlake, IL

The boss said I only have about a minute, so we'll have to do the rest of the list next week. Thank you to everyone. A reminder that Newsline is a 501c 3 California non-profit corporation. Information on how to support us is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now back to the news. (ARNewsline (tm) Support Fund)

**

RADIO SAFETY: CELLPHONE TAKES BULLET AIMED AT SUBSCRIBER

A South African merchant says he owes his life to the Nokia cellphone he was holding to his ear when he was ambushed by someone in a passing car. Andre Steyn felt the bullet penetrate his hand, only to be stopped by the phone before it could penetrate his head. The entire story is on-line at www.mobilemonday.net/mm/story.php?story_id=3653 (CGC)

**

RADIO ON THE ROAD: THE SHRINKING SYNDROME

If you are finding the size of your car and your mobile rig shrinking, you are not alone. According to Lee Cobb, W6TEE, writing in Worldradio Magazine, the actual size of automobiles has not changed much ion recent years, but the competition for space in front has. As a result, under dashboard mounting of gear is almost out of the question due to such amenities as consoles and such.

But fear not. Lee has some interesting notes on how to conquer the new car lack of space syndrome and ways her has found to get around the problem. You can read all about it on Lee's H-F Mobile column on
Page 31 of the August issue of Worldradio on newsstands right now.

(ARNewsline (tm))

**

HAM CONFERENCES: AMSAT-UK SPACE SYMPOSIUM

And AMSAT - UK is holding a Space Symposium at the University of Surrey from Friday the 30th of July to Sunday the 1st of August. On the Saturday there will be special beginners sessions run by Howard Long, G6LVB, aimed at those wishing to get into the fascinating world of amateur satellite communications. The RSGB GB4FUN van will be on site throughout the event. For booking information and full program details take your web browser to www.uk.amsat.org or contact Jim Heck by e-mail to g3wgm@amsat.org (AMSAT-UK)

**

WORLDBEAT: DXPL NOW ON WRMI

Turning to news from around the world, this item for hams and SWL's
who listens to the D-X Party Line show. Allan Graham, who hosts the DX Party Line has announced that the show will now be carried by WRMI each Sunday at 0300 U-T-C. That's 11 PM Eastern and 8 PM on the West Coast on Saturday here in the U-S-A. The frequency to listen on is 7.385 MHz.

WRMI is oned by the Florida based Radio Miami International and is heard throughout the Americas -- from Alaska to Tierra del Fuego -- in English, Spanish and other languages. The new schedule for the DX Party Line was slated to begin on July 24th. (ASWLC)

**

WORLDBEAT: SAQ NAMED WORLD HERIRTAGE STATION

SAQ, the Alexanderson alternator VLF transmitter at Grimeton in Sweden has been declared a World Heritage site by UNESCO. According to the RSGB News, the decision was made by the World Heritage Committee of UNESCO at a meeting near Shanghai in China on the 2nd of July.

S-A-Q continues to make occasional transmissions on 17.2 kHz on CW. The last one was on the 4th of July. (RSGB)

**

ON THE AIR: NEW PROPAGATION BEACONS IN CM88

Some new propagation beacons to report. K7XC reports over the VHF Reflector that as of 05:00 U-T-C on July 19th the KJ6KO 2 meter, 1 and 1/4 meter and 70 centimeter beacons in grid square CM88 are all clearly audible at his home in Fallon Nevada. Thats grid DM09.

The new beacons operate on 144.282 at 40 watts into a pair of loop antennas. The 1 an d 1/4 meter unit is on 222.014 with 25 watts into two stacked loops and the 70 centimeter beacon runs 100 watts into four stacked loops on 432.292 Mhz. KJ6KO says that he would apreciate any Q-S-N reports. Send them to his Callbook address. (VHF Reflector)

**

DX

In D-X. word that members of the United Kingdoms Wrexham and District Amateur Radio Society will be operating from the Isle of Man froom September 1st through the 8th. The exact operating location will be Scarlett Point which isd a decomisdsioned Coast Guard look out tower, approximately 1.5 miles South of Castletown, Isle of Man. Operation will be on all High Frequency Bands, plus 50Mhz, 70Mhz, and 144Mhz, at full UK Power. The team is expected to operate on at least 2 H-F Bands simultaneously, and will be running CW, SSB, RTTY, PSK and some SSTV. More is on the teams website at www.gb4iom.co.uk (GB2RS)

Also word that Andorra is now on 6 meters. According to ON4IQ, Andorra has released the 6 meter band to all resident amateurs. He reports that C31JI and C31HK are both already active on the band. (GB2RS)

**

THAT FINAL ITEM: SOMALIA GIVES HAM RADIO INCREASED POWER LIMITS

And finally this week, the ARRL Board Meeting was not the only place where things were ham radio changes were happening last week. Another was the nation of Somalia which has acted to grant its ham radio population a power increase to 3 kilowatts. Thats right. We said 3000 Watts and thats 3000 P-E-P for SSB and 3000 watts average for other modes. Somalia is also letting hams use of the 88 to 108 Mhz band for F-M and permitting Amateur Television broadcasts to be conducted on any unoccupied standard VHF or UHF television channel. WIA newscaster Graham Kemp, VK4BB, has more:

--

Yes the Ministry of Information, Telecommunication and Culture in Somalia has made these changes and more as part of action to implement the W-R-C 2003 accords.

And the Ministry has also made additional frequency allocations for amateur radio experimenters in Somalia. Radio Amateurs in that nation can operate on additional bands including Zero to 9 Kilohertz, from 70 to 90 Kilohertz and 130 to 190 Kilohertz. On Medium Wave frequencies include 495 to 526 Kilohertz, while on the High Frequencies the hams of Somalia get 5.060 to 5.450 MHz and 26.100 to 29.700 MHz excluding 27.995 the sliver band from to 27.999.

This Ministry is promoting Somalia as the best holiday and research destination for visiting radio amateurs. This, as a way of attracting skilled people to help the local Somali people become ham radio operators. Abdikariim Ali Sulatn in Puntand State Somalia confirmed again that Aussie Amateur Sam Voron, 6OA, will continue to conduct ham radio license qualifying courses and issue amateur radio licenses free of charge "in the name of this Ministry" until a national Somali Amateur Radio Society is formed.

And, oh yes. If you are planning to go there, a Somali Visitors Amateur Radio License is now issued to any class of overseas amateur radio license holder as a courtesy. It is free of charge and issued for life unless canceled by the Somali Government. Talk about an inducement to visit a far off land.

Reporting for the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, for
the WIA News, in Brisbane, Australia.

--

According to a Somali spokesman, as of now, no other country provides radio amateurs with more frequencies or a higher transmitter power output. He added that Somalia welcomes visiting radio amateurs from throughout the world. (WIA News)

**

NEWSCAST CLOSE

In days gone observations of birds were made before the military would do this or that thing. Ya know, those folk weren't stoopid. They had people called augurs who would do that.

Though they didn't know it, birds have senses unimaginable to man. Frinstance, bats use echo-location and pigeons navigate by sensing the magnetic field of the earth. They've got a sorta magneto-sensor in the pituatiry gland. So, you see, birds can sense what we can't.

Now I ask you, why wouldn't they be able to see into the future?

I'm not suggesting anything spookernatural. Nope, just the good old laws of physics extrapolated real-time into the near future. By birds.

Now, the Roman empire's gone and ours is in place. We got our radar, we got our protective anti-missle shield coming soon, but who's looking at them birds?

We need an eye in the sky checking the portents.

And we need to -- this is why I'm posting to y'all -- to make contact with them birds to let them know what we want them to do. C'mon guys, you got the transmitters.

How about it? One day next week? In times o' trouble we each gotta give our all.

Andre.

** SPECIAL NOTICE BY EDITOR (by KB8NW): This week's bulletin was sent out earlier than normal to accommodate the late IOTA Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the IOTA Contest participants.

Also, there will "NOT" be an OPDX bulletin for August 2nd. I know, you heard this before, but it is true this time. My wife (chief proof-reader), daughter and I will be going to Las Vegas to visit my dad and step-mother (who we haven't seen in 2 years). Besides, I can really use the break! However, PLEASE continue to send your DX info to me.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 17th/July, through Saturday, 24th/July there were 204 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J8, JA, JD/o, JT, JW, JY, K, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2M, VP5, VP9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5X, UGANDA. Jay, K4ZLE, will once again return here and be active (as time permits while there) as 5X2A from August 3-21st. Some effort will be made to operate on the lower bands this year, mostly CW. Activity is also planned for PSK31. QSL direct via K4ZLE.

A35, TONGA (Update/Change In Plans/Rotuma - Possibly Later). Aisea, 3D2AA, informs OPDX that Christian, 3D2EA, has changed his plans and is now active from Tonga instead of Rotuma. Christian was first heard active as A35EA, but now it seems he is signing A35DX. He is expected to be active until July 29th. Activity will be on 40/17 meters and mainly on 20 meters. Christian is still hoping that when he gets back from Tonga he shall reconsider his Rotuma trip. QSL via 3D2EA.

AFRICA TRIPLE HOP DXPEDITION 2004. Dave/K4SV and Neil/VA7DX return to Africa July 28th and will be active from three DX locations through August 17th. Dave and Neil will operate from Lesotho, July 29th to August 6th, Swaziland, August 7-11th and Mozambique, August 12-17th. Activity will be on CW, SSB, RTTY and other digital modes, with operations planned for 160-10 meters; subject to daily propagation conditions, with focus on the low bands nightly. Special effort will be made to work the general portion of the bands. Equipment has been provided by ZS6WB for meteor scatter and EME operation on 2m and 6m using FSK441 and JT65. Patience will be required because neither operator has much experience in either mode. Verticals will be used on 160 to 30 meters with 4 element A4S and WARC beams at 75 feet for the higher bands. Towers, antennas, logistical support, licensing and all in-country arrangements have been handled by African DX Safaris - ZS6WPX. They suggest that anyone needing these countries get your antennas ready to go now. Last year's callsigns will be reactivated with Dave using 7P8DA, 3DA0SV and C91DA. Neil will use 7P8NK, 3DA0WC and C91NK. Information on how to QSL and online logs will be available at: http://www.k4sv.com
Logs will be uploaded daily and will be updated with the date of any QSL requests received and sent. QSL Manager for the entire operation will be: Stephen K4YL, PO Box 183, Flat Rock, NC 28731-0183 USA.

IOTA NEWS.....
AS-147. Taka/JR3TVH and Natsu/JJ3NAW will be active from Rishiri Island and Rebun Island, the northern most islands in JA-land, as JR3TVH/8 and JJ3NAW/8 through July 25th. Activity will include the IOTA Contest, and they plan to operate on HF to 6m on SSB, CW, RTTY, FM, AM and PSK31. QSL to their home callsign via the bureau (ref.QRZ.com).

AS-169. Operators VU2UR and VU2NXM will activate this IOTA starting July 23rd for about a week. Activity will include the IOTA Contest. Call will be AT0BI. Please follow the operator's instructions to make contact. Last time only few QSOs were made due to huge pileups.

AS-NEW. Joel, F5PAC, was expected this past week to operate as 4S7PAG
from Barberen Island (which is an unnumbered Sri Lanka's
Coastal Islands group). ADDED UPDATE. This new IOTA is now
listed as AS-171.

EU-010. Dennis, M0LSB/MM0LSB, is currently on an Outer Hebrides,
"Grand Tour" - currently on Lewis (SCOTIA HI21). He will
activate the following island in the EU-0101 group using
the schedule below (approximate dates):
July 24-25th Great Bernera (HI27)
July 25-26th Harris (HI21)
July 26-27th Berneray (HI15)
July 28-29th North Uist (HI13)
July 30th Grimday (HI10)
July 31st Baleshare (HI11)
August 1-3th Benbecula (HI08)
August 3-7th South Uist (HI06)
August 7-11st Eriskay (HI05)
August 11-18th Barra (HI02)
August 11-18th Vatersay (HI01)
Dennis says this is a holiday, so don't expect a "round the
clock" operation. Visit Dennis's Home page at:
http://www.gm3vlb.com

EU-064. Some members of the past 5V7C crew, namely Gunther/F5VHQ,
Pascal/F5JSD and Frank/F4AJQ, will go to Noirmoutier, with
Bernard/F9IE and will be active during for the IOTA Contest
as F6KOP/P. Outside of the contest they will use their own
callsign/p except Bernard/F9IE who lives on the Island. QSL
via operator's instructions.

EU-124. The Barry Amateur Radio Society will participate in the
IOTA Contest (July 24-25th) as GW8K from Flatholm Island.
They will be on the island from now through July 26th
inclusive; outside the contest expect activity as GB5FI
also on PSK31 and SSTV. QSL via GW0ANA, direct or by the
bureau.

P40, ARUBA. Ken/K6TA and Kay/K6KO will be active from here as P40TA and
P40K, respectively, from November 30th to December 21st. Both operators
plan to be active as P40K in the ARRL 10 Meter Contest (December 11-12th)
as a Multi-Single/High-Power entry. Also, look for P40TA in the ARRL
160m Contest. QSL both callsigns via WM6A.

QSL INFO AND NEWS.....
Andy, DJ7IK, informs OPDX that the 3V8 QSL Bureau is now working.
The Bureau is located in Tunis at the headquarter of the Tunisian
Scouts. The address: Scouts Tunisiens, Amateur Radio 3V8ST,
Avenue Juguartha, P.O. Box 339, Tunis Mahrajene 1082, TUNISIA

Mac, W3HC, informs OPDX that he is now the QSL Manager for 9A6DR.
He also mentions that the new cards are being printed for PS2T at
this time.

SILENT KEY. The ARRL Web page and W1AW Bulletins report that "radio astronomer, antenna designer, cosmic explorer and author John D. Kraus, W8JK, of Delaware, Ohio, died July 18th. He was 94. While he enjoyed a worldwide reputation, Kraus is perhaps best known in Amateur Radio circles for his bi-directional wire beam antenna--often dubbed the '8JK array. Other important Kraus designs include the corner reflector and helix antennas. The Michigan native was a pioneer of radiotelescope design and the father of the 'Big Ear' radiotelescope." For more information about John, W8JK, please read ARRL Special Bulletin ARLX006 or visit the ARRL Web at: http://www.arrl.org/news/stories/2004/07/21/1?nc=1 OPDX and its readers would like to send out their deepest sympathy to John's family and friends.

T6, AFGHANISTAN. Henry, F6EAY, is currently assigned in Kabul, Afghanistan, and is active using the callsign T6RF only on PSK31. Henry states, "The propagation is not very good and the signals are weak." QSL via his manager, Jean Pierre, F6ITD.

TWLHF (The World Lighthouse Foundation). Charles, M3ZYZ, Founder and President of TWLHF, provides the following information about the TWLHF: "This foundation was established as a result of great appreciation for lighthouses and lighthouse keepers of whom there are ever fewer in the world. All people of good will from any part of the world can become members of this foundation, independent of whether they are radio amateurs or not. TWLHF will closely cooperate with associations of similar stand, attitude and interests by assisting and honouring one another as equal partners connected amicably and by a mutual love of lighthouses. The Foundation was the idea of Kresimir, 9A7K, along with other persons from across Europe including myself Charles, 'M3ZYZ'. I have been interested in Lighthouses from an early age and to combine them along with radio also, was a dream come true. The Foundation, of course, is not mainly aimed at Radio Amateurs but also SWL's and any other person who shares in the passion for seeing Lighthouses for whatever reason. The membership fee is €5 euros or equivelent in US Dollars, GBP etc and for this the member will recieve a beautiful full colour certificate bearing their name and unique member's number. In addition to the above, their are many Medals, Diploma's and Trophies all available, but moreso, they are achievable even to the SWL or Qrp station." For more information and details about the TWLHF, please visit their Web page at: http://www.twlhf.com

XU7, CAMBODIA. Jaak, ES1FB, will once again be active as XU7ACE starting around October 15th and end November 5th. QSL via ES1FB.

YV0, AVES ISLAND. The official YV0 DXpedition announcement was finally released this past week by the RCV. The press release states: "The Radio Club Venezolano (RCV) is celebrating the 70th anniversary and would hereby announce an expedition to Aves Island - one of the top ten most wanted DXCC entities.

Aves Island (NA-020) is located at 15 40' 33" North 63 36' 27" West (FK85eq) which is around 600 kilometres north of mainland Venezuela.

The island is about 580 meters long and 150 meters wide. The highest point on the island is only about 3 meters above sea level. Aves Island was claimed by Venezuela in 1865.

On August 23, 1972, the island was declared a wildlife sanctuary. In 1978 the Venezuelan Navy established a garrison in Aves called the Simon Bolivar = Scientific-Military Base. Now a new garrison has been installed this month, and this expedition will be there at the time of its inauguration. Last DXpedition to YV0 was in 1994.

Dates: From July 28th until August 8th. (on-the-air period depends on voyage to Aves)

Operators: K4UEE, K6MYC, OH2BH, OH0XX - as invited guest operators. The host group is YV1AVO, YV1DIG, YV4BOU, YV5AMH, YV5IVB, YV5JBI, YV5KM, YV5KXE, YV5OIE and YV6BTF. Also YY5FRD will be part of the crew.

Antennas: Sigma & SVDA vertical monoband antennas for HF provided by FORCE 12, the leading edge antennas for many successful DXpeditions and contest operations. On VHF M2 2x 41 ft. boomers on 6m and a 15.7 dbd yagi for 2m will be used. Crossed yagis for UHF and VHF will be used in satellite operation.

Modes: SSB, CW, RTTY, PSK, SSTV, FM and some other digital, many modes for the 1st time from YV0.

Bands: 75cms thru 160m including WARCs and satellite.

EME: Moon bounce operation for the 1st time from YV0.

Suggested Frequencies:
CW - 1823,3503/3523, 7003/7023, 10103, 14023, 18073, 21023, 24893, 28023, 50103, 144100 and 432100

SSB - 1843, 3795, 7055, 14195/14260, 18145, 21295/21195*, 24945, 28480/28905*, 50103 and 144200

RTTY - 3580, 7035, 10133, 14083, 18101, 21083, 24920 and 28083

SSTV - 14233, 21343 and 28683

PSK - 3580, 7035/7080, 10143, 14071, 18101, 21071, 24920 and 28120

FM - 29600 and 146520

* only for Novice (please do not call if you are not a Novice)

Follow up operator instructions for split range and frequencies. Plus 50103, 144080 for EME operations.

RIGS: 4x Yaesu's FT1000MP Mark-V and 2x FT847's, 2x FinnFet HF amplifiers by MA-FET among others rigs & amps, also a 1kw (8877) on 6m and 350w on 2m (EME).

Online Logs: If a good communication can be established, a query for daily uploaded logs will be on the radio club (RCV) Web page.

Logs will be on ARRL's LOTW (Log of the World) but the expedition will NOT load logs into EQSL but right QSO's on the InBox will be honored.

QSL Manager is KB6NAN 'OK' on QRZ.com, (1 IRC or 1 USD is 'OK' worldwide, SASE is 'OK' for USA). QSLs (most probably full colour folded cards) will be printed after the Dxpedition. QSLing thru bureau are 'OK'.

Sponsors: FORCE 12 (www.force12inc.com) for all HF antennas and AMSAT-YV (www.amsat-yv.org) for the satellite operation.

Pilot for Asia and Oceania: ZL2AL, America: K6GNX and Europe: OH2RF.

Anything extra sent as contribution will be gratefully welcome to cover the expenses of the DXpedition and printing the QSL cards.

Profile: 6 HF stations plus a 6m/2m EME and a satellite station for (AO7-FO29-SO50-AO51...).

Trip to the island is expected to be a 24 hours or less depending on the ship. The set-up period after arrival will be some hours in the Caribbean heat.

Such as antennas and tents, in a high heat would take its toll. And thereafter... be our guest!

The main antennas will be taken down day before the ship arrival while a modest signal may be kept on the air until 8th of August.

At the hour (00 minutes) operators will ask for only AF/AS/OC, be polite and stop calling if you are not in this areas, just wait until the next general QRZ.

At half hours (30 minutes) operators will ask for short skip stations only, it means Caribbean & North SA, again please follow the previous lines instructions.

If the ship commander would allow operations on the ship, keep your ears on 6m for some Caribbean sea grids.

As you have noticed there are real good operators in the crew, so just follow their instructions.

WEB Page: www.radioclubvenezolano.org and follow Aves link on the left menu, then choose 2004 (will be active soon).

You can enjoy some info on all the RCV's DXpeditions to Aves Island."

The following stations are expected to be active in the RSGB IOTA Contest (July 24-25th, 2004)

Thanks to Bill, NG3K, for providing OPDX readers the following
consolidated listing of the participants in the 2004 RSGB IOTA Contest. For
a more detailed listing in HTML format, please visit the Web page at:
http://www.cpcug.org/user/wfeidt/Misc/iota2004.html
To get the list in order by Entity and IOTA, see:
http://www.ng3k.com/Misc/iotad2004.html

>Bats aren't birds.

They are too. I know why you're saying that. It's a mammal,
that I do NOT deny. But if it got wings and flys it's a bird.
Period. Bats, y'see, are birds AND mammals. Those two things
ain't mutually exclusive.

That's something else folk way back when knew about.

Ever heard of a chimera? These classificatory issues ain't
as straight forwards as you might be thinking. Biologists
can't even agree a virus is alive or it ain't. Sheeeesh!

Andre.

So dragonflies and mosquitoes are birds?

In my dictionary, a bird has feathers. Bat's don't.

Nope. They haven't got wings. The have mobile membranes
I think they're called. Look it up in any third grader's
biology textbook.

>In my dictionary, a bird has feathers. Bat's don't.

Or do they? Small ones? Ones so small they look like little
hairs? Not so smart now, are we?

It don't matter anyways. They have wings, they fly, and
those two things are the only things that matter in the
matter of bird classification. I ain't got time to waste
going round and round on something as elementary as this.

You'll have to just accept what I say until you've done
your homework.

Andre.

Yes they are. Birds lay eggs. Mammals don't, and that's just for starters.

I smell a troll.

> >So dragonflies and mosquitoes are birds?
>
> Nope. They haven't got wings. The have mobile membranes

I suggest you do the same. Your first step, therefore, is to learn how to
read. Eventually, if you're diligent and honestly apply yourself, you'll
work your way up to studying Linnean classification. Then, if you can grasp
it, you'll see where you're wrong. It might be easier to see where you're
right, though. That'd be a much smaller job.

> >In my dictionary, a bird has feathers. Bat's don't.

Tell that to the penguins, ostriches and emus, amongst others. Troll or
idiot...I'm not quite sure.
> I ain't got time to waste
> going round and round on something as elementary as this.

You owe me a new irony meter.

LOL. Fun post, and probably a troll, but what the hey.

I think there are a lot of potential benefits to studying the motions and behaviors of birds.

I'd stop well short of suggesting they would help us predict the future, we could learn a lot that would be of benefit.

For starters, it'd be fun to have a web page that tracked individual flocks of migrating birds. Who knows, it might turn into a regular on the weather channel. :-)

I didn't start this thread. I have no idea who's involved in it, or from
which group it sprang. In short, I don't know where it's being cross-posted
to. The only thing that I -do- know is that it's probably only appropriate
for rec.birds. And considering what an idiot the original poster is, it's
probably not even appropriate for there.

<snippety>

You're getting your "science" from the Weekly World News, aren't
you?

Birds and mammals are two entirely different taxonomic
classifications. Some characteristics of mammals are:

(1) They give live birth. Birds lay eggs.

(2) They have hair at some stage of their lives. Birds have
feathers. Different growth, different composition.

(3) They feed their newborns on mother's milk. Birds cannot do any
such thing, as they do not have mammary glands.

There are only two characteristics that mammals and birds have in
common.

(1) They're both warm-blooded, with a self-regulating and
relatively constant body temperature.

(2) They both breathe air.

> Ever heard of a chimera? These classificatory issues ain't

Chimeras are mythical critters. See:

http://www.unifi.it/unifi/surfchem/solid/bardi/chimera/

There has been no solid evidence that I know of that proves (or disproves, I grant you) their existence.

Now, I have a question for you: Why did you post this off-topic discussion in an amateur radio newsgroup?

For that matter, why did you even bother crossposting it?

If you truly believe that, then I feel sorry for you.

Ham radio, like Life itself, is a big mirror. You get back exactly
what you put into it. Personally, I've chosen to be involved in disaster
preparedness -- more specifically, how the amateur radio SERVICE can be
of help in times of nastiness.

I've also gained a great deal of enjoyment from the technical side
of the hobby. Translation: I've been a 'tinkerer' most of my life. My
specialty now sits with helping others get good use out of 'legacy'
commercial gear in terms of converting it to amateur service.

If you truly believe that amateur radio is "dead," then perhaps it
is truly dead for you.

That being the case, perhaps you would be happier with another
hobby.

That's the suggestion I always make to whiners and complainers.

Like any other organized activity, Ham Radio is always improved when the whiney types are told in no uncertain terms that it is "Time to make like a cow-pattie and hit the trail."

Splat! - goes the girly men! And good riddance, I say!

I had a birdsight once, a florescent orange plastic dot that I mounted on one of my shotguns. I've never been much of a wingshot, and hoped that the bird sight would help out a bit there.

I tried it, but the bit of plastic did not help my shooting a bit. - It was lack of coordination getting me down, not a problem with seeing the shotgun's front sight. What I really needed was practice.

Good thing that there's no shortage of birds, eh?

After I gave up on the new birdsight I went home, and then cleaned and racked the smoke-pole so I could put in a little time trying to fix the microphone for my UHF radio.

I didn't get the microphone fixed, but had a great feeling of accomplishment anyway, as describing the action rescued this post from being 100% irrelevant to Amateur Radio.

98.9999% ?

Charles, N5PVL

You're starting wrong, chump.

DUCK-BILLED PLATYPUSSES _and_ SPINY ANTEATERS!!!!

> I smell a troll.

Lame. You smell someone who knows more than you. Gee, my old
grandpa woulda known a bat was a bird and he weren't what you'd
call educated or nothing. I guess some of us kinda lost touch
our roots in the real world. Lived all your life in the city?

Yep, another smartass comment. Ever read your bible?

Leviticus 11:13 Of birds these are they which you must not eat,
and which are to be avoided by you: The eagle, and the griffon,
and the osprey,

It keeps listing them birds through to verse 19.

Leviticus 11:19 The heron, and the charadrion according to its kind, the houp also, AND THE BAT.

It can't be a mistake cause it's in the Book of Deuteronomy too.

Deuteronomy 14:18 The bittern, and the charadrion, every one in their kind: the hoop also AND THE BAT.

Both of them quotes is from the Douay-Rheims. I guess you got no answer to that one.

> You can't be that stupid. You just can't be.

Some folk can't take losing the argument. There's a no need for use of an uncivil tongue.

> Tell that to the penguins, ostriches and emus, amongst others.

Uh?

Andre.

And they both have cells!!!

Guess what, dude, that's THREE characteristics.

If I had the time I'd find FOUR, FIVE, or who knows how many.

There are people around who put on armor and joust every weekend, but
that doesn't mean that knights are making a comeback. It just means
that the members of the Anachronistic Society happen to enjoy it, the
same way that some people collect toothpicks.

In that same sense, ham radio will never die. The ARRL has taken up
the function of the Anachronistic Society and it organizes the
equivalent of jousts with activities like field day. But that doesn't
mean ham radio is mainstream any more; it just means that some
potential toothpick collectors have chosen radios instead.

Look up the word monotreme for starters. They're a mammal, yes, but a -very-
small sub-set; hardly worth counting. You left out echidnas, btw. That's it
for the monotremes.

> > I smell a troll.

Yeah, bits and pieces from about 8 different versions that I own. I've
pretty much read it from cover to cover. Ever studied Linnaeus? Obviously
not. I guess discussing the twin-nested heirarchies would be too much to ask
of you.

> Leviticus 11:13 Of birds these are they which you must not eat,

Anybody that tries to use the Bible as a science book is either really
stupid or...a troll. Either way, you're not worth the effort. Although
you -are- a TINY bit amusing.

Of course, you could just be a stupid troll. I have to consider all of the
possibilities.

> Deuteronomy 14:18 The bittern, and the charadrion, every one in
> their kind: the hoop also AND THE BAT.
>
> Both of them quotes is from the Douay-Rheims. I guess you got no
> answer to that one.

Yes, I do. The Bible was written by a series of ignorant goatherds that
thought the world was flat, that bats were birds, that grasshoppers had four
legs, and that there was an invisible fellow in the sky that had an
inordinate interest in their sex lives. There...let's see what -that- does
to this thread! <gbg>

Look up Leviticus 11:20-23 for the grasshopper reference. See? I can thump
the book too. ;)

> > You can't be that stupid. You just can't be.
>
> Some folk can't take losing the argument. There's a no need for
> use of an uncivil tongue.

Allow me to quote you again:

<quote>

"You're starting wrong, chump."

<quote>

Now...what was that you were saying? I believe the key words would be "losing", "uncivil" and "chump". Hmmm. This makes you a hypocrite. Perhaps you're a sincere Bible thumper after all.

> > Tell that to the penguins, ostriches and emus, amongst others.
>
> Uh?

You snipped this part. You said:

<quote>

"It don't matter anyways. They have wings, they fly, and
those two things are the only things that matter in the
matter of bird classification. I ain't got time to waste
going round and round on something as elementary as this."

<end quote>

Penguins, ostriches and emus are birds that -don't- fly. There are others. According to your definition, they aren't birds. What was that you were saying about elementary? And by the way, snipping out the portions of my text that prove my argument is bad form. Shame on you.

Having said all of that, and realizing that this conversation isn't taking place in my "home groups" of talk.origins, sci.skeptic or alt.atheism where I've been debating people like you for years and force of habit makes me respond, I'll do the right thing and abandon this off-topic thread. The field is yours.

Well, well. Thanks to a post from m II I actually went and looked this up, which I probably should have done rather than relying on my memory. The link he provided points out that spiney anteaters -are- echidnas, so you didn't leave them out after all. I always thought echidnas were, well, echidnas. You learn something new everyday. Thanks, Maximus Geranium. I learned something, and so it turns out that conversing you wasn't a total waste after all.

Although it was pretty damned near. ;)

Would looking up the word make me wrong and you right?

Nope, no way.

>They're a mammal, yes, but a -very- small sub-set; hardly worth counting.

Definetely worth counting.

Your "mammals don't" was wrong, plain wrong, in your own taxonomy.

Did Linnaeus write "hardly worth counting"?

>You left out echidnas, btw.

Wrong again.

>Yep. Troll. I can smell it from here.

Wrong again.

>pretty much read it from cover to cover. Ever studied Linnaeus?
>Obviously not. I guess discussing the twin-nested heirarchies
>would be too much to ask of you.

Diversion alert!!

We were talking about them birds, not their nests, dude.

>> Leviticus 11:13 Of birds these are they which you must not eat,
>> and which are to be avoided by you: The eagle, and the griffon,

>> and the osprey,

Who said it's a science book? Not me. Another... diversion?

Gee, you're sounding more and more like a troll.

>> Both of them quotes is from the Douay-Rheims. I guess you got no
>> answer to that one.
>
>Yes, I do. The Bible was written by a series of ignorant goatherds that
>thought the world was flat, that bats were birds,

Yeah, right. If a goatherd says a bat's a bird, it ain't, cause
that would go against all known laws of nature. We don't get to
choose the names for critters. No, sir. Those names spring up out
the ground like stalks of corn and there ain't a thing we can do
about it.

Well, I got news for you, dude.

Naming is arbitrary. That ignorant goatherd Aristotle knew as much.

I guess 3 milenia of civilization just passed you by.

Andre.

Hmmm? Something like 675 thousand amateur radio licensees in USA alone, and growing, though slowly, per ARRL stats and statements. A recent survey suggested circa $500/yr spent on the hobby per amateur, IIRC, which suggests about $325 to $375+ million annually in USA alone, or more than $1 million per day in sales.

Shortwave listening is also up significantly in the USA, and it feeds into future amateur radio growth potentials. A good thing too, as our engineering schools are hurting for lack of qualified and interested applicants...

Doesn't sound like toothpick collecting or jousting to me ;-)

It's elemetary.
Who has the biggest axe to grind against MS?
Which company has been putting licensing pressure on open source code?
Who stands to gain most from the increased unpopularity and insecurity
of MS products?
[not that I have any affection for MS you understand, but it's simple
logic]

738. Andrea Hartlage (KG4IUM) named 2004 Amateur Radio Newsline™ Young Ham Of The Year

Newsgroup: rec.radio.amateur.misc
Date: 2004-07-25 18:06:13 UTC
From: radionews@aol.com
Message-ID: <20040725140613.26512.00002192@mb-m03.aol.com>
Source record: 56900

Andrea Hartlage (KG4IUM) named 2004 Amateur Radio Newsline™ Young Ham Of The Year

(Los Angeles, CA) She is 15 years old, about to become a sophomore in Grayson High School in Grayson, Georgia where she holds a 96.41 Grade Point Average and has dedicated the last four years of her young life to serving the needs of her community and its youth through Amateur Radio. For that reason and many others, Andrea Hartlage (KG4IUM) has been selected to be the recipient of the 2004 Amateur Radio Newsline™ Young Ham of the Year Award.

Andrea was first licensed in 2000 and currently holds the Amateur Extra class which is the top of the line. She credits her father with kindling her interest.

"My dad interested me, he introduced it to me, Scott Hartlage, KF4PWI and he introduced me to Amateur Radio - I guess it was four years ago," she says. "I just sort of got interested in the public service side and I also serve as net control and I enjoy doing that and all the other things." (A "net control" is the person in charge of a group of ham operators performing emergency or public service communications.)

Andrea has been quite active since getting her FCC license just four years ago.

"I do a lot of public service with parades and different types of marathons and things like that," she says. "I write the youth column for ARRL website...I'm assistant section manager for youth of the Georgia section and I'm a member of several local radio clubs." The ARRL is the American Radio Relay League, the National Association for Amateur Radio, based in Newington, Connecticut.

Among her many achievements, Andrea has served as an instructor at J.E. Richards Middle School Amateur Radio Club as part of the "ARRL Amateur Radio Education & Technology Program." The program's goal is to improve the quality of instruction by providing an educationally sound curriculum focused on wireless communications. The project emphasizes integration of technology, math, science, geography, writing, speaking and social responsibility within a global society. Andrea's instructional work at the J.E. Richards Middle School Amateur Radio Club was part of the pilot program.

But Andrea's work in the area of recruiting youngsters into the Amateur Radio hobby goes far beyond her local community. She is an

internationally known writer with a monthly on-line column titled "Youth@HamRadio.Fun" and also authors a similar bi-monthly column for the Young Ladies' Radio League (YLRL) Newsletter, YL-Harmonics. As a public speaker she has appeared at the Dayton Hamvention Youth Forum in Ohio and continues to promote the hobby to youngsters at local hamfests, club meetings, and other public events.

In the area of public service, Andrea has already completed the ARRL Emergency Communications training course and serves as the network control station for several regularly scheduled on-the-air emergency communications training sessions. These include networks sponsored by the Gwinnett Amateur Radio Society and the Gwinnett County Amateur Radio Emergency Service (ARES). Andrea also was the control station of the GEMA/ ARES Net for activation during the G8 Summit Conference. On the technical side, Andrea has already used the skill she learned through Amateur Radio to build communications gear for the September 2003 World Canoeing and Kayaking event.

Andrea is a member of several prestigious hobby radio organizations including the ARRL and YLRL mentioned above, the FISTS Club (an international organization dedicated to the preservation of the historic Morse Code), the Gwinnett County Amateur Radio Emergency Service, the Gwinnett Amateur Radio Society (GARS), the Alford Memorial Radio Club, the A-1 Operator's Club and scouting Venture Crew 73.

As to her future, Andrea says Amateur Radio and all the opportunities it has given her, also has opened her eyes to some career possibilities.

"I'm possibly thinking about some kind of journalism and writing these (ARRL) columns helps me develop writing skills," she says. "And, I'm also thinking about some type of communication field that I really enjoy, like, for example, serving as net control and learning how to communicate effectively."

At the end of her freshmen high school year, Andrea had all A's, placed 7th in her class of 664,. She takes all "Gifted Level" courses and will be taking "Advanced Placement" next year.

The Amateur Radio Newsline™ Young Ham of the Year Award will be presented to Andrea Hartlage on Saturday, August 16th, 2003 at the Huntsville Hamfest in Huntsville, Alabama. The award ceremony will be co-hosted by Bill Pasternak (WA6ITF) of Amateur Radio Newsline™, and YHOTY Award Committee Chairman Mark Abramowicz (NT3V). Also present at the ceremony will be representatives of corporate underwriters Vertex Standard USA, Inc. and CQ Magazine. The presentation of the award as a regular feature of this prestigious Amateur Radio convention has been made possible through the generosity of the Huntsville Hamfest Planning Committee and its Chairman, Walter "Scotty" Neustadter, (W4WW).

As "Young Ham of the Year," Andrea Hartlage, will receive -- courtesy of Vertex Standard USA -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu ham radio equipment. CQ magazine will treat Andrea to an expense-paid week in Spacecamp Huntsville, and will present her with a variety of CQ products. Amateur Radio Newsline™ will provide Andrea with a commemorative plaque at the award ceremony. The cost of year's plaque has been underwritten by Dave Bell (W6AQ) - President of DBA Entertainment Inc., Hollywood California.

The corporate underwriters of the "Amateur Radio Newsline™ Young Ham of the Year Award" are world leaders in their respective areas of Amateur Radio product support. Vertex Standard USA, Inc. is a trailblazer in the design, manufacture and distribution of high quality YAESU Amateur Radio and commercial two-way radio equipment. CQ magazine is considered the trend-setting publication serving today's modern radio amateur.

The Amateur Radio Newsline™ Young Ham of the Year award program, (formerly the Westlink Report Young Ham of the Year) now entering its 20th consecutive year, is presented annually to a licensed Radio Amateur (Ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his community or the betterment of the state of the art in communications through the Amateur Radio hobby/service.

Past recipients of the Young Ham of the Year Award, all of whom epitomize the heart of dedication to their nation include:

Shawn Alan Wakefield, WK5P, of Bartlesville, Oklahoma (1986)
David Rosenman, KA9PMK, of Muncie, Indiana (1987)
Jonathan Binstock, NK3D, of Potomac, Maryland (1988)
Erin McGinnis, KAOWTE, of Topeka, Kansas (1989)
Mary Alestra, KB2IGG, of Staten Island, New York (1990)
Richard S. "Sammy" Garrett, AAOCR, of St. Louis, Missouri (1991)
Angela (Angie) Fischer, KBOHXY, of St. Louis, Missouri (1992)
Kevin Boudreaux, N5XMH, of New Orleans, Louisiana (1993)
Allison Zettwoch, KD4CKP, of Louisville, Kentucky (1994)
Adam Weyhaupt, N9MEZ, of Alton, Illinois (1995)
Toby Metz, KB7UIM, of Boise, Idaho (1996)
Brian Mileshosky, N5ZGT, of Albuquerque, New Mexico (1997)
Richard Paczkowski, Jr., KF4BIA, of Edgewater, Florida (1998)
Michelle Swann, KE4EZI, of Warner-Robins, GA (1999)
Christopher Arthur, KT4XA, of Russellville, AL (2000)
Patrick Clark, KC8BFD, of Charleston, WV (2001)
Josh Abramowicz, KB3GWY, of Reading, PA (2002)
Jay Thompson, W6JAY, of Santa Ana, CA., (2003)

The award sponsors wish to also thank CQ magazine, Worldradio magazine, QST magazine, the ARRL Letter, and the Radio Amateur Information Network for their generosity in assisting in soliciting nominations for the 2004 award.

He's posting it because he's hoping to find a SUCKER to sell
this piece-of-crap excuse for a non-antenna/true-dummyload.
You are 100% correct Len. The Isotron antenna, just like the
Isopole which preceeded it, were/are/always will be PURE SHIT
and utterly useless for any type of ham radio usage. Thank glub
that AEA is out of business and can't pass on their shit-ass'ed
halfwit products to a new generation of hams. Now if we could
only duplicate the same results with MFJ and Radio Shack !

Personally, I think the virus writers are doing our country a great
service. If it were not for the virus writers finding these security holes
in software that our gov and major corporations use, a terrorist could
unleash a whole bunch of viruses all at one time shutting down our country
at a critical moment.

In fact the way I see it, there is so much money being made in anti-spam
and anti-virus software that MS would be a fool to fix the problems.

All you windoze lusers can keep rebooting and reloading your computers at
the same time you spend more money.

Why, yes, they did, but it appears there were questions surrounding the
moose's final exams. It appears he was spending a lot of time doing
campaign work in another State.

Hi - I'm new, I just passed the technician no code today. I'm pretty sure I'd rather bypass VHF/UHF and go right to shortwave so I'm learning morse and plan on taking the general within a week or two. I'm wondering what would be a good choice for a shortwave transciever (maybe 17 meters or 20 meters). I'm looking to do DXing (at least cross-country (USA)) and want a band where I can use CW and voice. I'll be living most of the year in Florida (college), the rest of the time in NY. In Florida I'll be living on the 17th story of an apartment building so I'm not totally sure how difficult it will be to get an antenna setup working well. Besides advice on a radio model (cheap but OK quality if possible), antenna choice and setup, I'm also looking for some good FAQs on the net for using shortwave and ham stuff in general. I did some searches and found some good stuff but not that much in-depth info.
thanks, dave k

Hello Dave!

Here is my suggestion.

1. A solid state rig with general coverage receive capability that
runs on 12 volts. A good choice would be a Kenwood TS-140S, Icom 735,
or a Yeasu FT-767GX. These radios are fairly old and can be had in
the $250.00 to $350.00 price range.
2. A 20 AMP 13.8 Vdc power supply for the above I've seen power
supplies such as the Astron RS-20A going for around $50.00 used. A 12
volt Deep Cycle Marine battery will work as long as you have a fully
automatic charger for the battery. Warning; Using a battery to power
the rig in doors is NOT recommended unless adiquate ventilation is
provided. NEVER recharge the battery indoors or with the radio hooked
up.
3. Antenna. Here you have many choices. You can build a good dipole
antenna for less than $30.00 including coax cable. Of course you will
need one for each band you will operate on. Or, you can build a
dipole antenna for the lowest frequency band you will operate on and
feed it with 450 ohm ladder line. This will require that you purchase
a manual antenna tuner that has a balanced feed line output to tune
the antenna to the radio. If you do not have the room or the trees to
install a full sized dipole antenna, you may be able to put up a TV
mast on a gable and place the center of the dipole there. Also, you
can put up a good vertical antenna. A Hustler 5-BTV would be a good
choice, so would a Butternut 5 band vertical. These vertical antenna
work best when mounted on the roof of your house with a radial ground
plane system. However they will work well mounted on the ground with

a ground plane system installed. I have seen good HF vertical
antennas go for as low as $25.00 at flea markets and Ham fests.

A great source for additional information would be the ARRL web site.
go to http://www.arrl.org and have a look around.

Another poster has already given you some good setup/equipment
recommendations so I'll just mention reference material. For what you are
interested in, the ARRL OPERATING MANUAL is quite complete.

The best rig for any _REAL_ Radio Ham is that which he makes
for himself. Anybody who goes out and buys off-the-shelf
from a shop is, in essence, no different to a CBer.

10-4 Good Buddy!

The article at http://tinyurl.com/4s6qg calls into serious question the manner in which the FCC allocates spectrum space, and even suggests that the FCC is itself in violation of the Communications Act. It seems that the Washington Times thinks that special interests are at work at the FCC and that Congress needs to step in.

Can anyone say "BPL?"

I'd go for something like the TS430 or TS440 with it's small size and general coverage receiver besides great ham band transmitting.
Dorm living at 17 floors up sounds like a wire dropped out the window at night with small antenna tuner. You're not going to have any room for feedlines.

Should work great !

A long time ago I had a 2m AEA Isopole antenna that seemed to do pretty
well. I sold it when I moved.

As for the Isotron, I notice that, out of 19 reviews on eham.net, it
gets mostly 5/5 and 4/5, with only one review worse than that -- a 3/5.
Average is 4.7/5. One user deals specifically with the claim that it's
the feedline that radiates rather than the antenna, noting that his
feedline is mostly lying on the ground with the braid grounded at both ends.

I dunno: it may not be the world's best, and it may be overpriced for
what it is, but it doesn't sound like junk to me.

Hello, Chris

What is so surprising that the FCC should follow king Bush ... er, President Bush's lead? If Congress steps in (and remember that we have the best government money can buy), they simply have to re-write some legislation so the FCC can continue to help Congress' well-heeled friends.

And they won't have to write any amendment to the constitution!

When the administration decides they don't want anything to do with a previous agreement, they can simply pull out. I don't see any surprises heading our way. The only answer is for the average amateur is to try and save up some money and raise his/her output level the same 10 dB that BPL will allegedly "only" add to the background noise :))

I would, however, suggest we invest in clean, legal amps and not try SSB or AM with some of the alleged class "C" boxes they sell for 11 meters LOL

BTW, this is off-topic, but did anyone notice that Japan has given the green light to human cloaning experiments? Most interesting what Professor Steven Hawking has to say on his website about genetic engineering (this was on his website long before the Japanese announcement).

Thankfully, I doubt I'll be around to witness the outcome of human genetic engineering. You think we have problems now?

Pardon me, I think I'm going to start on a half-wave beverage antenna. 160 meters. I'll lay in the necessary cases of beer tomorrow. I may not be in any shape to see any more comments on this for a week ;)

(49K of 'first cold-pressing' BS mercifully snipped)

Baaaaaaaaaaaaaa.....................
hahahahahahahahahah!!!!!!!!!!!!!!!

I have seen some kook rants online
but this one takes the wedding cake!

Hey Nathan, I was an engineer with
Douglas Aircraft Corp and was among those who
oversaw the construction of the Apollo
rocket stages for the Saturn V. I guess
in your twisted world we built those
building-sized Rocket Stages
just for show when they went up into space.

Pull you head out of the commode please.

> The Isotron and Isopole antenna are totally unrelated. The only thing in
common is the prefix of the name.
The Isopole employed commonly accepted quarter wave skirts to choke off out
of phase RF from the support mast and coaxial shield. The Cushcraft Ringo
Ranger emplys 1/4 wave radials instead of the 1/4 wave cones used by AEA-
same mechanism

From reviews on the AntennEX site, the main radiation from the Isotron is
the outer shield of the coaxial feedline not the antenna.

NEED STUFF - come check into the 146.64- saturday night net: check out the deals below

---
Saturday, July 24, 2004 traders net.

W4TQL- Don

Is selling a heath kit model SB2000

Price: $800.00 or best offer

Contact: (352)-854-3327 or kf4qljdon@aol.com (Please put radios in the subject box)

KF4EJS- Chris

Is selling a Yeasu FT-2800M. 65 watts, wx alert, large display, in a box with manuals.

Price: $125.00

Contact: (863)-853-5839 or kf4ejs@msn.com

KC5IBF- Jason

Is selling an Alinco DR-M06 6 meter FM transceiver. 50 watts

Price: $125.00 or trade for a 2meter/440 hand-held (No short size handheld if trade)

Wants a maha battery charger for a MH-PB32 batteries.

Contact: (727)-534-5828 or jmyers8@tampabay.rr.com

73,

Shoen

KG4YMB

Here are the listings for the 64 traders net on Saturday, July 17, 2004

KD2H-Al

Wants a 440 Hand held

Contact: aslowman@aol.com

N9EE- Ron

Wants a 14 inch computer monitor

Has a Imac 4cx16000A tube

18000watts

Price:$100.00

Contact: (813)-376-6575

KF4JED- Ron

iCOM IC706MKIIG with a 35amp power supply

Contact: (863)-398-0881

KF4RTE- Bryan

Wants a HF Switch that will hold 4 antennas.

Contact: kf4rte@ij.net

KA1WBE- Pete

Wants a Kenwood 820 HF rig

Contact: ka1wbe@hotmail.com

WA4EX- Sonny

Has a cushcraft rotaible dipole that covers from 10 to 40 meters.

Price:$150.00

Contact: (813)-782-7244

N2LZV-Ken

Has a techtronic ophiloscope T921 in perfect working condition

Price: $50.00

Contact: (727)-320-0807

N9ZN- Monty

Wants a PL tone decoder for a Yaesu FT8100R

Contact: (813)-265-3965

73,

Shoen

Traders net Saturday July 10, 2004

KG4COQ- Don
is selling 3 national receivers
MC60 Special- Table top
Two larger receivcers
Contact for price

Also selling a murcuary vacume tube om meter
No manual but has the leads for it.
Price: $10.00

Also selling a AEA node controller
Ratpack PK232MBX
Price: $30.00 or best offer

Also selling a 1950s vilco radio
Transworld
Price: $25.00 or best offer

Has a 90ft alumium tower
Light, heavy duty, Excellent condition
Price: $200.00

Contact: kg4coq@hotmail.com or (352)-597-8022

WX4F- Eric

Needs a hand mic for an iCOM 207H

Contact: wx4f@aol.com or (813)-685-1869

KG4ZSN-John

Silvercom 10-11meter vertical antenna.
Price: $45.00

Contact:(727)-455-1046

KG4RMD-Jay

Has a G5RV antenna
1 month old
Price:$25.00

Has two 5/8 inch wav ratshack 2m antennas mag mount
Price:$10.00 each

Yeasu FL-2100B AMP
Price:$275.00

Nah, we aren't talking about buying new gear off the store shelf at these budget levels, but older used gear, right?

In terms of bang for the $$, these older rigs seem to be a "sweet spot", more features than the pre-IC tube/transistor combo rigs, but without the overkill of many new and highly priced current rigs.

A good resource is the ARRL gear reviews in QST (local library, or online if you know a local member or have a subscription to QST, see www.arrl.org members's site for up to the latest reviews ;-), there was also a 1991 ARRL Equipment Buyer's Guide (IIRC title) which would be useful for older gear, again with reviews of the kits. Lots more tech analysis and pros/cons than the online sites, which may overlook many issues or lack gear to make useful comparisons.

and one major benefit of commercial gear over homebuilt rigs is the relatively high resale value and ease of resale vs. even well built homebrew designs. By the time you add in cost of design and development and test gear, I have found that homebrew designs are the most expensive way to go (possible exception is QRP kits like the Pixie-2 ;-)...

regards, bob monaghan

You can copy code anyway you want to help you with the exam.... BUT..... now days, the tests MUST BE "fill in the blanks" AND, should you fail that exam, the examiner can look at your code copy for the 25 straight characters - but YOU should have those dots and dashes translated to letters, as it isn't the examiner's place to decipher the message, it is YOURS.

AS I said, if you fail the "10" questions, they can fall back on your hard copy. THAT needs to be cleaned up. They aren't required to decipher your writing.

We had a guy fail once in the questions. He "said" he copied it perfectly. Neither of the 3 of us could make out a letter of what he wrote. He had Parkinson's. We hated to do it, but we had no choice but to fail him. We couldn't read his copy to pass him. We each tried desperately to read it but we couldn't make it out. It was "chicken scratch" in the truest sense, not to make fun of his disability. WE felt bad for him, we really did.

Subject: ham testing
Sent: Sunday, July 11, 2004 4:59 PM

Hi to all,

At our 64 group field day here in west Pasco last month we had a ham testing session. We would like to continue this effort and plans are being made to have another in August somewhere in the Oldmar area. Details will follow.

Know there are other groups such as CARS that give testing monthly. If anyone has info would be glad to announce on 64.

One note for those taking the General. As of July 1, 2004 a new General question pool is in effect and all General testing will be using this pool. You can go to www.arrl.org and get the pools for all 3 classes. With the General they have the old pool, but not obvious about the new pool. Just have to select under the new pool either plane text or Adobe versions.

I have downloaded the 3 pools and put on disk and if anyone wants it let me know. I will supply on disk and let you print out...each is 80 or more pages.

I also have a code practice program on disk running under DOS so about any PC will run the program. You simply load and enter the speed. It is a sub-version of the code program we use on 64.

We still run code practice on 64 each day at 10 AM and 7:30 PM at 5 wpm. Until the code goes away, which will problable happen in 2005, we will try to continue to send the practice. For now reality is if you want HF you must pass the code.

Well let me know if you need the question pool and or code practice disk...they are free.

Field Day and Using a Weather
Balloon

by: Ron, N9EE
July, 2004

The below is experience of using a weather balloon for a Field Day
antenna project.

As we announced for our 64 group Field Day here at the Werner Boyce
Salt Springs State Park (not open yet) here in west Pasco last month
one item of interest to many was the use of a weather balloon for
erecting some HF antennas. The following is some history and info of
the balloon we choose, legal information and results of our
experience. Hope it might help for those who want to give it a try.

From the internet, the source for all knowledge of which most sane
people have little use for, we found some good info on using balloons.
The FAA has a publication of regulation at
www.faa.gov/avr/AFS/FARS/far-101.txt. It explains what one can and
cannot do. One item of interest is the balloon is limited to a 5 lb
payload. Also one must notify the FAA if going above 200 ft even if
you are simply letting the balloon go such as in the use for ATV
projects which typically carries a video camera with a transmitter to
as high as 100,000 ft.

Another good site is www.nordicdx.com/antenna/special/baloon.html
which give some good info from experience on using a balloon for
antennas.

Also some good info came from ebay.com. There are many listings for balloons. Most are party or advertising custom type and range in price from $1 to over $5000. I found info on a balloon I was trying to use. It was an official weather balloon made for the NWS. I had obtained a ML541/A shaped as a sphere which was used until the mid 90s. The last buy by the NWS was 5000 units at $191 each, about $1,000,000 worth. It can be inflated up to 12 ft diameter which requires about 900 cubit ft of air. Helium here goes for about $75 for 210 cubit ft. The equation for determining the volume of a sphere is:

Volume = V(S) = 4/3 x 3.14 x r cubed (3.14 is pi and r is sphere radius)

volume = 75 cubit ft for 5 lb = 4/3 x 3.14 x r cubed means r= 2.616 ft or 5.2 ft diameter

Fifteen cubit ft of helium can lift 1 lb so to lift 5 lb requires about 75 cubit ft. The ML541 was purchased in Tampa, FL surplus new in it original sealed pack for $32. On ebay with shipping it goes for about the same.

Field Day Experience

The problem with this balloon for antennas is that it is a sphere. This gives a large face to the wind which kept trying to, and often did, blow the balloon down into the ground. Also the weather balloon was not made to have it tied down and simply lift a payload, but rather to be let go and rise on its own. The balloon eventually became damaged after a couple hours of the wind tugging at it. The winds were I would say mostly at only 5 mph.

The solution seems to be a cigar shaped balloon with rear fins which will cause it to face into the wind and have a small face. Thus the wind will not affect it much. Most balloons one sees at say car dealers are this type and for good reason. If you are in an area with no wind then this should not be a problem.

Getting the Balloon Ready

First we filled the balloon with about 110 cubit ft of helium. This can be puzzling due to the balloon did not look like what one would expect. The fill valve was at the top with a skirt about 5 ft long to hang from the bottom. Also due to the very thin rubber material of .0035 inch much care must be taken to protect the balloon.

Then after getting the balloon off the ground we tied it down but again the wind kept it low, less than 25 ft with at least 50 ft of rope.

Another problem with this balloon is helium is 2nd only to Hydrogen in the size of a molecule. Hydrogen is one proton and one electron and Helium has 2 of each. Hydrogen has more lifting power, but for obvious reasons is not used much, but it is used some. This small

molecule has the problem of being able to leak through many materials. If you ever got a helium balloon and took it home one sees it stay up, but after a day or so it is laying on the floor. The weight of the material becomes too much for the helium left after some leaked. For balloons ment to be used for long periods of time the lining is most often thicker rubber. The lining in the weather balloon is 0.0035 inches and was made for a short flight.

The Antenna

The antenna we planned on using was 80, 40 & 20 meter dipoles fed in the center with RG58. We calculated we could go to 200 ft with this weight. Some have used long wires with a tuner with success. I wanted a real Field Day antenna meaning tune and talk; don't tune the rig up, but tune only the freq and transmit. Of course an automatic antenna tuner would help.

Well we did not get off the ground because of the wind and the sphere shaped balloon. If I can get the right type I would like to try again. The total cost for this project was about 6 hours and $80, but we still had fun. Heck that is what ham radio is about and as for Field Day learning the dos and don'ts might just help when the real reason we have Field Day come along.

BPL NEWS:
ARRL BOARD MEETING IN CONNECTICUT
ARRL President Jim Haynie, W5JBP, is wielding the gavel as the
League's
Board of Directors meets Friday and Saturday, July 16-17, in Windsor, Connecticut, for its second meeting of 2004. Prime among the
discussion
topics will be broadband over power line (BPL) and strategic planning. Board members will review the current status of BPL and discuss any additional actions the League may wish to take to address potential interference. They also will hear a status review and revision of the ARRL's Strategic Plan and select strategies to implement in 2005.

A significant portion of the agenda will be given over to hearing and considering reports from committees and coordinators. Among others,
Great
Lakes Division Vice Director Dick Mondro, W8FQT, will speak for the Ad
Hoc
Committee on ARES (Amateur Radio Emergency Service) Communications,
which

he chairs.

The Board also will hear briefings on the status of current Amateur Radio-related legislation and on the progress of various regulatory issues. Recent proposals now before the FCC, including one from ARRL, would further restructure Amateur Radio licensing.

Bestowing certain honors on several members of the Amateur Radio community
is a traditional part of each July Board session. The Board is expected to
name winners of the Hiram Percy Maxim, the Herb S. Brier Instructor of the
Year, the Professional Educator of the Year, Technical Service, Technical
Innovation and Microwave Development awards. A recipient of the Philip J.
McGan Memorial Silver Antenna Award--for exemplary public relations

achievement--also is expected to be announced.

Special guest at the July Board session will be Radio Amateurs of Canada
President Daniel Lamoureux, VE2KA, who greeted the opening session July
16.

OHIO ARRL SECTION MANAGER ANNOUNCES BPL TEAM ORGANIZATION

Amateur Radio operators in the Cincinnati area are organizing a Broadband
Over Power Line (BPL) team to monitor a planned BPL deployment. In
announcing the move, ARRL Ohio Section Manager Joe Phillips, K8QOE, says
the group will study the effects of a BPL rollout in two neighborhoods by
utility Cinergy Corp. The new group, consisting of a half dozen
engineering professionals and some 20 others, will operate as a
subcommittee of the Greater Cincinnati Local Interference Committee (LIC).
Kirk Swallow, W8QID, will head the BPL/LIC effort.

AMSAT-OSCAR Echo Satellite Launched!
The AMSAT-OSCAR Echo Amateur Radio satellite and several other payloads launched on schedule June 29 at 0630 UTC from Baikonur Cosmodrome in Kazakhstan. Ground controllers made their first contact with Echo at 1452 UTC and collected some telemetry to analyze before shutting down the 435.150 MHz digital downlink transmitter.

''This achievement is due to many individuals around the world, who have helped in the design, building, integration, testing and launching of this satellite,'' said AMSAT-NA President Robin Haighton, VE3FRH.

Was he able to read his own writing? If he could, you should have had him
dictate the answers to the 10 questions, and had one of the VE's transcribe
for him. If he failed the question part, you could have had him read back
his copy, and had a membr of the team transcribe. This would have fallen
under reasonable accomodation for a disability.

My understanding of DCS is:

DCS (DTCS) [Digital (Tone) Coded Squelch]. A somewhat "private" calling system which can be used on some repeaters, but it is more commonly used on simplex for busy channels (e.g., Dayton Ham Fest). Appears Kenwood and Yaesu calls it DCS and ICOM's term is DTCS. Also DCS may have other variations such as Yaesu ARTS. It is digital data or code words that are transmitted with or without the voice audio at frequencies below 300 Hz. Not all Ham rigs have these features - check your manual. Nor do all repeaters support this function ask the repeater guru. DCS will squelch down a receiver until the proper codes are received thus is used to silently monitor busy channels. Not the same as Tone Squelch.

Unlike CTCSS, which uses a continuous tone, DCS uses code words, which are unique, and all code words may be used on the same channel without interference. There are 104 standard DCS codes -- see your manual. Your brand of radio may or may not have all of the standard DCS codes. To avoid transmitting on top of another transmission, one must take care to observe the S-Meter and/or the "Busy Light". Both Ringer and Tone Scanning functions are available with some systems.

There you go -- you decide.

I have it -- used once at a Ham convention simplex frequency. Our local repeater does not support it.

Actually, NO, he couldn't even read his own.... I kid you not. We tried to get him to decipher it. Any one string of it which would have made the necessary string of characters to allow him to pass. We spent a good 20 minutes trying to decipher it with his help. His writing was HORRIBLE. He basically answered the questions from what he "thought" he copied. It was really sad.... Believe me, we looked at several things we could have done "otherwise". Things like break the test down into segments which the rules allow for. We offered to retest him, but he wasn't up for it. I think too, what made it worse was his "test day jitters" kicked in with his Parkinson's - BIG TIME. The poor guy looked like he was going to have a heart attack when he finished his test before handing it in. He was a wreck.

My team is especially careful when it comes to doing those with disabilities. We've tested blind, deaf and so on. It truly was a sad moment. We seen him trying and frustrated beyond belief. If there were a way we could have passed him, we would have. As I said, we felt terrible. But, we must stay with in the confines of the rules.

You can usually tell as you sit there and watch over the masses testing, who is prepared and who isn't. Even the prepared come in with jitters quite often.
Was "that" guy prepared? It's hard to say. Though he "appeared" to be whizzing along with the code, he also "appeared" to have "test day jitters". That combined with his physical problem - really played havoc with him in the end. Had we known in advance of that test that he was so bad off, we could have made plans to test him differently. We had no clue. He was a walk - in - if memory serves me correct. All of the other folks with disabilities phoned us in advance to let us know, and we'd make arrangements to deal with it. We would have tested him separately. Not knowing his condition up front or being forewarned of it's intensity, he was tested with the others. The "examinee" has an obligation to let the team know in advance of any problems. Not all, even with Parkinson's are readily noticeable. I know people with Parkinson's - some have a mild tremor - barely noticeable, some - more advanced.
Yes, the man was a wreck after the test and his Parkinson's showed up big time at that point - BUT.... there is NO WAY to tell if he actually knew the code. While we can feel bad for his condition and the effect it "may" have had, we can't ever know or feel bad - for any part of perhaps not being prepared - not knowing the code as well as he may have thought. Liken it to being in school when your teacher gave you an exam where you had to write a paragraph - for the answer. You didn't know the answer, sooooo what do some people do? Doodle on the paper. Make it "appear" as though they're writing. OR plain write a bunch of garbage. We had NO way to tell if he was a legit candidate to pass the code. I don't know if he ever passed after. Never seen him since, not even at a hamfest. Had we known in advance of his condition

and were able to test him a bit differently, THEN we may have known if he truly was prepared for the code test.

That was not allowed when I took the test last October. Think about
it...if you write down the dots/dashes as you hear them, then go back
and translate them when you're done copying, you're not really copying
the code at the required speed. I guess what they allow all depends
on who's doing the testing.

Thank you for taking the time to read this.

Your Freedoms are in jeopardy! RadioShack Corporation has filed an injunction in a Texas Court that has shut down an opinion website, http://www.radioshacksucks.com, in direct violation of the Freedoms of Speech, Expression and Peaceful Assembly, as guaranteed to us by the Constitution of the United States. If other companies learn of this, they will use it against any website that speaks out against that company. This is extremely dangerous, as it will change the face and scope of the Internet.

If Big Business continues to dominate our lifestyles, we will lose our freedom to worship as we see fit. We will lose our freedom to vote for the candidate that we think will do the better job. We will lose our freedom of the press to accurately report on current events. We will lose everything we have fought and died for in the past 228 years Do not tell this to the descendants of those that have bravely fought in previous battles and wars, for their ancestors would have died in vain. The Constitution will have been overruled by Big Business.

RadioShack is on a vicious witch hunt and will not stop until they dominate our lives. RadioShack must be stopped now, before it gets any later or any worse.

Here is what you can do to help: copy this letter and add your signature to the bottom. Mail it to the following people:

Leonard H Roberts
CEO RadioShack Corporation
100 Throckmorton Plaza
Ft Worth, TX 76102

The Honorable Kenneth Curry
401 W BELKNAP
153RD DISTRICT COURT
FORT WORTH, TX, 76196-0225

Thank you for your help and support.

Some or all of this "may" sound questionable or gray, but here me out as you read. To answer your question....Maybe so! Here's another example and how "I" look at the situation you've raised. May be comparing apples to oranges - BUT... You're writing down the code as you perceive it as the message is being sent. You're skipping the spaces for the letters and so on that you don't catch or plain do not know. The Code test ends. YOU the examinee are responsible for filling in the blanks you left in whatever form they occurred. AND, given some people DO misspell, we are not allowed to allow for that error. Example: TWO is sent, but you fill in TOO. BZZZZZT. Won't pass. You must show in the copy that YOU deciphered it letter for letter, character for character and so on as it was sent. Yes, in MY opinion - you can write down the _._ for a K, but YOU have to tell US what it was "supposed" to be. YOU are supposed to be copying a coded message and deciphering it into plain English. It still comes down to the examinee deciphering what they wrote. The exam is 10 questions based on the code message sent. YOU copied the code as "you" perceived it to be based on your knowledge of the code. You answer the 10 questions (now days fill in the blanks) from your copy for the answers. Should you fail the 10 question exam, the exam team can go to your code copy to see if you copied 25 straight characters/letters, etc - to pass, showing a one minute solid copy. It HAS TO BE in PLAIN ENGLISH. I would fail someone too, if they came to my desk with a bunch of dots and dashes on paper. I wouldn't even take a second look at it. When the code is sent - we ALL hear the dots and dashes or to be more proper - the dits and dahs.... Now they're supposed to tell me in plain English what was sent. THAT is the difference. So, No - in reality, we're not doing anything different. It is usually stated - be it on the tapes or by the examiners - at the end of the test send, to "clean up your copy". Which means fill in any blanks you may have, make it legible, etc. Then the questions are presented for answering. And so it goes from there.

To me, I don't care if you write down the whole damned message in the dits and dahs. I don't really know of ANY examiners who actually watch what you're writing down! They're usually watching the masses to be sure of no cheating i.e.; hidden code decoders, examinees looking at someone else's copy, etc.. NOT looking over your shoulder to possibly "spook" you. But when the tape is done, YOU better go back - and over each series of those dots and dashes, tell me what they are supposed to be IN LETTERS, CHARACTERS and so on. AND even if you have _._ when it was a K sent, but you put in a L there, you will not pass - should it come down to me reading your copy in lieu of your failing the 10 question exam. IF you were to copy it all in Dots and Dashes and I'm not over your shoulder watching, how the hell would I know what you did, so long as it's deciphered properly and maybe the dits and dahs erased? Call it gray all you want. We're required to see the message as it was sent - in PLAIN ENGLISH for one solid minute - when you

turn in that code copy, if THAT is to be the determining factor of pass or fail. IF some examiners won't allow you to copy dits and dahs, not even for you to decipher before turning it in, that is on them. I can't say they're right or wrong. Actually, I'd have to agree with them. I gave the end product as we are supposed to get. THAT is what WE expect. Even if you are copying it all in dots and dashes, it doesn't mean you'll pass the 10 question test from your copy - since you'll then have to sit there and decipher it over and over and over to put it all together to form the words to the answer. Quite frankly, writing down dits and dahs then having to go back to decode, IS a waste of time. IF you don't know the letter or so on as it is sent, writing it down in dots and dashes ISN'T going to make it come to you later either in most instances. You should know the code much better than that. It should pop into your head the moment the sound is heard. 5 WPM is slow enough that you have time to think about it before writing it down. Bottom line, no matter how you copy it down for reference to use on the 10 question exam, IF you're missing more than a few letters, or characters, you simply are not ready for that test.

What's wrong with Radio Shack, anyway? I bought something there both yesterday and today. Had what I wanted a cheap enough. No problems.

Anybody can sue anybody. Why should this upset anybody. That's the American way. Sue enough people and you might even become a politician......maybe even a presidential or vice-presidential candidate. My freedoms are certainly not in jeopardy because RS sues somebody....quite the opposite. This just shows what freedoms we have.

(from alt.tasteless:)

"...you'll feel a slight pressure"

Saddam needs a urologist:

http://www.cnn.com/2004/WORLD/meast/07/29/saddam.ap/index.html

"Deposed Iraqi dictator Saddam Hussein suffers from a chronic prostate
infection and has refused to have a biopsy to rule out any chance he has
cancer, an Iraqi official said in an interview Thursday on Al-Jazeera
television."

--------- cut -------

Uhhhh, gee ... why would Saddam possibly object to a prostate biopsy if
he's having problems? Wouldn't *you* want a prostate exam from a
coalition forces doctor? Hey, I wonder if Lynndie England is available
with her big industrial rubber gloves?

It looks like your team did everything that it could given the circumstances.

About the only things that I could think of would be to retest at another
date -- and provide him a keyboard to type the code as he decoded it -- if
he was able to given the Parkinsons problem. If he could not type, give him
headphones and have him dictate while a team member transcribes. There
should always be a way to accomodate someone if enough warning time is given.

Amateur Radio Newsline™ Report 1407 July 30, 2004

Amateur Radio Newsline report number 1407 with a release date of Friday, July 30, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ham bands get clobbered by the sun and some of the results are amazing. Find out the details on Amateur Radio Newsline report number 1407 coming your way right now.

(Billboard Cart Here)

**

ON THE AIR: GEOMAGNETIC STORM AND HAM RADIO

A huge geomagnetic storm has hit the Earth, wiping out a lot of High Frequency communications. At the same time its making the VHF and UHF bands a veritable D-X playground. Bill Pasternak, WA6ITF, has more:

--

According to a propagation bulletin issued on July 25th by CQ Magazine's Tomas Hood, NW7US, the estimated planetary K index reached a level of 8, with the Bolder, Colorado K reading a level 7. Translated into everyday talk, that's one heck of a solar storm and it does odd things to radio communications. All you need do is turn on a 6 or 2 meter CW or SSB radio to hear it for yourself.

Solar storms bring with them an increase in Aurora and Aurora based communications. Reports over the VHF Reflector say that this one was no exception. According to Dave Wenner, K3KEL, in Benton, Pennsylvania, his 150 watts to a homebrew 9 element Quagi antenna made it possible for him to make dozens of 144 Mhz contacts. These ranged from Maine across to Missouri plus Nova Scotia, Quebec, and Ontario Canada. Dave's posting said that he did not work any stations to the South but that they were there. He says that he heard K4QI in North Carolina's grid FM06 very strong toward the end of the session.

Wenner's was typical of the reports posted to the VHF Reflector. Many of them said that this was the best Aurora session heard in years.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

How long does a solar storm like this last? NW7US reports that as Saturday, July 25th progressed, the geomagnetic field again became highly active and reached storm levels. He says that it has continued to get more intense, reaching very high storm levels. As the week progressed more Aurora contacts were reported world -wide with some on the 222 Mhz band and above. (NW7US via VHF Reflector)

**

PROPAGATION: IS THE SUN HARMING EARTH

Meantime the CGC Communicator cites an interesting propagation report. One that says Greenland's ice cores indicate that the sun is more active now than it has been at anytime in the past 1,000 years.

That report also says this has caused a warming trend here on Earth. As a result of this and other solar observations the pseudo-science doomsayers have been quick to jump on the gloom and doom bandwagon. They are out there predicting dyer consequences for those of us living here on the surface of our home planet Earth. But is any of this based on reality? That's what RAIN's Hap Holly asked CQ's Thomas Hood, NW7US:

--

Audio report only. Hear it in the MP3 version of this newscast downloadable at http://www.arnewsline.org/quincy

--

Hood says that you should enjoy the radio talk about the phenomena but not to take it seriously. (CGC, RAIN)

**

ON THE AIR: THOMAS HOOD ON RAIN

By the way, you can learn a lot more about radio propagation and the effects of solar radiation on communications from Thomas Hood on this weeks RAIN Report. Its available right now on-line at www.rainreport.com or on the phone at 847-827-7246. You can read the article referred to by the CGC Communicator at http://news.bbc.co.uk/2/hi/science/nature/3869753.stm (CGC, RAIN)

**

VHF AND ABOVE: ARRL MULLS CVHF/UHF CONTEST RULES CHANGES

ARRL Director Tom Frenaye, K1KI, has also posted some interesting information to the VHF Reflector. He says that says that the work done by the VHF-UHF Contests/Awards Subcommittee has been completed. That the written report and along with some in-person additional comments were given during the ARRL Board's Program & Services Committee meeting on July 15th. That's just before the ARRL Board meeting that began on July 16th.

Frenaye says that the Program & Services Committee did not take action on the report and will study it during the next several weeks. In the mean time, the committee agreed with him that the report should be posted to the VHF reflector public consumption. It will also be sent to the Contest Advisory Committee for information and possible comment.

What will happen from here? Frenaye says that the Program & Services Committee will work with the Membership Services Department in Newington to take the recommendations any further. He says that some rules may changes and some may not. Except for possible changes to the 2004 E-M-E contest, K1KI does not believe you'll see any major contest VHF changes until 2005. He also notes that some recommendations may have to wait until budget resources are made available. The full ARRL Board does not normally get directly involved in contest rules issues as contest rules are usually not policy matters. (K1KI via the VHF Reflector)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the K8KZO repeater serving Portage Michigan.

(5 sec pause here)

**

HAM RADIO IN SPACE: ECHO ON THE AIR

I'm Bruce Tennant, K6PZW, with some breaking news that hams worldwide have been waiting to hear. This, as AMSAT announces that its new Echo satellite, now renamed AO-51 will be turned on for general use in FM repeat mode on July 30th at about 02:15 UTC.

Echo will be on for a trial period of about three weeks. During that time command stations will be watching the power budget and adjusting the UHF transmitter output as needed for management of the battery supply. Initially, the transmitter will be running at about 1 watt but if all goes well it will be slowly increased during the trial period.

Echo's uplink is 145.920 MHz using FM voice with 67 Hz PL tone (CTCSS) required. The downlink is on 435.300 Mhz, also FM voice. And like many terrestrial repeaters the downlink transmitter will only come on when it hears an uplink signal with a 67 Hz PL tone for about 1 second. After the uplink signals drop away the downlink transmitter stays on for 10 seconds. After that, the downlink signal goes away. You might say that the operation is just like a terrestrial FM repeater with a 1 second kerchunk filter and a 10 second hang time. The only difference is that this one is circleing the Earth in space.

Norm. (AMSAT)

RESCUE RADIO: UK FIRE EVACUATION BRINGS OUT HAM RADIO

RAYNET, the United Kingdoms version of RACES was recently called out during a very hazardous materials fire. Jeramy Boot, G4NJH, has the details:

--

On Monday the 5th of July at 19.55 BST Lancashire Emergency Planning called-out Rossendale Raynet to attend a Rest Centre in Colne. A fire at a building that contained an acetylene cylinder meant that local residents had to be evacuated.

About 40 people went to the Rest Centre but the majority were able to find accommodation for the night with friends or relatives. Social Services arranged accommodation for the remainder. Rossendale Raynet was stood down at 22.08 when the Rest Centre closed for the night.

Im G4NJH in Nottingham.

--

There were no injuries reported and the ham radio system worked flawlessly. (GB2RS)

**

ENFORCEMENT: FCC INVESTIGATING 1999 EXAM SESSIONS

The FCC has ordered thirty-seven hams to sit for retests. This, as part of an ongoing investigation of ham radio examination sessions held in Yucaipa, California, back in 1999.

The tests under government scrutiny were administered by a W5YI exam team. The exact test dates involved are those held on February 27th, March 27th, April 24th, May 22nd, June 26th, and July 31st of 1999.

This is one of the largest retest orders issued since the all volunteer testing program got underway in the early 1980's. (FCC)

**

ENFORCEMENT: HAM SURRENDERS LICENSE

A now former ham involved in a licensing investigation has turned in his ticket to the FCC. The Agency's Daryl Duckworth, NN0W, explains:

--

Frank C. Richards of Moers, New York, submitted his license KG2IJ for cancellation. In November of 1995 he had requested that the call sign KB4VU be changed to the next availlable and that the address be changed to Plattsburg, New York.

--

The FCC says that the call KB4VU actually belongs to one Frank C. Richards of Ft,. Meyers, Florida. It says that this Richards has never lived in New York and never requested that his callsign or address be changed.

After an investigation that lasted almost five months the New York Richards surrendered his ticket to the FCC on June 23rd. The FCC acknowledged receipt on July 6th noting that the Wireless Telecommunications Bureau has canceled that license and no further enforcement action is contemplated at this time. (FCC, RAIN)

**

ENFORCEMENT: $11,000 FINE AFFIRMED AGAINST CALIFORNIA HAM

The FCC has affirmed an $11,000 fine issued to a California ham. One whom the agency says caused deliberate interference to repeaters and then refused to accept several certified letters from the Commission.

The target of the now affirmed fine is Daniel Granda, KA6VHC, of Whittier California. As previously reported, back on March 31st the District Director of the Commission's Los Angeles Field Office issued a Notice of Apparent Liability for Forfeiture alleging that Granda deliberately interfered with two different repeaters. It said that when FCC notices were sent by Certified Mail, they were returned as unclaimed. But the FCC says that copies sent by regular first-class mail were not returned by the post office.

The fine is $7,000 for the alleged interference and $4,000 for not responding to FCC notices. Granda was given the usual 30 days to pay or to file an appeal. (FCC)

**

HAMVENTION: ARRL NATIONAL AND HAMVENTION COMBINE FOR 2005

Turning to the ham radio social scene, word that the ARRL has accepted an invitation from planners of Hamvention 2005 to bring the society's national convention back to Dayton.

According to General Chairman Gary Des Combes, N8EMO, ARRL Great Lakes Director Jim Weaver, K8JE, called shortly after the recent Board of Director's meeting. Weaver told Des Combes the League had accepted the invitation to hold the next ARRL National Convention at the 2005 Dayton Hamvention.

The combined show will take place next May 20th to the 22nd at its longtime home. That of coarse is the Hara Arena in suburban Dayton. (Hamvention©)

**

CONVENTIONS: K7UGA ON THE AIR FROM ARRL SW DIV CON

And the call sign of the late Barry M. Goldwater will soon be heard again. This, as special events station K7UGA takes to the air from the Southwestern Division Convention in Phoenix, Arizona from August 27th to the 29th.

This will not only be a chance for convention attendees to operate Goldwater's original Collins S-Line equipment but also to take part in an oral history project about Senator Goldwater that will begin recording at the show. Also, Goldwater impersonator Ben Tyler will attend the convention on Saturday afternoon to present his Goldwater "Autobiography".

Again. it all takes place August 27th to the 29th in Phoenix, Arizona. We will see you there. (SW Division Communicator)

ARNEWSLINE™ SUPPORT FUND REPORT WITH N6TCQ

Ladies and gentlemen, once again here is Amateur Radio Newsline's Support Fund Administrator, Andy Jarema, N6TCQ.

--

Continuing with our thank-you for June, we heard from Tim, N9TO and Carol Toman, WD9CNW of Westmont, IL; Ted Tsucalas, W0RMJ of Littleton, CO; Turning to CA, Leo Halog, KR6EG of San Francisco; Doug Cannon of Livermore; Monthly contributor William Walters, WA2IBM, of San Jose; monthly contributor Scott Hensley of the Area Communications Team, also in San Jose; Art Protas, KG6AY of West Covina; John Rice, KE6YFV of San Pedro and the Rio Hondo ARC of Whittier.

Thank you to everyone, and we promise to do our best to continue to earn your care and support.

A reminder that Newsline is a 501(c)(3) and California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. (ARNewsline™ Support Fund)

**

CHANGING OF THE GUARD: JOHN KRAUS, W8JK - SK

Some sad news to report. Word that noted astronomer and antenna designer John Kraus, W8JK, has become a Silent Key. According to reports from the ARRL and CQ Magazine, Kraus died on July 18 at age 94.

John Krasus was a member of the inaugural "class" of the CQ Amateur Radio Hall of Fame, a world-renowned radio astronomer and the father of the "Big Ear" radio telescope at Ohio State University. In the world of Amateur Radio he was perhaps best known as an antenna designer. His designs include the famous W8JK bi-directional wire beam as well as the helix and corner reflector antennas often used at UHF frequencies. (ARRL, CQ)

**

KAHN STILL TRYING TO TEST CAM-D

Broadcast entrepreneur Leonard Kahn opposes the AM HD Radio IBOC system and has long promoted his Cam-D system as an alternative. In his latest filing with the FCC for the IBOC proceeding, Kahn reveals he tested his Cam-D system on Nebraska's 50 kilowatt KRVN at 880 kHz. However, he told Radio World Online that, some employees found the sound unacceptable and the tests were discontinued. For more on this story, see http://www.rwonline.com/dailynews/one.php?id=5511 (CGC)

**

HAM RADIO IN SPACE: NEW KENWOOD ISS RADIO PROVES OUT FINE

The Amateur Radio on the International Space Station USA team has successfully completed a comprehensive checkout pass of the new Kenwood D700 radio system with Astronaut Mike Finke, KE5AIT. Utilizing ground stations in Greenbelt, Maryland, Orlando, Florida and Houston, Texas and linking team members in Kansas, Colorado, Maryland, Florida and Texas, the ARISS USA team performed voice and packet radio uplink tests to fully validate the Kenwood D700 system for future school group operations.

During the East Coast pass, the ARISS team were able to perform signal strength measurements and voice quality checks on 2 meters and 70 centimeters using the Kenwood D700 radio and the ARISS-built W A One antenna system. Mike Finke provided the on-board feedback to the team to help them understand how the
radio sounds on-orbit. Finke said that the signals from the 70 centimeter uplink signals were especially loud. (ARISS)

**

WORLDBEAT - CANADA: RESTRUCTURING ON ITS WAY

Back on Earth, Canada appears ready to restructure its Amateur Radio service and work is well underway.

Following extensive discussions with Industry Canada, on July 23rd, Radio Amateurs of Canada formally submitted its Proposal on Morse Code and Related Matters to that regulatory agency. According to an Radio Amateurs of Canada press release, little changed from the draft proposal that was posted on the society's web site back in 2003.

Radio Amateurs of Canada says that it is now up to Industry Canada to respond to the proposal. The current version is on line in both English and French at www.rac.ca (RAC)

**

WORLDBEAT - MEXICO: ALL N.A. ADOPTS U.S. HDTV STANDARD

Mexico has formally adopted the U.S. ATSC Digital Television Standard based on 8 VSB technology. This, for terrestrial broadcasting in that nation.

Canada adopted the same standard in 1997. The decision by Mexico to go along with the U-S and Canada means that ATSC is now the North American Digital Television standard. ATSC was also adopted by South Korea in November of 1997 and Argentina in October of 1998. More is on the web at http://www.atsc.org/news_information/press/2004/PR_Mexico_7-7-4.pdf (CGC)

**

DX

In D-X, word that husband and wife team EA3BT and EA3WL will be active from the Gambia through the 4th of August. They plan to operate as C56BT and C56WL on 40 to 6 meters SSB. QSL as directed on the air.

And Steve Burrows, M5BXB, will be on from the Czech republic as OK8XB until the 6th of August. The OK8 prefix is quite rare, and Steve will be attempting to make at least 1,000 QSOs on the HF, 6 meters and on 2 meter's from a portable location on Lysa Hora. Thats site is 1,324 metres above sea level in grid square JN99FN.

**

THAT FINAL ITEM: THE PHYSICS OF M&M'S

And finally this week the story of how a researcher with a sweet tooth has changed science. Amateur Radio Newsline Henry Feinberg, K2SSQ, has the rest of the story:

--

Princeton physicist Paul Chaikin's passion for M&M candies was so well known that his students played a sweet practical joke on him. The left a 55 gallon drum of the candies in his office. Little did they know that their prank would lead to a physics breakthrough.

The journal Science says that the barrel full of the oblate little candies made Chaikin think about how well they packed in. A series of studies have shown they pack more tightly than perfect spheres. This is something that surprises many physicists and Chaikin himself. So Chaikin and his colleague, chemist Salvatore Torquato, used the candies to investigate the physical and mathematical principles involved when particles are poured randomly into a vessel.

The report in Science says they found that oblate spheroids like plain M&Ms pack surprisingly more densely than regular spheres when poured randomly and shaken. That spheres occupy about 64 percent of the space in a container. M&Ms manage to pack in at a density of about 68 percent.

But one of the researchers had a more philosophical view of the experiment. Salvatore Torquato said that to him it is remarkable that you an take this simple system with common candies and probe one of the deepest problems in condensed matter physics.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, not to far from Princeton, New Jersey.

--

According to news reports, Mars Inc., which makes M&Ms, did not help sponsor the research although it donated 125 pounds of M&Ms to the two scientists. (Journal of Science, Science Online)

We would have done that, but never heard from him again. As I said, hadn't even seen him at a hamfest! So, not sure if he gave up, moved, or what. And he knew, we were there every month at the same time. So, it wasn't like he didn't know how to get in touch with us or anything. We had/have our exams well advertised with my phone number on Cable TV channels, our Nets, etc. As I said also, had we known he was coming in (he was a walk-in), with that problem, we would have tested him separately. We weren't told about it.

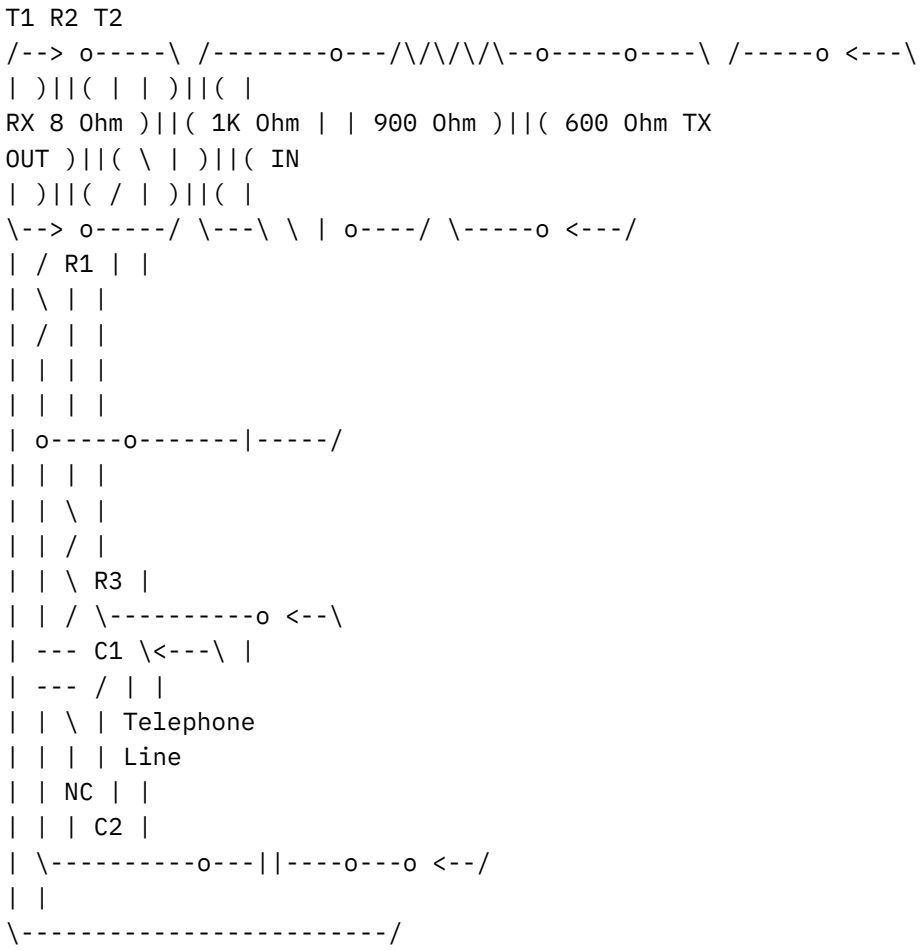
Lo and behold, I found another text-file in my ASCII archives containing the CORRECT schematic. (The schematic previously posted has an error; C2 should connect to T1 as shown below, else the telephone line won't be properly matched, as shown in my previous posting. I should've looked it over more carefully before posting it -- sorry 'bout that!)

...Dave, N6BHU

Wheatstone Bridge Phone Patch Circuit [from the mid-70s ARRL handbook]



Parts List

T1 - 1000 Ohm / 8 Ohm audio transformer (Radio Shack 273-1380, or equiv.)
T2 - 900 Ohm / 600 Ohm audio transformer (Triad TY-301p, or equiv.)
R1, R2 - 910 Ohm, 1/2 Watt composition, or metal-film resistor
C1 - 0.04 uFd ceramic, or mica capacitor

C2 - 0.01 uFd ceramic, or mica capacitor

If you have to write dots and dashes when you practice, then you just need to practice a little more.
Its quicker to write the letter - keep practicing - you'll get there. Shoot for 10 wpm - then 5 will seem easy.
When I was learning, there was a plateau at 10, then another about 15, thought I would never get the 20 - but practice made the difference - Y, G, J, F, and L (not to mention the numbers) were tough at first
almost every test will have 2 call signs, a QTH, an antenna type, watts being transmitted, a rig, and the operator's names.
The call signs will occassionally have slash and some letters or numbers after them.

823. The ARES Takeover Attempt - and Why...

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-01 10:57:18 UTC
From: Charles Brabham <n5pvl@sbcglobal.net>
Message-ID: <i04Pc.567$y94.134@newssvr22.news.prodigy.com>
Source record: 56885

Check this out, in order to understand what is being discussed, here:

Reference: http://www.arrl.org/announce/board-0407/

The ARRL set up a committee to look into digital communications for ARES last year.

Talking to one of the committee members early on, not long after this digital group was assembled, I was told that two or three affluent and powerful members of the committee had already decided the group's final conclusion, to utilize the Winlink 2000 system for ARES HF communications.

The six months or so that the committee "studied and discussed" the matter were a formality, a sham.

I know of three persons who attempted to inject a note of sense into the issue, but all attempts to suggest that anything other than Winlink2000 be used were rejected by the committee, often rudely and in one case the rejection involved name-calling and ridicule of fellow Hams that was entirely uncalled-for.

A note of sense? - As a digital experimentor, I know that finding space anywhere on the Ham bands to operate the new wide digital modes like PACTOR II and PACTOR III without interfering with other Hams is extremely difficult.

A PACTOR III signal is six or seven times as wide as a Packet signal, for example, and fifteen times wider than PSK31. - This proposal calls for dozens and dozens of these stations operating from NWS EOC's around the country - if the committe were being honest about its intentions.

The committee was not being honest about its intentions though, which may explain why repeated attempts to talk sense to this committee failed.

Not being honest? - Take a look at the pdf file describing the committee's plans:
http://winlink.org/Emergency.htm While you are there, do a word-search on the word "future" in the article. - You will find that as often as not, the word 'future" is used in the article to describe the HF links in this system. These "future" links are the ones I mentioned earlier, the ones that knowlegable hams tried to warn the committee as to the impracticality of. - The impossibility of getting that many wide-mode digital stations on the air for any purpose without causing massive interefence of every other ham-related activity on the air.

The thing is, you see, that the cynical members of this committee knew that they could ignore warnings about the chaos that multiple wide-mode digital

signals would cause on our bands - because the comittee never intended for this system to use Ham Radio in the first place.

That's right; This is another one of those "Amateur Telephone" scams, where Internet junkies put Amateur Radio traffic on the Internet and call it "Ham Radio" because the data was taken from Hams. They lied about it because they knew that if they told the truth, thier non-ham ideas would be laughed right out of the hobby. Winlink2000 is another one of those "ham radio digital modes" that could not exist or operate without Internet linkages.

Yes, the ARRL actually decided that we as Hams should back up the Internet - by using the Internet. (Duh!)

In other words, these people have no clue whatsoever about emergency communications - but they are going to force their ingorant, anti-ham policies upon the Amateur Radio community anyway - with the help of the ARRL. - The result will be that all Hams will look like idiots, not just the members of this "committee".

What has this got to do with the ARRL's decision to "take over" ARES, it's logo and all of it's operational issues? - It is so they can cram this cynical non-radio solution down the throats of Amateur Radio operators who are really more interested in trying to use Ham Radio.

ARRL: The hobby is "Amateur Radio", not "Amateur Telephone"... Get it?

Take-overs like this are usually motivated by a desire to force something upon people against their will, and this shameful takeover attempt on ARES by the ARRL is no exception.

I call it an "attempt" because ARES members across the country are already up in arms over this ignorant, cynical and destructive crap.

If you know any of the great Hams; The real Hams who pass emergency traffic every day on HF, please send them a copy of this via E-mail. That way, when they have been pushed aside to make room for "Amateur Telephone" operators who do not even use radio, they'll know how it all happened, and why.

It's another attack on the hobby by cynical Internet junkies, aided and abetted by the ARRL, as they did with Packet Radio. We all know how Packet Radio ended up after this treatment... Now the same "wisdom" is being applied to ARES.

Isn't that "special"?

Hey, the ARRL is made up of humans, and is not by any means "all bad"... Why not give the president of the ARRL, Jim Haynie the benefit of the doubt and let the gentleman know how you feel about this matter? His E-mail address is: w5jbp@arrl.org

Usually when I see someone bitching about Radio Shack it's from one of
the small brained no-lifers who get their kicks from going to Radio Shack
and trying to show off how much more technically intelligent they are than
the clerks behind the counter.

Unfortunately, I can't make an assessment of your web site to see if it's
of the same ilk, because it appears to be shut down.

Awww.....

Let's all say 'Too F...in Bad" in unison. Doesn't seem like you're getting
the
internet support you wanted!

If you don't like Radio Shack, why do you go there? Unless, of course,
you like the abuse you think you get, and go just to get more ammo!

Wait, I didn't come here for abuse, I came for an argument! Arguments
are two doors down on the right.

826. 40m ISOTRON antenna sold

Surrrrrrrrrrrrrrrrrrrre you did. You will either continue to haul it to hamfest boneyards or you tossed it in the landfill. If you really did sell it, you sold it to some newbie, bullshitting him what a great antenna it is. Do you also do estate sales? You know, where it goes like this, "Uhhhhh, Brenda, I know some guys uhhh been buggin' you for Tom's radio stuff, but he did promise it to me, and I'll give you market value for Tom's stuff. $300 is more than fair for his tower, beams, five transceivers, two amps., and all that other junk like his dynamic microphones and computers."

ISOTRON = JUNK

828. Cedartown

Newsgroup: rec.radio.amateur.misc

Source record: 56790

With the shift away from rural living patterns toward Interstate Highway satellite suburban living patterns, combined with the general U.S. shift away from agricultural and industrial economies, Cedartown is left in an awkward position. For its employment, Cedartown mainly relies on the prospect of large corporate operation centers like that of Cingular Wireless, small manufacturing operations like that of The HON Company, and the retail operations of Wal-Mart.

Access to nearby major cities like Atlanta, Georgia, Birmingham, Alabama, and Chattanooga, Tennessee is somewhat difficult due to the distance from interstate highways and the lack of public transportation systems. Passenger rail service to Cedartown was abandoned in the 1970s, leading to the destruction of the historic Cedartown Depot train station. There is no general public bus service. The nearest stop on the Greyhound bus service is Rome, Georgia, 20 miles away to the north. The nearest major airport is Hartsfield-Jackson Atlanta International Airport in Atlanta, 70 miles away to the southeast. U.S. 27, once a major thoroughfare, is now much deprecated by I-75, 45 miles away to the northeast. The closest Interstate highway is I-20, 25 miles away to the south.

829. Cobb County

Cobb County Drug Court Video Presentation: "Bringing your case to Magistrate Court" (Windows Media Player - 22 minutes)

The Cobb County Drug Court resumed operation in January 1995 under Judge Vic Reynolds. The court serves as the forum for all drug cases made by the Marietta-Cobb-Smyrna (MCS) drug squad. This specialized law enforcement unit makes about 85% of the drug offenses moving through the county's court system.
The original mission of the court was to clear up the many drug cases that were in Superior Court. Because of the number of felony cases pending in court, drug cases were often place on the back burner in order to dispose of more violent crimes. In two years of operation, the court had disposed of nearly 1200 drug cases, allowing more serious violent crimes to be heard quicker in other courts.

In addition to moving cases through the system, this version of Drug Court has been somewhat different . Every defendant that is sentenced in Drug Court is ordered to undergo a mandatory evaluation within 30 days of sentencing. The purpose of the evaluation is to determine whether or not the individual defendant has a substance abuse problem which warrants treatment. The defendant can undergo the evaluation at a number of private providers in and around Cobb County or can choose to be evaluated by a substance abuse counselor at Cobb Community Services Board. The latter evaluation costs $45.00 and is given on almost a daily basis.
Once the evaluation is complete the defendant's probation officer is given a copy and the result is reviewed with the defendant. If the evaluation indicates the defendant has a substance abuse problem, a treatment program suited for the defendant's needs is outlined. The recommended program is reviewed with the defendant and he must then begin treatment.

By requiring strict compliance with all conditions and by holding defendants accountable for their actions, we have managed to cut down repeat offenders. The Cobb County Drug Court has proven to be a viable, successful operation which disposes of drug cases in a rapid and efficient manner while holding defendants accountable for their actions.

r0f's guide to ASTRO radios - What you need to know to have a clue -

Lately, there have been several Ebay ads, and other questions asked on the board, that finally motivated me to write an ASTRO "guide" for newbies. When people ask questions, we should be able to point them somewhere. The main site (batlabs) has a lot of info, but not nearly enough to guide newbie/lamers through the woods

Let's start off with the basics.

Currently, there are 7 ASTRO portable models on the market.

- ASTRO Digital Saber (Models I, IR, II, IIR, and III)
- XTS3000 (Models I, IR, II, IIR, and III)
- XTS1500 (16ch only, no keypad/display)
- XTS2500 (Models I, IR, II, IIR, and III)
- XTS3500 (Models I, IR, II, IIR, and III)
- XTS5000 (Models I, IR, II, IIR, and III)
- SSE5000 (SP Radio, NYPD Only. Looks like a model I ASTRO Saber, but grey)

The lowest tier ASTRO portable is currently the XTS1500. This is an entry-level portable, designed for utility companies and public works users. It is 16 channels only, and does not support encryption. It supposedly is FLASHport upgradeable, but there is no mention of this on Motorola's website. It is dual band, 700/800 MHz, and supports ASTRO25 and APCO16 trunking. (3600/9600bps control channels)

The ASTRO Saber has long been a favorite of batlabbers. It is the last "real" radio that Motorola released, before going to the XTS series radios, which just aren't built the same. One could easily use the ASTRO Saber to beat down a bad prisoner, or get revenge on a locker thief (personal story, I won't go there). There are 2 versions of the ASTRO Saber available -- One with a 512K flash memory, and one with 1-meg. The 512K ASTRO Sabers are the most popular, but do not support 9600bps (ASTRO25) trunking, or firmware higher than Host R05.60.00 / DSP DSPN06.05.02. The 512K ASTRO Sabers support nearly every FLASHport option. Unfortunately, if the user
wishes to use one of the newer UCM Encryption modules with EMC R03.xx firmware, the radio MUST be upgraded to a 1-meg vocoder board, as EMC R03.xx requires Host firmware of R07.xx.xx to function. The ASTRO Saber comes in VHF, UHF-low, UHF-high, and 800 MHz flavors. The ASTRO Saber has 2 lines of 14 characters for the display.

The XTS3000. Released in 1996, it was Motorola's second ASTRO Portable to hit the market, and is the most common ASTRO portable in use, to

this day. It comes with a 1-meg vocoder board, and supports encryption. How could you go wrong with this? It's shorter than the "HUGE" (As ASTROMODAT puts it) ASTRO Saber, but the XTS3000 is a FATTER radio, even with the Lithium Ion battery. The XTS3000 supports 3600/9600bps trunking, and any other FLASHport option you wish to have added in. It does not require a vocoder upgrade. Like the ASTRO Saber model, certain features/hardware are firmware dependant. The XTS3000 and ASTRO Saber share the same host/dsp firmware releases. Example: R05.51.00 / DSPN06.04.11 can be found in both ASTRO Sabers, and XTS3000's. The XTS3000 comes in VHF, UHF-low/UHF-hi, and 800 MHz.

The XTS2500 and XTS5000 were released in early 2002. While the XTS2500 is a nice portable with 160 modes, it does not support encryption. It hasn't been hacked yet either, meaning if you buy a "featureless" XTS2500 on ebay, it's going to stay that way. It's a medium-tier radio, supporting 3600/9600bps trunking and conventional. It's nice eye candy, but that's about it.

The XTS5000 is Motorola's "top of the line" digital portable. It supports 512 modes, encryption, and 3600/9600bps trunking/conventional. It hasn't been hacked yet, and the only portables floating around on Ebay at the moment, all appear to be alpha-series developmental models. Their serial numbers are 123ABC1234. Keep away from them! They require special Alpha CPS to program, and are not supported via "R" CPS. The XTS5000 supports 8-meg's of FLASHport memory, and supposedly IP-data features. The "r0f" opinion of the XTS5000, is that it's a recased XTS3000 with a new display and more memory. Motorola didn't put a lot of effort in to the XTS5000, and it is overpriced and currently does not support anything that the XTS3000 or ASTRO Saber is capable of. Do not be fooled in to purchasing an XTS5000 thinking it's "the bomb", because it's just not!

The XTS2500, XTS5000, and SSE5000, are all programmed with the RVN4181 software package.

The XTS3500 is an XTS3000, with a faster CPU, and supposedly it supports higher levels of encryption -- however this has never been confirmed. It looks identical to the XTS3000, but it's only available in VHF and UHF models -- No 800 MHz. The 3500 is programmed with RSS. As far as I know, no CPS exists and the radio has not been hacked.

The SSE5000 is an SP radio developed for the NYPD. It looks like a Model I ASTRO Saber, in a grey case. It's exact features are unknown at the moment, and Motorola does not list it on their website. It's most likely got 1-meg of FLASHport memory, a faster CPU, and a few custom "one touch" buttons. Any information on this radio would be greatly appreciated!

So now I've covered, in a somewhat brief way, all 7 portables, and what they are. Now it's time to talk about what makes a radio worthy of an Ebay purchase, or just flat out hacking. I will only cover the

XTS3000 and ASTRO Saber, as they are the most popular models, and are easily "reconfigured" for the intended use.

First, when looking at an Ebay auction, or making a deal with someone to buy an ASTRO Portable, you MUST have the below information provided to you. If the seller is too ignorant or clueless to give you this information, then DO NOT chance your hard earned money! This information is obtained via 2 methods.

1. Via the F9 menu after reading the radio in RSS (or equiv in CPS)
2. Via SERVICE mode. To enter SERVICE mode, press the ".." button on the side
of the radio 5 times, within the first 10 seconds of powering up the radio. The information will scroll across the screen. This process may have to be repeated a few times to get everything.

First, ask the person selling the radio if it's IMBE or VSELP. If they don't know, then they are just stupid and ignorant. I'd be tempted to just not deal with them at this point, but sometimes you can "steal" the radio for under $500 from these people simply because they're too stupid to know what it is they're selling.

VSELP = Vector Sum Excited Linear Prediction
IMBE = Improved Multi-band Excitation

VSELP was Motorola's first attempt at a digital voice codec. It's inferior to IMBE, and is proprietary. The City of Baltimore uses VSELP on their 800 MHz trunked system. Other than that, it's almost extinct. IMBE is made by DVSI, and is the APCO-25 codec. 99% of the time, you'll want an IMBE radio.

- What is the Model #? H04UCH9PW7AN is an ASTRO Saber III 800 MHz. You need this
to be sure of what you're getting. I've seen MONGOLIAN MORONS selling 800 MHz
radios as "VHF" on Ebay. These people are either retarded, or are selling something
they know nothing about. i.e. STOLEN.

To decode the model #, visit this page:
http://www.batlabs.com/astromob.html#model

Next, you'll need the HOST and DSP firmware revisions installed in the radio. This
is probably the most important part. If the MONGOLIAN RETARD selling the radio
doesn't know if it's an IMBE or VSELP radio, you can obtain that information from
the firmware revisions. Here's the breakdown:

Host Firmware R0x.xx.xx R= Release. If it's anything but "R" here, it's a factory
test radio, and is probably stolen. Don't bother. Here is version

information:

Less than HOST R04.xx.xx Less than DSP DSPx06.xx.xx = VSELP KEEP
AWAY!!!
Higher than HOST R04.xx.xx Higher than DSP DSPx06.xx.xx = IMBE UNF
UNF! YES!

The latest HOST/DSP firmware (as of this writing) is R07.10.xx /
DSPN08.02.xx.

Now a few notes about the firmware that you need to know for certain
features to
work..

If you desire SmartZone Omnilink Q173/G173 in your radio, you'll need
HOST firmware
higher than R05.xx.xx. it is not supported in R04.xx.xx.

If you're using an EMC or UCM Encryption module, with EMC firmware
higher than
R03.xx, you'll require at the very least HOST firmware R07.xx.xx or
the encryption
module will not work. R07.xx.xx HOST firmware supports older R02.xx
EMC firmware,
just not the other way around.

The next thing you'll want to ask the seller is what the FLASHCODE is.
This lists
what features are installed in the radio. This even determines whether
or not your
radio will transmit/receive in ASTRO mode. This is VERY important.
Flashcodes look
like this:

540008-000400-3
591008-4F1E00-9 (Whored out Nick flashcode)

They are 12 digits long, with a checksum at the end. You can decode
the flashcode
by punching it in to Lindsay Blanton's flashcode decoder here:

http://www.radioreference.com/modules.php?name=Flash

To see a list of all available FLASHport options, type FFFFFF-FFFFFF-F
in to his
decoder.

Next, if the seller says "Radio has encryption installed", you'll need
to ask what
algorithms are installed. Encryption comes in many flavors, and not
all algorithms
are compatible with each other. An excellent write-up on encryption
was made by
Batwing (Doug) and is available here:

http://www.trunkedradio.net/trunked/stuff/encrypt.html

The encryption algorithms you may see in ASTRO portables are as follows:

DES DES-XL DES-OFB DVP DVP-XL DVI DVI-XL AES-256

If you see FASCINATOR, your phones will be tapped and you better buy some preperation H, because you'll have a date with Bubba. FASCINATOR is a classified encryption algorithm used to carry US Government communications, and is NOT available to the public. If you have it, chances are it'stolen, or stolen. Could also be stolen. Get the picture?

DES - 56-bit
DVP - 32-bit
DVI - 24-bit
AES-256 - 256-bit

While AES-256 may look appealing, there is a massive back-door in this algorithm so that big brother can listen in. Do you really think the boys would release 256-bit encryption to the public to use, without a way of snooping?
DES was developed for the US Government in the late 1970's. It is still to this day, considered "safe" from eavesdroppers. There are 72-quadrillion possible keys, and the amount of computing power required to brute-force the prime number the key is based upon, is not something joe-schmoe has access to. DES is not "secure" in the sense you would pass classified communications over it, but it's definitely a hell of a lot tighter than AES-256. There is no known back-door for DES.

DVP was developed by Motorola for business users. It's weak, and most likely is back-doored. Security companies and many police agencies in Canada use (or did use) DVP in the past, due to tight licensing/export policies back in the day. DES was restricted to the US only, but that's not the case any longer.

DVI was also developed for Motorola for use by business and law enforcement users, overseas. It is 24-bit, has a back-door, and is weaker than George Bushes self-esteem. The "I" in DVI, stands for "International".

Anyway enough of my encryption rant. The next thing you'll need to ask your
seller, is how big the vocoder board is. This is required when asking about
an ASTRO Saber. Is it 512K, or 1-meg? Read above for the differences.

Finally, I'll move on to "parts built radios". These radios are EVERYWHERE!
Originally they were sold by a mysterious man named "Nick", aka Watchbuddy,
but he has since disappeared in to the dark Motorola night. His radios were
supposedly built from "parts" that he or somebody else had ordered from M,
and then later constructed fully functional radios. They work fine, look fine,
and even smell fine (heh heh). They just have one fault; NO SERIAL NUMBER.
A parts radio is usually easy to identify. They all have the same host/dsp
firmware revisions, and usually the same flashcode.

2002 Nick Radios

Host Firmware: R05.51.00
DSP Fimrware: DSPN06.04.11
Flashcode: 591008-4F1E00-9

2003 Nick Radios

Host Firmware: R07.08.00
DSP Firmware: DSPN08.02.02
Flashcode: 548008-000480-9

The 591008-4F1E00-9 flashcode has become known as the "Whored Out"
flashcode. This is because it supports nearly every option Motorola offers,
except it has options that are not compatible with each other. Examples
are Software Encryption, and OTACS and OTACR -- which are proprietary to
the LAPD, UHF high band. Finding these in 800 MHz XTS3000's is messed up.

In early 2003, I started bitching on batboard that Nick's radios had old
firmware in them, and did not support new UCM modules, and described a noted
bug when used with speaker mics. I'm not sure if this is why Nick suddenly
started releasing newer host/dsp with his radios, but things changed a few
weeks after. His second flashcode (less whored out) comes with ASTRO25

9600bps
trunking installed. Unfortunately, it isn't supported by R07.08.00
host
firmware, and caused grief for 3600bps trunking users, as they could
no longer
monitor without forced affiliation. After people started bitching, he
went back
to the 591008-4F1E00-9 whored out flashcode. Then suddenly, Nick
disappeared.
Nobody knows what really happened, but there are lots of stories.

If you come across a parts built radio on Ebay or elsewhere, don't be
afraid
of it, just pay attention to host/dsp and FLASHport options. Also be
aware that
if you send it in to the depot, it may not come back, due to the
serial # issue.

I'm almost done, but I think I should continue ranting about KVL's
(Key Variable
Loaders).

A few of us whores like running encryption on ASTRO. Doing so requires
encryption modules, AND.. a keyloader. There are a few keyloaders out
there. I
will talk about DES, since they are the most common. The same applies
to other
models.

T3011DX -- Works fine for all ASTRO portables/mobiles. NEEDS to be
"D". C will not
work. A T3011DX is a DES/DES-XL/DES-OFB capable keyloader. It has 16
key memories,
and 16 shadow-key (used for OTAR) memories. It's big and ghetto
looking, but it
works just fine. Don't pay more than $600US for one, or else you're
getting hosed.

KVL3000/KVL3000 PLUS. -- There have been a few of these on Ebay
lately. The
sellers I've seen, have NOT listed what algorithm is installed! Can
you believe
that? "DUh I have a KVL3000 for sale". And? When I've emailed them
asking what
algorithm is installed, they rudely reply "THEY DO NOT KNOW". That's
like putting
a car on Ebay. "Selling: a car". You need a little more info than
that! Buyer
beware! These vary in price, but don't pay more than $1500-1600 for
them. One just
went for $2100, and the dork selling it didn't even list the
algorithm(s)! I hope

the buyer wasn't scammed.

Well it's been a slice writing all of this, I hope it proves
entertaining and useful
to ASTRO lovers. Additions, comments, and arguments are all welcome.
Remember,
it's just a hobby

Well, I find it hard to believe that, in a weak moment, I visited the site mentioned below. It is obvious that a great deal of time and effort has gone into this thing, and to what cause? To save our rights? Me thinks not. What rights are we having trampled? You're right to slander RadioShack? That right is only in your mind. You are most likely a relatively well educated individual with many personal conflicts in his life and I feel deeply for you, but mostly your parents and family members. They most likely put up with your drivvel year after year and detest the site of you.

Why don't we just cut to the chase, and you explain, in a very short sentence or a very, very short paragraph what caused you to create this Radio Shack site that you claim sucks so bad that it has obviously destroyed your life and those of your loved ones? When They haven't harmed you. You are harming them by saying to the world that they suck.

I have enjoyed Radio Shack for many years. I was there when they became RadioShack, and I became a valued customer (I believe that because I still get free catalogs in the mail, not many do anymore 'ya know) to them and grew through the whole gammit of stuff they have added over the years and I must say that when I had a problem with a product, and that was extremely rare, they took care of it. In one case the manager returned my money because it was a last item and he couldn't replace it. A few years later when computers came along if this had happened, they could check all the stores in their system to see who still had it on the shelf and that store would mail it to me at my home. Is that cool? I say "Yea Verily".

I love Radio Shack. This little reply is probably enough to get you to open up KF5DEsucks.com I won't sue you unless you get nasty. All my friends will check in and post there I'm sure they will have comments to make there, they have a lot of freee speech to use 'ya know. I have a friend that can enlist, in moments hundreds of hackers that believe in not only free speech but free hacking tooo!! Free viruses', free wurmzs, 'n free other stuff too.

After that you can open up another site, KF5DEreallysucks.com

Or, you can channel your efforts into something productive and usefull and possibbly profitable for yourself and your suffering family which will no doubt heal many open wounds.

Butch Magee, KF5DE
Diamondhead, MS 39525
wow, just can't believe i'm gonna push that send icon.

835. (UPDATE, SHORT) Auto-FAQ Sent to Over 37,500 rec.radio.amateur.* Posters

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-02 14:01:08 UTC
From: pschleck@novia.net
Message-ID: <410e48a3$0$158$45beb828@newscene.com>
Source record: 56797

For the previous (SHORT) update, see:

http://groups.google.com/groups?selm=401b2ff6%240%2499192%2445beb828%40newscene.com

In September of 1996, I started mailing an introductory message to all new posters to rec.radio.amateur.misc. This is accomplished via a special Perl script originally written by comp.infosystems.www.* FAQ maintainer Tom Boutell, who uses it on comp.infosystems.www.authoring.html, to send each poster such a message once, and only once, to a given E-mail address. It runs from a Unix cron job on my host every morning at 2 AM and queries my local news server via NNTP for the headers of any new articles posted to this newsgroup.

The project was expanded on June 19, 2002 to cover all rec.radio.amateur.* newsgroups, but with the same previous-poster database (as I stated my intention to do in previous updates). This means that if you have already received the message to a given E-mail address, you won't receive it again to that same E-mail address. The average number of recipients per day is currently about 16. Feedback statistics remain about the same for the additional 2,500 recipients (see previous updates via the link above for more details). Here are the milestones in terms of number of recipients, and the date each milestone was attained:

Recipients: Date: Average Recipients/Month (approx.):
0 September 21, 1996 N/A
5,000 July 5, 1997 625
7,500 December 7, 1997 500
10,000 June 2, 1998 420
12,500 December 20, 1998 420
15,000 September 29, 1999 280
17,500 May 30, 2000 310
20,000 April 7, 2001 250
22,500 April 3, 2002 220
25,000 August 8, 2002 625
27,500 December 1, 2002 670
30,000 April 1, 2003 625
32,500 August 27, 2003 500
35,000 January 30, 2004 500
37,500 July 31, 2004 420

>Subject: WELCOME to rec.radio.amateur.*
>X-Loop: rec.radio.amateur-auto-faq@oasis.novia.net

Hello,

The following message is automatically sent to every new poster or cross-poster (as of June 19, 2002) to any of the rec.radio.amateur.* newsgroups. It should be sent once, and only once, to each unique address. This is a welcome message. The Internet amateur radio community welcomes you to the newsgroups, including rec.radio.amateur.*, and welcomes your input, opinions, and constructive participation. To help make you feel welcome, experienced participants like myself have chosen to systematically inform you, as a new poster, about useful information resources and user tips to enable you to get the most out of these newsgroups. I hope you will consider the message in that spirit.

* * *

1. The news.announce.newusers newsgroup, moderated by Jon Bell, et al, contains a number of very informative articles providing an overview of net-etiquette, suggested writing styles for electronic forums, and other various do's and don'ts concerning Internet culture. If the articles have expired at your site, you may also access them from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/news/

2. Original newsgroup voting and charter information for the rec.radio.amateur.* hierarchy, as well as for rec.radio.info and rec.radio.swap, may be accessed from:

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.info
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur-reorg
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.dx
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.boatanchors

3. The Guide to the rec.radio Newsgroups, originally written by Jay Maynard, K5ZC, is now maintained by Jeffrey Herman, KH6O. It provides an excellent overview of all of the Usenet newsgroups devoted to amateur and CB radio. It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/personal-intro

4. The rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet, also originally written by Jay Maynard, K5ZC, is now also maintained by Jeffrey Herman, KH6O. It contains a number of good pointers for reading and posting articles concerning the buying and selling of radio and radio-related equipment on the Usenet newsgroup rec.radio.swap (which, with the sole exception of rec.radio.amateur.boatanchors for vintage equipment, is the only appropriate newsgroup in the rec.radio.* hierarchy for such articles). It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/swap-guide

Please direct any submissions feedback, or administrivia regarding the above two resources to jeffreyh@hawaii.edu.

5. The national amateur radio society of the United States, the American Radio Relay League, has a presence on the Internet. You may

access their comprehensive and informative home page at:

http://www.arrl.org/

(They also have information about amateur radio organizations in other countries.)

6. Read the newsgroup first to see if your question has already been answered. You may also view, and search for keywords in, older news articles (going all the way back to 1981) at the Google (formerly DejaNews) archive:

http://groups.google.com/

Many topics have been discussed before, often in great depth, but the articles have expired at your local news server. Services like Google allow Usenet a much longer "institutional memory," greatly benefiting both new and experienced users.

7. If you do post to the newsgroup, give as many details as possible. After you post, read the newsgroup for a week or two to see all replies to your posting. A recommended practice is to ask for responses by E-mail and offer to post a summary if others are interested in the answer to your question. Note that it is (almost without exception) inappropriate to post your article to all (or even a significant subset of) rec.radio.amateur.* newsgroups. Please pick only the most relevant newsgroups (2 or 3 at most), and post your article as a simultaneous cross-post (check your newsreader documentation) so that only one article is propagated, and the article is only shown once in a newsreader.

8. Remember, Usenet newsgroups are based on the idea of mutual aid. Usenet only works if we put as much into it as we get out of it.

73, Paul W. Schleck, K3FU

The author welcomes any and all constructive feedback. Please direct all such feedback to pschleck@novia.net and retain the original subject (e.g., "Re: WELCOME to rec.radio.amateur.*") in your reply.

We have
a working 2.4GHz . multi channel surveillance monitor with receiver and detachable SMA antenna plus micro high powered, weather resistant 2.4GHz wireless video sender (transmitter) with 900mW output at antenna. Surface Mount s-band (2400 MHz) amplifier mounted to micro transmitter unit. Unit has voltage regulation at 5VDC. Just add your camera or video source and you have a great, custom surveillance system. Unit (receiver) will work on many other types of commercial 2.4GHz receivers. Dip switch selectable channel switch on receiver and transmitter. The pinhole Black & White 1/3" CCD Board camera is included with this auction (normally an additional $35) Receiver unit runs on 4 AA batteries or 6 V regulated wall supply. Receiver can also act as a stand alone video monitor by switching the toggle switch below the video input connector. We accept POSTAL MO, some business checks (with clearance time) and Western Union payments. Asking $175 plus shipping. More photos available upon request. Units are great for ATV or model video.

Marvin,
Fred's a retard. Maybe you are too. Seems like a basic reading course would do a lot of people around here some good. I never violated Fred's acceptable use policies. The only thing I am guilty of is calling his attention to a thread that I thought was inappropriate. I requested that he remove it. Eventually, I got what I wanted. The thread was removed. I never made a habit of posting or even reading his forums. Prior to last week it had been over 2 years since I posted anything under any name on his site. It's not like I'm going to miss anything. I NEVER posted any profanity of any kind on his site. Which brings up another point. Multiple Logins. The only reason I had multiple logins in the first place is because someone else registered my callsign, W6DEK, (saving Fred the trouble, He so enjoys attaching my callsign to other people's posts) as their username. It took months to get that straightened out. You can read our entire email exchange below. Start at the bottom.

from http://fuckqrz.com

To: "Fred Lloyd, AA7BQ" <flloyd@qrz.com>
Subject: Confused
1. Very dumb posts, like the one that said your name over and over about 100 times.
Dumb posts? I DID NOT POST MY NAME OVER AND OVER AGAIN. That was posted by 435_used. I was

435_user. Are you dyslexic? Go back and check it again. All of my posts were well thought out and on topic. Remember I am the one that was doing the good deed here in calling your attention to a thread that was inappropriate.
2. Having three different login id's.
I found nothing in your user agreement about multiple login ID's.
3. Using a phony anonymous email account to subscribe
What is a "phoney" email address? I have and use many. I was able to receive the confirmation email to create the account there. What's the problem?
4. Would that be acceptable? You even took my callsign out of your stupid database. No, your terms are not acceptable. Go FUCK yourself !
Maybe you should have a cup of coffee before you read your email. You obviously don't comprehend what you read.

At 10:29 PM 7/29/2004 -0700, you wrote:

Dennis,
I don't have a lot of time to write so I'll make this quick
and to the point.
Being able to upload an EMBED tag gives a user the ability to
literally inject any sort of executable program, activeX
control, or whatever into the session.
There were other things, however, that caused me to decide
to ban your access. They were:
1. Very dumb posts, like the one that said your name over
and over about 100 times.
2. Having three different login id's.
3. Using a phony anonymous email account to subscribe.
I'll be blunt, I'm tired of putting up with bullshit here.
It's not just you but several people who cause us a lot
of headache. Especially those who have multiple aliases.
It's nothing personal, I don't even know you. I'm just
tired of being screwed over by users who don't realize
that it costs me my valuable time to chase down problems,
complaints, and in general, wasted effort.
I am willing to reinstate your main login id of w6dek and
no other. I only ask that you not cost me any more of my
time in the future. If you sign up again under another
alias, you're out.
Would that be acceptable?
-fred

To: "Fred Lloyd, AA7BQ" <flloyd@qrz.com>
Subject: Confused
Fred,
Why did you ban my ip? I don't get it. I point out an inappropriate thread and ask that you delete it. For this I get banned? I didn't start that thread. You didn't even delete the entire thread. You only deleted the first post. The rest of it is still there and growing. Then I point out some HTML that has been there for two years. A harmless sound byte. Where do the "big balls" come in? Is there something in your user agreement that I missed? Here I am doing you a favor and calling attention to a thread that was falsely accusing a major supplier of selling a known criminal amateur radio equipment. What did I do wrong?
Dennis

At 03:56 PM 7/29/2004 -0700, you wrote:

Dennis,
You have big balls.
Your postings using the EMBED tag were news to me. I'm glad you pointed them out to me.

This was started over concern that HRO had sold Jack Gerritsen an FT847 and other amateur equipment. This is "technically" not the case. According to their corporate, they absolutely WILL NOT sell him anything. He is on their "do not sell" list, as well he should be. Some information was leaked through an HRO insider, but the story is not straight. They were considering selling it to another store (Angels) before they learned who the end customer was. I would hate to see someone lose their job over this BS. Please remove the HRO bashing thread.
Thanks Fred,
Dennis

Yes, but you had to spell it EXACTLY "as it was sent" - including any mistakes "they" placed there. IF the word was "not" misspelled and I use the example of TWO being sent, and you missing the "W" letter and plugging in an "O" to make it TOO (as some do get them confused), then you still FAILED! So, it pays to know the characters well before even trying. Otherwise, it's a waste of time. It is amazing how many times I've seen here in posts - people using the wrong works. To-two-too interchangeably. And there are others. Simple mistakes maybe, but in exams where such as the Code, you're "required" to copy "exactly" what was sent, you can't err - lest you fail. Weird, yes.. but that is the way it is. Bottom line, some test instructions may seem off the wall, but if ya want to pass, ya got to play the game with the rules handed to you. It's all in knowing the stuff you're supposed to know - to start with.

I've had my ticket for over 10 years, but just never got into things until recently. Everything I had until now was UHF, but there's so much more to be heard in 6m, 2m, 220, 900, 1.2ghz, right?

But who wants to end up with 6 mobiles, 4 antennae, blah blah, etc. So I'm looking for advice. A million years ago Icom made the IC900 and IC901, which could add modules for almost anything (but cost a fortune, and are impossible to find). Was there progress? Did anyone else pick up the torch where this left off? What's today's comparable version?

And why is it that the TM742 from Kenwood can hold 3 modules but there are 6 available? How come my 10 year old Alinco DJ580 can scan AM Airline freq's but thats so uncommon today? I remember a time when amateurs wanted to pack as much as possible into their rigs and do it all, is that no longer the case?

And what do people who know more than I reccomend? I get online and look around, and it seems like used tri-bands are the only option, and Kenwood being the only manufacturer which has one which can listen to more than one band at a time. I have a small car, but there is space equal to the size of the average auto stereo free to install a mobile rig. I would love to be able to load up all the local repeaters, and whatever else I'd want to listen to (fire, ems, 800mhz police, air) - and maybe even program it alphanumerically.

So tell me Gods of amateur radio - does such a model exist? Is it possible to get a small unit that can function as a police scanner, alphadisplay, 6m/2m/144/220/70cm/900/1.2gz tranceiver (or some 3 or 4 band mix)? Or am i destined to search for a larger car, mount 7 pieces in it, and drive a porcupine?

Thanks all, I look forward to hearing back in every capacity. And if you have an old IC900 or IC901 or Kenwood TM742, or any commercial rigs that may work (I've got mainly Motorola Saber stuff now) let me know via email.

Richard,
Well, I was also 'out' for a while and got back in about 5 years ago...I am not THE expert, but I believe what you ask for does not exist. There just isn't enough activity (worldwide) on 222 900 & 1296 to attach those bands to an 'all-band' radio.
Now, I don't know you budget...

HOWEVER, look VERY CLOSELY at the Kenwood TM-D700A mobile and the Kenwood TH-F6A hand held. I think these come quite close. There is also the Yeasu VX5R (not 100% sure of number), but its Rx doesn't go as high. There's a Yeasu hand held which has 6M, 2M & 440 Tx - don't remember if it is the VX5 or not.

The two Kenwoods I mention cover close to what you ask for RECEIVE.

The D700 mobile is Tx on 2M & 440, and Rx FM from 108 (AM in air band) to 1300.

The F6 hand held is Tx on 2M 222 & 440. Rx from 0.100 Mhz to 1300 MHz -- AM, FM, Wide-FM, SSB, & CW (some limitations, but pretty much everything you can listen to). Just remember that it is still a handheld and therefore has minimal front end filtering (as is more common for the general coverage Rx).

1296 Tx is rare. The Kenwood TS-2000 has it (and 1-2 others), but the 2000 is a 160 through 2M, (222 Rx) 440 & 1296 all mode. It does have a mobile remote control head.

I don't think there is (hardly) any Ham-commercial equip for 903.
Look for Alinco and Ten-Tec. I'm not familiar with their products.
73,

1.its going on because we want to keep a history log of the 640
activities,
the newsgroups is a place to do it, the newsgroups willbe here for a
long time,as it stands, there are archived posts from the world from
as far back as 1982

2. i care. and there will be others outthere somewhere that will
appreciate all this archived information, look how many things are in
this post that otherwisewould recieve no hits in a google groups
search :)
plus, we post the traders net too, sotheres gotta be people on the net
that are interested inwhat people are selling...

hope that answers your question

> would brag about having a Tech class license, I have no idea.

Well..it's like this for some of us. I myself have a General Radio Telephone License, call sig PG GB 00077, which requires CW at 35 wpm to qualify. I also have a Ham no code tech license, call sign KC0OEB which can be looked up on qrz.com. My point is this, arrogant loud mothed s.o.b.'s that go about badmouthing other hams need to have their heads bashed in and their license's taken away.

I expressly decided on the no code tech for the very reason that is happening here. Scum like you inhabits the hf bands very predominantly, and need to set a good example, instead of taking each and every opportunity to prove to me and the remainder of the world exactly what a total jackass you can with a little effort.

So, from now on it might be to your benefit and others as well to be very carefull with your critisims or one day you may find your sorry ametuer ass being kicked really hard by someone that is ABLE to blow your ass away in the electronics field. My advice to you: shut you pie hole, asswipe.

855. OT - Flood of Non-Speaking Middle Eastern Males Crossing Border - ARIZONA

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-05 01:23:30 UTC
From: Eric Oyen - N7ZZT <n7zzt@127.0.0.1>
Message-ID: <pan.2004.08.05.01.23.29.757275@127.0.0.1>
Source record: 56816

I recently had occassion to be in southern arizona (the sierra vista hamfest) and heard on my little FRS radio (I have a lot more than just ham rigs) a conversation of 6 happening on several FRS chans. These were not in spanish (as one would expect in southern Az) but were in Arabic (I have a number of close friends who are arabic, so being exposed to the language, I was able to discern what it was amlmost immediately).

now, this was some months before the article dated. makes me wonder just how long this has been going on. Also, if I, as a ham, are aware of this, why wasn't the local authorities? I even spoke with a local border patrol agent who was in the sierra vista area that day and he said he would pass the info "up the line". he also made mention that this information was news to him.

now, I wonder if we shouldn't have a lot of the hams that live in southern Arizona (down along the border and in towns spread out across southern Arizona) listening for unusual radio traffic both on and off the ham bands. we are, by definition, one of the first lines of communications for homeland security.

Now, the situation in sierra vista (just 40 miles north of the Az-Mexico border) is that of your typical north american small town. a few latinos and a lot of locals that moved there from elsewhere. there was (at that time) no discernable arabic community down there (and still isn't according to friends that live in the are). so, the following article is of relivance to both national security, and the hams that deal with radio traffic down on the us-mexico border....

********** article**********
Flood of Non-Spanish Speaking Middle Eastern Males Crossing Border
July 23, 2004
From Chris Simcox
The Tombstone Tumbleweed

Border Patrol field agents have shared some disturbing information with the Tumbleweed as well as other civilian sources with the hope the information will make it to the general public.

The Tumbleweed has verified information that a flood of middle-eastern males have been caught entering the country illegally east of Douglas, Arizona. The increased patrols in the Huachuca Mountains area of Cochise County, seems to have diverted the flow of OTM's, "other than Mexicans" east to the Chiricahua Mountains. In the last month, the Tumbleweed has confirmed at least two documented accounts of Border Patrol agents encountering large groups of non-Spanish speaking males in the Chiricahua

foothills and on trails along the high mountain areas.

On or about the early morning hours of June 13, 2004 Border patrol agents from the Wilcox station encountered a large group of suspected illegal border crossers, estimated to be around 100, just east of the Sanders Ranch near the foothills of the Chiricauha Mountains. 71 suspected illegal aliens were apprehended; among them were 53 males of middle-eastern descent.

According to a Border Patrol field agent, the men were suspected to be Iranian or possibly Syrian nationals. "One thing's for sure, these guys didn't speak Spanish and after we questioned them harder we discovered they spoke poor English with a middle-eastern accent, then we caught them speaking to each other in Arabic. this is ridiculous that we don't take this more seriously, and we're told not to say a thing to the media, but I have to," said the agent, whose name will obviously remain anonymous.

The agent stated the men were wearing the traditional uniform of migrants; baseball caps, tennis shoes, some had work boots, denim jeans and many had t-shirts with patriotic American flags and slogans. The agent added the following description "A curious thing I noticed was that they all had brand new clothing and they looked as if they had just been to the barber shop, you know, new haircuts. They were clean cut and they all had almost the exact cut of mustaches."

The information was corroborated by a local rancher in the area who reports that sightings of groups similar to these are on the rise. The rancher also reports that groups of heavily armed paramilitary drug smugglers have also been seen in the same area.

"We've had groups in the hundreds coming through again They were gone for awhile but now they're back. And of course we have the drug mules again and many are carrying automatic weapons. Many other ranchers in the area have been frustrated with the lack of response from Border Patrol.

After calling over and over again, to the Wilcox headquarters, we might get a response a few hours later. We call them in to the Border Patrol, we only have the Wilcox station, and they're so darned far away. By the time they send in the helicopters these groups are long gone. I don't know how many they catch but they're coming through here heavy right now."

On or about the evening of June 21, 2004, agents from the Wilcox Border Patrol station apprehended 24 members of a larger group of Arabic speaking males located just east of the Pierce/Sunsites area of Cochise County. At least half of the males escaped capture and disappeared into the United States.

Since they're out to do their dirty work again, spying on our country and setting up shop for another 9/11, then ALL of them ought to be personally escorted either out of the country or to a death camp and promptly eliminated. Get them before they get us. AND THIS TIME, it is OUR country, we'd be going after them in. So they'd have little to say. SCREW THEM RAG HEADS. Let's squash those damned cock roaches. Kill every one of them, then they can't live to retry it another day.

One PROUD American.....

Rod, you might want to read KH2D's wise words concerning "The War."
Very insightful. I don't agree with everything he says, but I respect
his opinion.

Search "KH2D" and you'll find it easily.

That was Habib's or Apu's extended family crossing over
da Border. Now just watch, in 4 months he'll be running an
Exxon or a Motel 6 or a Seven-11.

You want a slurpie with your premimum unleaded? ;)

Lotta middle eastern folk go to the US via Mexico, they blend in with
the Mexicans and are able to cross the border easily. Most of them
are hard working people looking for a better life, not terrorists.
I'm met several, all hard workers with no interest in airplanes...

then they ought to do like we do with block watches and such, watch for
their own to be doing such garbage and let others know about it, to save
their own asses from A.... being suspect B. being killed like others.

> the board, that finally motivated me to write an ASTRO "guide" for
> newbies. When people ask questions, we should be able to point them
> somewhere. The main site (batlabs) has a lot of info, but not nearly
> enough to guide newbie/lamers through the woods
>
> Let's start off with the basics.
>
> Currently, there are 7 ASTRO portable models on the market.
>
> - ASTRO Digital Saber (Models I, IR, II, IIR, and III)
> - XTS3000 (Models I, IR, II, IIR, and III)
> - XTS1500 (16ch only, no keypad/display)
> - XTS2500 (Models I, IR, II, IIR, and III)
> - XTS3500 (Models I, IR, II, IIR, and III)
> - XTS5000 (Models I, IR, II, IIR, and III)
> - SSE5000 (SP Radio, NYPD Only. Looks like a model I ASTRO Saber, but
> grey)
>
> The lowest tier ASTRO portable is currently the XTS1500. This is an
> entry-level portable, designed for utility companies and public works
> users. It is 16 channels only, and does not support encryption. It
> supposedly is FLASHport upgradeable, but there is no mention of this
> on Motorola's website. It is dual band, 700/800 MHz, and supports
> ASTRO25 and APCO16 trunking. (3600/9600bps control channels)
>
> The ASTRO Saber has long been a favorite of batlabbers. It is the last
> "real" radio that Motorola released, before going to the XTS series
> radios, which just aren't built the same. One could easily use the
> ASTRO Saber to beat down a bad prisoner, or get revenge on a locker
> thief (personal story, I won't go there). There are 2 versions of the
> ASTRO Saber available -- One with a 512K flash memory, and one with
> 1-meg. The 512K ASTRO Sabers are the most popular, but do not support
> 9600bps (ASTRO25) trunking, or firmware higher than Host R05.60.00 /
> DSP DSPN06.05.02. The 512K ASTRO Sabers support nearly every FLASHport
> option. Unfortunately, if the user
> wishes to use one of the newer UCM Encryption modules with EMC R03.xx

> firmware, the radio MUST be upgraded to a 1-meg vocoder board, as EMC
> R03.xx requires Host firmware of R07.xx.xx to function. The ASTRO
> Saber comes in VHF, UHF-low, UHF-high, and 800 MHz flavors. The ASTRO
> Saber has 2 lines of 14 characters for the display.
>
> The XTS3000. Released in 1996, it was Motorola's second ASTRO Portable
> to hit the market, and is the most common ASTRO portable in use, to
> this day. It comes with a 1-meg vocoder board, and supports
> encryption. How could you go wrong with this? It's shorter than the
> "HUGE" (As ASTROMODAT puts it) ASTRO Saber, but the XTS3000 is a
> FATTER radio, even with the Lithium Ion battery. The XTS3000 supports
> 3600/9600bps trunking, and any other FLASHport option you wish to have
> added in. It does not require a vocoder upgrade. Like the ASTRO Saber
> model, certain features/hardware are firmware dependant. The XTS3000
> and ASTRO Saber share the same host/dsp firmware releases. Example:
> R05.51.00 / DSPN06.04.11 can be found in both ASTRO Sabers, and
> XTS3000's. The XTS3000 comes in VHF, UHF-low/UHF-hi, and 800 MHz.
>
> The XTS2500 and XTS5000 were released in early 2002. While the XTS2500
> is a nice portable with 160 modes, it does not support encryption. It
> hasn't been hacked yet either, meaning if you buy a "featureless"
> XTS2500 on ebay, it's going to stay that way. It's a medium-tier
> radio, supporting 3600/9600bps trunking and conventional. It's nice
> eye candy, but that's about it.
>
> The XTS5000 is Motorola's "top of the line" digital portable. It
> supports 512 modes, encryption, and 3600/9600bps
> trunking/conventional. It hasn't been hacked yet, and the only
> portables floating around on Ebay at the moment, all appear to be
> alpha-series developmental models. Their serial numbers are
> 123ABC1234. Keep away from them! They require special Alpha CPS to
> program, and are not supported via "R" CPS. The XTS5000 supports
> 8-meg's of FLASHport memory, and supposedly IP-data features. The
> "r0f" opinion of the XTS5000, is that it's a recased XTS3000 with a
> new display and more
> memory. Motorola didn't put a lot of effort in to the XTS5000, and it
> is overpriced and currently does not support anything that the XTS3000
> or ASTRO Saber is capable of. Do not be fooled in to purchasing an
> XTS5000 thinking it's "the bomb", because it's just not!
>
> The XTS2500, XTS5000, and SSE5000, are all programmed with the RVN4181
> software package.
>

problem is, by doing it this way, instead of via the normal channels, they
are attracting a lot more attention to their community than would
ordinarily be the case. I will lay long odds that at least a *few* of them
ARE wanted in connection with terrorist acts all across the planet

I showed this article to 2 of my friends (who are naturalized US citizens
formerly of Iraq AND Iran) and both of them agreed that this was
definitely a problem that should be dealt with in the most expedient
manner possible.

I personally would like to see some extra security along the border (and
the technology to do this is manufactured here locally). I don't like how
I have to live being dictated by those who seek to detroy that which I
love.

Once a "Liberty Net" moron did not agree with my assessment of the Liberty Net membership (illiterate idiots) and decided that threateneng my family was a clever idea. Later, he was found in a dark, lonely place, all pumped full of nine-millimeter rounds. Gee, I sure hated to hear about that! Apparently the old moron had managed to offend someone else who was not quite as patient as I am.

The old fool was touted in the local papers as a leading citizen (after he was dead) , and some of the local Hams have since honored the scumbag by adopting his defunct callsign for a local club. They caught the fellow who killed the "Liberty Nut", and with justice being blind, the guy was sent to jail for his attempts to clean up the gene-pool a little, and put evolution into action.

On the courthouse steps, the young D.A. was proud to have investigated and prosecuted the case so quickly. He was getting a good deal of attention over the killing, and part of his act was to mouth platitudes about this "victim" he had never personally met, and the tragedy of being cut down before his time.

I managed to get the D.A. to the side before the day was out. "That old idiot was a sack of corruption, and is better off dead." I informed the puzzled young D.A... "If it hadn't been for that kid, it could just as easily have been me or several other people going to jail today."

Thanks, kid: Wherever you are by now... Good work.

Well Sufi, if your friends are also not interested in getting shot, I'd suggest that they come into the US legally or preferably, not at all.

Not to come into the US at all would be the most intelligent policy for your friends, but I am not looking for intelligence from middle-eastern folk. If that were the case, they would not all still be living in crappy little dictatorships and going for fascism, the latest in failed political philosophies from the previous millenia.

Who's a fanatic? NOT ME...."I" just don't want to see another attack on our people. Maybe you're a pansy and don't want to stand up for this country, but then if that's the case, when an attack does happen, just place your head between your legs and kiss your ass good bye. If those 3000+ being killed doesn't bother you, then you're already dead.

Charles, what was the guy's callsign?
This is a story I never heard about.

Please, *what was his call* and what is the club
name that is using it now..?? Was it perchance a
guy in FL or perhaps NC....?

Amateur Radio Newsline™ Report 1408 August 6, 2004

**

A WORD FROM THE ARNEWSLINE (tm) SUPPORT FUND

The following is not necessarilly for retransmission. I guess you already know that if you are hearing my voice on a closed-circuit advisory it means that Newsline is again facing a financial crisis. Well, you're right.

The solution to the problem really lies with you. Our world-wide all volunteer staff produces these newscasts for you. The all volunteer Young Ham of the Year Committee labors tirelessly each year to select a youngster to receive the Award. Joe Eisenberg, K0NEB, oversees the Newsline sponsored Roy Neal, K6DUE, Amateur Radio Mentoring Project database, doing so at no cost. The list goes on and on.

I too am a volunteer, but I have to be the realist. I'm the accountant who has to look at the bottom line and when it turns red, I have to say -- hold on -- there is no more money to continue. And that's about where we are right now.

So, here's the bottom line. If you want the newscasts to continue. If you want the mentoring program to continue and the Young Ham of the Year Award to continue, we need you to show it now -- right now -- through your financial support of Amateur Radio Newsline.

Remember that Amateur Radio Newsline is a federally chartered 501(C)(3) and California state not-for-profit corporation. This makes your donations tax deductible, whether you're an individual or a club. The address to send them to is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California 91066. If you missed the address don't worry. It will be repeated at the end of this week's report.

For now I thank you for listening, for responding and offer you this weeks newscast which follows immediately. (ARNewsline Support Fund)

**

Amateur Radio Newsline report number 1408 with a release date of Friday, August 6th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. The B-P-L battelground expands in California and Texas while a U-K repeater is ordered off the air. Find out the details on Amateur Radio Newsline report number 1408 coming your way right now.

(Billboard Cart Here)

**

THE BPL FIGHT: SAN DIEGO CA. UTILITY REPORTEDLY CONSIDERING BPL

San Diego California could be the next B-P-L battleground. This, as an informed source tells the CGC Communicator broadcast industry newsletter that San Diego Gas & Electric is considering the deployment of Broadband over Power Lines in its service area. Bill Pasternak, WA6ITF, is here with the specifics:

--

According to Gonsett's CGC newsletter, an informed source has told him that San Diego Gas & Electric's communication systems planners met recently and are seriously considering endorsing and sponsoring B-P-L on the unility's power distribution system. The newsletter also says that San Diego Gas & Electric is considering entertaining proposals to partner with vendors for one or more field demonstrations of B-P-L technology.

CGC says that these plans should be of concern to all users of the High Frequeny and low band VHF spectrum. This includes TV Channels 2 through 5 and possibly even Channel 6. The latter because spurious and harmonic energy could reach these higher frequencies.

According to CGC and its unnamed source, San Diego Gas & Electric is aware that deployment of B-P-L in its service arera could cause considerable radio frequency interference. Even so, planners at the utility still appear ready to proceed.

More on this as it develops. I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

Bob Gonsett is known on the ham bands as W6VR. He says that he has a call pending with San Diego Gas & Electric corporate communications department to determine the company's official position on BPL. Bob also says to stay tuned for updates. (CGC)

**

THE BPL FIGHT: A TEXAS TRYOUT

Meantime, Larry Pollack, of the W5YI VEC reports that Central Texas-based Broadband Horizons has launched B-P-L operations in three Texas communities. The pilot projects were launched in mid-June in the towns of Blanco, Burnet and Weimar. According to Mike Steele, Burnet's City Manager, the community has had great success with the initial start-up. He says the city plans to expand B-P-L service it to additional parts of the municipality. (W5YI VEC)

**

THE BPL FIGHT: A BIG WIN IN PEN YAN NY

Meantime the B-P-L test is over in Pen Yan, New York and it appears as if ham radfio has won this round. This,, with word that the broadband provider that's been testing B-P-L in Penn Yan reportedly plans to "move away" from that technology.

According to the ARRL Letter, the Western New York community of some 5000 residents has been considering various proposals with Data Ventures to offer broadband service. A B-PL trial had been underway in Penn Yan for several months.

The village reportedly would get 10 percent of the generated revenue. Now, according to an article in the July 28th edition of the Finger Lakes Times Online, the provider is now proposing to employ wireless mesh "WiFi" technology instead of BPL and ARRL C-E-O Dave Sumner, K1ZZ, has already congratulated Penn Yan Mayor Douglas Marchionda Jr and DVI for going with wireless broadband instead of B-P-L. (ARRL)

**

THE BPL FIGHT: SPOKANE GOES WIDE AREA WI-FI

Spokane, Washington has also opted for Wi-Fi over B-P-L. This as that city inaugurates a wireless Internet access system covering 100 blocks of downtown Spokane.

The wireless zone uses new technology that allows Internet signals to be transmitted more than a mile. This is far beyond the traditional 200- to 300-foot range of previous Wi-Fi systems.

The Wi-Fi area is divided into a private network for use by the city and an open network for the public. Public users can connect for two hours a day at no charge, and subscription plans are in the works for extended use. One Eighty Networks provided the networking for the project. (Published reports)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world WR6ABD repeater serving Aptos California.

(5 sec pause here)

**
RADIO RULES: NO MORE "GROUP X" CALLSIGNS

The ARRL reports that the FCC is no longer issue 2 by 3 format vanity call signs that begin with the prefixes WC, WR, WK and WT. The Commission has acknowledged that it erroneously granted more than 150 WR and WC prefix 2 by 3 vanity call signs from 1997 through September 2003, when it began rejecting such call sign requests.

In the late 1970s, the FCC announced a new Amateur Service call sign assignment system. It provided four standard call sign groups, designated Group A, B, C and D, delineated by license class and issued sequentially with no backfilling. The FCC's Bill Cross, W3TN, recently told the nation's volunteer examiner coordinators that the FCC also had a "Group X." These included WC or RACES, WR repeater, WK and WT-prefix 2 by 3 format call signs reportedly reserved for special-use licenses.

The FCC stopped issuing repeater call signs in 1983 and ceased renewing RACES licenses in 2000. After the current vanity program began in 1996, several ham clubs sought new and formerly held repeater and RACES-type call signs. When the Universal Licensing System came along in August 1999, however, the FCC encountered some licensing system programming shortcomings, including the anomalous assignments of WC and WR prefix 2 by 3 call signs as acceptable formats.

When the FCC implemented programming corrections that halted the issuance of Group X call signs in September 2003, it did not advise the amateur community. As a result, several amateurs who filed for 2 by 3 WC or WR prefix call signs had their applications dismissed without any explanation beyond saying that the applicant's call sign choice was unavailable. That remains the case. The FCC has not indicated whether it plans to address the WC and WR prefix 2 by 3 call signs it's already issued.

In a related matter, the FCC's new Amateur Radio vanity call sign regulatory fee of $20.80 for the 10-year license term goes into effect Friday, August 6. All applications received at the FCC on or after that date must be accompanied by the new, higher fee. (ARRL)

**

ENFORCEMENT: RIS ORDERS REPEATER OFF THE AIR

A 2 meter repeater in the United Kingdom has been ordered off the air after it was involved in an interference issue. The Leicestershire GB3CF system which operates on 145.600 MHz, was closed down on Sunday the 25th of July following a request by the Radio Investigation Service due to an alleged incident of interference.

Service will be resumed as soon as investigations have been completed. The report did not say if the repeater was causing interference to other operations or if it was being interfered with. (GB2RS)

**

RADIO LAW: FEDERAL COURT RULES AGAINST CALIFORNIA CITY

Meantime, on this side of the Astlantic a big win for radio operations but another major loss for a city in its fight to restrict towers and antennas. Bruce Tennant, K6PZW, reports:

--

The attorney for a Rancho Palos Verdes California antenna owner says that his client won a clear victory against the city. This, following a recent federal district court decision requiring Rancho Palos Verdes to allow him to operate a broadcasting business from his unoccupied home. The judge also ruled that the plaintiff, James A Kay. Jr., may seek damages and legal costs.

And this is not the first major loss for the city. Earlier this year, the U.S. 9th Circuit Court of Appeals ruled that another Rancho Palos Verdes antenna owner could seek compensatory damages against the city. As previously reported, Mark Abrams, WA6DPB, said he will file a claim for damage to his two way radio business while he and the city fought numerous court battles over the right to regulate commercial radio frequencies.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Abrams has a 52 foot tall antenna tower in his backyard. The city has appealed the case to the U.S. Supreme Court. The full story is on-line at
http://pvnews.nminews.com/articles/2004/07/26/local_news/news1.txt

**

RADIO LAW: AN ANTENNA FREE ZONE

A real estate developer in Australia has come up with some of the toughest property use restrictions ever dreamed of. W-I-A Newscaster Graham Kemp, VK4BB, joins us with the details:

--

VK2WI have reported on a story that the Albury-Wodonga Development Corporation has set some restrictions on its new 40 block Thurgoona subdivision, near Albury.

Listeners to this WIA National News service through the 146.75 repeater can shed any thoughts of establishing a shack in the backyard, as the corporation has banned the erection of free - standing garages or sheds. One may also forget about erecting any antenna arrays as the corporation has also banned external TV antennas, any TV antennas should be placed under the roof or be internal.

Satellite dishes are also under scrutiny; you can have one, as long as no one can see it!

For the Am ateur Radio Newsline, Im Graham Kemp, VK4BB.

--

With these restrictions in place the potential amateur radio activity, using external antennas, is virtually impossible. (VK2GJH via WIA News)

**

RESCUE RADIO: WX4NHC ACTIVATED FOR HURRICANE ALEX

WX4NHC, the Amateur Radio Station at the National Hurricane Center in Miami was activated on August 3rd. This, in anticipation of the arrival of the first major tropiocal storm of the 2004 hurricane season.

Named Alex, the storm was a catigory one hurricane when the WX4NHC came to life at about 10 a-m Eastern on Tuesday morning. Catigory one means the storm had sustained winds of 75 MPH. It was forecast to strengthen before tracking just off the coast of North Carolina on Tuesday afternoon.

The WX4NHC Group monitored the Hurricane Watch Net on 14.325 Mhz. It also took part in EchoLink and I-R-L-P Skywarn Nets that were operational during the approach and departure of the storm.

WX4NHC has maintained an active Amateur Radio Station at the National Hurricane Center for the past 24 years. Please visit www.wx4nhc.org/WX-form1.html www.voipwx.net for details. (CQ)

**

RADIO LAW: IMPROVING AIRSPACE SAFETY

Garmin, Inc. has been conditionally granted its request to use 978 MHz as an aircraft radio datalink frequency. The idea is to enhance flight safety by enabling aircraft in the same airspace to precisely track each other's movement, reducing the risk of mid-air collisions. Datastreams containing location, velocity, altitude and heading are valuable commodities in the arena of air safety. More is o-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1871A1.doc (CCG)

**

ON THE NET: TEENS SET WIFI RECORD

A group of teenage hamss from the Cincinnati area got an ovation at the recent Las Vegas DefCon hacker conference. This, after organizers announced that the winners of this year's Wi-Fi shootout might have broken a world D-X record for ground distance in establishing a 55.1-mile Wi-Fi connection.

Ben Corrado KC8RKO, Andy Meng N8MX, Justin Rigling KC8OIO and Brandon Schamer KG4NVK won the prize for greatest distance achieved for an 802.11b network.

The teens, all 18 and 19 years old achieved the record using an amplifier and homebrewed antennas on both ends. This exceeded last

year's distance winner by 20 miles. Then, when they established that record, they turned off their amplifiers and broke the record for an unamplified connection at the same distance.

DefCon, in its 12th year is a gathering of hackers, security professionals and intelligence agents from around the world. The Wi-Fi shootout, held for the second time, is among the most popular contests. Six teams participated but it was ham radio know-how that came in number one. (N0AX)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: GEORGE DILLON NAMED ASSISTANT CHIEF OF THE FCC ENFORCEMENT BUREAU

Some names in the news. Word that George R. Dillon has been named Assistant Bureau Chief of the Enforcement Bureau. Dillon most recently served as the Bureau's Engineering Advisor, assisting the Bureau Chief on a wide range of public safety, technical and management projects. He also represents the Bureau on the Commission's "Engineering-in-Training" Board, for which he received the Chairman's Special Achievement Award, and was the principal leader of the Knowledge Sharing Program, which permits field engineers and headquarters engineers to exchange information and expertise. He is also a member of the Spectrum Policy Task Force. FCC)

**

NAMES IN THE NEWS: G4IDE NAMED WINNER OF TAPR LIFETIME AWARD

And Tuscon Amateur Packet Radio has presented its Lifetime Achievement Award to Roger Barker G4IDE, of Lincolnshire, in the U-K. Barker was honored for his work over the years in providing quality software for Amateur Radio operators that allows them to operate advanced digital modes without the difficulties once associated with these operations. T-A-P-R says that Baker's UI-View program is the benchmark by which all other A-P-R-S mapping software is compared to. (VK2TDS)

**

HAM RADIO IN SPACE: NEW U-K HAM TRANSPONDER IN SPACE ANNOUNCED

AMSAT-UK has announced a new amateur band transponder project. One to be launched as part of the European Space Agency's S SETI Express satellite.

The project was announced at the opening of the 2004 AMSAT-UK Colloquium by Dr. Martin Sweeting, G3YJO. Sweeting expressed his delight that AMSAT-UK has been able to work with the European Space Agency to provide, at very short notice, an S band 2.4ghz transmitter.

The SSETI Express project is believed to be the first ever pan-European student satellite with over 100 students from more than nine different countries working on it. The project is being coordinated and managed buy the Education Office of the European Space Agency. (AMSAT-UK, GB2RS)

**

SPACE SCIENCE: SMALLER ISS PRESENCE ANNOUNCED

NASA and its space partners have approved a scaled-down International Space Station with fewer astronauts and less science. This, so the United States can meet a 2010 deadline for ending shuttle flights.

According to news reports, the space agencies of Russia, Europe, Canada and Japan gave unanimous approval to a NASA plan that means the orbiting platform, now about half completed, will never become the beehive of scientific and commercial research once envisaged. In exchange, NASA will continue with plans to launch research modules owned by its partners, some of them already built.

The agreement means the station will never support long duration crews of seven astronauts, as originally planned. It will however be able to house at least four astronauts starting in 2009.

Phase one of the space-station was put into orbit in 1998. The first astronauts took up residence in 2000. (Published reports)

**

ON THE AIR: OH2B BEACON IS BACK ON THE AIR

Finland's OH2B beacon is back on the air after an absense of two years. OH2B is one of the eighteen stations in the world-wide five-band International Beacon Project network. It has already been heard in the UK on 14.100, 18.110, 21.150, 24.930 and 28. 200 Mhz. (GB2RS)

**

DX

In D-X, word that K4ZLE is returning to Uganda. He plans to operate as 5X2A through the 21st of August. Some effort will be made to operate on the lower H-F bands this year, mostly on CW. Activity is

also planned for PSK31. (GB2RS)

And F6EAY is in Kabul, Afghanistan and has been issued the callsign T6RF. At present he is active only on PSK31. QSL as directed on the air. (GB2RS)

Closer to home K-7-B-V reports that he will operate portable VP5 from the Turks and Caicos Islands from August 9th to the 16th. The trip will have focus on 6 and 2 meter WSJT work during the Perseid Meteor shower that peaks around August 12. H-F will, of course, get plenty of attention as well. QSL direct to K7BV. (VHF Reflector)

**

THAT FINAL ITEM: THE BIRDS ARE BACK

And finally this week, have you ever tuned in an owl? Yes, we said an owl. You know, tne find that go hoot in the night. Newsline's Joe Moell K0OV will tell you how.

--

It's been several months since I've advised you of opportunities for hams and scanner fans to help wildlife researchers tracking radio-tagged creatures. You can monitor these signals from your home or car. If you have direction finding gear, you might make a positive sighting. Right now, there's a need for ham help in the Denton and Collin County areas of Texas, where researcher Jennifer Johnston is releasing rehabilitated orphan Great Horned Owls into the wild. Six birds are on the air near 150 MHz as I speak, and more are expected to follow. We're also standing by for the departure of some young Burrowing Owls from their nesting places in Florida. A biologist from the University of South Florida wants know where they will end up. Nobody knows, but maybe you can help find out.

For all the details, including frequencies and ideas for equipping yourself for this project, go to www.homingin.com. That's HomingIn, as one word, homingin.com.

Thanks for your help. From southern California, where Burrowing Owls are raising their young in our own Imperial Valley, this is Joe Moell, K-zero-oscar-victor, for Amateur Radio Newsline.

--

Again that website is www.homingin.com (K0OV, ARNewsline(tm)

876. FYI: Anderson Powerpole connectors -- locking them together

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-06 22:10:56 UTC
From: Minnie Bannister <GoonButNotForgotten@NottheBBC.org>
Message-ID: <10h80fgap62qk84@corp.supernews.com>
Source record: 56738

I've read complaints that there is no way of locking a pair of Anderson Powerpole conenctors together, and I've read suggestions to glue them or to use a toothpick or a piece of wire.

The manufacturer's on-line catalog lists "roll pins" that are intended for this purpose, but the businesses aiming at the amateur market don't seem to carry them along with the connectors. Some of the big distributors list them, but at unduly high prices.

I have found them in hardware stores, called variously "roll pins" or "tension pins," for just a few cents for a pack of two. The 30Amp connectors use a 3/32" pin ; the 75Amp ones use a 5/32" pin; I don't have any 45Amp connectors to try, so I don't what size they would use. The pins I found were all too long; if you get long enough ones you could cut each one into two.

73

Alan NV8A

877. Correction: FYI: Anderson Powerpole connectors -- locking them together

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-06 22:30:37 UTC
From: Minnie Bannister <GoonButNotForgotten@NottheBBC.org>
Message-ID: <10h81kc7mpanbae@corp.supernews.com>
Source record: 56739

Ooops! Correction: The 5/32" pins are still too small for the 75Amp connectors. It looks as though 3/16" would be the right size.

Alan NV8A

Lotta middle eastern folk go to the US via Mexico, they blend in with
the Mexicans and are able to cross the border easily. Most of them
are hard working people looking for a better life, not terrorists.
I'm met several, all hard workers with no interest in airplanes...

.....

Yeah...sure. Not to mention that many of them are importers of fine
pharmaceuticals...

Oh...and they are NOT Undocumented Aliens as the Liberals would have us
believe...they are Illegal Aliens.
They break our laws, sneak across our borders and want us to pay them.

885. Tanks You Liberals

I sneek at midnight across your beeg river in Texas. I breeng my muther, my father, my fifteen uncles and 56 cousins weeth me. We go work in trailer factorys in United States and make beeg moneys. We dont need no social security numbers. We use yors.

I buy house on land contrackt and move 35 brothers in. We have twenty two cars in yard and most of them run. We have beeg parties and sit in the grass and watch anglos drive by. Sometimes the septic thing get full and run over but we fix. We pee under trees.

We fix own cars too. We good meckanicks. Why pay anglo beeg pesos when we fix our own cars? We got no insuranse on our cars but not needed. You have theese insurance stuff and you pay if we have accidents.

Mabee next month I get driver license. You have Democrats telling you to give me license eeven tho I sneeked into your country and have no papers. I like United States...get driver license, get food stamps, get free skool and medical. We dont like yor Policia becuse the Policia take our cars away. We play dumb and most of the time the Policia let us go.
I theenk I stay here for long time and have more babies.

Pancho

YES, as a matter of fact I CAN. I've put time in the service. And, I'm involved in the public sector who plans to deal with these damned attacks. ALL I AM SAYING IS - The cock roaches need escorted out of this country PERMANENTLY - OR - IF CAUGHT preparing for another attack - SHOT on sight. I have NO love for the bastards who dare come in here and kill our people. AND the pricks who tried to take down the towers the first time, are to my knowledge - still alive in jail - eating better and getting better health care than many of our Senior Citizens. When it comes to those who want to do US harm, I will NEVER EVER back down from an argument about dealing with them "harshly". I'm NOT saying we go CREATING wars.... What I AM saying is we defend "this" country vigorously - any way it needs to be done. WE owe it to ourselves and our fellow citizens. Those bastards do NOT deserve the benefits of our tax dollars, with the exception of a 50 cent bullet to the head.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (Also Possibly 3B9). Mart, DL6UAA (aka 3B8MM and 3B9MM), will once again head here for several weeks to be active as 3B8MM. He is calling it his 10 YEARS in "Paradise on Air Mission" (1994-2004). His activity will take place between October and November. An operation from Rodrigues Island (3B9MM) is possible, but it depends on the demand of

the HAM community. If you need 3B9, please cast your vote at the following Web link at: http://www.dl6uaa.com

3D2, FIJI. Operators K2KW, N6BT, KE7X and possibly others will be active from Taveuni during the CQ WW DX CW Contest (November 27-28th) as a Multi-Multi (Lite) entry. QSL via WA4WTG. Activity outside of the contest will be on 160-10 meters, mainly CW.

6O0, SOMALIA (Good News/Bad News). Good News First! Sam, VK2BVS, is currently active as 6O0A from Galkayo, Central Somalia, until September 30th. Reports indicate that he has established two club stations (the first at the Radio Galkayo ARC and the second at the Radio Daljir ARC) which are being used for amateur radio training courses. The "425 DX News" states, "Those stations are also available for the use of foreigners". Details on getting the Somalia Visitors ham radio license can be found at: http://www.radiogalkayo.com/banner/radio_school3.php
It seems 6O0A likes working 15/17 meters SSB. Look for him on/or around 18155 and 21295 kHz between 0500-0600, 1100-1400 and 1800-1900z. Now for the "BAD News"! Sam will not send out 6O0A QSLs. Sam is not interested in QSLing and states, "I am leaving the QSLing for the hams who may mount future DXpeditions or when the locals can do it."

8Q, MALDIVES. Jan/DL7JAN and Andreas/DL3GA will be active from August 26th to September 7th from Kandooma Island (South Male Atoll - IOTA AS013) as 8Q7JF (DL7JAN) and 8Q7GA (DL3GA). They will be active on 80-10 meters on CW/SSB and RTTY! There may be some PSK31. QSL via their home callsign, either direct or through the bureau is OK.

BALTIC TOUR 2004. By the time you read this Vincenzo, IZ0FKE, will be starting his "IOTA Microlite Baltic Tour" and will be active from Bjorkoby Island (EU-101 - Vaasa Group, Finland) until August 10th. He will then move to Parainen-Pargas Island (EU-096 - Turku Group, Finland) and be active from August 11-13th. After EU-096, he will then activate Finstrom Aland Main Island (EU-002) from August 14-18th. Vincenzo states, "All the places are located very close to sea, I rented cottages in special locations trying to install some vertical antenna very close to salt water. As usual I receive a massive support from the Alandia Contest Team OH0AZ (Mr.Peter OH0JFB). The microlite setup is based on Yaesu FT-857. Meanwhile the antennas are Atas100 plus homemade verticals and multiband sloper solutions." For live pictures and updates from the DXpedition, visit the Web page at: http://www.iz0fke.com
QSL to IZ0FMA, Alberto (Roma DX Dream Team), direct or via the bureau. Vincenzo states, "I will test some digital stuff during the tour, a PDA Pocket PC equipped with Wifi and GPS....." Anyone that wants a sked for some new ones from the Baltic Sea, you can write him for more details at: iz0fke@arrl.net

EA8, CANARY ISLANDS. Hans, ON6ZK, will be active from Gran Canaria as EA8/ON6ZK, August 11-19th. His activity will only be on 17 meters. Watch 18155 kHz for SSB and 18080 kHz for CW (+/- depending on QRM). He will use a TS-50 with 50 watts and an inverted dipole. Look for him mainly during his evening hours. QSL is OK via the bureau or direct.

EI, IRELAND (Also IOTA/Lighthouse Activity). Hal Turley, KC8FS, West Virginia ARRL Section Manager, will be traveling to Ireland and will operate August 13-23rd as EI/KC8FS/p from the western and southwestern coast of the Emerald Isle. He will operate both SSB and CW with 100 watts and "modest" wire and vertical antennas. Hal plans to operate from Clifden, the site of Marconi's phenomenal wireless station used during the early 20th century and the Aran Islands (EU-006). Hal has also received permission to operate from the Mizen Head Signal Station (IRE 053) during the International Lighthouse/Lightship Weekend and will be active during this event on Saturday, August 21st, from the country's most southwesternly point. QSL via his home callsign or via the bureau.

ES, ESTONIA (Special Callsign). Oleg, ES1RA, from Tallinn, will use the special callsign ES1924J now through September 4th. Activity is valid for the "Estonia Award" (2 points) and the "DIG Award" (DIG 2512). QSL via ES1RA: Oleg Mir, Box 806, 11702 - Tallinn, Estonia. Activity is to celebrate 80 years of ham radio in Estonia. Also, heard is ES1924L. QSL via ES6PZ.

FRENCH DX MEETING (Special Event Station). The annual meeting of the French DX Club, "The Clipperton DX Club " (CDXC), will be held in Malataverne, (South of Lyon, SE of France), the 18th of September. The morning meeting will continue into the afternoon with numerous DXpedition programs (scheduled presentations are: T33C Banaba, TO4E/TO4WW Europa 2003, 5V7C Togo, Mexican Islands and IOTA). This will be followed by the usual "Doctorate of DX" examination and the Pile up CW and SSB Contest. Awards, Diplomas and other certificates will be given at the end of the meeting. The special callsign TM8CDX will be aired for that event from September 4-18th. QSL via Rafiq, F5CQ. For more information, please visit the following Web page at: http://www.cdxc/

GB8, SCOTLAND (Special Event). Members of the West of Scotland ARS [GM4AGG] and Scottish-Russian ARS [MM0DGR] will be active as GB8RU before and during the Scottish-Russian Marathon 2004 (See SRM 2004 below). The station's QTH is: Hardgate, Clydebank, West Dunbartonshire. QRA Locator IO75TW, WAB: NS47. Dates of activity: August 7-15th. Pertinent equipment available to their station is: Transceiver Kenwood TS-940S, Amplifier SB-220. Antennas are: Cushcraft X7, Delta Loop 80 m, Delta Loop 40 m, and a number of portable antennas. Contacts will be carried out on all HF bands, CW, SSB and Digital Modes. Special QSL cards will be issued. Any operator is welcome to the club shack to operate as GB8RU, just let them know via "feedback" connection. Further information will be presented on the Scottish HAM Portal. QSL cards for contacts with GB8RU should be sent via RSGB QSL Bureau or direct to P.O. Box 7469, Glasgow, G42 0YD, Scotland.

HH, HAITI. Jan, K4QD, a member of the Florida DXpedition Group, will be active as HH4/K4QD from August 16-27th. Jan is traveling to the Northwest Haiti Christian Mission where he will operate as time permits. He will be active on most bands on SSB and CW. QSL to K4QD via his new CBA (January 2004) or via the bureau. UPDATE: Jan announced that he will be taking a 6 meter station and antenna with him. He will leave the station monitoring 50.125 MHz for openings and activity while working on other projects.

The NW Haiti Christian Mission is Grid Square FK39.

IOTA NEWS.....
AS-NEW. Arasu, VU2UR, reports that Raman, VU3DJQ, from New Delhi, has received permission for an operation at Rameswaram with the callsign AT0RI. Activity will be between August 23-31st, from Rameswaram, Pamban Island, Tamil Nadu State. There will be 13 permitted operators working from there for demonstrations and also DXing. They hope to have a 3 element beam and will use several wire antennas.

EU-025. Albert, IT9MRM, will be active as IT9MRM/p from Isola delle Palme (I.I.A. SR-010, M.I.A. MI-266), August 18-20th. Activity will be on 40/20/15/10 meters SSB between 0600-2200z daily. For more information, visit Albert's Web page at: http://www.mondoradiomania.tk

EU-064. Jerome, F5ASD, is now active as F5ASD/p from Noirmoutiers Island (DIFM AT-020) until August 15th. Activity will be on 80-10 meters, using a Yaesu FT-100 and 100 watts. QSL via his home callsign, direct or by the bureau.

EU-064. Franck, F4AJQ, will be active as F4AJQ/p from Noirmoutier Island, August 14-28th. Activity will be on HF and VHF. QSL either direct or via the French REF bureau.

EU-067. Mike, G8VHB, a member of the "International Short Wave League" (ISWL: G-14020), will be active as SV8/G8VHB from the Cyclades from September 14-30th. He states, "It would be nice to work a few more ISWL members from another location." Mike will be active on 40 and 20 meters using 100w on SSB and using vertical antennas from the the Island of Thira (Santorini). He might also be able to make some short 1 day excursions by ferry to activate some of other nearby islands, depending on band conditions.

EU-123. Look for Gigi, IK2UVR, to do a one operation from Great Cumbrae on August 9th. QSL via the Bureau or direct (QRZ.com).

NA-112. Look for Steve, W3HF, to be active as W3HF/4 from Bogue Banks Island (USI NC-010S, Grid Loc. FM14, Carteret County), North Carolina, from August 9-15th. Operations will be QRP on 40-15 meters. Equipment will be a vertical and a Yaesu FT-817. Primary mode will be PSK, with some SSB possible. This operation qualifies for the APE (August PSK Expedition) endorsement from the PODXS 070 Club: http://www.podxs.com/html/070_club.html
There is also a possibility of 6m (PSK and/or SSB) operation, from either Steve or his ten-year-old son Matthew (KB3JJV). QSL via his home callsign, direct or by the bureau, or via W3HF/4 on e-QSL.

J43 & SV0, GREECE. Wolff, DJ5JH, informs OPDX that he will be active as J43J in both WAEDC in August/September from the Peloponnese peninsula in Greece. QSL go via the bureau to his home callsign DJ5JH. QSOs count 10 points between May and September 2004 for the current "Olympia Award" by the RAAG. Outside the contests, look for him to use his new Greek callsign SV0XAO (this counts only 5 points).
